

McCumber *Angus* Ranch

March 25, 2020 | PRODUCTION SALE | 3:00 P.M.

AT THE RANCH | 1 MILE WEST OF ROLETTE, NORTH DAKOTA

www.mccumberangus.com

First off, I would like to thank our customers for their support of our program over the years. We truly would not be able to do what we love without your generous commitment to Mc Cumber Angus Ranch. We take our role as seedstock producers seriously and are continually breeding cattle to make each generation and calf crop better than the last. It is not an easy undertaking, but with you our customers in mind we strive to produce not just one great one, but an entire offering that no matter which animal you buy, whether the first one in the ring or the last, that Mc Cumber bull or female will make a positive impact on your ranch.

For 56 years we have bred cattle to meet the demands of the commercial cattlemen and woman. We believe that a balance of traits is important to your success and that keeping all traits in check is key to profitability. The mother cow is our first priority, we have never waived in our commitment to stacking proven, productive, fertile, problem free cows that flesh easy, have outstanding udder quality, a good disposition and are structurally sound with good feet and legs. The key to profitability starts with the cowherd,

This year's offering is the result of a balanced approach to breeding cattle. This set of bulls is the most consistent, soundest, heaviest muscled, deepest bodied set of bulls we have ever offered. They are bred to work in any environment and developed with you in mind. This set of bulls has an average backfat measurement of .22 in. They are not over-conditioned. I think sometimes the amount of muscle and capacity they display is often mistaken for fat. Mc Cumber bulls are fed to exhibit genetic differences, but are only on a 46 MCal ration, much lower than the industry norm. The offering is very unique; you will not find many Angus bulls bred and built like the moderate framed, heavy muscled, deep bodied bulls we offer. We invite you to come evaluate them.

Bryce Leonard has been with us now for two years. We truly appreciate all that he does. It is so nice to have someone to feed when the kids have a game, or when I am trying to get this darn catalog put together.

The sale will once again be broadcast by Superior Productions. The bulls will be videoed in mid-March and a video of each bull and heifer will be available on the Superior website or a link from our website,

Like always, all the information is provided in the catalog. We will have scrotal measurements available sale day or by request prior to the sale. The cattle will sell in catalog order. We stand behind the bulls and heifers 100%. If you have a problem, please let us know so we can take care of it to the best of our ability. Please join us for lunch at Noon, and the sale starting at 3:00 P.M. CST. Feel free to contact us with any questions and stop over anytime to view the bulls and go through the cow herd.

Sincerely,

Matt and Chuck Tastad

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding program for cattle buying. **Please note that high speed internet is required – this is not for dial-up or satellite internet.** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on Dish Network channel 997 (SLA-TV). Please note that there is a short delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452 or 800-422-2117.

Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements,

Sale Terms & Conditions

All cattle sell under the standard terms and conditions of the American Angus Association. Terms of the sale are cash.

Volume Discounts: We will discount your purchase price 3% on 3 head purchased by one buyer and up to 10% on 10 head purchased by one buyer.

Delivery: We offer free delivery in North Dakota and adjoining states on all bulls and free delivery up to 1,000 miles on purchases totalling \$2,500. Beyond 1,000 miles delivery will be billed at cost.

Sight Unseen Purchase Program: If you cannot attend the sale and would like to purchase bulls, please give us a call and we'll be glad to help you with your order. Describe the type of bull, minimum and maximum parameters and price range. We want to assure you that your bid will be handled with the utmost professionalism and your money handled like it is our own. We guarantee 100% satisfaction on all orders. If you get the bull and don't like him, we will take him back.

Lodging & Transportation

Multiple locations in Minot ND

Rolette ND has a 3,500
foot paved runway. Minot,
ND is served by Northwest
Airlines. Minot is 90 miles
from the ranch.

Herd Health & Nutrition

Herd Health: Bulls have been vaccinated with Vista Once SQ, 7-Way w/Somnus, poured with Ivermectin, and feed Safeguard. The bulls will have passed a complete fertility test. All cattle will sell with interstate health papers.

Nutrition: The bulls were fed a high roughage ration. The ration was balanced to ensure the bull's soundness and longevity. We reached a maximum of 46 Mega Cals, and the protein level was 13.2 percent. The bulls are hard, sound footed, and have not been pushed at all. The ration consisted of Alfalfa, Corn Silage, rolled corn and mineral package. For those that do not know what earlage is, it consists of the grain, cob, and husk, thus adding additional fiber to the ration. The bulls were raised on momma's milk and grass from birth to weaning and have performed well this winter.

Marketing

If you have calves sired by our bulls, or females bred to our bulls, we would like to help you market them. We along with Spickler Ranches sponsored the 14th Annual Angus Partners sale. The consignors realized a considerable premium over the current market for their McCumber and Spickler sired replacement open and bred females. We would be happy to accept your consignment at any time. I would also suggest checking out the Angus Source program. This is a very effective way to set apart your Angus sired feeder cattle, and replacement females.

Semen Interest

You will notice that we are retaining an interest in quite a few of the bulls. These are bulls we may want to collect semen from in the future for use within our herd. If we are able to sell semen from your bull, we would share with you any revenue generated from the sale of semen. The bulls would be collected when it was convenient for you. The buyer has full possession and salvage value of the bull. Many of these bulls will undoubtedly sell in the price range of the commercial man.

Selling ½ interest and full possession- A powerhouse son of Mc Cumber Titanium 5005 with explosive rib shape, extra muscle shape and expression and the masculinity lacking in so many of today's growth and carcass-oriented Angus cattle. 9145 has been a standout since birth. He is the heaviest actual weaning weight and yearling weight bull of the calf crop. He weaned off his 9 yr old dam with an actual weaning weight of 955 lbs, without creep and then smashed the scale at a year earning a 365-day weight of 1463 lbs. In addition to this he is a stout, wide based bull with excellent hoof shape and heel depth. He is large scrotaled and can really move out. His extra power, stoutness and muscle comes in a real complete package. He is not just another big, ill-structured, growth bull. He is built right, nicely balanced, long bodied, with an extended front end and base width. Like his ¾ brother 9142, he combines REA and IMF as well as in the sale earning a REA ratio of 112 and an IMF ratio of 117 with only .15 in. backfat. His dam is a legitimate 1300 lb. cow. She packs a lot of punch and has consistently raised big calves year after year. Miss Wix 0218 is a moderate, deep ribbed, good footed, near perfect uddered daughter of OCC Tremendous 619T. She has several daughters here in production and are cut from the same mold. She has an outstanding production record and is produced from a line of cows that trace back to Miss Wix 365 of Mc Cumber. 9145 is an outstanding herd bull prospect, that is very complete and covers the bases on many traits. **BALANCE!**

Selling ½ interest and full possession- Recommended for use on heifers- A unique, elite, calving ease, cow-maker that is bred to move your cowherd to a new level in terms of fertility, fleshing ease, efficiency and longevity. He is sired by the popular OCC Zodiac 655Z, whose sons have been the highlight of the Ohlde bull sale for 3 consecutive years. After attempting to purchase a son at Ohlde's for two straight years, we were able to get semen on Zodiac and flushed our most elite donors. 9119 has been a favorite of mine. He is a masculine, deep bodied, naturally thick bull with extra shape to his rump and lower quarter. He is nicely balanced, with a long neck and herd bull presence. He also is extremely quiet, large scrotaled, and sound structured. He weaned off his recipient dam with an actual weaning weight of 880 lbs, and earned a 365-day weight of 1342 lbs. His outstanding, pathfinder, donor dam needs no introduction. The herd bull producing, highly productive Miss Wix 2003 of Mc Cumber, has earned elite status here at Mc Cumber. The only thing she hasn't done is leave us with a bunch of daughters, but we are working on that. She is the dam to Mc Cumber Steadfast 635, Mc Cumber Armour 7148, and Mc Cumber 235 Fortunate 453 to name a few. All her sons are working in Registered Angus programs across North America. We would like to collect semen on 9119 after the sale for use here to continue to build upon the influence of his outstanding dam.

Selling ½ interest and full possession- Recommended for use on heifers- 983 has been a favorite of mine from birth. He is a classy, well-balanced, easy to look at son of Sinclair Shadow Rider. Not only will he catch your eye, but he has muscle shape to his top and rear quarter and possesses the masculinity not often found in a calving ease sire. He has absolutely, amazing hoof shape both front and rear and stands down on extra heel depth. He puts a foot down in all four corners and moves with a herd bull presence. His dam is a feminine, long bodied, deep ribbed daughter of Mc Cumber Trademark 4203 with a near perfect udder and excellent fleshing ability. She is produced by generations of light birth, neat uddered females that are productive and problem free. 983 is a complete herd bull prospect with the bred in traits to improve feet, udders and maternal value, traits not easily measured by an EPD. We would like to collect 983 after the sale and use him back in our program.

Selling ½ interest and full possession- 972 has the herd bull look. Not only does he look like one should he has the data and maternal heritage to ensure his ability to make an impact. 972 is a heavy muscled, stout made, masculine herd bull prospect with exceptional balance, soundness and disposition. He is a wide based, big hiped, wide rumped son of Mc Cumber Titanium 5005 with excellent hoof shape and heel depth. He weaned well, but has really turned it on this winter with an ADG of 4.22 lbs/day and a 365-day weight of 1416 lbs. He is not an outlier in terms of numbers, but from a breeding value, with the ability to sire outstanding, forage efficient females and males with the muscle, performance and soundness he excels. His 4th generation pathfinder dam is a true power cow, she is an absolute tank with massive volume, thickness and stoutness. She is a neat uddered female that fleshes with ease and has never missed to the AI service, she calved early again and maintains a calving interval of 6@366 and a WWR 5@104.

Selling 2/3 interest and full possession- Recommended for use on heifers- A calving ease, herd bull prospect unlike many you will find. 9135 is a high performance, long bodied, heavy muscled son of OCC Tremendous 619T with masculinity, good feet and a wonderful disposition. He excelled at every level. After starting with just an 81 lb. birth weight he went on to wean off his productive dam with an actual WW of 905 lbs. without creep and gained 3.72 lbs/day and earned a 365-day weight of 1432 lbs. He sports a CED of +11 and a BW EPD of just +0.8. His dam is a feminine, high volume, highly productive daughter of Mc Cumber Titanium 3127. She bred back early and is nursing an outstanding bull calf by Mc Cumber Tribute 702 already this year. She is produced by a top pathfinder cow that raised 12 calves with a WWR of 104 and has left many top daughters in our program. We always have received very positive feedback on the Tremendous sons and this is one of the best we have bred.

Selling ½ interest and full possession- 9206 hits the mark on so many different levels. Not only is he a high performing, heavy muscled beef bull, but has the capacity, soundness, and maternal strength to build a cow herd around. In addition to this you couldn't find one any quieter to handle and be around. He is good footed, large scrotaled and combines this with a herd bull look and presence. He has added length, depth of body and plenty of thickness. He weaned off his pathfinder donor dam at 910 lbs. without creep and has an off-test weight of 1300 lbs. His visual muscle expression is confirmed by a REA of 14.3 sq. in. for a ratio of 112. His dam is a member of the most successful flushes in our history. She has not skipped a beat and we finally calved 2 full sisters to 9206 this spring. The first daughters of Miss Wix 2012 to enter production and they did not disappoint. They are both high volume, thick made daughters of Mc Cumber Titanium 5005 and possess impeccable udder structure, with 4 small well-placed teats and proper attachment both front and rear. Their udders are clean and neat as evident by the picture of the udder of Miss Wix 8008 of Mc Cumber. You can't stack many more outstanding cows into a pedigree and 9206 did not let us down, earning herd bull credentials on many levels.

Selling ½ interest and full possession- A herd bull candidate that covers all the bases. 9142 is a stout, long bodied son of Mc Cumber Titanium 5005 that is loaded with muscle, performance, and cow power. He has been a favorite all summer. He is very sound and possesses near perfect hoof shape, both front and rear with extra heel depth. He weaned off his outstanding donor dam with an actual WW of 945 lbs. without creep and earned a 365-day weight of 1402 lbs. He combines REA and IMF as well as any bull in the sale and did it with only .15 in. backfat. His dam is a favorite of mine. She entered the ET program this past spring and never fails to raise a good one. She has extra capacity, thickness and fleshing ability, while being productive and fertile. She still has a neat, well-attached udder and near flawless hoof shape at the age of 10. She is built like one that will last well into her teens. 9142 is one of the top bulls in this sale with bred in ability to sire profit-oriented progeny that will fit many segments of the industry.

Selling 2/3 interest and full possession- A true power bull with the muscle, masculinity and performance a power bull should display. He is stout, wide based, with abundant shape and expression to his rear quarter. He has a big, expressive square top which is confirmed by a REA of 15.1 sq. in. for a ratio of 118. In addition to the power he displays from a phenotype standpoint, he is a standout on paper as well with an actual weaning weight of 920 lbs. for a ratio of 111 and a 365-day weight of 1431 lbs for a ratio of 108. His pathfinder dam is a deep ribbed, good footed, neat uddered daughter of Mc Cumber 8R101 Rito 1122 and a maternal sister to Lassie 935 of Mc Cumber. She is a top producer who never fails to bring in a good one and is always bred back to calve early again the following year. 9172 will raise the performance bar and sire a set of calves that will not only push the scale down, but will have the added muscle shape and body dimension to get noticed.

Selling ½ interest and full possession- A rare individual within the Angus breed, that combines the extra capacity, rib shape, natural thickness and softness to sire hardy, forage efficient females with udder quality, fertility, mothering ability and fleshing ease bred in. In addition to this 9159 is an extremely free moving, loose structured bull with excellent hoof shape and plenty of heel depth. He is wide based, square hiped, and packs a lot of performance on his moderate frame. He weaned off his pathfinder dam with an actual WW of 850 lbs. and then gained 4.13 lbs/day to ratio 111. He came off test as one of the top ten heaviest bulls with an actual weight of 1300 lbs. and earned a YWR of 106. He combines this with a REA ratio of 102 and an IMF ratio of 119. His pathfinder dam is a moderate, wide made, big bodied daughter of Mc Cumber Rito Rolette 1108. She made pathfinder after her first 3 calves and has never missed to the AI service. Although she is moderate, she is a calf raising son of a gun. She brings in a good one every year. 9159 is truly a rare individual with the body type not often found within the Angus breed.

Selling ½ interest and full possession- Here is a real load. He is deep from fore rib to flank, wide based, naturally thick and possesses the masculine, herd bull look the good ones seem to have. He weaned off his recipient dam with an actual weaning weight of 900 lbs. without creep to earn a 205-day weight that broke the 800 lb. barrier. The Zodiac sire group in general has exceptional dispositions and 9116 is no exception. In addition, he is large scrotaled, easy fleshing and stands down on a large well-shaped hoof. His pathfinder donor dam is a 2nd generation pathfinder from the maternal matriarch Miss Wix 2022 of Mc Cumber. Miss Wix 2012 is a big time embryo producer, and never fails to rebreed following a flush, she has an exceptional fertility record and is poised to go down as one of the great cows to ever reside at Mc Cumber. If you are looking to build a cowherd for the long haul, then 9116 should be near the top of your list.

Selling ½ interest and full possession- One of the best bulls in this sale. 923 has covered all the bases from start to finish and combines this with impeccable phenotype. 923 is very impressive to view. He is a masculine, muscular, well-balanced, sound structured herd bull candidate with extra length, shape to his top and rear quarter and a herd bull presence. In addition, he has outstanding hoof-shape and heel depth, a large scrotal circumference and an easy-going disposition. His performance is top of the line with an actual weaning weight of 920 lbs. without creep and an ADG of 3.81 lbs/day. His dam is a beautiful, long bodied, big ribbed daughter of Mc Cumber 4x13 Extra 829, with excellent udder quality, hoof shape and productivity. She is nursing a full sister to 923 this year and gets the job done year in and year out. Herd bull caliber statistics and the maternal value to make a positive impact.

Brett, Sydney, Nate , and Eva

Selling ½ interest and full possession- Recommended for use on heifers- The performance bull of the Zodiac X Miss Wix 2003 flush. He is a bigger framed, longer bodied son of Zodiac that has performed extremely well among a competitive group. In addition to his added size and length he still possesses the masculinity, depth of body and natural thickness you would expect from a mating like this. He weaned off his recipient dam with an actual weaning weight of 910 lbs. and then gained nearly 4 lbs/day and earned a 365-day weight of 1419 lbs. The flush sisters to 9126 are equally impressive with the depth, thickness and fleshing ease you would expect. His pathfinder, donor dam has raised the bar for fertility, productivity and maternal value within our cowherd. She has herd bulls working across the country for registered outfits and is a member of the flush that resulted in many impactful herd builders. 9126 is a result of selection for maternal value, performance and efficiency. There are no-holes in the pedigree, for many years the same selection criteria has been put on these cattle to perform in many ways, not just maternal or growth or carcass or calving ease, it is truly a balanced approach with building a cowherd and then selecting the level of performance your environment can support.

Selling 2/3 interest and full possession- A herd bull candidate that is the complete package. 930 combines impeccable soundness, structure, muscle and rib shape with outstanding performance at every measure. He displays the outstanding herd bull presence and Angus breed character his sire consistently passes on and exhibits the muscle shape, masculinity, and depth of rib we demand our cattle possesses. He is royally bred with top cows all throughout his pedigree. His 3rd consecutive generation pathfinder dam never misses, has settled AI every year and is the dam to our lead-off and top selling heifer from the 2017 sale at \$21,000 to Carlson Angus at Regent ND. She has gone on to become a top donor for Jon and her sons and daughter are feature lots in the Carlson Angus Production Sale. 930 has not only performed near the top of the calf crop, but exhibits the power, performance and soundness of a true herd bull candidate.

Selling 2/3 interest and full possession- A performance powerhouse, with added length, width, and size. He has performed from birth to yearling with a 205-day weight of 847 lbs. for a ratio of 115 and then gained 3.94 lbs/day postweaning, earning the #1 365-day weight of 1477 lbs. for a ratio of 111. He has not missed a beat in the performance race and is produced by a top young cow with a WWR 2@112. She is a moderate, neat uddered female with plenty of milk and outstanding mothering ability. She is produced from 5 consecutive generations of productive cows with weaning weight ratios all over 100. Will add pounds to a calf crop and sire the type of females that are fertile, productive, and problem free.

Selling 1/2 interest and full possession- A herd bull prospect with abundant muscle shape, capacity, masculinity and soundness. 936 is loaded with cow power, performance and exceptional structure. He is a wide based, thick topped, big rumped beef bull with excellent performance and generations of cows that have excelled for fertility, productivity, fleshing ability, udder quality, and maternal strength. His full brother was a sale feature and top selling bull in last year's sale to Diamond 7 Angus Ranch in New Mexico. 936 standouts out on performance as well. He is one of the top gaining bulls on test with an ADG of 4.27 lbs/day and a 365-day weight of 1430 lbs. His feminine, big bodied, neat uddered dam has never missed to the AI service and is currently nursing a 3rd consecutive 5005 son. He was supposed to be a heifer. She is the one and only daughter of Miss Wix 2002 of Mc Cumber in production at this point and a maternal sister to last year's top selling bull Mc Cumber Emulation XXP 836. 936 is stacked with the absolute best cows on this Ranch and combines it with the muscle mass, volume, and soundness a herd bull should possess.

Selling 2/3 interest and full possession- A truly unique individual with the mass, muscle, performance and volume required for forage efficiency. His masculinity and early maturity are truly unique for a bull that pushes the scale down like he does. He has weighed up at every measure with an actual weaning weight of 935 lbs. He combines this with abundant thickness, muscle shape, and capacity. He possesses excellent hoof shape and scrotal development. He is bred to convert forage and built like one that will do it. His dam is an easy fleshing, near perfect uddered daughter of Mc Cumber Rito Rolette 1108 with an excellent record for fertility and productivity. She is a daughter of the 6 consecutive generation pathfinder, donor dam Miss Wix 2027 of Mc Cumber, whose influence shows in this herd bull prospect.

Selling 2/3 interest and full possession- A herd bull prospect produced by the predictable combination of 5005 and Tremendous. 998 is a big bodied, soft made bull with extra thickness and shape to his top and rear quarter. He has hit the mark at every measure with top ratios across the board. His outstanding breed character and softness with extra length, impeccable structure and excellent disposition helps ensure his ability as an outstanding female maker. He has plenty of punch too and will sire males that can really push the scale down. His dam is another feminine, big ribbed, perfect uddered daughter of Mc Cumber Tremendous 2008. She has never missed to the AI service and is nursing a stout made son of Mc Cumber Trademark 4203 already this year. She descends from the 6th generation pathfinder Miss Wix 2027 of Mc Cumber.

Selling 2/3 interest and full possession- A powerhouse son of OCC Tremendous 619T. 9199 is a stout, heavy muscled, deep bodied bull with masculinity, excellent hoof shape, and a large scrotal. He is the #1 205-day weight bull of the calf crop with an actual weaning weight of 935 lbs. and a WWR of 116. He has been one of the more active bulls on test, thus affecting his ADG, but still exhibits the extra performance and pounds to add payweight to a set of calves. His highly productive, big bodied, thick made dam is a neat uddered, fertile daughter of Mc Cumber Titanium 3127 and has already achieved pathfinder status with a WWR of 3@106 and a calving interval of 3@362. She is already nursing a phenomenal heifer calf by Chapman Memento 7601E. Her fertile, productive dam left here with her 11th calf at side selling to Buyan Angus in Canada as the foundation for his new Angus herd. She is still going strong at the age of 13 and exhibits impeccable hoof shape and udder quality no matter her age. She never missed to the AI service and raised 11 consecutive AI sired calves.

Selling 2/3 interest and full possession- 912 is a real tank, with the added base width, muscle shape and rib dimension that is conducive to forage conversion. He has been a favorite of visitors to the Ranch this winter. He is a wide-tracking, masculine, thick rumped son of Mc Cumber Steadfast 635. He nearly hit the 900 lb. mark at weaning without creep and has continued to perform post weaning. His dam is a moderate, deep ribbed, wide made daughter of Fortunate Son with a near perfect udder and a good disposition. This meat wagon should sire forage efficient progeny that will push the scale down at sale time, and leave a set of replacement females to be proud of.

Selling 2/3 interest and full possession- 9136 is a soft-made, big bodied, square hipped, thick rumped bull with extra muscle expression to his hip and rear quarter. He is a heavy weaning, moderate framed son of Mc Cumber Titanium 5005 with base width, good feet and large scrotal. He stacks a bunch of top-end cows in his pedigree and is bred to sire forage efficient, fertile, long-lived females that are problem free and easy fleshing. His 4th generation pathfinder, donor dam is a herd favorite, with extra rib shape, and absolutely flawless udder. She has excellent feet, a good disposition, and maintains a calving interval of 9@365, after being flushed last spring, she bred right back and is already nursing a heifer calf by Mc Cumber Armour 7148. He is the right kind, with a maternal heritage second to none.

Selling 2/3 interest and full possession-Recommended for use on heifers- 966 displays abundant rib shape, natural width and muscle shape. He is one thick bull with masculinity, added shape and expression to his hind quarter and still moves with ease as he travels the pen. He is a calving ease bull that started with just a 75 lb. BW and has a CED of +12 and BW EPD of +0.1. He was one of the top bulls at weaning as his dam's first calf with a 205-day weight of 817 lbs. for a ratio of 111 and had an actual weaning weight of 870 lbs. without creep. He gained 3.72 lbs/day and earned a 365-day weight of 1412 lbs. His dam is a beautiful, feminine, deep ribbed, neat uddered daughter of OCC Big Time 746Z. She settled AI again this year and calved early. She comes from a line of cows that are not quite as well known, but for multiple generations have been fertile, productive, near perfect uddered, sound structured and long lived. 966 has jumped through all the hoops and is bred to sire moderate, easy fleshing, forage efficient females.

Selling 2/3 interest and full possession- Recommended for use on heifers- A herd bull prospect that catches your eye, every time you enter the pen. 911 is a classy, well-balanced, sound structured son of Mc Cumber Steadfast 635, that not only makes you take a second look, but combines this with herd bull stats and the added muscle shape to his top and rump that is not always found in a calving ease bull. He has performed from the start with only a 77 lb. BW, he weaned off his dam at 875 lbs. and earned a WWR of 108. His dam is a gorgeous daughter of OCC Big Time 746Z. She is feminine, big bodied, and has a near flawless udder. She bred back AI again this year and is nursing a full sister to 911. She is produced by one of the top producing cows ever at Mc Cumber. Her dam Bemindful Maid 509 Mc Cumber produced to the age of 14 and earned BWR 12@96, WWR 12 @104 and YWR 12@104. She never missed and left several top daughters here at Mc Cumber. 911 represents multiple generations of cows that have excelled for fertility, longevity and productivity.

Selling 2/3 interest and full possession- 975 is a long bodied, deep ribbed, naturally thick son of Mc Cumber Steadfast 635. He has performed from start to finish. 975 is bred to be a cow-maker and should have no problem living up to that label. He combines outstanding cows on both sides of his pedigree and is produced by the herd bull producing Miss Wix 9122 of Mc Cumber. He is a maternal brother to Mc Cumber Fortunate 307 and Mc Cumber Trademark 4203, and his full brother sold in last year's sale to Manzano Angus in NM. Miss Wix 9122 has never missed and even while being flushed actually moved up her calving date and now has a calving interval of 9@358 and is currently nursing her 10th natural born calf. She is produced from 4 consecutive generations of Pathfinders and her daughters in production are doing an outstanding job as well. He represents our program well.

Selling 2/3 interest and full possession- A powerful son of Mc Cumber Steadfast 635, with abundant muscle and extra body dimension. 9183 is not only full of meat and muscle, but is a super sound, free moving, big bodied bull with the softness and maternal strength of a cow-maker. His dam is a stout, easy fleshing, moderate framed daughter of Entrepreneur, with extra capacity and natural thickness. She is neat uddered, good footed, and wide hiped. The first Steadfast daughters are calving this year and what a treat they are. Everyone of them is thick, deep bodied, and near perfect-uddered. They are excellent young mothers that get their calf cleaned-up and off the ground quickly. We look forward to many more in the herd.

A big, stout, thick rumped son of Mc Cumber Armour 7148. 9169 is one of the top performers of the calf crop. He weaned off his 12 year old dam with an actual weaning weight of 815 lbs to earn a WWR of 102. Post weaning he really took off and gained 4.27 lbs/day and earned a 365 day weight of 1429 lbs for a ratio of 108 to rank among the very top bulls for yearling weight. He is wide based, big topped and deep ribbed. His dam has been impressive and is currently nursing her 11th calf here at Mc Cumber. She is a naturally thick, deep ribbed, sound, neat uddered daughter of 4X13. She has an excellent record for both fertility and productivity. She does not show her age at all. A top performing bull from the first calf crop by Mc Cumber Armour 7148 and he did not disappoint.

9147 is an Unmistakable son with length, thickness and muscle. He has performed at every measure with top ratios across the board. He has a masculine, beef bull look with the added body dimension and thickness common among the Unmistakable sire group. His dam at the age of 10 weaned this good bull off at 835 lbs. without creep and settled AI again this year, now nursing her 10th calf. She has maintained a calving interval 9@366. Bred to add pounds and sire easy fleshing, efficient, long lasting females.

Selling 2/3 interest and full possession- A thick, massive, big bodied bull with excellent performance and the maternal heritage to move a program forward. 961 has been a standout since birth. He is a wide-made, sound structured, square-hipped son of Mc Cumber Big Time 7188. We retained 7188 from his calf crop and this first set of calves has exceeded our expectations. They are big bodied, high performing progeny with thickness, soundness and outstanding disposition. His dam is a standout in the herd from a phenotype standpoint. This beautiful daughter of Mc Cumber 8R101 Rito 1122 is feminine fronted and then displays abundant rib-shape, natural thickness and a near perfect udder. She has outstanding hoof shape and is one that is not hard to find when going through the cows. She has an excellent production record and comes from many generations of top Miss Wix females known for fertility, longevity and productivity in a forage environment.

Selling 1/2 interest and full possession- 937 is a bull that has been on our radar since birth. He possesses massive thickness and volume with plenty of length and muscle shape. He will fit for many of our long-time customers. His sire is new to us and was discovered at Risse Ranch in SD, after outstanding reports on the daughters in production at their ranch. In addition he adds length of body, soundness and libido due to the fact that Sinclair Shadow Rider 1741 naturally settled 85 heifers out of 100 in the first cycle and 96 out of 100 were bred. 937 has performed from the start and combines this with one of the top young cows on the Ranch. His dam Miss Wix 5017 of Mc Cumber is an absolute tank, with outstanding hoof shape, abundant capacity and a near perfect udder. She is a flush sister to Mc Cumber Titanium 5005 and is on the short list for the donor pen. Expect 937 to sire highly fertile, near perfect uddered females with the ability to maintain flesh in any environment and last in your herd for years.

Selling 2/3 interest and full possession- 9218 is an extra stout, thick, heavy muscle son of Mc Cumber Titanium 5005 with loads of performance and the added muscle shape, thickness and capacity cattlemen travel to find. This bull is a wide-based, square hipped, expressively muscled bull with excellent hoof shape and heel depth. He got pretty cold when he was born and nipped his ears, but that didn't prevent him from really performing from the start. His pathfinder dam is a moderate, wide-made, high volume daughter of OCC Tremendous 619T with excellent udder structure and a super disposition. 9218 is the result of a mating combination that works every time. The resulting progeny fit our breeding goals perfectly. Whether male or female they have the soundness, muscle, capacity and breed character we select for.

A thick, meaty, masculine beef bull with added base width. 917 is a square hipped, thick rumped son of Mc Cumber Trademark 4203 with impressive performance across the board. He rose to the top this winter with an ADG of 4.27 lbs/day ranking in the very top end of the calf crop for gain. He combines this with a 365 day weight of 1425 lbs. for a ratio of 107. His dam is a docile, stout made, high volume female with excellent hoof shape and productivity. Her dam produced 11 calves here with a WWR of 103 and 9 @106 for Yearling. We went back to use Trademark after his first daughters came into production. They are easy fleshing, near perfect footed, and possesses impeccable udder quality. They are the type that will work in any environment. You won't miss this thick, heavy muscled bull.

A stock bull with abundant thickness, dimension and capacity. 915 is a masculine, big scrotaled son of Mc Cumber Trademark 4203 that has performed well at every measure. He gained well on test with an ADG of 3.94 and displays the added thickness, muscle and stoutness to sire forage efficient progeny. His dam has a near perfect udder and near perfect feet. She is a stout, high volume, daughter of Mc Cumber Fortunate 235 and has earned a WWR of 3@101 and descends from 3 consecutive generations of cows with ratios over 100.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9191 is a moderate framed, masculine, heavy muscled son of Mc Cumber Armour 7148. He displays as much muscle shape and expression to his rear quarter as any bull in the offering. He is a wide based, square hipped bull with very good hoof shape. He weaned off his dam with an actual WW of 850 lbs. and scanned a REA of 13.4 sq. in. for a ratio of 105. His moderate, easy fleshing dam has a near perfect udder with small well-placed teats and excellent attachment both fore and rear. She has an excellent production record and is produced by a personal favorite donor dam Bemindful Maid 965 of Mc Cumber. 965 has only missed once to the AI service and is currently nursing her 10th calf already this spring after being flushed last spring for the first time. At 11 years old 965 still has a flawless udder and excellent hoof shape. She currently has 6 outstanding daughters working in our herd and appears to be set to produce well into her teens.

Selling 2/3 interest and full possession- Recommended for use on heifers- A calving ease son of Steadfast produced by a full sister to Mc Cumber Fortunate 235. 9109 is a masculine, muscular, long bodied bull that can really get out and move. He is wide based, thick rumped, and good footed. He is a light birth bull with enough power and punch to be used on cows successfully. His dam is a moderate, deep ribbed, wide female with an easy going disposition and an excellent record for fertility. She is a maternal sister to Lassie 113 of Mc Cumber, the dam of Mc Cumber Tribute 702 and a full sister to the calving ease specialist Mc Cumber Fortunate 235. Top maternal and calving ease genetics bred into this bull with enough power to add pounds to a calf crop.

Selling 2/3 interest and full possession- A well-built, masculine, thick-made, stout son of Mc Cumber Titanium 5005. 9176 is an easy going, soft made bull with abundant capacity, added shape to his hip and rear quarter, and a large scrotal. He has performed well and exhibits the traits that our herd is built upon. His dam is one that everyone finds when touring the cowherd. She has massive volume, extra thickness and a neat, well-attached udder. Miss Wix 0170 of Mc Cumber has a good disposition and is extremely easy fleshing. She has produced 3 daughters all retained and still producing within our herd, and her son's have been top performing graduates of past bull sales. 9176 is very complete and the type of bull that will sire progeny that will perform.

Selling 1/2 interest and full possession- Recommended for use on heifers- 9241 is a heavy muscled, deep ribbed, thick rumped son of OCC Bonus 802B. He has impeccable hoof shape, heel depth and soundness. He has performed well amongst stiff competition and weaned off his pathfinder donor dam with an actual weaning weight of 830 lbs. after starting with just a BW of 72 lbs. He has a CED of +1.4 and a BW EPD of -2.7, which should ensure his ability as a reliable heifer bull candidate. 9241 is the natural born calf of Miss Wix 2003 of Mc Cumber after being flushed the year before. We have never held her open to flush but have taken a flush for 3 years in a row and then bred her back to calve. She has never failed to rebreed, and even though 9241 is a younger calf she still weaned him off near the top. She consistently reduces birth weight in her progeny but does not sacrifice performance. Both Armour and Steadfast have been used successfully on heifers and I would expect 9241 to be no different. Herd bull candidate with the credentials to rebuild the nations cowherd with forage efficient, easy fleshing, fertile females that will last a long time.

Selling 2/3 interest and full possession- An eye-catching, big topped, thick rumped son of Mc Cumber Titanium 5005. 947 is a well-balanced, wide based, square hipped bull with excellent feet and legs. He is very free moving and puts a foot down in all four corners. His dam is an outstanding daughter of Mc Cumber Tremendous 2008 with added rib shape, natural thickness and impeccable udder quality. She is the dam to Mc Cumber Influence 7121, who sold as a feature of the 2018 sale to Master Angus in MT. She has never missed to the AI service and continues to raise a good one every year. Her dam B Pride 3150 entered the ET program this past spring and exemplifies what a beef cow should be. She fleshes with ease and has a flawless udder, is good footed, feminine fronted and even while being flushed once in the spring bred back AI and has calved again. 947 will catch your eye and stacks cows that display the fleshing ease, fertility, udder quality and productivity we expect.

Selling 1/2 interest and full possession- Recommended for use on heifers- A really neat genetic package with a combination of the best of OCC and Mc Cumber genetics combined. 981 is a long, smooth, deep ribbed, naturally thick son of the popular OCC sire Zodiac. He is a masculine, sound structured, free moving bull with a large scrotal. His disposition is second to none. As we move bulls up to the working facility he likes to be scratched and is never in much hurry to get anywhere. His 2nd generation pathfinder dam is a full sister to Mc Cumber Tremendous 2008, Miss Wix 2002 of Mc Cumber and Miss Wix 2003 of Mc Cumber. All 3 of the flush sisters have produced top-selling bulls in past Mc Cumber Sales and all 3 are donor dams in our ET program. They have all 3 been flawless for fertility. They have a combined WWR of 18@107. Miss Wix 2012 is a beautiful, perfect uddered, extremely good footed cow with an excellent disposition, fleshing ease, and productivity. If you are serious about an efficient, fertile, problem free cow herd 981 should be near the top of your list.

A thick, heavy muscled son of OCC Big Time 746Z. The Big Time sire group was very popular last year and rightly so. They are high performing, heavy muscled, deep ribbed Rancher bulls with a super disposition and the ability to add payweight to a set of calves. 9195 is no exception and displays the masculinity, muscle shape and performance common among the sire group. His dam is a gorgeous, near perfect uddered daughter of Mc Cumber Fortunate 307 and displays the femininity, udder quality, and hoof structure that is missing in many cattle. 9195 not only should have the ability to sire market topping feeder cattle, but the maternal strength to leave productive, problem free, low maintenance females.

You will like this Mc Cumber Big Time 7188 sire group. They are thick, stout, big bodied, beef bulls with added length and outstanding performance. 9184 is no exception a high-performing, naturally thick bull with a ton of rib and extra length. He has performed well at every level and combines carcass quality as well with an IMF ratio of 116 and a REA ratio of 103. His pathfinder dam never fails to bring in a good one and is always bred first service AI. She is nursing her 8th consecutive AI sired calf and at the age of 9 still has a near perfect udder. She is a deep bodied, feminine fronted cow that never has a bad day. Her dam Lassie 725 of Mc Cumber is still in production at the age of 13 and shows no sign of letting up. A well-bred bull with a pedigree that would work well for our long time customers.

Selling ½ interest and full possession- Recommended for us on heifers- This good-looking, deep ribbed, thick-made son of Steadfast has a unique and predictable pedigree. 9133 is a masculine, eye-catching, heavy muscled calving ease herd bull prospect that is soft made, big bodied, and free moving. He started with just a 75 lb. birth weight and earned a CED of +11 and a BW EPD of -0.8. He really performed post-weaning with an ADG of 3.94 lbs/day and scanned an actual REA of 14.3 sq. in. for a ratio of 110. He is a standout among his pen mates and will be an easy find come sale day. His feminine, deep ribbed, neat uddered dam is a full sister to Mc Cumber Titanium 3127 and has already produced a top bull that sold in 2018 to Joe Bohl. She is an easy fleshing, good footed, near perfect uddered daughter of Fortunate Son. Generations of top cows make 9133 a predictable source of maternal value, forage efficiency, longevity, fleshing ease, and fertility.

Selling 2/3 interest and full possession-Recommended for use on heifers- I wish we had a whole bunch more of these Mc Cumber Tribute 702 sons to offer this year, but it just wasn't in the cards. It has been a real treat to watch them develop. They start small and vigorous and take off from there. 971 is a perfect example of what Tribute can do. He started with just a 74 lb. BW and then weaned off his dam with an actual weaning weight of 800 lbs. as her first calf. He gained 4.22 lbs/day on a 46 Mcal ration and earned a 365-day weight of 1433 lbs. for a YWR of 108. Phenotypically he does not disappoint. 971 is a masculine, big bodied, wide made bull with soundness and balance. He moves with ease as he travels the pen and is a bull I have noticed all winter. His dam is a moderate, near perfect uddered daughter of Mc Cumber Fortunate 241 and produced from a pathfinder, donor dam B Pride 404 of Mc Cumber, who produced into her mid-teens.

Selling 2/3 interest and full possession- Recommended for use on heifers- A top, calving ease herd bull prospect with the masculinity, thickness and body depth not often found in a heifer bull candidate. 9213 not only was born light, but he is one of the top performing bulls of the calf crop. He weaned off his dam with an actual WW of 785 lbs. and then gained 4.22 lbs/day for a ratio of 114. He earned a 365-day weight of 1454 lbs. for a ratio of 109 and then combines both REA and IMF with ratios of 109 and 117 respectively. 9213 has really done it all to this point and combines outstanding performance in a sound, heavy muscled, high volume cow-maker package. His dam is a favorite among the age group with abundant rib shape and depth, extra thickness and an impeccable udder. She combines this with femininity, hoof shape, and fleshing ability. 9213 not only has the performance to sire top feeder cattle, but the maternal strength to leave a set of outstanding replacement females.

Selling 2/3 interest and full possession- Recommended for use on heifers- This eye-catching, well-balanced, sound structured Tribute son has really gotten it done. 9216 is a masculine, square hipped, wide based bull with the added style and look to really sire some attention grabbing progeny. He started with just a 74 lb. birth weight and earned a CED of +12 and a BW EPD of -2.1, from there he did nothing but grow. He weaned off his dam with at 770 lbs. to ratio 104 and then gained 4.17 lbs/day and earned a 365-day weight of 1434 lbs. to ratio 108. His dam is a moderate, feminine daughter of Mc Cumber Titanium 3127 with a neat, tidy udder wit 4 small well-placed teats. She did not weight more than 1150 lbs. this fall when she weaned him, however she really packs some punch. Her dam is an easy fleshing, good footed, near perfect uddered daughter of Mc Cumber 4X13 Extra 829. She has never missed to the AI service and has had all 5 of her daughters retained as replacements and is currently nursing a 6th. She entered the donor pen this spring and was flushed for the first time. The Tribute sons offered in this sale have exceeded our expectations, we have many more on the ground this spring and anxiously await to watch them develop.

Selling 2/3 interest and full possession-Recommended for use on heifers- A Shadow Rider son with impressive masculinity, muscle shape, and soundness. 991 moves with authority as he travels the pen. He is a wide-tracking, free moving bull that can really cover some ground. He would be a real treat to watch covering cows in big country. He is big-topped, and carries that muscle out into a full, expressive rear quarter. He weaned off his dam as her first calf with an actual weaning weight of 760 lbs. and then earned a top 5 spot for ADG at 4.27 lbs/day. He has a 365-day weight of 1412 lbs. for a ratio of 106. His dam is a moderate, extra thick, big bodied daughter of Mc Cumber Titanium 3127 with excellent udder quality. She maintains her flesh with ease and is a fine example of maternal efficiency. She weaned off over 60% of her own body weight. 991 descends from the same line of cows that produced the herd bull prospect 983 selling in this sale.

Maternal grand dam Miss Wix 921 of Mc Cumber.

Selling 2/3 interest and full possession- Recommended for use on heifers- A sure-shot, sleep all night calving ease herd bull prospect by Mc Cumber Tribute 702. 9180 is a well-made, thick topped, masculine bull with more muscle shape and masculinity than you typically find in a calving ease bull. 9180 started with just a 63 lb. BW and earned a CED of +14 and a BW EPD of -2.2. After starting small he really turned it on and weaned off his dam with an actual WW of 760 lbs as her first calf. He continued to perform like all the Tribute sons did and gained 4.27 lbs/day for a ratio of 115 and earned a 365-day weight of 1425 lbs. for a ratio of 107. His dam is a long, thick, feminine daughter of Mc Cumber Fortunate 307, with outstanding hoof shape, and extra heel depth. She is an ET daughter of B Pride 463 of Mc Cumber and is off to a great start. 9180 surely could be labeled a "curvebender".

A bigger- framed, extra long bodied bull, the kind that will sire feeder cattle the feedlots like to feed and produced from an outstanding dam to ensure that his daughters will be the keeping kind. 9194 is a masculine, square topped, long hipped, free moving son of Mc Cumber Big Time 7188. He has performed across the board and is sporting a REA of 13.7 sq. in. for a ratio of 107. His dam is a beautiful young daughter of Mc Cumber Fortunate 241 with impeccable udder structure and teat placement. She has excellent hoof shape and is a feminine, deep ribbed easy fleshing female. She has a spotless record for fertility and is currently nursing her 5th consecutive AI sired calf. 9194 is a bull whose progeny should fit any segment of the industry.

Selling 2/3 interest and full possession- Recommended for use on heifers- 913 stacks all the great cows to ever reside at Mc Cumber. He is bred the best with top cows all throughout his pedigree. In addition to this 913 is a big, long bodied, smooth made, thick rumped son of Mc Cumber Titanium 5005. He started with just a 75 lb. BW and then weaned off his dam at 895 lbs. He has a CED of +10 and a BW EPD of -1.0. He not only will work on heifers, but also has the added performance and size to move on to the cows easily. His dam is an ultra-feminine, long bodied, near-perfect uddered daughter of Mc Cumber Tremendous 2008. Her dam is the pathfinder, donor dam Miss Wix 5139 of Mc Cumber, who at the age of 15 will calve again here at Mc Cumber, and still possesses impeccable udder quality and hoof shape. No end to the cow power behind 913.

A Tremendous son with added length, thickness and masculinity. He combines this with a weaning weight of 865 lbs. and the muscle, soundness and capacity you expect from Tremendous. He puts it in a bit bigger package than some of the Tremendous sons, but for those that like a little bit more frame he should fit the bill. His dam is a productive, neat uddered daughter of Fortunate Son who produced one of the feature heifers in last year's sale to West Family Angus in Iowa.

A long bodied, big framed, smooth made bull with superb structure and outstanding hoof shape and heel depth. He is a big weaning bull with a large scrotal and a bit more frame than some of the 5005 sons. His dam is a highly productive daughter of Rito Revolve with an excellent record for fertility. She is produced by the pathfinder donor dam Miss Wix 5139 of Mc Cumber, who is also the dam of Mc Cumber Fortunate 213. Top cows behind this bull, with the size and length to sire pounds.

Maternal grand dam Miss Wix 5139 of Mc Cumber

A well-built, eye-catching son of 5005 with the balance, soundness and structure to sire those eye-popping females. 9158 is long bodied, square hipped and puts a foot down in the corners. He moves wide and true as he travels the pen and possesses the masculinity and breed character common among the sire group. He is a bit bigger framed with extra length and is produced from a line of cows that are easy fleshing, neat uddered and fertile. His dam is a big, deep ribbed, perfect uddered daughter of Unmistakable. She is long bodied, wide made and one you notice when going through the cowherd.

Another Shadow Rider son that offers a little outcross pedigree for some. 980 is a long bodied, smooth made bull with plenty of rib and thickness. He is super sound, free moving, and well balanced. He has performed well and will sire highly fertile, problem free females. His dam is an impressive young cow with extra fleshing ability, udder quality and natural thickness. She is the kind that can maintain her flesh under the harshest conditions.

964 is a heavy muscled, long bodied, thick-made son of Tremendous. He moves with ease as he travels the pen and is backed by the 6 consecutive generation pathfinder Miss Wix 2027 of Mc Cumber. The Tremendous daughters here at Mc Cumber have risen to the top. Easy fleshing, near perfect uddered, productive and fertile describe them well. There is basically no sort on them, they are good footed, easy going and seem to be poised to last in the herd a long time. His dam is a bit bigger framed Fortunate Son daughter with extra extension through her neck. She is deep ribbed, long bodied, and has an excellent udder. She was the dam to last year's performance stand out Mc Cumber Steadfast 863.

Selling 2/3 interest and full possession- Recommended for use on heifers- A light birth, calving ease bull by Sinclair Shadow Rider that really pushed the scale down at weaning as his dam's first calf. 904 is a long bodied, square made bull with depth of rib and a quiet disposition. He earned a WWR of 110 and combines this with a +12 CED and a BW EPD of -1.3. 904 has heifer bull credentials but possesses enough power and punch to be used successfully on cows. His dam is a high volume, productive daughter of Mc Cumber Tremendous 2008 and calved again early after weaning off this big scamp.

An extra long bodied, stout made son of Sinclair Shadow Rider 1741. 9153 is rugged built, thick, deep ribbed bull that has performed well across the board. After starting at just 74 lbs. he went on to wean off his dam as her first calf with an actual weaning weight of 810 lbs. He gained 3.72 lbs/day and earned a YWR of 103. After trying him first on cows he may work on heifers, he has some added birth weight coming from the dam's side of the pedigree. His dam is a stout, thick, big bodied daughter of OCC Big Time 746Z. She is easy to get a long with and has a neat well-attached udder. Some new blood for long-time customers here.

Recommended for use on heifers- Take it to the bank calving ease bull by Mc Cumber Steadfast 635. 918 is a long, smooth, big topped, eye catching calving ease bull with a +14 CED and -2.1 BW EPD. Not only should he work well on heifers he weaned off his 10 year old dam with an actual WW of 840 lbs. He seemed to be the bull that got picked on quite a bit this winter and it really affected his post-weaning performance. His outstanding dam is an easy fleshing, neat uddered daughter of 4X13 who has left many daughters here at Mc Cumber. She is the type we love to own. She displays the type of fertility, productivity, efficiency and fleshing ability that keeps ranchers in the cow business. This is a good one. A real cow-maker.

A moderate, thick-made, wide based son of Mc Cumber Big Time 7188. 9186 is a wide-tracking, square hipped, thick rumped bull with an easy going disposition. He weaned off his 11 year old pathfinder dam with an actual WW of 800 lbs. He is one of the top bulls for IMF in the sale with an IMF ratio of 137. His 2nd generation pathfinder dam is a top producing daughter of Sinclair Extra 4X13 with a WWR of 9@107 and a calving interval of 9@366 and her 10th calf at side already this spring. Sons of these older proven cows takes the guess work out when trying to build a fertile, productive, efficient cowherd.

Selling 2/3 interest and full possession- 938 represents a mating combination that never misses. It does not matter bull or heifer the resulting calf hits the mark for soundness, balance, performance and soundness. Without exception it results in good cattle, the kind that will excel in every environment and be problem free, low maintenance cattle that pay the bills. 938 fits the mold perfectly. He is a good performing, sound structured, long bodied, heavy muscled bull that gained nearly 4.00 lbs/day and earned a 365-day weight of 1362 lbs. He is easy going, big scrotaled and very good on his feet and legs. His dam is a long bodied, feminine daughter of Mc Cumber Tremendous 2008 produced in the ET program from the influential maternal matron B Pride 463 of Mc Cumber.

Recommended for use on heifers- A calving-ease prospect by Mc Cumber Steadfast 635. 959 has been catching my eye all winter and for good reason. He is a masculine, muscular, thick-made bull with extra length and overall soundness. In addition, he is the top gaining bull on test with an ADG of 4.36 lbs/day for a gain ratio of 118. He did get his ears nipped last winter, which was a pretty common occurrence dealing with the cold we went through. His dam is a big ribbed, high volume cow with a neat, well-attached udder. She has a perfect record for fertility and descends from some top Miss Wix females.

A big-bodied, naturally thick son of Sinclair Piney Creek 6FV16. He is a smooth shouldered, long bodied bull with exceptional soundness and a excellent disposition. He offers a new pedigree for some of our long time customers and would work well on the Titanium line of cattle. He really performed on test with an ADG of 4.17 lbs/day and earned a YWR of 104. His dam is easy to like. She is a high volume, wide made daughter of Unmistakable with impeccable udder quality and an outstanding disposition. She has a WWR 2@101 and has never missed to the AI service and already has an outstanding Tremendous daughter who came into production this year.

Recommended for use on heifers- Bred to be as reliable from a genetic standpoint as we can produce. The 619T X 4X13 combination is a no brainer when it comes to producing outstanding females. Some of the very best cows here right now are bred just like this bull. 927 represents genetic balance very well, not only will he work on heifers, and sire outstanding females, but packs enough punch to be used on cows without sacrificing payweight. He weaned off his dam at 810 lbs. without creep as his dam's first calf and gained 3.72 lbs/day to earn a 365-day weight of 1355 lbs. His dam is a maternal sister to the 4 consecutive generation pathfinder Miss Wix 7126 of Mc Cumber, who produced Mc Cumber Titanium 5005, and is the dam to the herd bull producing full sisters Miss Wix 9122 of Mc Cumber, the dam of Mc Cumber Fortunate 307 and Mc Cumber Trademark 4203, and Miss Wix 175 of Mc Cumber, the dam of Mc Cumber Unmistakable 524, all past sale toppers here at Mc Cumber.

Recommended for use on heifers- 902 represents a new sire group this year at Mc Cumber. Sinclair Piney Creek 6FV16 was sampled here seeing progeny sired by him at the Risse Ranch in SD. We tried to purchase him through the 2017 Sinclair sale, but came up short. While starting with just a 75 lb. BW, 902 performed well and weaned off his dam at 775 lbs. without creep as her first calf. 902 is a well-made, big bodied, square hipped bull with a very good disposition. His young dam is a neat uddered daughter of Mc Cumber Titanium 5005 and is produced by one of the top cows on the Ranch. Her maternal sister by Mc Cumber Titanium 3127 is currently the high ratioing cow in our herd with a WWR of 2 @117 and produced the \$16,000 Mc Cumber Unmistakable 810 in last year's sale. Good choice for long time customers looking for a bit different pedigree.

A long, thick son of Mc Cumber 5005 Titanium 7166, who just falls outside the parameters of a heifer bull. He performed extremely well as his dam's first calf and earned a WWR of 104. He gained 4.08 lbs/day and has a 365-day weight of 1417 lbs. for a ratio of 107. He excelled from a carcass ultrasound standpoint as well, earning ratios of 101 and 117 for REA and IMF respectively. His dam calved early again this year and is a moderate, easy fleshing neat uddered daughter of Resolution, and traces back to the dam of Mc Cumber Tribute 702.

A thick, meaty, stout made son of Mc Cumber Titanium 3127. 989 is a load, full of muscle shape and dimension which he displays readily. He performed well at all measures and earned a WWR of 104 in a competitive group. He descends from the same line of cows that produced Mc Cumber Titanium 5005. His dam is a big, feminine, deep ribbed, daughter of Mc Cumber Tremendous 2008 with a near perfect udder. She is one that you will definitely notice when going through the cow herd.

954 is a thick-made, deep ribbed sound structured son of Mc Cumber Titanium 5005. He displays the masculinity, muscle shape, and base width the 5005 consistently possesses. He is a top gaining bull with an ADG of 3.85 lbs/day and earned a 365-day weight of 1321 lbs. His dam is long bodied, deep ribbed daughter of Mc Cumber Tremendous 9191 with a neat, well-attached udder and excellent foot and leg structure. She is a daughter of Miss Wix 6145 of Mc Cumber, who will calve again this spring at the age of 14. She still possesses outstanding soundness and udder quality. Miss Wix 6145 of Mc Cumber has a BWR 11@98, WWR 11@100, and YWR 11@102.

Selling 2/3 interest and full possession- Recommended for use on heifers- A Tremendous son with muscle shape, added length and an easy-going disposition. 935 is a masculine, heavy muscled calving ease bull with generations of top cows throughout his pedigree. He started with just a 76 lb BW and then weaned off his dam with an actual WW of 765 lbs. He didn't back down post weaning with an ADG of 3.85 lbs/day and earned a 365-day weight of 1340 lbs. for a YWR of 101. His dam is a productive, neat-uddered daughter of Mc Cumber Trademark 4203 and is produced by the pathfinder, donor dam B Pride 463 of Mc Cumber. Predictable, problem free, genetics that will work in any environment.

Recommended for use on heifers- A clean-made, masculine, square topped son of Mc Cumber Armour 7148. This smooth fronted, long necked bull should work on heifers without a problem. He weaned a little lighter off his 11 year old dam, but not because the growth potential was not there. He got on test and gained 4.13 lbs/day and earned a 365-day weight of 1352 lbs for a ratio of 102 an 8% increase over his weaning index. His proven dam is a wide, extra deep daughter of 4X13. She had an excellent disposition and displayed the fleshing ability and maternal strength common among these mature 4X13 daughters.

Recommended for use on heifers- 9219 is a long, smooth, well-muscled calving ease bull with muscle expression to his top and rear quarter. He should be a sure bet on heifers with a +13 CED and -2.2 BW EPD. He gained nearly 4.00 lbs/day and combines calving ease and carcass traits as well as any bull in the offering. He scanned a REA of 14.3 for a ratio of 112 and has an IMF of 3.32 for a ratio of 107. He is the only bull sired by Mc Cumber 2008 Trmndous 793, who is a son of Lassie 935 of Mc Cumber that sold to JR Ranch in WA through the 2018 sale. 9219's dam is a top daughter of Missing Link from the pathfinder donor Miss Wix 5139 of Mc Cumber. She is a feminine, deep ribbed, neat uddered female with top production record.

Recommended for use on heifers- There are only 4 Tribute sons this year, but we couldn't be happier with their development. 9203 is a masculine, long bodied, deep ribbed bull with natural width. He is very easy going, like his sire and is large scrotaled. He came off his dam as her first calf with an actual weaning weight of 775 lbs. for a ratio of 104, gained 3.90 lbs/day and earned a 365-day weight of 1388 lbs. for a ratio of 104. His dam is a perfect uddered, easy going, feminine fronted daughter of Mc Cumber Unmistakable 524. She bred back early and calved again this spring and is nursing a fancy heifer calf by Chapman Memento 7601E. The Tribute sire group is the #1 ADG and YW sire group, granted only 4 bulls, but all 4 are out of first calf heifers and earned a combined WWR of 102. They have gotten it done at every measure.

Selling ½ interest and full possession- Recommended for use on heifers-
A no doubt about it cow-maker with all the new and old generation Miss Wix cows that have propelled our program forward. 9008 is a moderate, deep ribbed, wide based naturally thick son of Mc Cumber Tremendous 2008 and an ET son of Miss Wix 7126 of Mc Cumber. He is a sound structured, free moving bull with extra shape to his rump and hip. His full sisters in production are outstanding young females with impeccable udder structure and outstanding dispositions, both calved first cycle and are doing an excellent job to this point. His flush sisters are real gems of the replacement pen and will provide the maternal building blocks to the future of Mc Cumber Angus. His 4th consecutive generation pathfinder donor dam is still going strong at the age of 13. She still maintains her flesh like a cow half her age and possesses excellent foot and leg structure as well as udder quality. The list of maternal sibling could go on and on, but one of her greatest achievements is Mc Cumber Titanium 5005, which is evident by the consistently strong set of sons offered in this sale and the young, easy fleshing, productive, neat uddered daughters he already has in production. 9008 is the herd builder kind.

Selling ½ interest and full possession- Recommended for use on heifers- 9205 is a masculine, thick topped, wide based son of OCC Tremendous 619T from the 15 year old pathfinder donor dam Miss Wix 5139 of Mc Cumber. He is her natural calf. 9205 is a 7/8 brother to Mc Cumber Tremendous 2008. His dam is the maternal sister to Miss Wix 2022 of Mc Cumber sired by BT Right Time 24J. Miss Wix 5139 of Mc Cumber will calve again any day at the age of 15 and still maintains a tight, neat udder and soundness on her feet and legs. She is showing a little age now, but continues to impress with her longevity, fertility, and productivity, all traits bred in from generations of top Miss Wix cows.

Selling 2/3 interest and full possession- The power bull of the Mc Cumber Titanium 3127 X Miss Wix 2003 flush. 9017 is massively built with abundant width, depth and muscle. He is wide based, free moving, and can really move out. He displays the extra width and dimension his sire commonly stamps into his progeny. 9017 weaned off his recipient dam at 800 lbs. without creep from our cooperater. He is packing a large REA, like his full brother Mc Cumber Steadfast 635. His pathfinder, donor dam is one of the all-time great cows from our program. She has herd sires working across the country and Canada. She has consistently produced top cattle and a full sister to Steadfast and 9017 calved this year and is very impressive. Herd bull prospect with a proven, predictable, fertile, productive dam that consistently excels in her environment.

Selling 2/3 interest and full possession- 969 is ripped with muscle. He is an expressively muscled, masculine, sound, naturally thick son of Mc Cumber Titanium 5005. He displays the added width and dimension to his hind quarter cattlemen search to find. He is built like a tank with extra rib shape and plenty of length and outstanding hoof shape, and heel depth. His powerful pathfinder dam will enter the donor pen this spring. She is a favorite among the sire group. Additionally, she is a big bodied, easy fleshing, naturally thick daughter of Fortunate Son with a neat, well-attached udder and excellent hoof shape. She has a perfect record for fertility and maintains a calving interval 6@365. She is already nursing a standout bull calf by Mc Cumber Tribute 702 this year. She is a 2nd generation pathfinder produced from the proven B Pride 463 of Mc Cumber. His full brother was a feature of the 2018 sale selling to Harris Ranch in ND. 969 displays the powerful muscle shape and dimension that is not around every corner within the Angus breed.

Selling 2/3 interest and full possession- Recommended for use on heifers- A masculine, moderate, thick-made member of the Zodiac X Miss Wix 2012 flush. 9123 is a real tank, with added rib shape, depth of body and muscle shape. He can really get out and travel the pen and also displays the extra scrotal development and easy going disposition common among the sire group. His dam does so many things right. Not only is she highly productive, fertile, and easy fleshing, she has an impeccable disposition, outstanding udder quality, near flawless hoof shape, and tends to give her progeny some extra punch. I have talked about her and her flush mates many times over within this catalog. She is the kind we all could use a lot more of.

Selling 2/3 interest and full possession- Recommended for use on heifers- 9173 is a long bodied, eye-catching son of Sinclair Executive 9XV2. He is easy going, deep ribbed and thick. He is a long-striding, free-moving bull with excellent hoof shape and plenty of heel. He has performed well. After starting with just a 66 lb. birth weight, he went on to wean off his dam with an actual WW of 740 lbs and then gained 3.76 lbs/day and earned a 365-day weight of 1326 lbs. His dam is a moderate, neat uddered, easy fleshing daughter of Mc Cumber Tremendous 2008. She calved again to her AI service and is produced from an outstanding maternal sister to N Bar Shadow. He combines the best from Mc Cumber and the N Bar, including Miss Wix 2022 of Mc Cumber, N Bar Enchantress 4908, and N Bar Primrose Y3051. The maternal strength behind 9173 is second to none.

Selling 2/3 interest and full possession- Recommended for use on heifers- A well-bred calving ease prospect by Steadfast. 9214 combines Miss Wix 2022 of Mc Cumber on both the top and bottom of his pedigree. He is a well-balanced, square hipped, attractive bull with masculinity, and rib shape. He is wide based, good footed and a calving ease bull that has enough performance to be used on cows. He weaned off his 11 year old dam with an actual weaning weight of 800 lbs. to earn a WWR of 102. He has dealt with a slight injury this winter that set him back on gain. He appears to be fully recovered and is guaranteed to stand up. His dam is a feminine, deep bodied, near perfect uddered daughter of 4X13 and Miss Wix 2022 of Mc Cumber, although not as famous as her maternal siblings 9259 has really gotten the job done. She has a BWR 9@98, WWR 9@102 and is currently nursing her 10th calf already this spring.

Bred to sire forage efficient, moderate framed, range hardy cows that will thrive under harsh conditions. 9234 is a moderate, deep ribbed, thick made bull with masculinity and outstanding hoof shape and heel depth. Not only will 9234 be a predictable source of low maintenance genetics but has performed very well. He weaned off his dam with an actual WW of 770 lbs and earned a WWR of 102 and then gained 3.90 lbs/day and has a YWR of 103. His dam is an easy going, neat uddered daughter of Mc Cumber Fortunate 307. She is deep ribbed, naturally thick and after raising twin bulls as a heifer bred back and has not missed a beat since.

A new generation bull that will fit for many of our long-time customers. 925 is a long bodied, deep ribbed son of Sinclair Sun Dial 6TL8. 6TL8 was the selection of Circle V Ranch from the 2017 Sinclair Sale. 925 is a docile, easy going bull with plenty of performance and outstanding structure. His dam from the first crop of Mc Cumber Titanium 5005 daughters is a big ribbed, long bodied, feminine fronted female with a well-attached udder both fore and rear and is produced from the pathfinder donor dam Miss Wix 7176 of Mc Cumber. You won't sacrifice pounds and 925 should sire the type of long lasting, fertile females that aid in the ranch profitability.

Recommended for use on heifers- A bull built unlike many you will have the opportunity to evaluate this sale season. 9240 is a moderate, deep ribbed, thick-made bull with the extra spring and shape to his rib not often seen. He is wide based, wide tracking and square hipped. He has an excellent disposition and outstanding hoof shape and heel depth. His sire consistently improves hoof structure and adds the extra body dimension and rib capacity needed to consume and convert forage efficiently. His dam is a moderate, massively built daughter of Unmistakable with on excellent udder and the width and rib shape displayed by her son. She is off to an excellent start with a WWR 2@104 and a top young daughter already retained in the herd.

9108 is a Titanium son with muscle, thickness, length and capacity. He is a free moving, wide tracking bull with added dimension and muscle shape. He is easy going, sound structured, and large scrotaled. His dam is a beautiful, feminine fronted, long bodied, perfect uddered daughter of Mc Cumber 4X13 Extra 829 and is produced by a highly productive, moderate framed, easy fleshing daughter of Tremendous.

Selling 2/3 interest and full possession- A thick, meaty, masculine bull with top-end performance and herd bull credentials. 9042 has excelled at every measure and combines that with the extra muscle shape, body length and soundness to be a positive contributor to the beef industry. This April born bull earned a 205-day weight of 819 lbs. for a ratio of 105, gained 3.75 lbs/day on test and earned a YWR of 104 in his contemporary group. He is a docile, sound structured, free moving bull that holds his own among a group of bulls nearly 2 months older than he is. His dam is a productive, easy fleshing, neat uddered daughter of Fortunate Son and a full sister to a sale highlight of the 2016 bull sale. Her outstanding dam is an easy fleshing, neat uddered daughter of Tremendous and never fails to bring in a good one. A top-end bull late in the sale that should not get overlooked.

Recommended for use on heifers- A light-birth, calving ease son of 6TL8 with enough muscle, performance and punch to be used on cows as well. He is a thick, deep ribbed, thick rumped bull with excellent performance across the board. He has a test gain of 4.49 lbs/day and earned a 365-day ratio of 105. His productive, fertile young dam is a feminine, deep ribbed, easy fleshing daughter of Mc Cumber Fortunate 213. She is produced from 2 generations of cows with nursing ratios over 102 on at least 6 calves. Her pathfinder, donor dam is a big bodied, extra wide daughter of Coleman Emblazon 780 that was flushed last spring for the first time. You will appreciate his outstanding disposition, soundness and maternal value.

Recommended for use on heifers- 9030 is a real complete, sound structured, masculine, thick son of 6TL8 with excellent hoof shape and heel depth. He displays added shape and expression to his rear quarter and is a free, moving smooth made bull with an outstanding disposition. He has been a top performer from the start, with a WWR of 107. He gained 4.32 lbs/day on test and earned a YWR of 105. He combines this in a well-balanced, attractive package with plenty of muscle and rib shape. His dam is a productive, fertile member of the Rosetta cow family and is off to a good start with top ratios for weaning. 9030 is an outstanding bull deep in the order and one that is bred to move a program forward.

9040 is a long bodied, heavy muscled, high performing beef bull with excellent data across the board and the added length to sire pounds. He is a masculine, big topped, square rumped bull with an excellent disposition and large scrotal circumference. This March born bull weaned off his dam with an actual weaning weight of nearly 800 lbs. without creep and has kept on coming with an ADG of 4.18 lbs/day. He is a big REA bull with a REA of 13.6 for a ratio of 117. His dam is a moderate, neat uddered female with a excellent record to this point.

This young bull is a powerhouse and will not even be a year old on sale day. He is a massively made, big bodied, high performing bull with top-end performance and the added width and dimension we like our cattle to possess. His dam is a high volume, thick-made, feminine fronted daughter of Mc Cumber Tremendous 2008 with a near perfect udder and the eye-appeal to get noticed. She is produced by a full sister to our herd sire and past sale topping, Mc Cumber Fortunate 307. 9285 earned 205-day weight of 763 lbs. for a WWR of 104. He was too young to have a 365-day weight, but came off test weighing 1150 lbs. the first of February, two full months before his birthday. He was the high-gaining bull on test by nearly .5 lbs/day with an ADG of 4.80 lbs/day. A well-bred, high performing bull with maternal strength bred in for generations.

Recommended for use on heifers- A thick, deep ribbed son of Sinclair Sun Dial 6TL8. He has not skipped a beat with a WWR of 106, a test ADG of 4.26 lbs/day and a YWR of 104. He combines both REA and IMF extremely well with a REA ratio of 112 and an IMF ratio of 119. He has an amazing disposition and the first daughters of 6TL8 coming into production are displaying outstanding maternal instincts and disposition. His dam is a beautiful young daughter of Mc Cumber Fortunate 213 with the soundness, capacity and udder quality we demand. 9025 has a bit higher birth weight than I would normally recommend for heifers, but his dam's previous calves were both only 67 lbs. and his sire is a reliable source of calving ease.

Just missing as a heifer bull candidate, 9026 is a big, long bodied, sound structured son of 6TL8. His added performance certainly makes him a good, outcross source of new genetics to be used on the cowherd. 9026 has excelled at every measure with a WWR of 105, a test gain of 4.55 lbs/day and a YWR of 106. In addition to his excellent performance he combines both REA and IMF with raitos of 103 and 111 respectively. His young dam is a stout, deep ribbed daughter of Mc Cumber 8R101 Rito 1122. She is produced by many generations of top Miss Wix females.

Recommended for use on heifers- This incredibly sound structured, heavy muscled, thick-made bull is free-moving, masculine and deep ribbed. Have your mature cow size and fleshing ability gotten away from you? 9242 can help reverse the problem. He started off light at birth but weaned off his dam at 740 lbs. as her first calf. His dam is a moderate, stout made, deep ribbed female with excellent udder structure and a good disposition. She is produced from multiple generations of fertile, productive, easy fleshing cows that hit the mark for forage efficiency.

Selling 2/3 interest and full possession- Recommended for use on heifers- A calving ease bull with breeding leading CED of +15 and a BW EPD of -2.0. He is a long, smooth, clean-made son of Mc Cumber Tremendous 2008 and produced from the pathfinder, donor dam Lassie 935 of Mc Cumber. Lassie 935 has been a long-time donor and a consistent source of calving ease and carcass quality. She is the maternal grand dam of Mc Cumber Tribute 702 and at 11 years old will calve again soon after being flushed as well last spring. A cow maker supreme and a calving ease prospect that will consistently reduce birth weight and make calving heifers a dream.

Recommended for use on heifers- 9251 is a sound, masculine, deep ribbed, thick-made son of OCC Bonus 802B. He started light and has performed very well. He is produced by a favorite cow of mine, who not only is a beautiful, well-balanced, feminine female with a near perfect udder and outstanding hoof shape, but is a gentle, easy-going female who always brings in a good one. His maternal brother sold to Chapman Cattle Company in Canada as a top-selling feature of the 2018 sale and reports of his first calf crop are very promising.

9190 is a moderate, heavy muscled son of Mc Cumber Titanium 5005. He has extra shape and expression to his rear quarter and puts a foot down in all 4 corners. This masculine, muscular beef bull is good footed, and deep ribbed. He earned an actual REA of 14.8 sq. in. and has an off the charts REA/CWT of 1.39. His dam is an easy fleshing, feminine fronted daughter of Mc Cumber Fortunate 248. She has never missed to the AI service and is already nursing a super fancy Tribute heifer calf this spring.

Selling 2/3 interest and full possession-Recommended for use on heifers- 9006 is a moderate, deep bodied, wide made member of the Zodiac X Miss Wix 2012 flush. He should be a sleep-all-night heifer bull with a 75 lb. birth weight and CED of +12 and BW EPD of +0.1. He has a super disposition and large scrotal. His pathfinder donor dam is poised to make a large impact in our program and is already well on her way to doing it.

Recommended for use on heifers- A full brother in blood to 927 and 939. 941 is a sure-shot heifer bull with rib shape, natural thickness and masculinity. He started at just 65 lbs and then weaned off his dam at 750 lbs. without creep. He sports a CED of +16 and a BW EPD of -2.7. His dam is a high volume, near perfect uddered daughter of 4X13 and settled first service AI again this year, actually all 4 of the 4X13 flush sisters raised AI calves the first time out and have again all calved to the first service AI with their second calves. Miss Wix 413 of Mc Cumber is a 3rd consecutive generation pathfinder dam, who has been an influential cow within our program.

Recommended for use on heifers- A calving ease bull by Shadow Rider, with extra length and smoothness. 9165 is a sound structured, good footed calving ease bull that still weaned off his dam with an actual WW of 800 lbs. He displays extra rib depth and displays the cow-making traits his pedigree would indicate. His dam is an extra thick, big ribbed, near perfect uddered daughter of Mc Cumber Tremendous 9191. We only have a few 9191 daughters, but they are all the same, easy fleshing, wide made, good footed, and near perfect uddered.

A stout, masculine, long bodied son of Mc Cumber 1108 Rito 3200, better known as Buster. His sire was raised by Eva as a bottle calf and you would have never known he was a bottle calf, we lost his dam to an injury shortly after Buster was born. This well-bred, heavy muscled, easy going bull is produced by a powerful flush sister to Mc Cumber Titanium 5005, who has a WWR of 3@105. Miss Wix 5131 of Mc Cumber is a massive, wide sprung, stout made female with an excellent record to this point. 9271 combines many top cows and has the added performance to go along with it.

Recommended for use on heifers- A light-birth, calving ease son of 6TL8 with enough muscle, performance and punch to be used on cows as well. He is a thick, deep ribbed, thick rumped bull with excellent performance across the board. He has a test gain of 4.49 lbs/day and earned a 365-day ratio of 105. His productive, fertile young dam is a feminine, deep ribbed, easy fleshing daughter of Mc Cumber Fortunate 213. She is produced from 2 generations of cows with nursing ratios over 102 on at least 6 calves. Her pathfinder, donor dam is a big bodied, extra wide daughter of Coleman Emblazon 780 that was flushed last spring for the first time. You will appreciate his outstanding disposition, soundness and maternal value.

A big framed, long bodied, stout made bull with a ton of performance. 953 is a masculine, big scrotaled, easy going bull that will add pounds to a calf crop. In addition he has a bit different pedigree and would work well as a bit of an outcross for some customers. He weaned off at 900 lbs. without creep, gained over 4 lbs/day and weighed off test at 1350 lbs. His dam is a thick, deep bodied, neat uddered daughter of Tremendous and traces back to Miss Wix 5139 of Mc Cumber. He was born 10 days over his due date, which led to the extra birth weight. If you can handle a little extra birth weight he will certainly sire the added payweight.

Sire, Sinclair Piney Creek 6FV16

Recommended for use on heifers- A bit of an outlier from this sire group of 6TL8 sons in terms of added frame and length. Like his half brothers he started out with a light birth weight and then really took off. He is the high-indexing bull from his contemporary group with a 205-day weight of nearly 800 lbs. for a WWR of 119. He gained over 4 lbs/day on test and earned an IMF ratio of 126. His 2nd generation pathfinder dam is a productive, fertile, neat uddered daughter of Coleman Emblazon with top production ratios. She never fails to bring in a good one.

Recommended for use on heifers- A soft-made, big ribbed, naturally thick calving ease bull by OCC Tremendous 619T. He is a double digit CED bull with a light birth weight EPD. He is easy going, good footed, and has the bred-in ability to sire moderate, easy fleshing females with outstanding udder quality. His young dam by Mc Cumber Titanium 3127 is big middled, wide made and extra stout. She has a neat, well-attached udder and is excellent for hoof quality. She is produced by a 12 year old 4X13 daughter still in production here with a calving interval of 10@366, WWR 10@102, and YWR 10@105. She is currently nursing her 11th calf already this spring.

Recommended for use on heifers- A long, smooth-made son of 6TL8 with a CED of +12 and a BW EPD of -0.8. He has an easy going disposition, excellent hoof shape, and is a strong topped, square hipped bull. He has performed well earning weaning and yearling weight ratios of 107 and 103 respectively. He gained well and has combines Ohlde and Sinclair genetics very well. His moderate, easy fleshing, thick made dam is a daughter of OCC Tremendous 619T and is produced from the line of Rosetta cows that includes the dam of Mc Cumber Stretch 604, for some of you that have followed our program for a long time.

Selling 2/3 interest and full possession- 9014 is an absolute chunk. He is extra wide, deep bodied and heavy muscled. He truly puts a foot down in all four corners and tracks about as wide as one could. He was raised in a cooperator with no creep and has really performed well. In addition to his added muscle he has an exceptional IMF score of 4.17 with only .22 in. back fat for an IMF ratio of 134. His pathfinder, donor dam Miss Wix 2003 of Mc Cumber is a herd bull producing cow that does things right from a fertility, productivity and mothering ability standpoint. Additionally, she has an excellent udder and super hoof shape. You will love the daughters he will sire and the males will be fast growing and heavy muscled.

A masculine, thick rumped, well-made son of Mc Cumber Titanium 5005. He is masculine, deep bodied and excellent on his feet and legs. He weaned off his pathfinder dam with an actual weaning weight of 760 lbs. and has one of the top IMF scores with an IMF ratio of 142. His dam is a productive, easy fleshing, neat uddered daughter of Mc Cumber 8R101 Rito 1122. She has several graduates of the Mc Cumber Bull sale and never fails to bring in a good one. Built like his half brothers and out of a top, fertile, productive dam.

Retaining the right to a future flush- Without a doubt one of the most powerful cow prospects we have ever offered for sale. 994 has not only performed at the top of the calf crop, but has the maternal strength to move any program forward. 994 is a massive, moderate framed, long bodied, big ribbed, naturally thick heifer with the extension and femininity the most fertile females seem to possess. She is free moving, long striding and sound structured. She has been noticed by all the visitors to the Ranch since she was a baby and has not once backed off. In addition she is produced from a top line of cows. Her dam is a powerful, productive, fertile daughter of a past sale topper Mc Cumber Fortunate 248, with the extra mass, thickness and volume we see in her outstanding daughter. She has an excellent production record and has never missed settling to the AI service. 994 is offered strictly as a sale highlight and possesses all the traits we strive to reproduce in all the cattle here. No question she has future donor potential.

945 could be the mold for maternally efficient, easy fleshing, adaptable females. 945 is a beauty, with a ton of thickness, rib shape, and soundness. She is a moderate framed, big bodied, square hipped, wide tracking daughter of Mc Cumber Titanium 3127. She is produced by a feminine, easy fleshing, daughter of 4X13 with a neat udder and maternal strength bred in for generations. Her dam is a maternal sister to Mc Cumber Rito Rolette 1108, and Mc Cumber Fortunate 241 past lead-off and top selling bulls from Mc Cumber bull sales. 945 is a top cow in the making and is backed by generations of females that have made an impact here at Mc Cumber.

A truly powerful heifer by Mc Cumber Titanium 5005. She has the mass, capacity, natural thickness and stoutness to work in any environment. She is wide based, free moving and is built like one that will thrive in any environment. Her dam is a moderate, easy fleshing, thick daughter of 4X13 and possesses excellent hoof shape and udder quality. She is produced from an outstanding pathfinder dam that produced to the age of 14 and never failed to bring in a good one. 909 is the kind we strive to produce and is one of the top heifers born on the Ranch this year.

The Unmistakable daughters are living up to our expectations with tremendous fleshing ease, udder quality and productivity. They are some top young cows in our herd and will continue to make a positive impact on our program. 990 is outstanding, other than getting her ears nipped last winter she is a powerful heifer with loads of rib shape and depth. She is extra thick and still has a neat, extended front end. Her dam is a neat uddered, easy fleshing, high volume daughter of Sinclair Extra 4X13. She is good footed and always brings in a good one. Her dam weaned 11 calves here with a WWR of 102 and set the bar for fleshing ease, and thickness. 990 is the kind that will work in any environment and has the extra power to produce herd bulls.

An absolute, brood cow in the making here. 9117 is high volume, naturally thick daughter of Mc Cumber Steadfast 635. She is loaded with rib shape and thickness from front to rear and still possesses the femininity and attractive front end not often found in a heifer with this much power. Her dam has simply been outstanding with top production and a spotless record for fertility. She never fails to bring in a good one and has produced replacement females and top bulls in past sales. We are calving the first Steadfast daughters and could not be more pleased, they are excellent mothers with impeccable udder quality and mothering instincts. We hope to have a bunch more.

Here is one, neat heifer! 920 is a well-balanced, stout made heifer with extra rib shaped, and thickness. She combines this with a feminine, extended front end and moves exceptionally well as she travels. She is easy going, and not only will make a top cow, but could be one that could find success at the end of a halter. Her dam is a moderate, easy fleshing daughter of Fortunate Son and produced from the first calf of Miss Wix 9122 of Mc Cumber. 920 descends from the same cow family as Mc Cumber Fortunate 307, Mc Cumber Trademark 4203, and Mc Cumber Titanium 5005.

We do not have many Tribute yearlings this year and so 965 is offered strictly as a sale attraction. She represents the new generation of our program well. A Tribute out of a top young Mc Cumber Titanium 5005 daughter. 965 is an extremely attractive, well balanced heifer with extension through her front end and the correctness and soundness one should have. She is a light birth heifer that started at just 67 lbs. and still managed to earn a WWR of 102. This has been pretty common among the Tribute sire group. Light birth and fast, rapid early growth and yearling performance that does not disappoint. Her dam is a powerful, big bodied, thick-made daughter of 5005 with an impeccable udder and excellent fleshing ease. We anxiously anticipate getting these Tribute daughters into production and 965 is one of the best from the first calf crop.

Maternal great grand dam Miss Wix 9122 of Mc Cumber

Sire Mc Cumber Tribute 702

The cowherd known for Outstanding Maternal Traits.

970 is a feminine, stout, deep ribbed daughter of Mc Cumber Trademark 4203. She is a free moving, square hipped female with excellent hoof shape and heel depth. She is a top performing heifer with a YWR of 110 and is produced from a easy going, neat uddered, deep bodied daughter of Mc Cumber Titanium 3127. Her pathfinder grand dam Gale 9228 of Mc Cumber is a fertile, productive, long-lasting daughter of Sinclair Extra 4X13. She is nursing nursing her 12th calf at the age of 11 and shows no sign of slowing down. We went back to using Trademark because we really like the daughters, he consistently sire excellent hoof and leg structure, impeccable udder quality and top fleshing ease on forage.

I certainly don't like to let these Tremendous daughters go. His daughters have risen to the top within our cowherd and do so many things right. 9102 is a good one with thickness, rib shape, and easy going disposition. She has performed well and is the type of female that is typical of the Tremendous daughters. Her dam is a deep ribbed, good producing daughter of Mc Cumber Titanium 3127. We bred quite a few Titanium daughters back to old Tremendous and it really works. There is no doubt that 9102 will be a neat uddered, easy fleshing, long lasting female with plenty of production and a positive impact.

A moderate, naturally thick daughter of Mc Cumber Big Time 7188 displays the added rib shape and body dimension to efficiently convert forage. 9161 is a wide based, square hipped, high volume female with an excellent disposition. Her pathfinder dam is a productive, fertile, deep ribbed, neat uddered daughter of Mc Cumber Rito Rolette 1108 and has produced a top selling son in a past Mc Cumber bull sale. Her dam is a maternal sister to Mc Cumber Titanium 5197 and Mc Cumber 5005 Titanium 829, both who were sale highlights in past sales. Miss Wix 062 of Mc Cumber is still producing at the age of 10 and has gone on to anchor the Buyan Angus herd in Canada. Miss Wix 6145 of Mc Cumber is still in production here at Mc Cumber and will calve again soon at the age of 14. Her maternal sister just calved at the age of 15. Both are daughters of the maternal matron Miss Wix 7111 of Mc Cumber, who is having as large of an influence on our program as her dam Miss Wix 365 of Mc Cumber. A royally bred heifer with a bright future ahead of her.

9162 is another big bodied, wide made, high performing daughter of Mc Cumber Big Time 7188. The only reason we are offering these 7188 daughters is because we have quite a few. They hit the mark from a performance and cow-maker standpoint in so many ways and we expect them to be outstanding females. 9162 has performed well with a WWR of 101 and a YWR of 106. Her dam is nursing one of the early standouts of the 2020 calf crop with a son of Mc Cumber Steadfast 635 that is always catching my eye.

A fancy, well-bred, thick topped, square hipped daughter of Mc Cumber Titanium 5005. 984 could be a real sleeper. She got set back last spring with some sickness, but is totally fine and guaranteed to be so. She is loaded with top cows and is produced from one of the top ratioing females on the Ranch. Her powerful, productive, fertile dam is one of the top Tremendous daughters on the Ranch and is certainly donor candidate this spring. We have several daughters in production by her and a daughter by Mc Cumber Titanium 3127 has a nursing ratio of 2@117 and is nursing her 3rd calf already this year. You can't go wrong with a 5005 out of a Tremendous daughter. The mating flat out works.

Fancy Fancy! 9193 is a sharp fronted, well-balanced attractive-patterned daughter of Mc Cumber Titanium 5005. She is smooth shouldered and then has a big, wide square hip. She will catch your eye when you enter the pen and has done well from a performance stand point as well. Her dam is a near-perfect uddered, feminine, deep ribbed daughter of Mc Cumber Tremendous 2008 and has already produced a top bull in last year's sale as her first calf. This mating combination is a favorite of mine for consistently producing sound, well-balanced, deep-ribbed, heavy muscled progeny that perform well and the result is the same time after time. They are just good, problem free cattle.

A powerful, stout made, deep ribbed daughter of OCC Bonus 802B. 9230 has performed well from the start with extra thickness and base width. She combines this with impeccable hoof shape and heel depth and is built to withstand the rigors of a harsh environment. Her dam is a deep ribbed, easy fleshing daughter of Fortunate Son and is produced by a fertile, productive pathfinder dam.

An April-born heifer with a ton of width, dimension and rib shape. She is really thick, extra deep and sound structured. Her dam is a favorite of mine with added capacity, excellent hoof shape and a neat, well-attached udder. She is a daughter of Miss Wix 9122 of Mc Cumber, the dam of the herd sires Mc Cumber Fortunate 307 and Mc Cumber Trademark 4203. The cows behind 9287 have been some of the best cows to ever reside here and a young heifer like this could be a building block for the continuation of this excellent line of cows.

An Emulation heifer with length, volume and thickness. She has performed well from the start and is a big bodied, naturally thick, heifer with extension to her neck and excellent structure. Her impressive dam is a capacious, extra thick, near perfect uddered grand daughter of Unmistakable from the dam of Tribute, Lassie 113 of Mc Cumber. A potential sleeper in the offering with some of our very best cows behind her.

A March-born heifer with style, balance and the capacity to make a top cow prospect. 9256 is a real eye-catcher with extension through her front end and the squareness and thickness out through her hip. She has performed extremely well amongst stiff competition and is certainly one not to overlook. Her dam is a moderate, easy fleshing, neat uddered daughter from the first calf crop by OCC Bonus 802B and descends from a long line, of top B Pride females.

Maternal sister to dam B Pride 945 of Mc Cumber

A sound, deep bodied, naturally thick daughter of Mc Cumber Big Time 7188. We retained 7188 from his calf crop and AI'd as well as used him natural service. He has not disappointed. His progeny are long bodied, thick-made and deep ribbed. They have very good dispositions and foot and leg structure. His dam is a top Fortunate Son daughter that descends from Miss Wix 7111 of Mc Cumber. This good heifer will be easy going, productive and problem free.

A super fancy, well-balanced attractive daughter of Sinclair Emulation 6FX2. She is long necked with plenty of rib depth and thickness. She has performed well and earned a YWR of 104 and an IMF ratio of 118. Her near perfect uddered, feminine dam is a double bred Miss Wix 2022 of Mc Cumber female with the fertility, udder quality, and maternal value you would expect.

Cows headed out to fall grazing after the calves were weaned

COMMERCIAL HEIFER CALVES

The heifers are the younger end of our calf crop. They are all purebred Angus heifers and were all raised right here on the Ranch. I think you will appreciate the uniformity of the group and would expect these heifers to become moderate, easy fleshing females with the ability to work in any environment. In an effort, to provide our commercial customers with the opportunity to purchase females these heifers will not sell with registration papers. They have been managed exactly the same as the Registered heifers selling in this sale as well as the replacement heifers we are retaining. Many of the heifers have already been cycling, but we will have them vet checked open and breedable prior to the sale. **Selling in groups of 5 or more by numerical gate cut.**
