# Welcome

*Dear Friends,*

*Welcome to our12th annual joint production bull sale. 2017 left many challenges for a lot of people in the ag sector in a large part of the country. Mother Nature has a way of providing a reality check to the best laid plans of man by identifying where weakest the links lie. All of the EPDS and indices of selection programs become pale in the face of fire, drought and blizzards. This brought to mind the almost oxymoronic term used in beef production – convenience traits – as if it is convenient that one would consider things like feet and legs, udder structure, disposition, mothering ability etc. only after perusing the most recently popular EPDs or combinations thereof. Convenience traits in reality should be foundation traits and traits of necessity without which you don't even get to consider secondary selections schemes. Years like this remind us who is in charge and require one to focus on the elements of selection that promote stayability, if not survivability.*

*Our environment has required our programs to focus on sorting for retention those cattle which effectively produce beef without supplementation or providing exceptions. We hope the result meets your expectations.*

*We acknowledge, more than ever, the many customers over the years that have chosen to use our genetics. More so, we value the relationships that have resulted from this association. We have the opportunity to provide genetics to the best customers a business could have.*

*Additional information will be posted on these bulls at www.openaangus.com and www.heartrivergenetics.com as it is collected such as carcass ultrasound data, videos and PF50 data that was not available at press time. Feel free to contact us if you have any questions on the bulls or their dams. The bulls are available for inspection at the development lot 4 miles south of Belfield on highway 85 and then ½ mile west on 40th St SW. We welcome your visit at any time.*

*We have a casual program scheduled for the evening of March 13th at the sale barn as an appreciation to our customers over the years. Ken Howie will present a short trailer to his upcoming documentary entitled "Feek's Vision." We will also hear from residents at Home On The Range and we have a social and prime rib dinner that evening. Come early, inspect the bulls and have an enjoyable meal and evening. We appreciate your friendship and interest in our programs.*

## Open A Angus

Jim & Lynn Arthaud Family
PO Box 556, Medora, ND 58645
701-623-4461 • jima@midstate.net • lynna@midstate.com

## Sale Location

Open A Angus/Heart River Ranch Feedlot, Belfield, ND

The bulls will be on display in pens outside of the barn. The sale itself will be a video auction in the warmth and comfort of the barn.

A DVD will be available upon request and bulls can be viewed online at **heartrivergenetics.com** and **openaangus.com** after Feb. 25, 2018.

## Sale Order

The sale order will be catalog order.

## DV Auction

The sale will be available online on DVAuction.

## Phone Numbers

If you would like to bid on the telephone please call 701-290-6424 or 701-290-9745 to make arrangements to be on the telephone for bidding or to have someone look at the cattle for you. The main office phone number to call us on sale day is 701-290-9745. Please call in advance to make arrangements to call in during the sale.

**701-260-4630 ..... Chuck's Cell**
**701-260-0412 ..... Tellan's Cell**
**701-290-6424 ..... Wes's Cell**
**701-290-9015 ..... Jim's Cell**
**701-290-9745 ..... Office Cell**

## Internet and Absentee Bids

We would prefer to visit with our customers in person but realize that not everyone can be at the sale; therefore we have made arrangements to bid through telephone or internet. Bids will be handled in strict confidence by any of the publication representatives or the respective ranches. If you would like to discuss the sale offering call us preferably several days before the sale, and we can help select your genetics. Keep in mind that we are sure that we have a bull that will fit your needs. After the sale you will need to contact Annette at 701-575-8145 or 701-290-9745 to make arrangements for payment of telephone purchases.

## Storm Date

In case of postponement please listen to the Northern Ag Network, KLTC 1460 AM or go to northernag.net, ndstockmen.org, heartrivergenetics.com or openaangus.com for any postponement announcement. Postponement sale date is set for pre-sale activities: March 15, 2018, 6:00 p.m. and sale March 16, 2018, 1:00 p.m.

## Transportation

Belfield, ND, and Dickinson, ND, are both served by bus. Dickinson, ND, is also served by United, Delta and Frontier Airlines. Please call 701-575-8145 or 701-290-9745 if you need transportation from the bus or airport.

## Lodging

Lodging is available in Belfield, ND.

**Trapper's Inn Motel**
801 Hwy 85 N, Belfield, ND ..... 701-575-4261

**Cowboy Inn**
406 Hwy 10 E, Belfield, ND..... 701-575-4245

## Announcements

Errors discovered in the catalog will be corrected by announcements from the auction block at sale time and such corrections will take precedence over the printed matter in the catalog.

## Liability

All persons who attend the sale do so at their own risk. Neither the owners, management, sales staff, facility or any person connected with this sale assume liability, legal nor otherwise, for property loss or for any accidents that may occur.

# General Information

## Delivery

Free Delivery to central points up to 500 miles. Balance will be at cost. We will make every effort to assist in deliveries of greater distance or by private arrangements and volume purchases. Delivery will be made at our convenience and efforts will be made to have bulls delivered by April 1.

## Feeding and Development of Bulls

All bulls of Heart River Ranch were weaned in September and the Open A bulls were weaned in late October. The bulls did not receive creep feed with the exception of a few Open A bulls that were ET calves produced at a recipient herd. Calves received their pre-weaning and weaning vaccinations and were handled in every respect as all natural. Bulls were fed to gain 2.5lb per head per day on a 1% grain and by product rotation. Bulls were fed free choice mineral, salt, and hay. We took yearling weights at approximately 105 days post weaning with no post weaning adjustment period or warm up period. Our intent is to grow out the bulls for maximum longevity and integrity of the bull.

## Historic Photos

Most of the historic photos in this catalog were taken by Inez Kessler, Annette's great grandmother between 1905 and 1908 in the Gaylord, ND area. Inez was the only person to have a camera in the area and as a result she took pictures of many people and events. The town of Gaylord was located about 13 miles south of Belfield, ND along US Highway 85. The Gaylord Post Office and store was a stop for travelers going south. This building still stands at the Curt Molm place.

## Sale Terms & Conditions

The terms of the sale are cash. No release will be given until satisfactory settlement has been made. All settlements will be made with the clerks of the sale immediately after the sale. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure date. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. All Sales are subject to an acceptable semen examination. Semen evaluation certificates will be furnished to the buyer at delivery.

Bulls were carcass ultrasounded on February 25, 2018.

Updated EPD information, carcass ultrasound, and 50K data will be provided at the sale and available at www.heartrivergenetics.com or www.openaangus.com. This information will be available as soon as it is received from the Red Angus Association of America or the American Angus Association.

HD 50K

All bulls have been tested using the Zoetis 50k genomic test and parent verified.

Health certificates and brand releases will be furnished for shipment anywhere in the United States.

Each animal carries a readable tattoo or freeze brand.

## Insurance

Ownership risk to purchaser commences when the auctioneer's hammer falls. Insurance will be available sale day. It is recommended that buyers insure their purchases for safe delivery. Purchaser assumes the risk of death or injury to their livestock immediately after the sale.

## Heart River Ranch and Open A Angus Loss of Use Policy

2018 optional loss of use policy: Heart River Ranch and Open A Angus are striving to offer the best options not only in beef animal genetics but also loss of use protection for bulls and/or females we offer to our customers. We would like to introduce our customers to the Stockman's Insurance Policy which to the best of our knowledge and research offers the best protection to you, our customers.

> Heart River Ranch/Open A Angus will pay 4% of sale price toward the Stockman's Insurance policy. The balance of the policy will be paid by the customer. If the customer chooses to decline the policy, Heart River Ranch or Open A Angus has no obligation to cover any loses due to injury, sickness or death. Heart River Ranch/Open A Angus does guarantee all cattle to be sound the day of the sale. All bulls will be semen tested by the Wibaux Vet Clinic in March/April 2018.

**Breeder's Guarantee:** All bulls are guaranteed to be breeders. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event a bull is claimed to be a non-breeder, the purchaser may return the animal to the ranch of the seller if in good condition and complying with the health requirements of the Seller's state. The Seller will be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the Seller shall be obligated to replace the animal with another of equal value or to refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. If the Seller proved the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal at the purchaser's expense.

**Implied warranty:** Except for those stated in the terms and conditions, there are no warranties or implies, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in the terms and condition are in lieu of all other warranties, either expressed or implied and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

## Health

Bulls and heifers were treated with Enforce at birth and branding and were calf hood vaccinated with 4-way and 7-way. At weaning, calves were given a 5-way, 7-way and One Shot, boosters were also given. Calves and cows were poured with Dectomax in the spring, fall and late winter. All bulls will be vaccinated with Preg Guard, Endovac and wormed prior to delivery. All females are bangs vaccinated and on a fall vaccination program.

## Semen Tests:

Bulls will be semen tested after the sale.

## Semen Interests:

Heart River Ranch and Open A Angus are each respectively retaining 50 percent revenue-sharing semen interest in every bull selling in this sale. Full possession and full salvage value sells on all bulls. If a buyer chooses to collect and market semen, the seller will share proportionately in the collection costs and revenues earned. In the event that the seller chooses to collect semen for "in herd" use, it will be done at the seller's expense and at buyer convenience. Semen will be made available to buyer at cost.

## Volume Discounts

We are pleased to give a volume buyer discount. You will receive 5% off of purchases of 5 to 9 bulls, and 10% off of 10 or more bulls. Please notify the clerk when you check out to receive your discount. This is another way to say "Thank You" for your trust in our program.

## Buy a Bull – We'll Buy Your Tags!

If you purchase a bull from us, we will purchase one bag of FCCP or Allied Access tags per bull for you.

All you need to do is call the Red Angus Marketing Department, answer a few management questions, and enroll your calf crop for free. Then start reaping the premiums through Red Angus' marketing programs!

Feeder Calf Certification Program (FCCP) "yellow tags" are for bull customers using ONLY Red Angus bulls. FCCP cattle are accepted into the Choice+ Grid and Pro-Cow Program. Cattle enrolled in FCCP are USDA genetic, source and age verified.

Allied Access "green tags" verify source and age for bull customers utilizing halfblood bulls in their planned crossbreeding program.

**RedAngus.org • (940) 387-3502**

## Bull Selection – Simplified.

**Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:**

**"What impact will each potential sire have on my operation's profitability?"**

### HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

### GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

## Watch & bid online for FREE at DVAuction

Broadcasting Real-Time Auctions

### View the Auction Live! Bid Online... you're ringside right at your desk!

**Buying online is as easy as 1, 2, 3...**

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

**High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

**Proxy Bidding**-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

**Having troubles?** During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

*We sampled Loosli Right Kind 205 in 2014 and only got a few daughters but what we got we really liked and the sons were well accepted and mostly heifer bulls. The daughters are broody with good udder confirmation and disposition. The sons in this year's sale performed well coming from two-year-old first calf heifers.*

## Red Angus Guide to EPDs

**HB** ..... HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

**GM** ..... GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

**CED** ..... Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

**BW**..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

**WW** ..... Weaning Weight and **YW** ....Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious as to what the bull's other EPDs are.

**Milk** .... Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

**ME** ..... Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

**HPG**..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

**CEM** .... Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

**STAY**.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

**MARB** .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

**YG** ..... Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

**CW**..... Carcasss Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

**REA** ..... Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

**FAT** ..... Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

# American Angus Association® Selection Tools

**Expected Progeny Difference (EPD),** is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

## MATERNAL

**Heifer Pregnancy (HP),** is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first–calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM),** is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Cow Energy Value ($EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow $EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## $VALUE INDEXES

**$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. $Values are reported in dollars per head, where a higher value is more favorable. The $Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value ($W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. $W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value ($F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value ($G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade ($QG)** represents the quality grade segment of the economic advantage found in $G. $QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to $QG.

**Yield Grade ($YG)** $YG represents the yield grade segment of the economic advantage found in $G. $YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.
**$G** combines both $QG and $YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

**Beef Value ($B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

*HRR Advantage 7259 fittingly starts off our 2018 sale. This bull has been a pasture favorite and continues to turn heads in the bull pen. He is a stout, rugged bull that moves with an athletic stride and has a great disposition. His dam, DR 21R Julian W100, is an outstanding cow that we purchased as a bred heifer from the Dukart Ranch in the 2010 North Dakota Red Select Sale. The Red Angus cow has gained the reputation amoung ranchers as a being a complete package with fertility, fleshing ability, good dipositions and overall productivity. DR 21R Julian W100 has filled that mold for us at Heart River Ranch. She is an easy fleshing, moderate framed cow that has a 103 MPPA, 143 Herd-builder and 13 stay. Her son, HRR Advantage 7259, ranks in the top 4% of the breed with an impressive 168 herdbuilder EPD. Don't be sleeping on this impressive bull!*

*HRR Epic 7289 is a dark red performance bull that is full of eye appeal and balance and moves very well. He has a good disposition and just kind of grows on you. His dam, HRR Freyja 308 is a solid, good level uddered cow that has balance and style. She has had many top selling bulls in our sale over the years and this might be one of the best Beckton Epic sons we have raised. His numbers are interesting and we believe that there is going to be a lot of good to come out of this bull. He is in the top 9 % of the breed for WW, top 4% for YW and top 8% for GridMaster.*

*HRR Impressive 7232 is a deep quartered bull whose dam, HRR Miss Rambo 563 is a daughter out of one of our favorite cleanup bulls, HRR Raymond 975. We have come to appreciate the Raymond 975 daughters for the productivity and uder conformation. This bull has a smooth shoulder with spring of rib. We used Mushrush Impressive CA U236 extensively over the years and his daughters have done a nice job. This is a very stylish, dark red heifer bull that started out at 64# and continued to gain ground as the year went along. This attractive bull should be one you will look forward to seeing when you go check cows.*

# American Angus Association $Value Indexes

**$Values** are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A $Value has meaning only when used in comparison to the $Value of another animal. For example, just as with EPDs, variation in $Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

## How do I use them?

$Values should be used to complement the criteria that producers already use when selecting bulls.

The $Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

The $W, $F, $G and $B values on individual animals and the Sire Evaluation Report may be viewed at www.angus.org.

**American Angus Association**
3201 Frederick Avenue ■ St. Joseph, MO 64506
816-383-5100
ahir@angus.org ■ **www.angus.org**

| $Values | | | |
|---|---|---|---|
| $W | $F | $G | $B |
| +21.28 | +13.60 | +12.53 | +25.32 |

**Weaned Calf Value ($W):** an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. $W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value ($F):** an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

**Grid Value ($G):** an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Beef Value ($B):** an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The $B value combines the contributions of $F and $G.

HOME on the Range

*For the nineth year in a row, Home On The Range is participating in the embryo transfer program. Home On The Range has entered into a contract with Open A Ranch (Jim Arthaud) and Heart River Genetics (Annette Steffan). The staff and children bring in the cows, implant the CIDRs (a progesterone impregnated devise), inject a shot of GnRH (gonadotropin hormone), remove the CIDRs and, finally, the embryologist transfers the frozen embryo into the cow's uterus.*

*The children are a little apprehensive at first, never really being around cattle and such a procedure, but once they get comfortable and know what their job is, they take responsibility. They put in ear tags and even learn how to palpate the cow later to see if she is pregnant.*

*It's a great program for Home On The Range and teaching children about cattle reproductions.*
