FREE DELIVERY 100 miles & FEEDING UNTIL APRIL 30, 2019

Dear Cattlemen & Friends:

We, at Weisbeck Red Angus, would like to take this time to welcome you to our annual bull and heifer sale. This year's sale offering has something for everyone, while this is a very uniform set of bulls, there are bulls that have tremendous length and most of the bulls are thick and deep bodied.

This will provide an opportunity for you to choose a bull that will compliment your cow herd.

We appreciate your interest in our cattle and your business in the past years and believing in our program. We look forward to visiting with all past customers and are excited at the opportunity to meet new ones. We cannot continue to operate without your patronage.

If you have any questions or would like to view the bulls, please give us a call. We would be happy to give you all the information we can.

Thanks again!

The Weisbecks

Information

Feed and Performance

1A - 100% Red Angus • 1B - 87% - 99% Red Angus

Average daily gains were also started at weaning until February 21, 2019, for a 121 day test. They were weaned October 23, 2018.

Our bulls were fed 1/3 corn, 1/3 chopped hay, 1/3 silage, and 1 extruded soybean meal with TMR Ration.

EPD Codes

BW - Birth Weight • WW - Weaning Weight • YW - Yearling Weight • Milk - Milk • TM - Total Maternal Stay

Delivery Services

We will offer free delivery of bulls immediately following the sale to central points within 100 miles. Balance at cost. Bulls fed free of charge until April 30, 2019. After that we charge $3 per day per head to feed them. Bulls fed at buyer's risk.

Bulls taken home on sale day will receive a $50 refund, per bull.

Guarantee

Bulls sell as guaranteed breeders. Due to their young age the bulls haven't been semen tested, but we strongly recommend you have them semen tested before you put them in service. All claims must be submitted to the Seller in the calendar year, along with written semen evaluation and health report from a licensed veterinarian. Seller has the privilege of trying to prove the bull after his return, before making any adjustment. This guarentee is null and void if there is evidence of improper management in care of sold animal, or if the inability to breed is due to sickness or injury after being sold.

Weisbeck Red Angus will not be liable for more than the actual purchase price.

Registration Papers

All bulls are registered with the Red Angus Association.

Health

All bulls have had a full vaccination program. Health papers can be provided. Not responsible for injuries, sickness, or death during boarding time. Calves had Vista Once and Vision 7 with Enforce, and Nayensgen at weaning. The bulls were poured on Jan. 14, 2019. **Lot Tag White and ID Tag Yellow.**

Announcements

Any announcements made on sale day take precedence over printed material.

Phone Bids: 605-845-6170 Mark
605-230-0153 Jesse

Terms of Sale

Cash or check payable at the time of the sale.

Purchaser's Risk

All animals are the owner's risk prior to their sale and become property of the purchaser as soon as declared sold.

As soon as an animal is purchased, it becomes the responsibility of the buyer. We **do** recommend buying insurance for any bull not taken home by the buyer sale day.

If interested in purchasing bull insurance, contact Stockmen's Insurance Co, at Bill Pelton Livestock, Inc. at 406-671-5100 or email bill@billpelton.com.

Liability

Any person attending this sale do so at their own risk. The cattle owners, or any person connected with this sale assume no liability.

SALE DAY CREDIT RAFFLE

On the day of our Private Treaty Bull sale we will be holding a raffle for a $250 credit toward any bull. Any person who attends the sale on April 10th will be entered into a drawing and the person whose name is drawn will receive $250 credit toward any bull that they purchase that day or on a later date. We are looking forward to seeing you!

This is an E.T. herd sire from two of the most famous bloodlines at the Brylor Ranch. Makin Waves 39X was there high selling bull in 2011. We have seen an extraordinary amount of stretch and length in all of his calves and we are really happy how is offspring is turning out for us.

This is the $22,000 herd sire we purchased at the 2015 Bieber Fever Production Sale and we can not be happier, the calves are very deep and have a disposition that everyone strives to get in there cattle. They are moderate framed and have an early maturity, get one of his calves and put him to work.

We searched around for quite a while to find a Beckton Epic R397 herd bull and we found one in 2015 at Leddy Red Angus. This bull is dark cherry red and has growth that is second to none. He has great numbers across the board. Check out his calves in the sale and you can see the kind of performance he is all about.

This is a Rollin Deep son we retained back to use in our herd. We purchased his mother at the Erdmann dispersion and she has done nothing but produce outstanding calves year in and year out. A full brother to him sold in last year's sale to Huber EY Ranch. We used him on your heifers and we are very happy with the results of calving ease and strong performance.

Frontier was a bull we purchased as Lot 2 In the Rhodes Red Angus Annual production sale. He caught our eye immediately with his dark cherry red color and smooth muscle definition along with a very calm demeanor and he instills a lot of those similarities in his offspring. Rhodes sold a full brother to him in the same sale for $39000. Frontier will add the pounds to the calves when fall comes around.

Profitbuilder is ideal for cattlemen who appreciate performance and carcass quality without sacrificing structure and eye appeal. The #2 registration sire in the breed in 2018, Profitbuilder progeny have been well received with high selling daughters and sons. Check out lot 2 in this years offering, I think you will like what you see.

LSF MEW X-Citement 6690D sired by Redhill Ten X 104U 190A and out of a NSF Icon P532 daughter sold for $100,000 in the Ludvigson Stock Farm's 11th Annua Herdbuilder Bull Sale in 2017. We purchased two bred heifers from Northlund Stock Farms that were bred to LSF Mew X-Citement and are extremely impressed with calving ease and performance. We plan on using more of X-Citement in the years to come. Check out lots 4 and 5

NOTES

RED
RIGHT. NOW.
An independent university study compared six years of Superior Livestock Auction data, revealing Red Angus-sired heifers commanded from $5 to $9/cwt. more than females of all other breed types.
Learn more about the value of Red Angus-sired replacement females at redangus.org.
The Red Angus female is the rancher favorite for replacements that deliver real profitability.

Red Angus

Red Angus Guide to EPDs

HB ..... HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM ..... GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED ..... Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW ..... Weaning Weight and **YW** ....Y earling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk .... Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME ..... Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.

CEM .... Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls that have a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG ..... Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcasss Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA ..... Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT ..... Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.

Ranch Tested. Rancher Trusted.

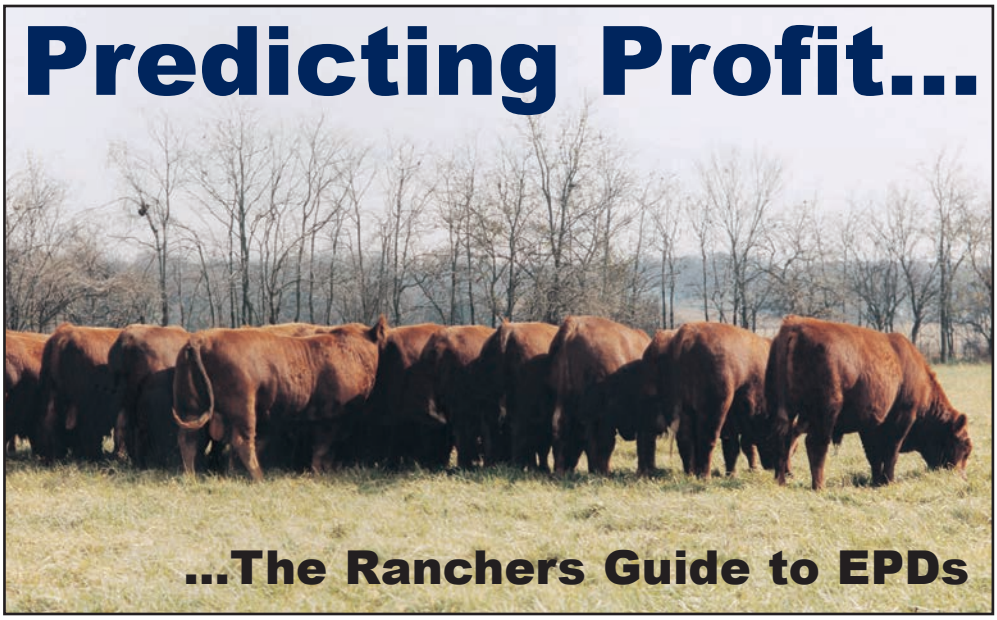
Predicting Profit...



...The Ranchers Guide to EPDs

Cowherd Building Traits

Profit starts at Reproduction! Placing selection pressure on traits that will have a direct impact on your marketed product (weaned calves, yearlings, carcasses sold in the meat) can certainly increase your revenue on a per calf basis. However, in order to achieve the higher goal of increased revenue per cow exposed, selection pressure must be placed on cow herd building traits.

Profitable reproduction can be boiled down to success in these four Economically Relevant Traits:

Calving Ease Direct (CED): The expected progeny difference of calves being born unassisted from two year-old heifers. The Red Angus CED model accounts for contemporary group birth weight differences and calving ease scores.

Heifer Pregnancy (HPG): The expected progeny difference of heifers conceiving to calve at two years of age.

Calving Ease Maternal (CEM): The expected progeny difference of a given animal's daughters calving unassisted at two years of age.

Stayability (STAY): The expected progeny difference of a bull's daughters remaining in the herd until at least six years of age. Females that don't stay in the herd that long are losing money, and they also contribute to a higher rate of replacement females that the rancher can't cash crop.

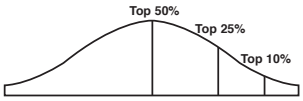
Cows Eat Money! That's why Red Angus published the Mature Cow Maintenance Energy EPD (ME EPD), becoming the first beef breed to evaluate the expense side of the ranchers' profit equation. Here are the facts:

- ME predicts differences in maintenance energy requirements of mature daughters of a bull.
- Maintenance energy requirements are directly related to feed cost - often producers' largest single expense.
- The lower the ME EPD, the less feed daughters require to maintain body condition.
- ME can be used to ensure environmental fit, and to estimate additional feed required by increased growth & milk.

With a long standing commitment to better serve this continually changing beef industry, Red Angus has prepared for tomorrow's challenges through New & Improved Genetic Predictions (EPDs).

Red Angus has combined databases and subsequent EPD calculations with the American Simmental Association in order to simplify producers' use of crossbreeding programs by supplying them with true multi-breed EPDs. This enhancement enables Red Angus to provide reliable EPDs on all animals in the database, regardless of breed composition. Additionally, with the recent changes to carcass value Red Angus has added Carcass Weight and Yield Grade to its arsenal of ERTs.

EPDs are the most reliable predictors of an animal's true genetic merit. As the only major beef breed to mandate Total Herd Reporting (THR), Red Angus EPDs have the built in advantage of being calculated from 15 years of complete contemporary group data. EPDs have "fast-tracked" beef cattle improvement and removed much of the guesswork associated with selecting range bulls.



Trait	Abbrev.	Expressed In (units)	50%	25%	10%

Bull Selection – Simplified.

Red Angus stakeholders have enjoyed the capability of selecting bulls based on economically relevant traits (ERTs), such as Heifer Pregnancy or Stayability, that truly impact their operations profitability. While these ERTs allow for efficient selection decisions, the growing number of ERTs and EPDs has resulted in confusion as producers attempt to estimate a sire's overall impact. In response, RAAA has developed the HerdBuilder and GridMaster indices, which answer the question:

"What impact will each potential sire have on my operation's profitability?"

While the process of calculating an index is very complex, the resulting selection tool is very simple to implement.

HerdBuilder and GridMaster are expressed as differences in profitability per exposure.

For more information, visit RedAngus.org.

HERDBUILDER

Producers selecting bulls to develop profitable replacement females and maximize the value of non-replacement marketed progeny should incorporate the HerdBuilder Index into their selection decisions.

The HerdBuilder Index is built using the following scenario:

- Red Angus bulls mated to cows and heifers
- Replacement heifers retained from within the herd
- All remaining progeny sold on a quality-based carcass grid

Given that replacement heifers are retained, significant influence is placed on the obvious maternal ERTs of Stayability, Heifer Pregnancy and Calving Ease. Additionally, with all remaining progeny sold on a quality-based carcass grid, Marbling, Yield Grade and growth EPDs also impact the HerdBuilder Index.

GRIDMASTER

Use the GridMaster Index if your operation's primary goal is maximizing profitability of feeders in the feedyard and on the rail.

The GridMaster Index is built using the following scenario:

- Red Angus bulls mated to cows
- All progeny sold on a quality-based carcass grid

Marbling, Yield Grade and growth EPDs are the traits of primary importance in the GridMaster Index.

We start off this year with a Rollin Deep son that has herd sire written all over him. I'm not quite sure where you can fault this bull. A strong maternal background and a set of EPD's that will rival some of the top bulls sold in the Red Angus Breed this year. Check out the performance and the scrotal. He has everything going in the right direction, and out of a very attractive young cow with a bright future. We are really excited to see how this bull is going to turn out for someone.

I don't know where to start with the Profitbuilder son. Well let's start with his mother who is a Hard Drive daughter that was purchased at the 2017 ND Red Select Sale. This bull ranks in the top 1 PERCENT in the Red Angus breed in Grid Master, Weaning Weight, and Yearling Weight. He has that herd bull look and has a disposition that is second to none. We are retaining 50 Percent semen interest and selling 100 percent possession.

These X-citement calves have a lot of eye appeal and hit the ground running with moderate birth weights and grow like weeds. This guy has the performance everyone strives for with a 78-pound birth weight to an ADJ Weaning Weight of 827 and a ADJ Yearling Weight of almost 1400 pounds. Feeder calf operations should have this bull in their sights.

EAR Kima has produced three straight outstanding bulls and this one is no exception. He ranks in the top 5 percent for Grid Master, Weaning Weight, and Yearling Weight. If you want to had that extra weight to your calves in the fall check this guy out. We retained a full brother to him last year that we are using on your own cows. I wouldn't worry about his Birth weight as we believe she went overdue. The previous 3 calves Kima has raised had an average birth weight of 85.
