Welcome

Welcome to our 2022 Bull & Heifer Sale,

We are finally at the point in the cattle cycle that cattle are getting to be good property again. That is, if we can get Mother Nature to give us some moisture.

We have a great set of bulls this year. They came off the cows lighter than normal, especially the ones off the two-year-old cows. They have caught up and have yearling weights that are normal. Drought and lack of grass tested them but they got through it.

82% of these bulls are recommended for heifers, yet most of them are in the top 30% of the breed for weaning and yearling EPD's. All of the bulls have been DNA tested for parentage and higher accuracy for all traits. They have also been ultrasounded for carcass traits.

These bulls have had no creep feed. Just dry grass and their mothers. We feed a moderate ration balanced to gain 3.25 lbs./day. This year they gained 3.43 on the group off the cows and 3.49 on the group off the two-year-old cows. We cull hard on their mothers for disposition, udders and feet.

We will be on Superior Livestock again, so you can preview videos of the bulls ahead of time, bid on the phone or online if you cannot attend.

We will have a great set of commercial heifers this year. They will have their pre breeding shots and be ready to breed. The owners have been buying bulls from us for a long time.

We will video the heifers the day before the sale and have the videos up the morning of the sale. We will show their weights on the scale as they come in, and the buyer can take five head or a truckload.

Come for lunch starting at 11:00 am MT or bid on Superior at home!

Join us at Sweetwater Creek Golf Course after the sale for a steak and some cow talk.

\$Value Indexes - What are they? How do I use them?

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

Top Dollar Angus

Top Dollar Angus Feeder Calf Program

Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

How it Works:

Our program begins with a FREE genetic evaluation based on the current/past herd sires used in your program. We evaluate the sires used in your herd based on their growth and carcass merit characteristics. A herd that qualifies for Top Dollar Angus has cattle that are at least 50% Angus or Red Angus and also ranks in the top 25% of its respective breed for growth and carcass merit.

Once qualified, our team provides boots on the ground to share this valuable information with buyers looking for high quality cattle that will go on feed and perform. Our team has experience coast to coast and works directly in all channels (video, local auction, direct and internet). Plus, we have the resources to provide a very fast turn-around.

What our Customers Say:

"Top Dollar Angus is a program that benefits all levels of the industry. The seedstock producer is rewarded for providing superior genetics to the commercial cattleman, who in turn supplies the feeder with efficient cattle that will produce top-end carcasses. As Top Dollar Angus continues to raise their qualifying standard, these cattlemen will have to up their game to purchase the genetics that will fit the program. These cattlemen will see a return on investment when offering reputation feeders at market time."

Ranch Horse**Bronc Pippert - 701-565-2383****172****LITTLE GUY**

"Little Guy" is a 2005 model. I have owned him since a baby. He is gentle and quiet. He is a finished ranch, head and heel horse. Very cowy and fun to sort on. He has been hauled the last three years in the PRCA as my head horse. Does well with time off. 100% sound. If you want any more info call 406-480-2298.
