Treasure Bull Test

ANNUAL SALE

Tuesday,
April 17, 2018 • 1 PM

Western Livestock Auction
Great Falls, Montana

Welcome

TBT
TREASURE BULL TEST

Ryan & Karnell Perry
406/788-9869 406/390-5473

Being a longtime consignor to the Treasure Bull Test (TBT) since 2006, when we took it over last spring we had a specific vision of the type of bulls we wanted to merchandise. The bulls had to have a look, masculine, long sided, deep middle and heavily muscled. They had to have the "Cowboy Kind" look. The consignors took note of our vision, they brought their best and the performance data got them sorted to the top 70% of the initial offering. We are very proud of the quality in this offering. Fellow TBT consignor, John Dalbey, said it best "You can't put an EPD or ratio on quality". He was right and the quality from top to bottom is second to none.

This set of bulls have been thru an extremely hot, dry summer followed by a cold, long winter. They performed outstanding. We would like to thank the Yeager Family and the entire crew at North Montana Feeders. They did an outstanding job feeding the bulls, they absolutely treated the bulls like they were their own. We do truly appreciate all their efforts. This set of Red Angus and Black Angus Bulls exemplify what we are trying to achieve with the TBT. That PERFORMANCE MATTERS and that PERFORMANCE PAYS! Every time we weigh that set of steer calves thru an auction or video sale, that dry cow or the old bull, performance and pounds is still the driving economic factor to your ranches bottom line.

Ryan, Karnell, Quayd, Pryce and Brant

Something else to think about. This winter has been as bad as anyone can remember. The month of February didn't see above the teens for temperature in our area, March hasn't been much better thus far! The snow, cold, and wind has gotten to have taken its toll on the old bulls.

We feel this mid-April sale will give you the time to evaluate them. While providing an opportunity to purchase front end kind bulls right at turnout time. Red Angus and Black Angus Bulls we feel strongly enough about the quality that they will fit any seedstock or commercial cattle program.

You can view the videos of the bulls on Northern Livestock Video Auction. Feel free to stop by North Montana Feeders if you are in country to take a look. Feel free to contact us or the fellow consignors about the bulls. We would love to assist you with your bull selections and questions.

Also please join us Monday, April 16th at 4 PM, for "Happy Hour Bull Preview". Plenty of refreshments, snacks, and fellowship among ranchers and TBT consignors to be had while previewing the bulls.

We'll see you at the sale on Tuesday, April 17th. You will truly appreciate this set of "Cowboy Kind" Angus Bulls!

Karnell Perry 406/390-5473

Auctioneer:

Joe Goggins 406/861-5664

Livestock Press

Kurt Kangas 406/366-4190.....Angus Journal/Angus Ass'n
John Goggins 406/698-4159 ..... Western Ag Reporter
Devin Murnin 406/696-1502 …… Western Livestock Journal

Footnotes are provided by consignors. Feel free to contact consignors about their bulls. Consignor contact information is on page 2.

Fertility

Every bull selling has had a complete breeding physical and has been semen tested. Scrotal measurements were taken March 16, 2018. Measurements listed are actual size. Bulls sell guaranteed to be breeders via natural service. Guarantees are between the buyer and TBT Consignor only.

Veterinarian: Dr. Kurt Johnson, 406/788-0700

Health

All bulls have also been tested negative for BVD and trichomoniasis. Bulls have completed all requirements for immediate interstate shipment.

Trucking

Trucking is at the buyers' expense and responsibility! Several TBT Consignors will have trailers with them and will help with delivery if possible. Contact TBT prior to sale to discuss and coordinate possible delivery options. TBT has several contacts who they deem to be reliable livestock carriers. Please arrange trucking when settling for bulls.

Insurance

Mortality and ASD Infertility Insurance is available thru Jerry Gliko, Novich Insurance Agency. See page 3 for insurance options. Buyer pays for ½ and TBT Consignor pays for ½. Buyers if you choose to insure your bulls please do so when settling for bulls.

Performance Data

EPD's listed in this catalog are as of March 8, 2018.

Transportation & Accommodations

Great Falls is served by several airlines. We will meet any planes if notified.

O'Haire Motor Inn 17 7th St. S, Great Falls, MT.....406-454-2141
La Quinta Inn 600 River Dr S, Great Falls, MT.....406-761-2600
Ask for the Treasure Bull Test Rates.

Terms and Conditions

Bulls sell under the terms and conditions of the American Angus Association. Settlement is cash. Settlement must be made at the time of sale unless arrangements have been made prior to sale with individual consignor and TBT. Registration papers will be transferred to buyer when settlement has been made. Announcements made from auction block take precedence over printed material. Auctioneer will settle any disputes of bids. Anyone attending the sale does so at their own risk. TBT and Western Livestock Auction, LLC assume no liability, legal or otherwise, for any accidents which may occur.

BULL MORTALITY & ASD INFERTILITY INSURANCE

Purchases are the responsibility of the new owner. We strongly encourage you to insure your bulls. Contact me for coverage details on these options.

XL Insurance Equine & Livestock
XL CATLIN

Jerry L. Gliko • 406-860-3181
jlgliko@3rivers.net
Provided through Novich Insurance Agency

Option A – Mortality Only
Annual – 5.8% • 6 months – 3.5%
Claims paid at 100% of insured value

Option B – Mortality + Accident, Sickness Disease Infertilty
Annual – 10.3% (11.3% in ND, SD & NE)
Claims paid at 100% of insured value, 80% for ASD loss

Option C – 6 months – 6.75% all states

Option D – Mortality + Accident, Sickness Disease Infertilty
Annual – 12.3% (12.8% in ND, SD & NE)
Claims paid at 100% for either mortality loss or ASD loss

Option E – 6 months – 8.5% all states

*All claim payments are less salvage value, if any. Minimum policy premium is $200.

Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

"What impact will each potential sire have on my operation's profitability?"

HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:
- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:
- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.

HerdBuilder and GridMaster are expressed as differences in profitability per exposure.

HerdBuilder Example:

30 cows x 5 years breeding = 150 exposures
Bull A has a HerdBuilder Index of 175: 175 x 150 = $26,250
Bull B has a HerdBuilder Index of 100: 100 x 150 = $15,000

$11,250 Difference in Profitability

Ranch Tested. Rancher Trusted.

Trophy's sire is a breed leading performance sire and son of the breeds #1 performance cow that sold for a record $54000 in the 2015 Mile High Sale in Denver. Trophy was born small and has had high octane growth his entire life. When the end product, pounds and grid are priority, Trophy will bring the Trophy home. ***3rd PLACE WDA RED ANGUS BULL.***

This set of bulls are out of the $60,000 R B Traveler 3244 which is the high performing son of R B Tour of Duty 177. His mother, Gaffney Rita 115, has been called the most powerful cow in the breed. 3244 calves come small and grow extremely fast with tons of eye appeal. These four half-brothers will bring performance and maternal power. **Member of the *3rd PLACE SIRE GROUP BLACK ANGUS.***

An Insight son that caught our eye all summer long with a lot of muscle expression and he's big boned. He's out of the Peggy cow family; Chestnut Hill has had a lot of success with this cow. Peggy 5064 has produced bulls for their Denver pen and they have been some of their top sellers. She has longevity and a strong pedigree behind her.

We are really excited about this young bull who is a son of Basin Bonus 4345. This bull has it all on both the paternal and maternal sides. His offspring should deliver outstanding marks for WW EPD, milk and marbling. He will also produce high quality, structurally correct replacement heifers that will stay in your herd.

This Basin Bonus 4345 son has stood out since birth. He has tremendous length and depth. His sire is proven to deliver milk, marbling, and presents a strong combination of WW EPD along with $F and $B value indexes. His dam possesses strong feminine qualities and her maternal lines are stacked with efficiency and functionality. ***HIGH INDEX BLACK ANGUS BULL.***

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- **more accurate selection**
- **easier identification of genetic outliers**
- **the ability to propagate young animals with confidence earlier in their lives**

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Calving Ease Maternal	18
Weaning Weight	26	Mature Weight	11
Yearling Weight	21	Mature Height	8
Dry Matter Intake	8	Carcass Weight	9
Scrotal Circumference	13	Yearling Height	11
Docility	10	Carcass Marbling	9
Heifer Pregnancy	14	Carcass Ribeye	12
		Carcass Fat	10

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS ™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

American Angus Association

$Value Indexes

$Values are multi-trait selection indexes expressed in dollars per head, to assist commercial beef producers by adding simplicity to genetic selection decisions. A $Value has meaning only when used in comparison to the $Value of another animal. For example, just as with EPDs, variation in $Values between animals indicates average expected differences in the relative value of progeny if random mating is assumed and the calves are exposed to the same environment.

$Values			
$W	$F	$G	$B
+21.28	+13.60	+12.53	+25.32

Weaned Calf Value ($W): an index expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. $W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value ($F): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning performance compared to progeny of other sires.

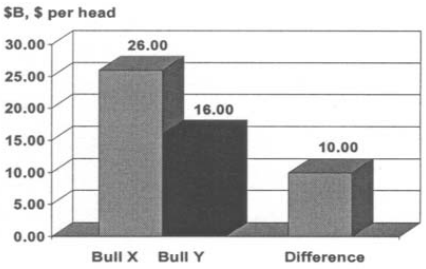
Grid Value ($G): an index expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

- **Quality Grade ($QG)** represents the quality grade segment of the economic advantage found in $G. $QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to $QG.

- **Yield Grade ($YG)** represents the yield grade segment of the economic advantage found in $G. $YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

Beef Value ($B): an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires. The $B value combines the contributions of $F and $G.

$Values have meaning when used in comparing the relative merit or ranking of two individuals. For example, Bull X has a $B value of +26.00, and Bull Y has a $B value of +16.00. If these bulls were randomly mated to a comparable set of females and the calves were exposed to the same environment, on the average you would expect Bull X's progeny to have a +10.00 dollar per head advantage in postweaning performance and carcass merit over Bull Y's progeny (26.00 - 16.00 = +10.00 per head)



How to Use $Values

$Values should be used to complement the criteria that producers already use when selecting bulls. Different management situations may require varying emphasis on the genetic selection "tools" offered. For instance, one producer might have historically sold calves at weaning, and rarely used the carcass EPDs in bull selection decisions. First he needs to meet his birth weight EPD/calving ease EPD requirements, depending on whether heifers are to be bred. Then selections can be made on Weaned Calf Value ($W) which characterizes revenue and costs associated with the preweaning phase. He would use $W to capture preweaning dollar differences when comparing two sires of interest.

In addition, he may want to begin making general progress in improving end-product value to create more predictability in his calves, or he may choose to retain ownership in the future. In this case, the $B could be used in concert with the selection criteria he has used in the past, such as $W, to make directional change in postweaning and carcass merit.

The $Values are not designed to be driven by a single trait, as an index is multi-trait by design. These selection tools are the result of the application of industry-relevant market values to Angus genetics for preweaning, feedlot, and carcass merit.

Keep in mind that selection for an individual trait may be an effective option for some producers. In this case, he might sell fed cattle and have significant carcass data on past groups of steers. This detailed data would allow him to identify the specific trait in need of improvement. In this case, $B might not be used where the individual end-product EPDs could better assist him in achieving the desired genetic change. The producer still has the opportunity to use $B as a tool in maintaining the balance between feedlot and carcass traits.

The $W, $F, $G and $B values on individual animals and the *Sire Evaluation Report* may be viewed at *www.angus.org*.

New Generation Supplements

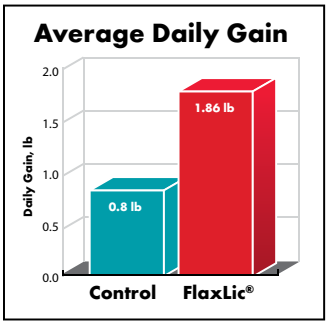
FlaxLic® Supplements:
Improving the Performance of Your Herd

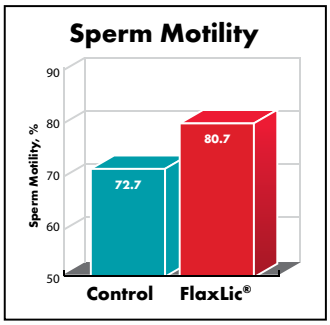
Flaxlic® provides essential vitamins and minerals for proper bull conditioning. **Flaxlic** blocks are completely fortified to prepare your bulls for breeding season. **Flaxlic** is also great for show animals, calves at weaning, breeding heifers and cows. In addition, **Flaxlic** is the first low moisture block to contain a high level of alpha-linolenic acid derived from flaxseed and edible linseed oil.

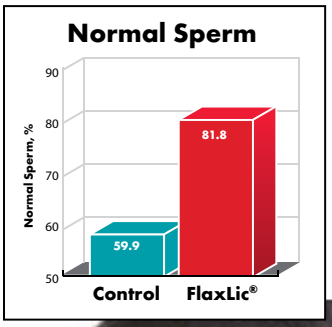
High-energy **Flaxlic** blocks contain 15% fat, essential minerals, and vitamins, and work around the clock to meet the demands of breeding bulls! Get your bulls ready for breeding season.

Visit **smartlic.com** today for more information!

FLAXLIC® SUPPLEMENTS







ENRICHED WITH THE POWER OF OMEGA-3 FATTY ACIDS

FlaxLic now has a U.S. Product and Process Patent for elevating Lipid Blood Levels in Livestock.
