Always a phenotypic favorite. This powerful and easy-fleshing sire has a phenomenal fertility level. He is a very large scrotal bull. He was the leading sales sire at ORIGen for 2018. Southern Charm descends from a line of females with quality udder structure and a high level of fertility that have good feet and ease of fleshing. The females are very efficient cattle.

Quoted - "Altitude bull calves have meat where meat is supposed to be in Angus cattle." Altitude exhibits tremendous phenotype combining eye-appeal and power with calving-ease. His first daughters are in production and they have great udders, excellent teat placement, and they are breeding back very well. The calves are coming easy, unassisted with quick get up and go. There is exceptional growth in his calves with muscle, width and depth displaying tremendous expansion of rib.

Sired by the very popular Black Granite. He catches our eye with his phenotype and display of bull power. He is the #2 source of \$Beef value index offers the #3 Yearling Weight EPD and \$Feedlot value index and the #4 Weaning Weight EPD and Residual Average Daily Gain EPD, ranking top 1% of the population for \$Weaned calf value index and Rib Eye area measure EPD while offering a double-digit Calving Ease Direct EPD.

Welcome to McConnell Angus Ranch
Developing Bulls for Longevity and Feed Efficiency

Dear Fellow Cattlemen, Producers and Friends,

We are excited to invite you to our Annual Bull and Female Sale held on Friday, **January 29, 2021, 12:30 p.m. MST**, at the Ranch, 5740 Road 52, Dix, Nebraska.

We want to thank all of our customers over the past several years for investing in us. Your continued support helps us build an exceptional set of cattle. We have put together a set of bulls and females that have combined performance, phenotype and EPDs to provide you with long-term value, ultimately creating greater profit for your operation. We continue to strive to improve the quality and performance of the Angus breed.

We all know things have been difficult and uncertain this past year. In spite of the challenges of 2020, it is so exciting and encouraging to see the way people in agriculture continue to pull together with common sense and grit.

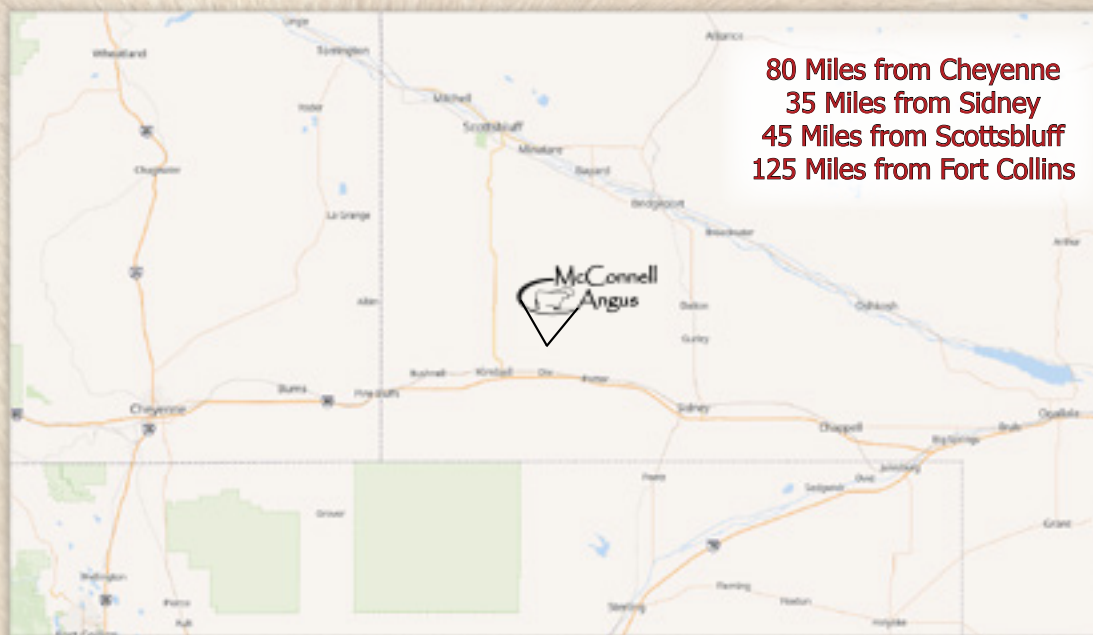

Our goal is to develop bulls for longevity and feed efficiency. These bloodlines are chosen for feet, structural soundness, and maternal strengths. As in years past, our bulls are raised and managed on grass forage throughout the year, which puts a ready-to-work toughness into them and promotes longevity. We have seen a rising demand for high elevation PAP-tested bulls. The bulls have been at an elevation of 7360' in Laramie, WY. They are PAP tested by Dr. Holt.

DV Auction will broadcast our sale starting at **12:30 MST, January 29, 2021**. You do have to register with DV Auction at least one day before the sale at www.dvauction.com. You can also call one of us or our listed representatives. Feel free to contact any of us for additional information. You are welcome to come see our bulls before the sale and view them on our web page, www.mcconnellangus.com.

As always, we stand behind our bulls. Our priority is that they work for you.

Sincerely,

The McConnell Angus Family

Guarantee

All bulls selling over \$2750 are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is not available when needed, credit toward one bull will be given in the following year's sale less salvage value. Salvage value will be valued at \$2750 and McConnell Angus will provide credit on any amount over that. Buyers will receive whatever the amount of salvage value is. Verification of salvage value is required. Please notify McConnell Angus as soon as possible should injury occur. All claims must be made by September 1, 2021.

INFORMATION

SALE DAY: Friday, January 29, 2021

SALE TIME: 12:30 MST

LUNCH: Complimentary lunch will be served beginning at 11:00 AM.

ACCOMODATIONS: There are a number of motels in the Kimball area. These motels are conveniently located along Interstate 80/Highway 30.

Days Inn Kimball (308) 235-4671

First Interstate Inn (308) 235-4601

Super 8 Kimball (308) 235-4888

Hampton Inn (308) 254-2111

• Cabela's is 30 miles from Exit 29

INSPECTION: Bulls can be seen anytime at the ranch.

HERD HEALTH AND SEMEN EVALUATION: All bulls sell with proper health papers for interstate shipment. A rigid herd health program is followed. All bulls selling have been Calfhood vaccinated with 7 Way Somnus at branding and again at weaning along with IBR, P13, BVD, BRSV and Ivomec Pour On twice. All bulls will be fertility tested and scrotal measured and are guaranteed breeders.

TERMS AND CONDITIONS: All bulls sell under the terms and conditions of the American Angus Association.

• All AI Sires are AMF (Arthrogryposis Multiplex Free), NHF (Neuropathic Hydrocephalus Free), CAF (Contractural Arachnodactyly Free), and DDF (Developmental Duplication Free).

RETAINED INTEREST: Full possession sells on all bulls. McConnell Angus is retaining (1/3) revenue sharing semen interest in every bull in this sale.

PAP TESTING - Most Fall and Two-year old bulls were ranged and pastured at Laramie, WY (7350 -7600 Ft.). Pap tested by Dr. Tim Holt.

Pfizer 50K test: Several bulls have EPD's enhanced by Pfizer i50K  and ANGUS GS .

CALVING EASE: We have implemented the following scoring system for Calving Ease:

- ★ ★ ★ ★ Indicates an extremely calving ease bull.
- ★ ★ ★ Indicates a super calving ease bull.
- ★ ★ Indicates a calving ease bull.
- ★ Indicates a bull recommended for larger framed heifers.

• All two-year-old bulls sold out of state will meet state health requirements. The bulls will then be delivered by McConnell Angus shortly after sale.

DELIVERY: Free delivery on all bulls. However, if buyer wishes to take a Spring or Fall bull home on sale day, \$100 will be deducted from the sale price per bull. The \$100 deductible does not apply to two year olds. All two year old bulls will be delivered by McConnell Angus shortly after sale.

WINTERING: Free wintering on fall and spring bulls until April 1, 2021. We will begin delivering bulls the last week in March. Wintering does not apply to the two year olds as they

will be delivered by McConnell Angus shortly after sale.

VIDEOS OF SALE BULLS: Taken in December.

www.mcconnellangus.com  

BULL VOLUME DISCOUNT: Purchase 5 or more bulls and receive 5% off of your total bull purchases.

• Representing herd bull material at its best, an outcross blending of calving-ease, muscle-expression and maternal value. This Logo son is attractive, clean-fronted, deep-ribbed and easy-fleshing. Here is a gentle bull earning a weaning weight of 906 lbs., while recording an individual weaning ratio of 108. He ranks in the top 10% or better in the growth and breed-back EPDs, weaning, yearling, heifer pregnancy, PAP and \$Weaning. His feminine, nice-uddered, dam from the Blackbird family stacks a powerful pedigree, recording a birth weight ratio of 98 and a weaning ratio of 104 on three calves. Her pathfinder dam, SAV Blackbird 3172, records a birth weight ratio of 102, a weaning weight ratio of 108 and yearling weight ratio of 106 on 8 calves. Great feet and low PAP.

MA Blackbird 466 - Dam of Lot 1

SAV Blackbird 3172 - Grandam of Lot 1
Tremendous producing Donor. She balances a birth ratio of 102 with a weaning ratio of 108 on 8 calves. Her outstanding dam is out of Leachman Right Time.

SAV International 2020

International daughters are consistently stamped with exceptional thickness, muscle, stoutness, breed-leading performance and are perfect footed.

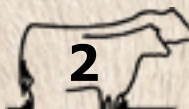

Logo is catching the attention of breeders with the offspring he is producing. He caught our attention with his phenotype and maternal strength. He is moderate framed with added length. He is exceptionally thick with an outstanding back line and tremendous lower hind leg. His sons selling have been in demand and are noted for their high heifer pregnancies.

• Recommended for heifers. A special favorite of his calf crop with calving ease, maternal value and sound phenotype. This gentle bull has the herd bull confidence with shape, substance and muscle. An outstanding EPD tabulation and maternally bred excellence gives him an exciting future. He ranks in the top 15% or better in CED, birth, weaning, yearling, heifer pregnancy, \$Maternal and \$Weaning. Descending from the Primrose family, his dam has been a remarkable cow, recording a birth weight ratio of 98 and a weaning ratio of 101 on eight calves. Great feet and low PAP.

• Here is a Southern charm son with many positives; phenotype, pedigree, performance, great EPDs and cow family strength. A top individual with plenty of dimension, capacity and performance. Powerfully muscled and wide based, he combines cow power and a great EPD tabulation. He ranks in the top 10% of the Angus breed in WW, YW, scrotal, \$Maternal, \$Weaning, \$Feed lot and \$Combined values. His fantastic donor dam is a picture-perfect cow with a splendid udder and excellent feet. She is a Pathfinder and records four calves with a birth weight ratio of 97 and a weaning ratio of 107. A son by Regard, highlighted the 2019 bull sale, sold for \$16,000 to Farthing Ranch WY. Great feet, big scrotal and low PAP

• A fancy, nice-headed bull with length, muscle and eye-catching style with an outcross pedigree. Following his powerful and easy-fleshing sire he has a high fertility level and a notable production EPD profile. His dam is a model Angus cow, who records on three calves a weaning ratio of 104. She is wedge-shaped with a beautiful udder standing on great feet and legs. She sold a Capitalist 316 son in 2019 to Lanning Angus, Tennessee for \$10,500. Great feet, big scrotal and low PAP.

BUBS Southern Charm AA31

2019 Capitalist Sale Bull

Always a phenotypic favorite. This powerful and easy-fleshing sire has a phenomenal fertility level. He is a very large scrotal bull. He was the leading sales sire at ORigen for 2018. Southern Charm descends from a line of females with quality udder structure and a high level of fertility that have good feet and are easy-fleshing. The females are very efficient cattle.

• Extra size, growth in this power wagon. He will sire the kind of feeder cattle that the industry desires. He scored well on carcass merit, propelling him to Certified Angus Beef and a high \$Beef. With a little extra birth weight, it will be an advantage for his calves as they will have more performance with stoutness, helping yield grade and carcass quality. His dam is the front pasture kind. She always raises a great calf and she records a birth weight ratio of 96 and a weaning ratio of 100 on four calves. She raised a top bull in the 2020 Bull sale selling to SR Cattle Company, Wyoming. Great feet, big scrotal and low PAP

• Here is a standout bull with extra size and length, in a class all of his own, bred to provide high-end product premiums and pounds on the scale. This big son of Southern Charm exhibits plenty of bone and substance, earning a 205 weight of 940lbs. He ranks in the top 5% of the Angus breed in carcass values; WW, Carcass Weight EPD (CW), \$Feedlot, \$Beef and \$Combined. His easy-fleshing dam records birth ratio of 99 and a weaning ratio of 105 on three calves. Great feet, big scrotal and low PAP

SAV President 6847

He was the world record, top-selling bull of the 2017 SAV sale for \$750,000. He was the heaviest 205-day weight bull of his calfcrop at 1077 lbs and posted a 365-day weight of 1690lbs. His progeny are extra long, thick, heavy-muscled and powerful in every dimension, with scale-crushing performance and perfect feet.

• This President son has the credentials of a top herd sire. His tremendous length, muscle and phenotype will catch your eye. He offers a predictable pedigree that has outstanding performance and cow family strength. He had five full brothers that sold in the 2020 bull sale for an average of \$8300. His Pathfinder donor dam has tremendous volume with thickness and is the dam of Altitude 3114. She records a birth weight ratio of 102 and weaning ratio of 107 on six calves. Full brother to Lot 57.

• Recommended for heifers. Smooth-fronted bull that will add length of body, depth of rib, a little more height and a high calving ease direct of 10. These Jet Black sons express desirable phenotype and extra growth. He ranks in the top 10% in weaning weight, yearling weight, average daily gain, yearling height, hot carcass weight, ribeye, \$Weaning and \$Feedlot. His dam records a weaning ratio of 103 on three calves.

A special note on PAP testing. Our Bulls are taken to Laramie, WY during the summer to range at high altitude 7360'. After ranging at 7360' a PAP test is performed physically on the bulls by Dr. Tim Holt. We believe that administering the physical PAP test at higher elevation ensures the greatest accuracy. Due to demand, we will test more bulls in the future. More information on pg. 90.

• Recommended for heifers. A complete well-balanced calving ease bull with an easy-fleshing pedigree. His dam, from the maternally proven Pridella family, is one of the best low PAP producing cows, having had six bulls PAP tested and has an astounding average of 37 for the PAP score on those six bulls. She records a birth ratio of 98 and a weaning ratio of 98 on ten calves. He ranks in the top 15% of Angus breed in Marb, SC, \$EN, \$M, \$G and meets Certified Angus Beef. Great feet, big scrotal and low PAP.

• Here is an attractive Southern Charm son stamped with incredible thickness, muscle, stoutness, and structure in a moderate easy-fleshing package. His well-made nice udder Bismarck dam from a fashionable cow family will add quality to your herd.

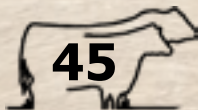

BUBS Southern Charm AA31

Always a phenotypic favorite. This powerful and easy-fleshing sire has a phenomenal fertility level. He is a very large scrotal bull. He was the leading sales sire at ORigen for 2018. Southern Charm descends from a line of females with quality udder structure and a high level of fertility that have good feet and are easy-fleshing. The females are very efficient cattle.

• Recommended for heifers. Here are a special set of Raindance flush brothers that will leave some incredible looking, fancy replacement heifers. Calving-ease with eye-catching phenotype and a champion pedigree. Their dam was the 2012 Tennessee State Fair ROV Reserve Senior Heifer Calf Champion, and was also the co-second top seller of the 2012 Champion Hill spring sale where she sold one-half interest for \$30,000.

• Recommended for heifers. Displays calving ease with depth of rib. He is gentle, with a lot of length and hip. He should make good replacement heifers descending from the Mayflower family.

McConnell Altitude Plus 854

Sold in the 2020 bull sale to Colorado Genetics for \$32,500.

McConnell Altitude 6228
Sold in 2018 to McGill Ranch for \$13,000

McConnell Altitude 6900
Sold in 2018 to Berry Angus for \$23,000

Testimonials from other Breeders...

"I really like the McConnell Altitude bull Genex has. I was really impressed with Altitude as a calf. Thick, deep bodied and very docile.

His calves are thrifty at birth. Many of his calves weaned right with my Simmy crosses and the best part, his heifers/momma cows are great. He is the only bull we have AI'd to three years in a row."

- Lloyd Gerard

"Altitude is the easiest calving bull we have ever used. This was our fifth year in a row to use him again."

- J T Nunn

Altitude exhibits tremendous phenotype combining eye-appeal and power with calving-ease. His first daughters are in production and they have great udders, excellent teat placement, and they are breeding back very well. The calves are coming easy, unassisted with quick get up and go. There is exceptional growth in his calves with muscle, width and depth displaying tremendous expansion of rib.

• Here is a rugged beef bull that will add pounds at weaning. He descends from a time-tested, old, genetic pedigree with Really Windy, Traveler 004 and Scotch cap.

Cut Above was chosen for his outstanding rib-eye measurement of 18.4 inches and IMF ratio of 143. When he sold, he was a crowd favorite for phenotype, performance, maternal value and carcass merit. In SAV 2017 sale he sold for \$175,000. He presents ideal shape, substance and style with added growth and superb structure and perfect feet. His heavy-milking, Pathfinder dam by Density is an outstanding producer and records a weaning ratio of 106 on ten calves.

• Recommended for heifers. This stout-made, calving-ease bull descends from a very highly maternal pedigree with Resource and Bismarck on the bottom side. His easy-fleshing dam out of the Blackcap family always throws thick-down-the-top calves with expressive muscle. She records a birth ratio of 96 and a weaning ratio of 98 on five calves. Good feet, big scrotal, low PAP.

• This outstanding Donor female is directly out of the herd of the SAV program. A direct daughter of SAV Madame Pride 0075 - who produced SAV America, he sold in the 2019 sale for \$1,510,000.00. Lot 268 is a maternal sister to SAV Registry 2831, selling for \$90,000, SAV Super Charger 6813, selling for \$235,000, SAV Response 2411 selling for \$90,000. Her full sister, SAV Madame Pride 5290 has tallied up 1.5 million dollars on her progeny. This Madame Pride 5000 is a maternal sister to America and she has proven herself, raising 11 calves with a birth ratio of 98 and weaning ratio 103. She currently is raising a calf now that will be weaned at sale time. We have kept her open for flushing and currently she is open to flush now. She is sound, easy to work with, very good on her feet, superior structure and angus character. We are selling full possession and reserving one flush at the buyer's timing to a bull of our choice at seller's expense. Sells open.

SAV Madame Pride 0075 - Dam of Lot 268

EPD and \$Values

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PERCENTILE RANKINGS for the EPDs and \$Value Indexes are listed to allow you to see how the cattle in the sale offering stack up to other animals in the breed.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis. Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

WEIGHTS

BW (Birth Weight): The actual weight in pounds at birth.

Adj. WW (Adj. Weaning Weight): The weight in pounds at weaning adjusted to 205 days of age.

\$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning merit compared to progeny of other sires.

Grid Value (\$G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

Combined Value (\$C), expressed in dollars per head, is an index which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid. EPDs directly influencing a combined index are: CED, CEM, WW, YW, Milk, HP, DOC, MW, Angle, Claw, DMI, Marb, CW, RE and Fat.

CAB TARGETING THE BRAND

The CAB® icon will appear on the pedigree of those animals that meet the criteria for targeting the Certified Angus Beef® brand.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand. Only 3 in 10 non-parent Angus bulls meet the Targeting the Brand genetic requirements.

Minimum Genetic Requirements

Value

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

PAP and Foot Score

What Is PAP?

Pulmonary Artery Pressure (PAP) is the measure of blood pressure in the pulmonary artery. What is blood pressure? Blood pressure is the force that blood exerts on the walls of blood vessels. The higher the blood pressure or PAP score can result in a decrease in performance, cause of illness, and even more severe stroke or brisket disease. It is known that at higher altitudes the cow/bull has to work harder to process oxygen. So if the cow/bull already has a high PAP score then they are more likely to develop brisket disease when moved to a higher altitude.

Is PAP relevant to my herd?

PAP scores are mainly monitored for cattle going to range in high elevations. However, PAP is applicable to all herds. The PAP score is also useful in determining the amount of arterial stress the cow/bull can handle which can be related to the performance of a cow/bull.

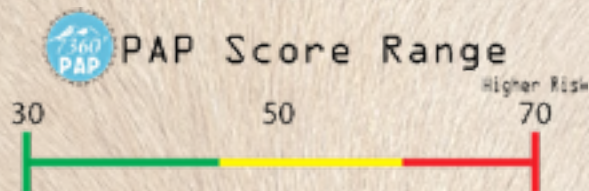

First let's explain this...

Muscles need oxygen to function, and arteries carry oxygenated blood to the muscles. So with the example of a bull in breeding season when traversing through pasture from cow to cow, their body has to process oxygen at an alarming rate by allowing larger amounts of blood to pass through arteries in order to feed the muscles. The arterial wall needs to withstand higher amounts of pressure from the blood. So the lower Pulmonary Artery Pressure (PAP) score, may result in a more athletic performing bull.

PAP scores are also genetic. This makes it important to pass on bloodlines that improve the overall health and performance of a cattle herd.

• Recommended for heifers. A genuine herd sire with herd-improving genetics and real-world maternal value. He is calving ease, backed by a highly maternal pedigree. His powerful dam by Bismarck is a model Angus cow and a prolific producer who comes from one of the strongest maternal cow families in the breed. She has accumulated progeny and embryo sales of over \$800,000. Great feet, with big scrotal.

• McConnell Yeti Altitude 672 comes with a great disposition, abundant muscle throughout and perfect feet, defines this herd sire. If you are looking to improve the phenotype of calves, Yeti can do it. While breeding cows this summer and fall, many visitors were impressed at how expressive his muscle definition was and his presence in the pasture. He ranks in the top 10% of the Angus breed in \$Maternal and \$Feedlot along with strong production and carcass EPDs. His grandsire is the heavy muscled SAV 707 Rito 9969, known for top feedlot performance (ranking in the top1%) and Residual Average Daily Gain. His dam descends from the Pridella family who has produced numerous herd sires, including MA Final Choice who is leased by Genex.

• McConnell Rainmaster 8458 is a calving-ease bull with capacity, muscle and excellent feet. He is a true herd builder checking all the boxes. His progeny will benefit from a modest birth weight, strong weaning weights in the top 3%, excelling into the yearling weights in the top 10% and rounding off with solid carcass merit for end-product benefits. His highly productive dam has satiability with a quality udder and good feet and legs. Out of Full Power, she descends from the highly maternal Pridella family, which has been a cornerstone in our program. She records a birth ratio of 99, weaning ratio of 104 and a yearling ratio of 98 on four calves.

• Independent is second-to-none in following his proven sire SAV President 6847. He is a double blending of SAV Blackcap May 4136. His heifer calves will be moderate framed, maternal and functional. They will have excellent muscle definition and length of body. Independent scores at the Top 2% of the breed in both Claw and Foot Angle. His weaning and yearling weight EPDS score at the Top 10% of the entire breed.
