WELCOME

Wendy, Rollie, Isaiah and Benjamin

in mind. If we're going to look at these cows every day they better be good looking with fault free udders and ideal teat size. Our main focus is to maintain a cow herd that fits the commercial and purebred operations. This is not an easy task but we cull hard and fast to make it an easier task. As there is a long line of things to cull on we simply want a mama cow that will raise a heavy calf with a tight functional udder maintain her condition year round with sound structure and great feet confirmation. A wise man once said let your cow herd work for you not the other way around. Some cows are better than others but every cow needs to meet these qualities to raise bulls for our customers.

We feel the bulls as a group have become more consistent over the past years. We try to keep all traits in balance. With that being said we feel this year's groups excels in natural performance, eye pigmentation, muscle shape fore to rear, eye appeal and ideal hoof conformation. If this is what you're looking for, I think the drive to Belfield will be well worth your time. We have increased the number of polled bulls and have stayed steady on the horned end. Remember a herd bull can be one of your most valuable investments and we always keep that in mind for you with our breeding decisions.

The Hereford trend has stayed steady for a long time and is increasing in popularity. Ranchers love the black baldy cow and their docility. Feeders love the feed efficiency. Consumers love the tenderness of Hereford beef. This is why we say use Hereford.

We invite you to come any time to view the offering and or the cow herd. Note that we are never too busy for questions, concerns or conversation. We want you to feel comfortable in what you're buying and want to assist you in any way if so possible. This offering will include heifer bulls, power bulls, bulls suited more for feeder cattle and bulls suited more for making replacement females so please contact us on what bull can fit your needs.

We look forward to sale day to see old friends and meet new ones. This is our passion and sale day is our favorite day of the year. We hope you enjoy this year's catalog!

The Baumgarten Family

With the New Year behind us we are extremely thankful for another year of doing what we love every day! With some challenges big and small I think it's safe to say we as ranchers and farmers overcame these challenges and look forward to a more prosperous year in 2022. Remind yourself that beef is still King and the Hereford/Angus cross is number one for pounds and production.

To those of you that are new to our operation we are strictly a family owned operation. It's been that way for a 107 years as well as 107 years of solely breeding Hereford seed stock. Rollie (4th generation) along with his wife, Wendy, Isaiah, Benjamin, Jake (5th generation) along with his Fiancée Savanna and son Theodore run this operation with the help of our two hired men, Perry Emch and Todd Kuelbs. We take great pride on continuing the Hereford legacy on the same ranch for many past decades and plan for many decades to come.

Our cow herd is production oriented with functionality and balance

Jake, Teddy and Savanna

Amber, Audra, Alisha, Luke and Bob Nord

BAUMGARTEN PRODUCTION SALE

Friday, February 4, 2022 • 1:00 p.m. MST
at the ranch south of Belfield, ND

Our first preference is to have everyone at the sale who is interested in our cattle. We realize this is not always possible due to our busy lives and commitments. We encourage our customers to come and visit any time prior to the sale. We are happy to show you our offering this year as well as our cow herd and answer any questions. We will gladly make time for you. We are never too busy. You also have the option of looking at the cattle alone if that is your preference. All the cattle can be viewed on our website and there are videos of the bulls as well. You have the opportunity to bid on DV Auction if you can't attend the sale. Our sale representatives are also available to take phone bids on sale day.

If you have questions about specific lots please reach out to Rollie, Jake or Todd and they will be happy to answer your questions about this great offering of bulls we have this year.

Mandibulofacial Dysostosis (MD)

The American Hereford Association identified a new genetic defect marker called Mandibulofacial Dysostosis (MD). This genetic defect can cause deformation of the lower jaw. This is a simple recessive gene, so the only way it can be a problem is if two carriers are mated to one another. All potential carriers in our herd have been tested. There are 5 bulls in the sale that tested positive as carriers of this gene. Lots 162, 1105, 1109, 1141 and 1186 will be noted with MDC. This genetic marker does not have any negative effect of customers using these bulls on non-carrier Hereford cows or cows of other breeds.

NATIONAL CATTLE EVALUATION TERMS

EPD — EXPECTED PROGENY DIFFERENCE:

Estimate of a bull or cow's future progeny performance compared to progeny of a breed average sire or dam. EPDs are expressed in actual pounds, plus or minus, for birth, weaning and yearling weights and maternal performance.

2019 HEREFORD BREED EPD AVERAGE

CED	BW	WW	YW	Milk	M&G	CEM
2.4	2.9	52	84	24	50	1.7

CED — Calving Ease Direct

BW — Birth Weight

WW — Weaning Weight

YW — Yearling Weight

MILK

M&G — Milk & Growth

CEM — Calving Ease Maternal

SCROTAL EVALUATION

Age in Months	12-14	15-20	21-30	30 plus
Acceptable Range (cm)	30-35	31-37	32-39	33-40

SC — SCROTAL CIRCUMFERENCE:

A measure of fertility. Testicle size indicated by scrotal circumference measured in centimeters is a highly heritable trait very much correlated to reproductive efficiency. A valuable indicator of bull fertility and puberty, and highly related to early puberty in heifers and cow fertility, increased bull scrotal circumference should improve fertility and inherent cow herd productivity.

Sale Accommodations

Trapper's Inn 701-575-4261
Cowboy Inn 701-575-4245
Please reserve rooms ahead of time. Due to oil activity rooms are limited.

Special Announcement

Check out our website for further updates, sale bull pictures and videos and sale catalog at www.baumgartencattle.com.

TERMS AND CONDITIONS: Terms of the sale are cash. Every animal will be sold to the highest bidder with the auctioneer settling disputes as to bids. Announced changes in catalog information sale day take precedence over printed material in this catalog. All cattle are the buyer's property as soon as sold. Bull calves returned to seller will be fed free until April 1st. Feeding arrangements will be made on bull calves only. We would appreciate that all bull calves we feed be insured. Neither the owners nor any person connected with this sale or catalog assumes any liability, legal or otherwise. Animals that are being cared for by seller are done so at the purchaser's risk.

GUARANTEE: Every animal in the sale is to the best of our knowledge, free from any disease or defect unless noted otherwise. All bulls are guaranteed breeders. All claims must be submitted in writing to seller within eight months of sale date, along with semen evaluation and health report, at buyer's expenses, from veterinarian. Seller must be contacted as soon as buyer is aware of the problem and before the bull is disposed of. Seller shall have the privilege of trying bull after his return before making any adjustments. In case an adjustment is required, it will be made with a replacement animal of equal value to the animal. We assume no liability, legal or otherwise, to make any further compensation to the buyer. All Hereford bulls selling for \$3000 or more will be guaranteed for one full breeding season by Baumgartens. Breeding season is defined as the 90-day period following the first turnout of the bulls. 100% of the value of the injured bull, minus full salvage value, will be given as credit in a future sale or toward a replacement bull if one is available. Salvage value, if any, belongs solely to the buyer. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 15, 2021. Injury resulting in death or death of bull will not be the responsibility of Seller. This is an insurable risk that the purchaser can obtain coverage for through Joana Friesz, (701) 400-8744 or (701) 843-8744.

EMBRYO TRANSFER PROGRAM: Just a short note here to advise you about some information on our ET program. Please remember that the calves that are ET calves are not raised on their natural mother, but instead a recip cow. Some of these recip cows do not have that natural ability to milk and feed a calf the way the original ET mama cow does. Therefore, sometimes the performance of an ET calf is not as good as her natural calf is, but the genetics are still there to produce that type of performance.

INJURY OR DEATH PRIOR TO DELIVERY:

Injury resulting in injury or death of the bull prior to delivery will not be the responsibility of Baumgarten & Nord. This is an insurable risk with coverage offered at the time of sale at the following cost of coverage.
6 month term.....4.0% of purchase price
1 year term.....6.0% of purchase price

NEW: We offer a sight unseen guarantee. Call Rollie for details.

DELIVERY: \$50.00 will be taken off the top of the purchaser's price if the bull is taken home with the buyer on sale day. Free delivery up to 300 miles on bulls. No delivery on heifers.

ABSENTEE BIDS: Anyone wishing to bid who cannot attend the sale may place phone or mail bids by contacting Rollie or any sales representative.

HEALTH: Health of the Baumgarten herd is excellent. State is Bovine Brucellosis free and Accredited Bovine Tuberculosis free. Females are officially calvhoo Bangs vaccinated. Individual health papers will be furnished for shipment anywhere.

REGISTRATION AND TRANSFER:

Registration certificates will be transferred to buyers upon request at seller's expense. When making settlement, buyers must give complete written name and address information for making transfers.

Our go to calving ease sire that is gaining extreme popularity in the breed. On 197 calves he ratios 98.7 for BW and 91 calves ratio 101.6 for YW. 619 is one of those rare bulls that sires light calves at birth and heavy weaning weights with true performance. Sound structure and beautiful females. The first daughters are in production and they are broody, feminine cows with attractive, level udders. This bull will leave his mark on the breed. Many well respected seedstock producers have sought out his semen and sons alike. He is owned with Stuber Ranch.

We selected 8392 to run with our cows for his width, shape and eye appeal. He stamps his offspring with eye pigment, superb muscle shape and natural performance. His sons show a great deal of gain on feed and high carcass traits which should indicate profitability in feeder calves. 9 sons will be offered.

He is an AI sire that stamped his progeny with fleshing ability, functionality and more moderate frame. His bulls are short marked, shapely & robust. A very consistent set of cowboy bulls here. 4 sons sell.

4030

REFERENCE DAMS

BCC LACEY 048X - 43124559

The performance cow. She has done it all from raising herd bulls to excellent females. Breeders from all aspects of the industry have admired her and her offspring alike. She is one of those cows that seems to always out breed herself, a no miss kinda cow. She is the Grandmother of 619 and will have 11 daughters in productions in 2022. Direct sons sell as 153, 154, 157, 187, 1118, 1139. Grandsons are 102, 152, 162, 0165, and 0175.

REFERENCE DAMS

CL 1 DOMINETTE 617S - 42673551

The female producer. Her daughters are big bodied, correct in their skeleton, flat shouldered, and very feminine about their head. They are very milky. We would love to show you the udders on these cows. She raised her last calf at 12 years old and still did a superior job. Her genetics are cow herd builders. Her genetics in the sale include 181, 188, 189, 1102, 1121 and 1127. She ratios 107 for WW. Her 39 daughters ratio 102.8 for WW. We have 12 daughters working in the herd.

CED	BW	WW	YW	MILK	M&G	REA	MARB.	CHB\$
+4.6	3.5	55	74	34	61	.50	-.13	83

BCC L1 TAMA 580C ET - 43623925

Recently sold to Tim Merek of Iowa. Her performance records indicate heavy milk and performance and ratios 109 for WW on 8 head and she did this with a beautiful, high quality udder. Awesome structure and feet and legs. She is designed with a correct spine, ultra feminine look and always stays in ideal condition. You want a whole herd of this kind. Furthermore backed by decades of high quality females and herd bulls. Direct sons sell as 181, 188, 189, 1102 & 1121! You'll see her influence for years to come!

CL 1 DOMINETTE 352A 1ET- 43379788

Short marked, dark eyed, and has a ton of length and performance. She passed on all these traits with authority. Her udder was beautiful and she milked like crazy. All her daughters raised big, heavy calves with lower BW. We used one of her sons, 882, two years ago on a group of heifers with great success. She ratios 98 BW, 104 WW, 102 YW. Her calves ratio 101.9 WW. There are five daughters working in our herd. Two sons, 0120 and 1150, will be offered.

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

The result of a true breeding bull and a productive cow. 171 is made awesome with plenty of punch. His EPD profile reads amazing with explosive carcass numbers. The daughters are going to be extremely valuable out of 171. Top 1% SCF, REA, BMI, BII, CHB, top 10% YW & Marb., top 20% CED, BW, top 25% WW. Could be used on heifers. Maternal brothers sell as 1119, 1120 & 0401. 65% eye pigment. Horned.

He is a great up and coming sire and big things are going to come from his progeny. Outcross genetics to most popular Angus pedigrees and will work multiple sectors of the industry.

YEARLING ANGUS BULLS

Phone: Bob 701/361-6493, Luke 701/446-6157.

Please call us for sight unseen guarantee. Free delivery on all bulls selling for \$3,000 or more.

All bulls have genomic enhanced EPDs through Angus GS.

Bull Development

Only the top cut of bulls that excel in performance and structure will be in the offering.

Bulls were weaned October 5th and were placed on a high roughage total mix balanced ration of chopped hay, silage, dry distillers grain, vitamin mineral package and whole corn.

They have been vaccinated from birth to post weaning with Alpha 7, Inforce 3, Vision 8 with Somnus, Vista Once SQ and drenched and poured.

Feel free to contact us with any other questions you may have.

Perry Emch has been working for Baumgarten Cattle Co. for 7 years. He is a long time neighbor as well.

Todd Kuelbs came to work for Baumgarten Cattle Co. in the summer of 2019. Todd has a couple of bulls in the sale.

PAYBACK MONTHLY SPECIAL:
Payback Minerals
available with Zinpro® Performance
Minerals and Bio-Mos®

\$40 OFF
PER TON

Ranchers, make
PAYBACK MINERAL
part of your productive feeding program,
for a healthy, profitable herd.

Payback Mineral

PAYBACK

Heifers:

- ▶ Improved growth
- ▶ Improved ovulation
- ▶ Better conception rates

Cows:

- ▶ Tighter calving intervals
- ▶ Improved conception rates

Bulls:

- ▶ Earlier puberty
- ▶ Enhanced semen quality
- ▶ Improved foot health

Healthy calves:

- ▶ Improved colostrum quality
- ▶ Better vaccination response
- ▶ Lower incidence of scours

Heavier calves:

- ▶ Increased milk production
- ▶ Tighter calving intervals
- ▶ Greater weaning weights

Payback mineral forms the foundation of a productive feeding program resulting in the best return on investment for your operation.

BLIZZARD - In 1888 a gallant black mare saved the day

Anna in this story was Jordis Baumgarten's grandmother.

The blizzard is among Nature's most dreaded phenomena, and occasionally one of unusual violence roars across the plains.

Such was the blizzard of 1888 which struck with devastating fury Jan. 12. That was 79 years ago, but the memories chill and awe to this day.

The story I am about to tell was told to me by my father who immigrated from Norway with his parents in the summer of 1881. He was 11 years old the winter of 1888.

The morning of Jan. 12 was calm and sunny. The blue sky and smiling sun caused many people to start for neighboring towns to replenish dwindling stocks of food and other supplies.

Father's oldest sister, Anna, decided to visit her cousins who lived on a farm some distance to the southwest. It was about a mile going around by the road but Anna walked briskly along the well-worn shortcut that cut diagonally across the prairie.

It was about 11 in the forenoon when she arrived at her aunt and uncle's home. The hours sped by quickly as their big family of boys and girls prevented any dull moments.

It was nearing 3 in the afternoon when Aunt Carrie noticed an ominous cloud in the northwest and admonished Anna to start for home at once.

As Anna hurried homeward she glanced at the oncoming cloud. It was a peculiar one, massive and gray, with swift-moving ragged edges marking its advance.

The weather changed abruptly. In a matter of minutes the sun was obscured. The river woods to the west disappeared behind a curtain of gray and white. The curtain moved rapidly toward Anna. Then it struck her with such force that she fought to keep her balance in the swirling mass that obliterated everything around her. She became frightened and sought to turn back but the snow laden wind seemed to buffet her even more. So, confused and panic-stricken, she turned again and trudged forward into the blinding storm.

At home, her parents became alarmed when the storm arose so suddenly and Anna had not yet returned. There was no way of knowing if she had remained at her aunt and uncle's farm or if she had begun the homeward trek, not realizing this was no ordinary storm. Grandfather decided to find out before the storm worsened and darkness fell.

He made his way to the barn and flung a blanket on Kate, the black mare. Grandfather's years in the Cavalry in Norway were to stand him in good stead that day. He and Kate disappeared into the howling winds. By the time he reached the home of his sister-in-law the storm had increased in such intensity that the visibility was zero at times.

One can well imagine Grandfather's dismay when he learned that daughter Anna had already left for home and somewhere along the way he had missed her. He wasted no time in remounting Kate and plunging into the roaring storm once more.

Kate knew the way well and needed no guidance. Now Grandfather looked for footprints and between the strong gusts of wind he made out a few that had not yet been drifted over. He followed them as best he could, hoping desperately that he would find Anna safely at home. Then to his consternation he saw that the footprints headed off in a southeasterly direction. Again, he hoped to find that they had turned in the right direction but after a few yards he realized the horrible truth. Anna had lost her way.

The storm seemed determined to tear him from the horse's back and bury him with vengeance beneath the deepening snow. The temperature was dropping rapidly, too, and his hands began to freeze within the heavy mittens. He could no longer feel to guide the horse.

But Kate was being guided by some strange instinctive wisdom. They were being driven by the wind in the direction away from home, warmth and safety, but the game little horse never faltered. On she plodded until they came upon a dark object that fell, then rose and staggered on. Grandfather passed his hand before his eyes. His vision seemed blurred, Kate, however, suffered from no such uncertainty. She caught up with the struggling figure and halted beside it. A frightened half-frozen face looked up.

"Anna!" Her father lifted her up on the horse. Overwhelming joy gave him new strength. "Go home, Kate!"

If the journey had been difficult and dangerous before it was doubly so now because they were facing the raging blizzard. Courageous Kate unhesitatingly began the task that was to tax her to the utmost. Grandfather's main concern was to remain on her back with his precious burden. It was a matter of Kate's sense of direction and her endurance.

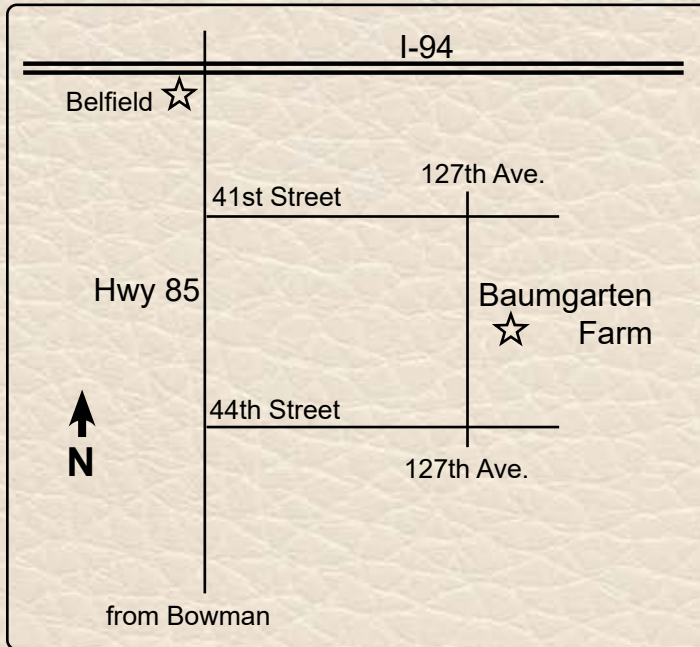

On and on and on. How much more could man and beast stand? Finally it was over. Kate halted wearily. Grandfather raised his head and opened his eyes with difficulty. They were virtually frozen shut. It took some moments before he recognized the building by which they stood. Faithful Kate had brought her master and his daughter directly to the door of their own house.

The killer blizzard of '88 was to claim more than a thousand lives before it roared its way into oblivion but thanks to a persevering black mare this pioneer father and daughter were not to be counted among its victims.

BAUMGARTEN PRODUCTION SALE

Friday, February 4, 2022 • 1:00 p.m. MST
at the ranch south of Belfield, ND

From I-94 at Belfield, 5 miles south on Highway 85, turn left at 41st street and go 3 miles east, turn right at 127th Avenue and go 1 ½ miles south.

Coming from the south turn right on 44th street after mile marker 67. Go 3 miles east and then turn left at 127th Avenue and go 1 1/2 miles north.
