

McCumber *Angus* Ranch

March 24, 2021 | PRODUCTION SALE | 3:00 P.M.

AT THE RANCH | 1 MILE WEST OF ROLETTE, NORTH DAKOTA

www.mccumberangus.com

It is an honor to welcome you to our annual production sale. The past year presented challenges we would have never imagined. It is encouraging to see the perseverance and drive within our industry as you, our peers, pushed forward through these challenges. The future is bright and we are optimistic that as an industry we will begin to reap the rewards that we as beef producers deserve. We can't thank you enough for the continued support and interest in our breeding program. For 57 years you, our customers, have been the focus of our breeding program. Our goal is to produce cattle that will go out and work for the grassroots cow-calf producer. We don't take our role as a seedstock source lightly.

We are extremely proud of the offering this year. Without a doubt this is the most powerful, most consistent set of bulls we have ever offered. It is a unique offering with moderate framed, heavy muscled, deep ribbed bulls all through out the offering and backed by a cowherd that for 57 years has been selected to be fertile, productive, and problem free. We have not wavered in our commitment to breeding Angus cattle that are truly balanced, while keeping the mother cow and her functionality in any environment a top priority. In an ever-evolving industry one fact remains, the mother cow is the key to profitability in a cow-calf operation.

The offering is highlighted by the first Tribute progeny in volume. He has far exceeded the lofty expectation we had for him. His calves are born easy and then go. They convert and perform on pasture and on feed. The first daughters are a real treat with excellent mothering ability, udder quality and an easy fleshing look. In addition, the progeny by 5005, Armour, and Steadfast continue to impress and we are excited to offer a couple new sire groups this year, the Manzano Electra 0214 and Chapman Memento 7601E. The bulls and females offered are unlike many you will have the opportunity to evaluate. They are bred and built with a style all their own. We invite you to come anytime and evaluate them and the cowherd that produced them.

The sale will once again be broadcast by Superior Productions. The bulls will be videoed in mid-March and a video of each bull and heifer will be available on the Superior website or a link from our website.

Like always, all the information is provided in the catalog. We will have scrotal measurements available sale day or by request prior to the sale. The cattle will sell in catalog order. We stand behind the bulls and heifers 100%. If you have a problem, please let us know so we can take care of it to the best of our ability. Please join us for lunch at Noon, and the sale starting at 3:00 P.M. CST. Feel free to contact us with any questions and stop over anytime to view the bulls and go through the cow herd.

Sincerely,
Matt and Chuck Tastad

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock and is the suggested process for anyone who does not have consistent, high-speed internet. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form. Fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding program for cattle buying. **Please note that high speed internet is required – this is not for dial-up or satellite internet.** Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy – just go to the homepage of www.superiorclicktobid.com and follow the outlined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved by the ranch you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. The sale will be broadcast via satellite on Dish Network channel 997 (SLA-TV). Please note that there is a short delay if you are watching the auction on television so be sure to call in a couple lots ahead of the lot you are interested in bidding on. The sale will also be broadcast live on the internet at www.superiorclicktobid.com – just go to the home page and select the auction. Remember you can call in to bid whether you watch on the TV or on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452 or 800-422-2117.

Bidders who are successful in making purchases via satellite or internet will be contacted by the ranch after the sale to settle payment and make shipping arrangements,

Sale Terms & Conditions

All cattle sell under the standard terms and conditions of the American Angus Association. Terms of the sale are cash.

Volume Discounts: We will discount your purchase price 3% on 3 head purchased by one buyer and up to 10% on 10 head purchased by one buyer.

Delivery: We offer free delivery in North Dakota and adjoining states on all bulls and free delivery up to 1,000 miles on purchases totalling \$2,500. Beyond 1,000 miles delivery will be billed at cost.

Sight Unseen Purchase Program: If you cannot attend the sale and would like to purchase bulls, please give us a call and we'll be glad to help you with your order. Describe the type of bull, minimum and maximum parameters and price range. We want to assure you that your bid will be handled with the utmost professionalism and your money handled like it is our own. We guarantee 100% satisfaction on all orders. If you get the bull and don't like him, we will take him back.

Multiple locations in Minot ND

Rolette ND has a 3,500
foot paved runway. Minot,
ND is served by Northwest
Airlines. Minot is 90 miles
from the ranch.

Herd Health & Nutrition

Herd Health: Bulls have been vaccinated with Vista Once SQ, 7-Way w/Somnus, poured with Ivermectin, and feed Safeguard. The bulls will have passed a complete fertility test. All cattle will sell with interstate health papers.

Nutrition: The bulls were fed a high roughage ration. The ration was balanced to ensure the bull's soundness and longevity. We reached a maximum of 46 Mega Cals, and the protein level was 13.2 percent. The bulls are hard, sound footed, and have not been pushed at all. The ration consisted of Alfalfa, Corn Silage, rolled corn and mineral package. For those that do not know what earlage is, it consists of the grain, cob, and husk, thus adding additional fiber to the ration. The bulls were raised on momma's milk and grass from birth to weaning and have performed well this winter.

Marketing

If you have calves sired by our bulls, or females bred to our bulls, we would like to help you market them. We along with Spickler Ranches sponsored the 14th Annual Angus Partners sale. The consignors realized a considerable premium over the current market for their McCumber and Spickler sired replacement open and bred females. We would be happy to accept your consignment at any time. I would also suggest checking out the Angus Source program. This is a very effective way to set apart your Angus sired feeder cattle, and replacement females.

Semen Interest

You will notice that we are retaining an interest in quite a few of the bulls. These are bulls we may want to collect semen from in the future for use within our herd. If we are able to sell semen from your bull, we would share with you any revenue generated from the sale of semen. The bulls would be collected when it was convenient for you. The buyer has full possession and salvage value of the bull. Many of these bulls will undoubtedly sell in the price range of the commercial man.

Selling ½ interest and full possession- Recommended for use on heifers- A highlight of the sale season. Mc Cumber Global 07 is a calving ease, herd bull prospect by Tribute that has excelled from the start. One of the top prospects bred in our program. He combines calving ease, performance and the maternal heritage to ensure his ability as a top herd sire. He exhibits massive rib shape and volume with thickness, muscle and style. A well-balanced bull that displays a powerful body type and is easy to spot among a stiff set of contemporaries. He is large scrotaled, docile and sound. His young dam is a moderated, big bodied, neat uddered daughter of Mc Cumber Steadfast 635. She bred right back and calved again to her AI service this year and is nursing another top prospect. She is produced from two consecutive generations of pathfinder, donor dams here at Mc Cumber and goes back to one of the most influential cows in our program B Pride 463 of Mc Cumber. The cow power behind Global is time-tested and proven. In his 3-generation pedigree, every female is a pathfinder and donor dam here at Mc Cumber, except his dam who raised him as her first calf. He goes twice to Miss Wix 2022 of Mc Cumber and combines the best of the B Pride, Lassie and Miss Wix cow families. With Tribute semen in short supply, Global becomes a logical choice to go forward with. The kind that doesn't come along every day, Global is poised to make a positive impact.

Selling ½ interest and full possession- A true power bull in terms of muscle mass, body width, rib shape and stoutness. Remington is a rugged built, masculine, wide tracking, big hipped son of Mc Cumber Titanium 5005 and one of the top sons we have produced. He is the type of bull not often found in today's race for extreme growth, high carcass Angus genetics. He displays true Angus breed character and moves across the pen with authority, putting his large well shaped hoof down true and wide. He has performed well from the start with excellent performance at every measure. He is built to add power in terms of rib shape, natural thickness and bone density. His 11 year old dam has been a staple of consistency. Miss Wix 0170 is a big volume, naturally thick daughter of OCC Tremendous 619T with impeccable teat size still at age 11, hoof shape, and soundness. She is nursing her 10th calf already this year and has produced 3 daughters all of which are top cows within our program. She is the type of cow we would love to have a whole herd of. She just gets the job done year in and year out. Remington is a sale highlight and one of the stoutest, heaviest muscled bulls we have bred. Not only will he power up a set of females, but is bred to ensure they are productive, fertile and problem free.

Selling ½ interest and full possession- A herd bull prospect by 5005 that looks good from any angle. Way more than just a performance bull 049 is the result of a proven mating that never fails to result in a good one. A ¾ brother to Armour and Remington, 049 fits the mold. This big, long bodied, sound structured herd bull has extra length, depth and thickness. He gained 4.68 lbs/day over a 142 day test on just a 45 Mcal ration and weighed off-test at 1495 lbs. to nearly catch Tribute as our all-time heaviest yearling weight bull in our 57 year history. He has a big, square top that carries out into a perfectly designed hip and rear quarter. He is wide based and moves freely as he travels the pen. His moderate framed, beautiful dam by OCC Tremendous 619T is a favorite of mine. She displays perfect hoof shape and has impeccable teat size and udder structure. She is extremely fertile and produced the 3rd top selling bull in our 2018 sale to Chapman Cattle Company in Alberta. His first son's just sold this past February and averaged over \$7000. 049 will get your attention with his overall balance, soundness and structure, combined with real world top end performance and the bred in ability to sire females to build a cowherd around.

Selling ½ interest and full possession- Recommended for use on heifers- A herd bull prospect with unlimited potential. An outstanding son of Tribute that started with just an 80 lb birth weight and went on to be one of the top performers of the calf crop. 011 is a massive, thick-made, long bodied bull with a large scrotal and excellent disposition. He is a wide based, big ribbed bull that is square hiped and wide based. He gained 4.08 lbs/day on a high roughage ration that never exceeded 45 MCals. He came off test weighing 1430 lbs. and earned a YWR of 108 among a stiff group of contemporaries. His highly productive dam is a feminine fronted, big bodied daughter of Mc Cumber Titanium 3127 and is produced by a top pathfinder dam that produced to the age of 15. His dam produced the Lot 5 and 4th top selling bull in last year's sale to Richard Angus in ND, and is positioned to make a positive impact within our program. Big Time herd bull prospect with the calving ease, performance, and body type to appeal to many.

Selling 2/3 interest and full possession- Muscle shape, body depth, extra stout and exceptional performance describe this herd bull prospect by Mc Cumber Armour 7148. This powerful, masculine, performance bull has been a standout since birth. He weaned of his pathfinder dam at 890 lbs. to rank as the second heaviest actual weaning weight bull of the calf crop and has not looked back. He came off test at 1425 lbs. and carries his weight in a sound, well-balanced package. His 4th consecutive pathfinder dam is no stranger to producing powerful herd bulls. She is a powerful cow with abundant capacity, natural thickness and ruggedness. She fleshes with ease and combines this with fertility, productivity and consistency. Her 5005 son from last year renamed to Mc Cumber Carbon 972 was a sale highlight and sold to Juan Debernardi SRL in Argentina and Eaglehawk Angus in Australia. 075 is a herd bull prospect with power, performance and maternal quality bred in for many generations.

Selling 2/3 interest and full possession- A powerhouse performance bull with balance, style and soundness. 013 will catch your eye with his herd bull presence and overall soundness and structure. He packs a lot of pounds and combines this with extra mass, thickness and length. He puts a foot down in all the corners and moves with ease as he travels the pen. He represents a new sire group for us this year. His sire was proven in the Diamond 7 Angus herd in New Mexico, where they have had over 60 daughters in production. He was proven the old fashioned way, through progeny performance. His dam was in production to the age of 15 and 0214 ran natural service to an old age himself. We used 0214 again last spring and have a much larger group of calves on the ground this year. He represents some new genetics for long time customers and a bit of an outcross to add to our program. 013's dam is a high volume, naturally thick daughter of Fortunate Son with a neat, well-attached udder and maintains her flesh well all year round. He weaned off his productive dam at 885 lbs and then gained over 4 lbs/day on a 142 day test. He weighed off test at 1460 lbs and earned a YWR of 110 to rank among the top 5 bulls for yearling weight. A new genetic option with the rib shape, natural thickness and soundness we expect our cattle to possess.

Selling ½ interest and full possession- Recommended for use on heifers- A truly unique, sale highlight bred to sire forage converting, easy fleshing, low maintenance females that excel for udder quality and maternal instinct. 098 has been a standout since birth with impressive muscle shape, added rib dimension and masculinity. He has the softness of a cow-maker and the muscle expression not often found in a calving ease bull. He has added base width and tracks wide as he moves. His highly productive, fertile, pathfinder dam has risen to the top of our program. She consistently reduces birth weight, adds body mass and muscle and produces performance in a moderate forage efficient package. The flush sisters to 098 are impressive. We have two older full sisters that calved this year for the first time and possess the body mass, natural thickness and impeccable udder quality you would expect. We got the opportunity to see Zodiac's dam this past summer at the age of 11 nursing an outstanding calf and displaying the impeccable udder quality, fleshing ease and rib dimension we come to expect from the Ohlde program. We really appreciate the opportunity afforded us to use Zodiac and thank Tim and Trudy for the outstanding program they have built. I expect 098 to make his mark by siring the type of female that keeps Ranchers profitable.

Selling ½ interest and full possession- A truly, unique herd bull prospect with the muscle mass, body dimension, and soft design to sire conversion oriented, easy fleshing females. 0289 has been on my radar since the day he was born. Born on sale day last year this wide based, big bodied bull has hung with his contemporaries 1 to 2 months older than him. He has performed well at every measure with a 205-day weight of 835 lbs. without creep and then earned a 365-day weight of 1424 lbs. for a ratio of 109. He has a large REA of nearly 15 sq. in. for a ratio of 110 and combines this with a body type not found on every street corner. His big ribbed, easy fleshing, perfect uddered dam is a maternal sister to Mc Cumber Tribute 702. She is a docile, wide-made female with the extra rib shape and body dimension to convert forage. She is produced from 2 consecutive pathfinder, donor dams here, both which are leaving a major impact on our program and excelling for productivity, fertility, fleshing ease and udder quality. A herd bull prospect that will sire the kind of soft made, big bodied, easy fleshing females that can move a cowherd.

Selling ½ interest and full possession- Recommended for use on heifers- An Armour herd bull prospect produced from one the top cows on the Ranch. Lassie 0101 of Mc Cumber excels for udder quality, hoof shape, fleshing ease, fertility and productivity. She is a herd bull producer and her daughters retained in the herd are making their way towards the top. 0191 is an attractive, well-balanced bull with muscle shape and capacity. He displays more shape and expression to his hip and rear quarter than what is common among calving ease bulls. He weaned just a bit lighter due to a slight injury to his dam, but more than made up for it on-test with an ADG of nearly 4 lbs/day and a 365-day weight of nearly 1400 lbs for a ratio of 105. A cow-maker supreme with the softness, extension and mass to sire the type of females everyone wants.

Selling 2/3 interest and full possession- A real sale highlight here. This thick, deep bodied, wide tracking son of Mc Cumber Armour 7148 has jumped through all the hoops. He is a moderate, easy going, big topped thick rumped bull with added performance in a moderate, forage efficient package. He earned weaning and yearling ratios of 106 and 106 respectively. He gained 3.73 lbs/day on test and scanned a large REA for a ratio of 102. His OCC Tremendous 619T sired dam is a favorite of mine with impeccable udder quality, hoof shape, fleshing ease and fertility. I sound like a broken record talking about these Tremendous daughters, but they are very much a like and the type of female that is fits our ideal. 0239 is actually double bred to two top OCC Tremendous 619T daughters, combining his dam Rosetta 277 of Mc Cumber and Armour's dam Miss Wix 2003 of Mc Cumber. The predictability bred into 0239 takes the guess work out of how he will sire. Herd bull candidate with a balance of traits and the type of cows behind him that help ensure profit at the cow-calf level.

Selling 2/3 interest and full possession- An Armour son with impeccable style, extension, stoutness and muscle. 014 is a big, stout bull with added length and eye-catching presence that is common among the Mc Cumber Armour sire group. He is one of the top performing sons of Armour in the offering with top ratios at every measure. His pedigree is loaded with top cows tracing twice to Miss Wix 7126 of Mc Cumber the dam of Mc Cumber Titanium 5005 and Miss Wix 9122 of Mc Cumber. 9122 is the dam of Mc Cumber Fortunate 307 and Mc Cumber Trademark 4203, both past top selling bulls through our sale and both used back successfully within our program. A lot larger group of Armour son's in this year's offering and they will not disappoint. He consistently sires an outstanding look and soundness to his progeny and the first daughters in production are what we hoped they would be. It won't be hard to spot 014, he combines a ton of muscle shape, thickness and soundness into an impressive, eye-catching package.

Selling 2/3 interest and full possession- A big, stout, high performance bull by Mc Cumber Steadfast 635. 0171 is a long bodied, stout, heavy made bull with a big, expressive top, extra rib depth and an easy going disposition. He has performed near the top all the way through, with a WWR of 107, an ADG of 3.94 lbs/day and a off-test weight of 1400 lbs for a YWR of 109. His dam is quickly rising to the top. Miss Wix 685 of Mc Cumber is a deep ribbed, high volume, feminine fronted daughter of Unmistakable with excellent udder quality, hoof shape, and disposition. She is another maternal sister to Miss Wix 7126 of Mc Cumber and is well on her way to becoming a top cow within our program. Her pathfinder donor dam produced to the age of 15 and earned a WWR of 12@106 right to the end. A top bull in the group and one bred not only for performance, but longevity, fertility, and productivity.

Selling 2/3 interest and full possession- A Steadfast son that combines performance, carcass and cow power as well as any bull in this sale. 0103 is a stout, long bodied, thick topped Steadfast son with added power and muscle. He weaned off his dam with an actual weaning weight of 890 lbs. in September without creep and continued to perform post-weaning earning REA and IMF ratios of 106 and 140 respectively. He ranks among the very top bulls for IMF in the entire offering. His feminine, productive, neat uddered dam is a highly productive, fertile daughter of 4X13 and B Pride 463 of Mc Cumber. She never fails to bring in a good one with a WWR 6@105. We have retained all the daughters she has ever produced. The offering includes a real stout set of Steadfast sons and 0103 will rank right near the top.

Selling 2/3 interest and full possession-Recommended for use on heifers- An extremely attractive, well-balanced bull that is big middled, square hiped, and has that soft cow-maker look to him. He is long fronted and carries that length throughout. He is long-striding and excellent on his feet and legs. He is one of the top gaining sons of Armour in the offering and has been favorite of mine all winter. He never seems to have a bad day. His dam could be the mold for how an Angus cow should look. She is a moderate framed, big bodied, feminine fronted female with natural thickness and a near perfect udder. Building a cowherd is never ending, there is always a way to improve, 058 is the kind of herd sire prospect to keep you headed in the right direction.

Selling 2/3 interest and full possession- Recommended for use on heifers. A cool looking, well-built son of Armour with added rib dimension, thickness and extension to his front end. After starting at just 73 lbs. out of a mature cow. He went on to wean off his dam at 805 lbs. and has a 365-day weight of 1320 lbs. He is a moderate, soft-made, free moving bull with excellent structure and soundness. His dam does not miss. Miss Wix 2195 was flushed this spring for the first time. She is a moderate, perfect uddered, good footed daughter of Sinclair Entrepreneur 8R101 that is extremely fertile and productive. Her daughters retained in the herd are top young females and are what made the decision to flush this cow an easy one.

Selling 2/3 interest and full possession- 068 is a real bruiser, with extra mass, muscle and bone. He is one of the top performers of the calf crop with impressive performance at every level. He weaned of his 10 year-old dam at 880 lbs. with out creep and then broke the 1400 lb. barrier off test weighing in at 1420 lbs. in early February. His highly productive, fertile pathfinder dam ranks right near the top with a WWR 9@107 and nursing her 10th calf already this year. She has never missed to the AI service and is on the short list of potential donors for this spring. We went back to using Mc Cumber Trademark 4203 after getting his daughters in production. They are very nice with excellent fleshing ability, udder quality, hoof shape and fertility. Real nice set of Trademark sons in this sale and 068 ranks right at the top. He will be easy to find and is one of the true power bulls of the offering.

Selling 2/3 interest and full possession- A powerful bull with body mass, length, and muscle. 0224 is impressive and has been since the day he was born. He has never looked back and is the heaviest 205-day weight bull of the calf crop with a 205-day weight of 889 lbs for a WWR of 116. He didn't back off on test with an ADG of 3.80 lbs/day and a 365-day weight of nearly 1500 lbs. for a YWR of 112. He has outstanding breed character and carries a lot of weight in a moderate package. His dam is a heavy milking, beautiful, neat uddered daughter of Fortunate Son and produced from a high volume, perfect uddered 4X13 daughter. His sire was our selection and high-selling bull from the 2019 Chapman Cattle Company sale in Alberta Canada. He is produced by a highly productive, fertile dam who not only produced more than 10 calves, but her dam and grand dam both did as well. Herd bull prospect that will add pounds to a calf crop and sire easy fleshing, moderate framed females with longevity bred in.

Selling 2/3 interest and full possession- 0176 is another son of the Manzano Electra 0214 bull that offers some new genetics to our gene pool. They look like they are going to fit in well. 0176 is a big, long bodied, heavy muscled bull with an excellent disposition and the soundness and structure to cover a large group of cows. He has performed outstanding from the start and was a standout of the calf crop all summer. His dam is a bigger framed, feminine fronted perfect uddered daughter of Mc Cumber Tremendous 2008 and is produced by the pathfinder, donor dam B Pride 463 of Mc Cumber. She has never missed to the AI service and is nursing her 4th AI sired calf already this spring. This stout, high performing bull is sure to add some length and pounds to a calf crop and you won't have to sacrifice the maternal quality that has been bred in for generations.

Selling 2/3 interest and full possession- You would never guess this performance powerhouse started with just an 83 lb. birth weight when you see him. This big, massive, stout made Tribute son would rival any bull in our history for performance. The heaviest actual weaning weight of the calf crop coming off his dam at 900 lbs. without creep and earning a WWR of 111. He didn't stop there, he gained 4.05 lbs/day over a 142-day test on a 45 Mcal ration and came off test weighing 1475 lbs. to nearly match his sire as the all-time heaviest bull in our 57 year history. In addition, he combines REA and IMF with ratios of 108 and 133 respectively. His powerful dam is massive in terms of body dimension and natural thickness. She has a tight, well attached udder with small well-placed teats. She is docile, easy fleshing and fertile. She has never missed to the AI service. She is produced from 2 consecutive generations of pathfinders and is well on her way to pathfinder status as well. Big time performance combined with the maternal qualities of the cows that produced him.

Selling ½ interest and full possession- An ET bull produced from the mating of Mc Cumber Trademark 4203 and Miss Wix 2012 of Mc Cumber. 0012 is the more moderate of the pair and possesses incredible soundness, softness and structure. He is a free-moving big middled bull with cow-maker written all over him. He has a big, wide square hip and is very balanced in his overall design. He weaned off his recipient dam over 800 lbs. and combines plenty of performance with an excellent disposition, large scrotal and hoof shape. His pathfinder, donor dam Miss Wix 2012 of Mc Cumber is a member of the famous OCC Tremendous 619T X Miss Wix 2022 of Mc Cumber flush that has and will continue to leave a large influence on our program. The 3 sisters have not only played a large role to this point but are the kind we will continue to build our program around. The flush mate sisters are outstanding and we will anxiously wait to get them into production. A pair of flush brothers with as much maternal quality as we can breed into one.

Selling 1/2 interest and full possession- We went backed and flushed Miss Wix 7126 of Mc Cumber to 4X13 because that mating had already produced two of the outstanding, herd bull producing cows in our herd, Miss Wix 9122 of Mc Cumber and Miss Wix 175 of Mc Cumber. Both have had sale topping sons in previous production sales and both are still in production and going strong at the ages of 12 and 10 respectively. 0015 may be one the best 4X13 sons we have bred. He displays more muscle shape and natural thickness than is typical of a 4X13 son. He is long bodied, smooth fronted and sound on his feet and legs. He weaned off his recipient dam at 800 lbs and combines this with excellent ultrasound data earning a REA ratio of 103 and IMF ratio of 158. The 4X13 daughters are the backbone of our cowherd. They have far exceeded our expectations when we purchased him in 2005. Their influence within our cowherd is hard to measure but the impact will be felt for generations. 0015 has the potential to make a positive impact on any program. Check out his flush brother 0019 in this sale.

Selling 2/3 interest and full possession- 032 is the type of bull to take home and build a cow herd out of. He is a well-made, big bodied, naturally thick son of Armour that weaned off his 12 year-old dam at 850 lbs. in mid-September. He is a wide based, easy moving bull with a wide, square hip and puts his feet down in the corners. His pathfinder dam has never missed and is nursing a standout heifer calf again this year. She is a deep bodied, neat uddered daughter of 4X13 that never fails to bring in a good one and her highly productive daughter by Titanium 3127 is the dam of the powerful Tribute son 0116 selling in this sale. Fertility, productivity, low maintenance, problem free genetics bred in this good bull for generations.

Selling 2/3 interest and full possession- Recommended for use on heifers- A calving-ease herd bull prospect by Tribute that started at just 67 lbs. as his dam's second calf and has not look back since. 036 is a masculine, proud fronted bull with extra extension through his neck. He has a big, wide square hip and carries out into an expressive rear quarter. He can really get out and move well with a long, powerful stride. He combines this with the masculinity and muscle shape not often found in a true heifer bull. 036 is another nearly 4 lb/day gainer on test by Tribute and earned a 365-day weight of 1395 lbs. for a ratio of 105. His dam is a moderate framed, neat uddered, easy fleshing daughter of Mc Cumber Fortunate 307 and a maternal sister to Mc Cumber Titanium 3127. She is off to a great start with a WWR 2@103 and never has missed to the AI service. A full sister to 036 is one of the top heifers from last year's calf crop and displays the extra rib shape, natural thickness and udder quality the first Tribute daughters consistently possess. There are many really good Tribute sons to sort through, but 036 will find his way near the top, not only because of the type of bull he is, but because of the cows that he descends from.

Selling 2/3 interest and full possession- Recommended for use on heifers- 0115 does a lot of thing right. Not only is his pedigree stacked with some of the top cows here. He is one of the top gaining bulls in the offering and combines REA and IMF as well as any bull. He looks the part two with the masculine, muscular build we like to see. He is deep bodied, wide based, and full of meat. His large REA confirms the big, square top he displays. His dam is a quiet, neat uddered, high volume daughter of Mc Cumber Tremendous 2008. She is easy to get along with even with a newborn calf and stays calm and cool in any situation. She is good footed, easy fleshing and a daughter of the herd bull producing Miss Wix 9122 of Mc Cumber, the dam of Mc Cumber Fortunate 307 and Mc Cumber Trademark 4203. I believe you can never stack enough good cows into one. 0115 is bred to consistently sire predictable, profitable progeny.

Selling 2/3 interest and full possession- A bit of an outcross on the top side of his pedigree, 092 is a well-balanced, long bodied, high performing son of Manzano Electra 0214. He has excelled from birth with top weaning and yearling performance. He is a long striding, sound structured bull with added shape and dimension to his rear quarter. His time-tested, long lasting dam is an outstanding daughter of 4X13 and produced by Miss Wix 2022 of Mc Cumber. Not nearly as famous as her maternal sisters sired by Tremendous, 9259 has excelled in her own right. She sports a WWR of 10@103 and is currently nursing a top full sister to 092 already this year. She has never missed to the AI service and at the age of 12 this year looks and acts like a cow half her age. 0214's dam produced to the age of 15. Longevity and Fertility bred in on both sides of 092's pedigree. Two of the main drivers of profit for cattlemen.

Here is one stout, rugged built, masculine, muscular beef bull. 0179 is impressive in terms of muscle mass, traditional Angus character and stoutness of bone. He has a big, expressive rear quarter and tracks wide as he travels the pen. He has performed outstanding with WW and YW ratios of 104 and 105, respectively. His dam is a quiet, big bodied, easy fleshing daughter of OCC Big Time 746Z and is easy to handle even with a newborn calf. He would be a great fit for some long-time customers looking for a little bit of an outcross. Solid like a rock and ready to get cows bred. He is always catching my eye.

Selling 2/3 interest and full possession- Recommended for use on heifers- A real standout sired by Tribute with extra length, masculinity and muscle shape. 0163 is a long bodied, smooth made bull with a big, square top and shape to his rear quarter. He is free-moving, docile and large scrotaled. He has performed well from the start among some stiff competition and combines this with a REA ratio of 109. His dam by Mc Cumber Titanium 3127 is a powerful, big bodied, wide made cow with excellent udder structure and a super disposition. She bred back early and is nursing a standout full brother to 0163. She is produced by a highly productive, fertile, long lasting 4X13 daughter who just recently calved with her 12th calf. She has a WWR of 11@102 and YWR 10@105. 0163 is a top end Tribute son with performance, calving ease, and maternal bred in.

Selling 1/2 interest and full possession- The flush brother to Mc Cumber Trademark 0012. 0013 is a bigger framed, longer bodied bull with extra extension to his neck. He is an extremely free moving, long strided bull with masculinity and soundness. He was a heavy weaning bull, coming off his recipient dam at 850 lbs. in September. His pathfinder, donor dam will rank among the all-time top cows in our program and her influence within our program will be appreciated for many generations. In addition to her fertility and productivity, she excels for hoof shape, udder quality and disposition. As more of her daughters come into production we can see the positive impact she will leave. 0013 should sire those beautiful, feminine fronted females with plenty of capacity and natural thickness, the kind everybody wants.

Selling 2/3 interest and full possession- A standout from the day he was born, this masculine, thick topped heavy muscled son of Chapman Memento 7601 has been on my radar. He has not disappointed. He weaned off his dam with a 205-day weight of 849 lbs. for a ratio of 111 to rank among the top 10 bulls at weaning time. He has not backed off and came off test weighing 1300 lbs and earned a YWR of 104. His dam is an easy going, deep bodied, neat uddered daughter of Big Time. She is quiet all the time and is off to a great start with a WWR of 2@106. She calved again early this year and is nursing a stud 5005 bull calf. She is a daughter of the donor Bemindful Maid 965 of Mc Cumber, who excels for hoof shape, udder quality, fertility and fleshing ease. If you like stout, expressively muscled bulls with early growth, you will like the Memento sire group.

Selling 2/3 interest and full possession- A masculine, muscular, long bodied son of Tribute that is free moving, sound structured, and large scrotaled. One of the more active bulls in the pen, which affected his gain, but he will be hard and fit, ready to cover a large group of cows. Statistically he would qualify as a heifer bull, but his dam has produced a bit of birth weight in the past so should go on cows to start with. His dam is a long bodied, feminine fronted daughter of Fortunate Son with impeccable udder quality. She is produced by the 6th generation pathfinder Miss Wix 2027 of Mc Cumber and she maintains an excellent calving interval as well with 4@353 and another early born bull calf nursing her this year. 023 is bred to sire fertile, productive, long lasting females, enforced by the top cows from which he descends.

Selling 2/3 interest and full possession- A Tribute son to use on cows and reap the benefits of his added performance, length and stature. 076 is one of the top weaning weight bulls of the calf crop earning a WWR of 110 as the 12th calf produced from his 12 year old pathfinder dam. He is a masculine, extended front, long bodied bull with loads of performance. His pathfinder dam, who still qualifies as a 12 year old always brings in a good one and is one of the most fertile, productive cows on the Ranch. She has never missed to the AI service, even while raising two sets of twins. She is currently nursing her 13th calf and is a standout bull calf by Manzano Electra 0214.

Recommended for use on heifers- A big framed, stretchy son of Tribute with masculinity and muscle shape. 065 is one of the bigger framed bulls in the offering if you are wanting to add some frame and length, he is one to take a look at. He has performed well across the board earning ratios over the average at every measure. His pathfinder dam is a broody, deep ribbed feminine fronted full sister to Mc Cumber Fortunate 213. She never fails to bring in a good one. She is a highly productive, fertile, easy fleshing daughter of Fortunate Son and Miss Wix 5139 of Mc Cumber, a long-time donor and herd bull producing member of the Miss Wix cow family.

An Armour son with balance and style. He combines it with stoutness, body depth and impeccable structure. He is a free moving, wide tracking bull with extra length and front-end extension. He has excellent hoof shape and heel depth. He earned a 205-day weight of 801 lbs. for a WWR of 105 as his dam's second calf and was an active bull all winter preparing to cover a bunch of cows. His dam is a gorgeous young cow and one everybody spots when touring the cowherd. She is a feminine fronted, big bodied female with extra length and a perfect udder. She has never missed to the AI service and is nursing a standout full brother to 043 again this year. A legitimate cow-maker.

A stock bull with masculinity, natural width and traditional breed character common among the Memento sire group. This stout, big bodied, thick made bull has excellent hoof shape and heel depth. He earned a 205-day weight of 806 lbs. for a WWR of 105 and is produced from a highly productive daughter of Mc Cumber Tremendous 2008. His big bodied, perfect uddered dam is easy fleshing, easy to get along with and a top producer. She never fails to bring in a good one and is nursing an excellent 5005 heifer calf this year. Early growth, combined with muscle shape, extra capacity and soundness describe this good bull well.

Selling 2/3 interest and full possession- 5005 consistently sires thick-made, heavy muscled bulls with extra width and dimension to their rear quarter. 055 is no exception. This well-bred, high performing bull is big ribbed, wide based, heavy muscled and sound structured. His pedigree is loaded with all the great Miss Wix females to reside here and along with that he traces 7 time to the Miss Wix matriarch, Miss Wix 365 of Mc Cumber and goes twice to her outstanding daughter Miss Wix 7111 of Mc Cumber, two of the most influential females in our history. His big bodied, feminine fronted dam by Mc Cumber Tremendous 2008 has incredible udder structure and perfect hoof shape. She is well on her way with a standout bull calf by Manzano Electra 0214 already this year. The cows are stacked for generations ensuring his ability to sire herd building progeny.

Selling 2/3 interest and full possession- An OCC Big Time son with muscle shape, masculinity, and a good disposition. This heavy weaning bull could possibly work on heifers, but should be tried out on the cows first. He packs a large REA and is big scrotaled and free moving. His easy fleshing, perfect uddered dam is a productive, fertile daughter of Mc Cumber Tremendous 2008. She has one son working in the Master Angus herd in MT and another in NE. She consistently brings in a good one. The Big Time daughters are big bodied, neat uddered females with an excellent disposition, all the time. They are attentive, easy going mothers and are easily handled if needed. Only direct Big Time son this and a good one.

A Memento son with muscle, capacity, base width and soundness. 0203 is a wide hipped, thick rumped bull with masculinity and impeccable hoof shape. This sire group is particularly strong for foot shape and heel depth. In addition 0203 earned a 205-day weight of 810 lbs. for a WWR of 106 as his dam's 2nd calf. His moderate, neat uddered, dam by OCC Bonus 802B is easy fleshing and earning an excellent record to this point. I really like our Bonus daughters they are moderate, productive females with fleshing ability and fertility. They will have reduced mature size, but they seem to pack a punch when it comes to raising their calf. Some new genes for long-time customers here.

Selling ½ interest and full possession- A maternal brother to Mc Cumber Tribute 702 and sired by the popular Ohlde sire OCC Zodiac 655Z. 083 is loaded with meat, muscle and thickness. He has a big, square top and large expressive rear quarter. He is wide based, big scrotaled and easy going. He is moderate framed with extra rib shape and displays the qualities of a forage converter. His dam is one of the top females ever in our program and her influence through sons and daughters will provide the steps to our continued evolution to building a highly efficient, forage converting, fertile, productive cow herd. 083 can be a key to that progression. The first Zodiac daughters here calved this spring and are the real deal in terms of udder quality, mothering instinct, fleshing ease. They possess extra rib shape, natural thickness and are built the way low maintenance, forage efficient females should be. 083 is a herd bull prospect combining the best of the Lassie and Dixie Erica cow families.

Selling 2/3 interest and full possession- An impressive, heavy muscled, big butted son of Armour from the ET program. He along with 2 of his flush brothers represent herd building, cow making, maternal genetics. This masculine, wide made Armour son has been a standout since birth, he has impeccable breed character and a herd bull presence to him. His 4th consecutive pathfinder, donor dam sets the bar for udder quality. Still at the age of 12 has impeccable teat size and udder attachment. She is good footed, big bodied, easy fleshing and easy to get along with. His flushmate sisters will be a highlight of the heifer offering and if you want a glimpse as to what the daughters of 0128 will look like go check them out. You will not be disappointed.

Selling ½ interest and full possession- 0271 is the natural born bull calf off Miss Wix 2002 of Mc Cumber. The good-looking scamp is well-balanced in his design and possesses explosive muscle shape to his top. He has performed well and combines this with a REA of 15.5 for a ratio of 115 confirming the visual muscle shape he displays down his top. He is a free moving, long bodied bull with excellent breed character and maternal quality on both sides of his pedigree. His dam is an impressive female with abundant rib shape, natural thickness and udder quality. She combines this with excellent hoof shape, extension to her frontend and fleshing ability. Her influence will be lasting here and the future is bright with a large group of young daughters just entering production. 0271 combines the best of the Miss Wix cow family into a complete package.

Selling ½ interest and full possession- 0026 is a masculine, wide based, long bodied, deep ribbed son of OCC Zodiac 655Z and produced from the donor dam Miss Wix 2002 of Mc Cumber. 0026 started a bit bigger off his recipient dam in the cooperator herd, and although I wouldn't use him on heifers from the start, I would not be concerned at all with him on cows. We retained his full brother from last year, he was the natural born bull calf of 2002 and are expecting his first calves anytime now. His dam is a member of the most successful flush in our history for producing impactful progeny within our program. The influence left from the 3 flush sisters Miss Wix 2002 of Mc Cumber, Miss Wix 2003 of Mc Cumber and Miss Wix 2012 of Mc Cumber and their flush brother Mc Cumber Tremendous 2008 will be felt for generations. The flush sisters to 0026 look like top brood cows in the making. His sire Zodiac has worked well in our program, with both top sons and daughters that will help move our cowherd forward. 0026 combines the best from the Miss Wix and Dixie Erica cow family.

Selling 2/3 interest and full possession- A thick, meaty Steadfast son with extra rib depth and muscle expression. 0154 combines carcass ultrasound traits as well as any bull in this sale. He has a REA of 15.1 sq in. for a ratio of 112 and earned the #2 IMF score for a ratio of 208. He did this while being slight below average for Backfat. His IMF ranks in the very top percentiles for IMF and he combines this with maternal quality passed on from generations of top cows. His easy going, neat uddered dam is a maternal sister to Miss Wix 7126 of Mc Cumber sired by 4X13. Her 3rd generation pathfinder dam was in production here to the age of 15 and maintained her pathfinder status to the end with a WWR 12@106 and YWR 12 @104. More than just a top carcass bull, 0154 is bred to sire females that will be productive, fertile and long lasting.

Selling 2/3 interest and full possession- Recommended for use on heifers- Phenotypically one of the most complete bulls in the entire offering. 057 is a stud. He combines incredible balance, style and soundness with abundant muscle shape and capacity. In addition, he is a wide based, free moving bull with masculinity and Angus character. He did not disappoint from a performance standpoint either, gaining 3.87 lbs/day and earning a YWR of 104. His dam is a moderate, heavy milking daughter of Mc Cumber 235 Fortunate 4154 with a beautiful, feminine front end and plenty of capacity. 057 has been catching my eye all winter and is built like one ought to be.

Selling 2/3 interest and full possession- Recommended for use on heifers- A royally bred Tribute son that started with just a 62 lb birth weight and then weaned off with a 205 day weight of 736 lbs. for a WWR of 104 as his dam's first calf. He exploded on test with an ADG of 4.11 lbs/day and has a 365 day weight of 1400 lbs. for a YWR of 107. 021 is a masculine, long bodied, thick-made son of Tribute with an outstanding disposition, large scrotal, and maternal quality bred in for generations. His dam is a highly productive, neat uddered, easy going daughter of Unmistakable and is produced from an outstanding Mc Cumber Tremendous 2008 daughter out of the herd bull producing Miss Wix 9122 of Mc Cumber. This set of Tribute sons have exceeded our expectations, we have never used a bull that is consistently light birth and then have the added performance and power his son's possess. 021 ranks near the top of this strong group of Tribute sons combining calving ease, performance and cow power together.

Selling 2/3 interest and full possession- ET Tribute son bred to sire forage efficient, easy fleshing, perfect uddered females. 0149 is a well-balanced, eye-catching son of Tribute with extra length and stoutness. He is square hipped and moves with ease as he travels. He has an excellent disposition and a large scrotal. He nearly gained 4 lbs/day on test and combines this with an IMF ratio of 140. He is a member of a large flush of these full brothers, most of which will be fine on heifers, but because of his extra birth weight this good bull should go on cows first. His dam is a herd favorite and with incredible udder structure and fleshing ability. She is feminine fronted and displays added rib shape and capacity. Every daughter she has produced has been retained here at Mc Cumber and 3 of them have son's selling in this sale.

Selling 2/3 interest and full possession- Recommended for use on heifers- A high performing, light birth weight member of the Tribute X B Pride 3150 flush. He came off his recipient dam with a 205-day weight of 729 lbs. and then gained 3.87 lbs/day on test and earned a 365-day weight of nearly 1350 lbs. He is the top ultrasound bull of the flush with a REA of 14.4 sq. in. for a ratio of 113 and an IMF ratio of 117. He is a long bodied, big middled, smooth made bull with a large scrotal and easy going disposition. I have talked a lot about their donor dam B Pride 3150 and the best way to describe her is she is balanced. She balances many traits both measureable and ones not easily measured. She will remain a key piece of the gene pool within our program.

A moderate framed, heavy muscled tank by Armour. 0195 is big bodied, naturally thick and full of meat. He is wide based, masculine and big scrotaled. He has performed with the best of them earning a YWR of 103 and gaining 3.80 lbs/day. He is built to work in the rough country and sire the type of progeny that thrive on forage. His dam is a stout, big bodied Fortunate 213 daughter. She is tight uddered, easy to handle and one that is off to a good start. Real strong set of Armour sons and 0195 will rank right with the best of them.

Maternal grand dam Miss Wix 6145 of Mc Cumber.

Selling 2/3 interest and full possession-
Recommended for use on heifers-
Starting with just a 70 lb. birth weight this performance powerhouse never looked back. 010 is a big bodied, deep ribbed, wide made son of Tribute that pushed the scale down at every measure and combines it with an easy going disposition, and maternal backing second to none. His young dam by Titanium is produced by the oldest cow on the Ranch Miss Wix 6145 of Mc

Cumber, who at the age of 15 this spring is raising a summer born heifer calf and being flushed. She shows some age but is still extremely sound and good uddered. Another well bred Tribute son with many top cows all throughout his pedigree.

An ET son of Armour produced from the powerful, pathfinder donor dam Miss Wix 9102 of Mc Cumber. 0146 is a long bodied, masculine bull with an easy going disposition and good hoof shape. He has weaning and yearling ratios of 102 and 103 respectively and gained 3.70 lbs/day. He is square topped, and good hiped. His pathfinder donor dam is a 12 year old Missing Link daughter that traces back to Miss Wix 2022 of Mc Cumber. She is perfect uddered, big bodied, and easy fleshing. She has a good disposition even with a newborn calf and will continue to be flushed here at Mc Cumber. These Armour X Miss Wix 9102 flush brothers are bred to sire those beautiful, big bodied, easy fleshing females with impeccable udder quality and maternal instincts.

A stout, bruiser of a beef bull. 0202 has a design all his own. This wide made, big bodied stout made son of Chapman Memento 7601 has performed well and is built unlike many bulls you have the opportunity to evaluate this year. Masculine, wide based, and big scrotaled. He can add some power and rib shape to a set of cows. His tremendous dam is quickly rising within our program and is becoming a herd favorite among visitors to the Ranch. She is a tank, with incredible rib shape, udder quality and fleshing ease. She combines this with fertility, productivity and an easy going disposition. Her daughter by Tremendous is a favorite of her age group and has the look of a low maintenance, easy fleshing, problem free cow. Unique bull that will have the bred in ability to change a set of cows.

Cattleman take a look here. 0048 will sell without registration papers pending DNA test on his sire. A performance standout in his contemporary group with extra length, body depth and size. This performance bull weaned off his dam with a 205-day weight of 751 lbs. for a WWR of 116. He converted on test with an ADG of 4.30 lbs/day and earned a 365-day weight of 1340 lbs. for a ratio of 115. He excelled for REA as well with a REA of 14.9 sq. in. for a ratio of 116 in his contemporary group. His dam is a highly productive, fertile daughter of Mc Cumber Fortunate 213 with a WWR of 4@106. She is produced from 2 consecutive generations of pathfinders and her grand dam has a WWR of 11@108.

Selling 2/3 interest and full possession- Recommended for use on heifers- Tribute strikes again. 064 has an incredible birth to yearling spread. He started with just a 64 lb. birth weight. He weaned off his dam with a 205-day weight of 742 lbs. without creep as his dam's first calf and then gained 3.87 lbs./day on test and earned a 365-day weight of 1361 lbs. for a ratio of 104. In addition to his spread he is a moderate framed, big bodied, thick made beef bull with base width and soundness. His dam is an easy-going, moderate framed, deep ribbed daughter of Mc Cumber 1108 Rito 3200 with a near perfect udder. She bred back AI again this year and calved early. Calving ease bull without sacrificing performance and maternal quality.

Recommended for use on heifers- A well-balanced, good looking son of Tribute that catches your eye when going through the pen. He is a big bodied, wide based, square hipped bull with plenty of muscle and natural thickness. His dam is a picture-perfect daughter of Mc Cumber Titanium 3127 with impeccable udder structure. She is naturally thick, deep ribbed and feminine fronted. A moderate milking, easy fleshing female that is built to last a long time. She has a perfect record for fertility to this point and traces back to the influential B Pride 463 of Mc Cumber. Built to handle the rough country and bred to leave fertile, easy fleshing, forage converting females.

Selling 2/3 interest and full possession- Recommended for use on heifers- A high volume, naturally thick son of Tribute and a maternal brother to Mc Cumber Titanium 5005. 0005 is a big bodied, masculine, easy fleshing ET son of Miss Wix 7126 of Mc Cumber. He weaned off his recipient dam at 750 lbs and gained 3.70 lbs/day on test. His dam is one of the most influential females in our program and this year at the age of 14 will retire to being a full-time donor. The only bull in the flush and lucky for us there are 3 flush sisters that have the brood cow look. He combines the best of the Miss Wix and Lassie cow families and not only should sire easy fleshing, moderate framed, problem free females, but possess the performance to sire male progeny the will fit the industry.

Selling 2/3 interest and full possession- Recommended for use on heifers- A look alike set of flush brother from the mating of Tribute to B Pride 3150 of Mc Cumber. 0020 is a long, smooth made bull with abundant capacity. He is a sound structured bull with excellent hoof shape and heel depth. He has performed well on test and earned a REA ratio of 102. Is a quiet, easy to get along with Tribute son as well. His donor dam is a fertile, neat uddered, easy fleshing female that earned her way to the donor pen by consistently producing the type of females we demand. She has never raised a natural bull calf and every daughter she has produced has been retained as a replacement and all are still production to this point. Granted they are not all that old yet but show no signs of falling out anytime soon.

Recommended for use on heifers- It's gonna get repetitive talking about these Tribute sons, but he consistently makes them very much alike. 033 is no exception. A light birth, high performing bull that is big bodied, naturally thick and wide tracking. His dam is a moderate framed, high volume daughter of Mc Cumber Titanium 5005, with a neat, well-attached udder and is produced from 3 consecutive generations of Miss Wix pathfinders. Her dam produced the lead-off and top selling female from our 2017 production sale to Carlson Angus Ranch where she has gone on to be a productive member of their embryo transplant program. Well-bred, complete son of Tribute that is bred to add profit to a cattleman's operation.

Thick-made, masculine, big bodied Tribute. It feels like I describe these Tributes all the same. I probably for the most part do, he consistently stamps them with a look all their own. 0172 is moderated framed, wide made with rib shape and an excellent disposition. His dam is a powerful, perfect uddered daughter of Mc Cumber Trademark 4203 with an excellent record for fertility and maintains her condition year round. This stout, easy fleshing Tribute son will sire low maintenance, easy fleshing, forage converting progeny.

A powerful Tribute son to go on the cows. 0114 is a big bodied, wide based bull with natural thickness and excellent performance. He earned a WWR of 106 as his dam's first calf with a 205-day weight of 750 lbs. In addition to this he has a YWR of 103 and combines performance with one of the top IMF scores of the entire offering for an IMF ratio of 149. His dam bred right back last spring and calved to the AI service. She is a big bodied, neat uddered daughter of Mc Cumber 1108 Rito 3200. She is easy going, feminine fronted and good footed. A Tribute son to add pounds, along with the maternal qualities bred in for generations.

Selling 2/3 interest and full possession- Recommended for use on heifers- A soft-made, big bodied ET son of OCC Tremendous 619T and Lassie 935 of Mc Cumber. This calving ease, herd bull prospect is long bodied, deep ribbed and smooth fronted. He has the bred in ability to sire forage efficient, easy fleshing females that will excel for udder quality, fertility, and productivity. His pathfinder, donor dam is the maternal grand dam of Mc Cumber Tribute 702 and has produced her own influential herd sires that include Mc Cumber Fortunate 235 and Mc Cumber Unmistakable 597. She is a favorite of visitors to the Ranch and one of the top cows ever produced in our program. If you are serious about building a maternally efficient cowherd this set of flush brothers will get you headed in the right direction.

Selling 2/3 interest and full possession- An attractive, well-built bull produced from the flush of Armour to Miss Wix 9102 of Mc Cumber. 0021 has a presence all his own. This fancy fronted, stout made, big hipped bull really has a neat look to him. He is a good traveling bull and can really get out and move across the pen. He is masculine, wide based, and big topped. Choice of two flush sister will be a highlight of the heifer offering and his 4th generation pathfinder dam is a productive, fertile, perfect uddered daughter of Missing Link that entered the donor pen based mainly on traits that are not easily measured. A neat looking bull with the stoutness, soundness and generations of top cows behind him.

Selling ½ interest and full possession- The flush brother to Mc Cumber 4X13 Extra 0015. 0019 is built a lot like his flush brother. He is a deep ribbed, naturally thick bull with a soft, easy fleshing look to him. He weaned off his recipient dam at 780 lbs and like his flush brother earned a top IMF score with a ratio of 138. We currently have 3 full sisters in production here, Miss Wix 9122 of Mc Cumber, Miss Wix 175 of Mc Cumber and the young one who just had her first calf this spring Miss Wix 9021 of Mc Cumber. They are all cut from the same mold. They are built for the long haul and I would expect these flush brothers to sire the same type of females.

Selling 2/3 interest and full possession- Recommended for use on heifers- There aren't very many OCC Tremendous 619T sons selling this year, but all are out of current donors here at Mc Cumber. 0198 is the natural born bull calf off one of my all-time favorite 4X13 daughters. He is a moderate framed, deep ribbed, naturally thick bull that weaned off his 12 year old dam at 740 lbs. without creep. He is wide based, easy going, and bred to be a cow-maker. His dam is a favorite of mine. She is a perfect uddered, feminine fronted, good footed daughter of 4X13 that made her way to the donor pen because of the traits not easily measured she excels at. She is produced from a pathfinder 004 daughter that was in production to the age of 14. 0198 is designed to get your cowherd on the right track and is backed by the maternal heritage to do it.

Sire OCC Edge of Glory 841E

A long bodied, extended front, thick rumped son of OCC Edge of Glory 841E. The Edge of Glory bull was our selection along with Diamond 7 Angus Ranch in New Mexico from the 2019 Ohlde sale. We did not have possession of the bull, so this first calf crop has a limited number of progeny because we didn't get semen until the end of our AI season. However, we have a large group of calves on the ground this spring and they are impressive. The 3 replacement yearling heifers look excellent at this point. 0049 is an easy going, good footed, free moving bull that performed well across the board. He has an on-test ADG of 4.47 lbs/day and earned a YWR of 110. He combines this with an IMF ratio of 121. Look for more from this sire group down the road, but for long-time customers 0049 offers a new sire group for you.

Selling 2/3 interest and full possession- Recommended for use on heifers- What a chunk. 0187 is a moderated, extra wide, big middled Armour son with added base width and dimension. He is built like one that can thrive in a low input environment and convert forage efficiently. To go along with this he is one of the top IMF bulls of the offering with an IMF score of 5.45 for a ratio of 211, which along with his body type could make him a logical choice for a grass finishing program. His moderate, deep ribbed, neat uddered dam by OCC Tremendous 619T is a highly productive, fertile cow with an excellent disposition. She is also the dam to the 2019 popular and high selling heifer Miss Wix 867 of Mc Cumber that sold to 5L Red Angus in MT, where she entered their ET program. He may not be for everybody, but in the right situation will thrive.

Maternal sister Gale 867 of Mc Cumber

Selling ½ interest and full possession- Recommended for use on heifers- A sale highlight. 0145 is the result of a planned half brother-half sister mating. To truly identify outstanding genetics, we believe you have to close breed them and if they can withstand it you have identified prepotent genes that will consistently be passed on to the next generation. There is a misconception within the industry that linebreeding or close breeding causes genetic defects, that is not true it reveals them if they already exist within the gene pool that is being linebred. As a breeder it is our duty to test our gene pool by close breeding. The mainstream is constantly outcrossing and always looking for that outcross bull. It is similar to crossbreeding, but within the same breed. Putting them to the test genetically is the job of a breeder and to the benefit of their customers. Enough of that soapbox. 0145 has withstood the linebreeding pressure and risen to the top. He is a soft made, big bodied, wide bull with masculinity, muscle shape and a herd bull presence. He has jumped through all the hoops to this point not only from a performance standpoint, but sports a 15.1 in. REA for a ratio of 113. Like Global, who is bred very similar, every cow in his 3 generation pedigree is a pathfinder except for his dam, who raised him as her first calf. He is intensely bred to the Miss Wix cow family thus ensuring his ability to sire fertile, productive, adaptable females that will last. His dam is a near perfect uddered, deep ribbed daughter of Mc Cumber Tremendous 2008 and a maternal sister to Mc Cumber Titanium 5005. She is produced from the 4th generation pathfinder Miss Wix 7126 of Mc Cumber. We currently have 8 flush sisters to Miss Wix 8004 in production here and they are an impressive group of flush sisters. The work is done with this one the genetics behind him have been tested for 57 years and have risen to the top within our program.

Selling 2/3 interest and full possession- Recommended for use on heifers- The youngest Tribute son in the offering and one of the best. 0248 is a heavy muscled, big topped, thick rumped bull with abundant rib shape and capacity. He displays the masculinity and true Angus breed character of the Tribute sire group. He earned a 205-day weight of 764 lbs for a ratio of 108 as his dam's first calf and continued to perform post weaning with a 365-day weight of 1334 lbs. for a ratio of 102. He has a REA of 14.1 sq. in. for a ratio of 105 and is a large scrotaled, wide tracking herd sire prospect. His dam is a moderate, neat uddered daughter of Mc Cumber Titanium 5005 with an excellent disposition. I just moved her and her newborn calf into the barn after calving outside in -10 weather. It was a piece of cake. 0248 represents a mating combination that ensures efficient forage conversion, fleshing ease and predictable performance.

Selling 2/3 interest and full possession- Recommended for use on heifers- 0032 may just be my favorite member of the 619T x Lassie 935 flush. He is a moderate, thick, masculine, calving ease prospect with added capacity and natural thickness. He is a masculine, good fronted bull with base width and muscle shape. He combines REA and IMF for ratios of 104 and 101 respectively. His pathfinder donor dam is a visitor favorite with that wedge-shape build, femininity and length. She is still in production at the age of 12. Her daughter Lassie 113 of Mc Cumber is the dam of Mc Cumber Tribute 702 and the flush sisters to 0032 look to have a bright future in our program. The females this set of flush brothers should sire, will put a cowherd on track in terms of fertility, productivity, longevity and forage efficiency.

Maternal sister to dam Miss Wix 994 of Mc Cumber

Maternal sister Lassie 113 of Mc Cumber

Maternal brother Mc Cumber Fortunate 235

Recommended for use on heifers- A moderate, masculine, thick rumped Tribute son with added capacity and natural thickness. 0101 is big middled, wide tracking bull with an easy going disposition and the look of a cow-maker. His moderate, big bodied, thick-made dam is perfect uddered and one of my favorite cows of her age group. She fleshes with ease and has the extra width and rib shape to thrive in harsh conditions. Her dam is a maternal sister to Miss Wix 7126 of Mc Cumber and is an impressive, quiet, neat uddered daughter of Unmistakable with a WWR 3@103. Real good Tribute son late in the sale order.

This masculine, muscular Tribute son just falls outside what I would consider a heifer bull, but that's not a problem because he performed extremely well across the board. 0219 is a well-balanced, thick topped square hipped bull with the masculinity and body depth so common among the Tribute sire group. He performed well as his dam's first calf with a 205-day weight of nearly 750 lbs. for a WWR of 106. He gained 3.70 lbs/day on a 142 day test and earned a YWR of 103. His dam by 5005 is deep ribbed, neat udded and good footed. She bred back right away this year and is nursing a full brother to 0219 again this year.

Selling 2/3 interest and full possession- Recommended for use on heifers- Never before have we been able to offer so many quality ET sons of our top donors. When we flush these donor cows the main objective is to produce top females for replacements within our cowherd. So the resulting bulls from these flushes should be some of the most predictable cow-makers we can offer. 0033 is a calving ease bull with cow-maker genetics bred in.

Selling 2/3 interest and full possession- Recommended for use on heifers- I know I am sounding very repetitive when describing this Tribute X B Pride 3150 of Mc Cumber flush. They truly are very much alike and in my opinion that is a good thing. You could put a group of these flush brothers on a set of cows and reap the added consistency and predictability of the daughters that would result. Long, smooth, deep ribbed and sound, just like his flush mates. In addition he has a REA ratio of 104 and like his brothers is an easy going bull. Their dam is a herd favorite that does so many things right.

An April born bull that has really gotten it done. This big bodied, wide-made bull is moderate, heavy muscled and wide based. He is a wide tracking, big rumped beef bull that earned nearly a 800 lb. 205-day weight to ratio 102. His dam is beautiful, deep ribbed, near perfect uddered daughter of Mc Cumber Titanium 5005 and is produced from 2 consecutive generations of pathfinders. She is good footed, easy fleshing and easy going. Although the youngest bull in the offering, 0298 has performed at every measure and is a heavy muscled, big bodied bull that will sire efficient, easy fleshing females.

0043 will sell as a commercial bull. We need a DNA test on his dam in order to get him registered. 0043 is a long, smooth, eye-catching son of 5005 with a big hip and easy going disposition. He was one of the top gaining bulls on test with an ADG of 4.34 lbs/day. His dam is produced from 2 consecutive generations of pathfinder and his great grand dam was a top producer with a WWR of 11@108. Strong performance and top cows behind this good bull by 5005.

The cowherd known for Outstanding Maternal Traits.

Selling ½ interest and full possession- A Zodiac son bred to adaptable, low maintenance and problem free. 0037 is a big bodied, wide made son of Zodiac and produced from Miss Wix 2002 of Mc Cumber. He is a wide based, easy going bull with natural width and dimension. His impressive dam is a member of the Tremendous X Miss Wix 2022 flush and ranks right up there on my list of favorite females on the Ranch. She produced the top-selling bull in our 2019 Production sale by XXP and her natural born bull by Zodiac last year was retained as a herd sire here. We will get his first calves this spring. By stacking generations of like cattle the outcome becomes pretty predictable and leads to positive outcomes.

Recommended for use on heifers- 0212 is the result of a mating combination I really like. Tribute on these 5005 daughters really seems to work well. They are thick, masculine, wide hiped bulls with base width and body depth. 0212 is built how I described. He earned a WWR of 101 as his dam's first calf and has a REA of 14.1 sq. in. for a ratio of 105. His dam is very nice with abundant capacity, femininity and impeccable udder quality. She is produced by a powerful 2008 daughter with extra mass and thickness. She is an impressive cow. These younger Tribute sons out of the first calf heifers are really a good bunch of bulls with the same masculinity, muscle shape and rib shape as their older contemporaries out of the cows.

Recommended for use on heifers- A sleep all night heifer bull by Tribute with just a 72 lb birth weight a CED of +13 and BW EPD of -1.6 should ensure his ability as a true calving ease bull. 0209 is moderate framed, deep ribbed and wide based. He moves with ease as he travels the pen and earned a WWR of 101 as his dam's first calf. He has a REA of 14 sq. in. and has a REA/CWT of 1.27. His dam is a moderate, tight uddered, small teated daughter of Mc Cumber Steadfast 635. She is big bodied, wide made, and easy fleshing. She is a maternal sister to past sale topper Mc Cumber Unmistakable 524 and a daughter of the donor dam Miss Wix 175 of Mc Cumber. Calving ease bull with the extra body mass to sire forage efficient, easy fleshing females.

Probably the smallest framed bull in the offering, but this guy is loaded with meat. He is a stout, heavy muscled, well-balanced son of Chapman Memento 7601. This expressively muscled, wide based, thick rumped bull is big bodied and sound structured. He is packing a lot of weight on a moderate frame. His visual muscle expression is confirmed with a REA of 14.3 for a ratio of 106 and a REA/CWT of 1.24. His big bodied, tight uddered dam by Unmistakable has a WWR of 3@107 and is a newly qualified pathfinder this year. I realize this guy may not be for everyone but take a look if you are concerned with mature size and lack of ability. This one can change it quickly.

Selling 2/3 interest and full possession- A full brother to Mc Cumber Steadfast 635. 0036 is a deep bodied, wide based bull with shape and expression to his hind quarter. He has performed well this winter with an ADG of 3.77 lbs/day. His herd bull producing dam has risen to the top of our program. She displays all the characteristics we envision our ideal cow to be. The Steadfast daughters are making excellent young cows with the fleshing ease, udder quality and soundness we would expect.

Maternal sister Miss Wix 6127 of Mc Cumber

A moderate, stout, thick son by Chapman Memento 7601E. He is deep ribbed, wide based and thick rumped. He has an easy going disposition and excellent hoof shape. We lost his dam this summer on pasture so he was orphaned for a month before weaning and was ratioed in his own contemporary group. His dam was a moderate, perfect uddered daughter of Mc Cumber Fortunate 248 with impeccable udder structure and an excellent disposition. Her dam was in production here to the age of 11 and maintained exceptional udder quality and soundness.

Selling 2/3 interest and full possession- Recommended for use on heifers- 0229 is a member of the OCC Tremendous 619T X Lassie 935 of Mc Cumber flush. Bred to sire calving ease, light birth progeny that have natural thickness, body depth and maternal quality bred in for generations. 0229 has a CED of +14 and a BW EPD of -2.5. He is a big topped, free moving bull with length and depth of body. He did exceptional on the ultrasound with a REA of 15.6 for a ratio of 110 and a REA/CWT of 1.43. He combines this with an IMF ratio of 107. His pathfinder, donor dam is Lassie 935 of Mc Cumber. She has consistently been a light birth weight cow and strong for carcass traits. 0229 is the result of a mating combination that anchors our cowherd, with predictable, easy fleshing, neat uddered, long lasting females.

Moderate, thick, deep ribbed bull with added base width and masculinity so common among the Tribute sire group. He just misses qualifying as a heifer bull, will sire forage efficient, easy fleshing progeny built to handle any environment. His dam is a real nice Mc Cumber Titanium 5005 daughter with a neat, well-attached udder perfect hoof shape and an excellent disposition. She is produced from a 12 year old 4X13 daughter that is still going strong.

Selling 2/3 interest and full possession- Recommended for use on heifers- The Steadfast X Bemindful Maid 965 is consistent from top to bottom. They are moderate, thick-made calving ease bulls with maternal quality bred in for generations. 0017 is a long bodied, smooth bull with a big top and square hip. He moves with ease as he travels the pen and puts a foot down in the corners. His donor dam is a herd favorite and excels for udder quality, hoof shape, fertility and fleshing ease. These flush brothers would be a good choice for a group of heifers to sire a consistent set of calves with maternal superiority bred in.

Recommended for use on heifers- The only son of OCC Bonus 802B in this year's offering, but a real good, well-bred son that will work well on heifers. 0280 is a deep ribbed, naturally thick bull with excellent hoof shape, and heel depth. He is square topped, with a long, level hip and moves with ease as he travels the pen. His dam is a feminine fronted, deep ribbed, near perfect uddered daughter of Mc Cumber Tremendous 2008 and produced from the BT Right Time 24J daughter of Miss Wix 7111 of Mc Cumber, Miss Wix 5139 of Mc Cumber, making her double bred up close to Miss Wix 7111 of Mc Cumber. A well-bred, sound structured, calving ease bull bred to sire moderate, easy fleshing females that will convert forage and thrive in a harsh environment.

Retaining the right to a future flush- Incredible power, performance and mass combined with the rib shape, natural thickness and maternal heritage to move any program forward. A sale highlight and one of the top females we have ever offered for sale. 09 has cow written all over her. She has been a standout since birth and has passed every test along the way. Her moderated, wide-made, neat uddered dam is a maternal sister to the past sale topper Mc Cumber Unmistakable 524. She is nursing an outstanding full sister to 09 this year and maintains a calving interval of 3@363. 09's grand dam is a maternal sister to Mc Cumber Titanium 5005 and a full sister to Miss Wix 9122 of Mc Cumber. This line of cows is responsible for not only producing sale topping herd bulls through our production sale, but the females retained within our herd are consistently the right kind. 09 combines the Miss Wix and Lassie cow families. She is the kind to build a program around.

Selling Choice- A sale highlight and a pair of flush sisters that represent our program well. Two maternally bred, high caliber cow prospects with generations of the best females to ever reside here. These near replicas sired by Mc Cumber Armour 7148 are the kind to build a cowherd around. They exhibit the width, capacity, soundness and structure we desire and combine it into a complete package not only phenotypically, but genetically as well. Their 4th consecutive pathfinder, donor dam Miss Wix 9102 of Mc Cumber is an impressive female displaying the added power, fleshing ease and natural thickness to work anywhere. She sets the bar here for udder quality, with impeccable udder structure and teat size even as a 12 year old cow. She is a 4th generation pathfinder and in 8 generations of Miss Wix cows all the way back to the original, 7 of the 8 cows are pathfinders, the only one that is not is Miss Wix 7111 of Mc Cumber. A pair of high caliber heifers that are bred to be maternally superior and backed by generations of cows that are proven to be.

A beautiful, feminine fronted, long bodied daughter of Sinclair Shadow Rider 1741. 012 combines femininity and extension, with extra body dimension and impeccable soundness. She is the front pasture kind. Her sire has worked well for use adding body length and maintaining the capacity and thickness we desire. We only had heifer calves from Shadow Rider last year, so no bulls are in the sale, but we continue to keep him as part of our AI sire group and along with his outstanding son Mc Cumber Shadow Rider 983 we have a larger group of calves on the ground this spring.

Paternal brother Mc Cumber Shadow Rider 983

A big, long bodied, feminine heifer with rib shape, and natural thickness. Both her sire and dam are produced by current donors here and represent a new generation of maternal quality. One of the top performance heifers of the calf crop 088 weaned off her dam with a WWR of 105, and just exploded post weaning earning a YWR of 112. Along with this she balances REA and IMF with ratios above the average for both. Her dam is an impressive Unmistakable grand daughter with fleshing ease, rib shape, and udder quality. She is produced from Miss Wix 2195 of Mc Cumber who was flushed for the first time this past spring. A top performing, well-bred heifer that has top cows stacked in her pedigree.

A top of the line, brood cow prospect sired by OCC Big Time 746Z. 0175 is a big bodied, feminine fronted, easy going heifer with top performance across the board. Her dam is a product of our ET program. She is a feminine, deep ribbed, near perfect uddered daughter of 4X13 and produced from the 3rd generation pathfinder Miss Wix 413 of Mc Cumber, also the dam of Miss Wix 7126 of Mc Cumber. Miss Wix 7013 has never missed to the AI service and is a quiet, productive female that has a real promising future.

A real complete, sound structured, well-balanced daughter of Mc Cumber Steadfast 635 with top cows through out her pedigree. 0185 is a good performing, deep ribbed heifer that earned an IMF score of 4.03 for a ratio of 111. Her dam is a neat-uddered, easy going daughter of Resolution with a neat udder. Her dam is a top producing maternal sister to Mc Cumber Fortunate 213. The Steadfast daughters are making some top young cows that flesh easily, have neat, well-attached udders and are built to last.

A powerful, performance heifer with extra mass, substance and thickness. 0250 is a docile, wide tracking, big bodied female with ratio of 106 for weaning and 107 for yearling. She has performed from the start and is produced from an attractive, perfect uddered, high volume Mc Cumber Titanium 3127 daughter. Her dam is a maternal sister to last year's top selling bull Mc Cumber 5005 Titanium 9145 and her dam is a productive daughter of OCC Tremendous 619T who entered the ET program last spring and is still producing at the age of 11.

A moderate framed, wide made female with abundant rib shape and capacity. She is a wide-based, wide tracking heifer with cow written all over her. A heavy weaning heifer with a WWR of 104 and a combination of both REA and IMF with ratios of 106 and 103 respectively. In my opinion one of the best parts about here are the cows from which she is produced. Her dam is a maternal sister to the Lot 2 and sale feature Mc Cumber Remington 031. She has her own top record for production and fertility and comes from a line of cows that have left an impact.

Right from the ET program and only offered because the large group of flush sisters we were fortunate enough to retain. 0024 is the result of a mating combination that never fails. OCC Tremendous 619T on the Sinclair Extra 4X13 daughters produces fertile, productive, problem free females that consistently produce top calves and are built to last. 0024 is a moderate, wide made, female with plenty of capacity. She is sound structured and designed like one that is forage efficient, low maintenance and easy fleshing. A maternal sister to Lassie 113 of Mc Cumber, the dam of Tribute, and poised to make an impactful contribution to any program.

A well-bred, moderate framed, big bodied daughter of Mc Cumber Trademark 4203. Her unique pedigree ties together both Mc Cumber Titanium 5005 and Mc Cumber Trademark 4203, a son and grandson of Miss Wix 7126 of Mc Cumber. On top of that her maternal grand dam is one of the top OCC Tremendous daughters on the ranch with a WWR 9@107 and her 10th calf at her side now. The Trademark daughters are making real good cows and with a pedigree combining so many top cows, 074 should be bred to follow in their footsteps.

Don't assume that because there are a large number of Tribute daughters in the offering that for some reason we don't like them. That is the furthest from the truth, he has by far the largest sire group, and thus we are retaining nearly 30 Tribute daughters as replacement. The first daughters to calve have exceeded our expectations. Everyone of them is easy going, near perfect uddered and possess all the characteristics we expect at this point. 0223 has a royal pedigree combining both Lassie 113 of Mc Cumber and Miss Wix 2002 of Mc Cumber. She is a moderate, extra thick, deep bodied female that tracks wide and puts a foot down in the corners. Her dam by Mc Cumber Titanium 3127 is a moderate framed, deep ribbed female and was one of the top indexing heifers of her calf crop. Backed by top cows 0223 is bred to get the job done.

A top cow prospect with the capacity, natural thickness and base width to work in any environment. 099 combines the body type of an efficient forage converter with one of the top IMF scores of the entire contemporary group. She earned an IMF of 6.6 for a ratio of 182 to rank in the top 5 IMF heifers. Her dam is a maternal sister to Mc Cumber Rito Rolette 1108 and traces back to B Pride 463 of Mc Cumber.

The Tribute daughters possess the capacity, thickness and design to convert forage and flesh easily. 0190 is cut from this mold. A big bodied, easy going female with top performance. 0190 earned weaning and yearling ratios of 101 and 103 respectively and combines this with an IMF ratio of 117. Her dam has a well-attached udder with small well-placed teats and is produced from a maternal sister to Lassie 935 of Mc Cumber

Produced from a line of top cows that go back to Miss Wix 2022 of Mc Cumber. 0208 is a sweet, well-made daughter of Chapman Memento 7601 with that wedge-shaped design. She is a feminine, high volume heifer with natural thickness and excellent hoof structure and heel depth. 7601 was our pick and top selling bull of the 2019 Chapman Cattle Company sale in Alberta Canada. 0208 is a new generation Miss Wix with fertility, productivity and longevity bred in.

A Big Time daughter with femininity, body capacity and natural thickness. You will love these Big Time daughters when they calve. They possess excellent udder quality, mothering instincts and are absolutely no problem to weigh and tag their calves. The dam of 059 is a near perfect uddered, feminine fronted daughter of Mc Cumber Fortunate 235. She calves early every year and maintains her condition well.

The Big Time daughters are high volume, wide made females with excellent udders and wonderful disposition. 0216 displays these traits as well and is produced from a 12 year old 4X13 daughter who calved again this year to the AI service and is raising a full brother to 0216. Her dam is a moderate, easy fleshing, neat uddered cow that does the little things right. A predictable genetic package bred to be profitable.

Dam Gale 9169 of Mc Cumber

The cowherd known for Outstanding Maternal Traits.

COMMERCIAL HEIFER CALVES

The heifers are the younger end of our calf crop. They are all purebred Angus heifers and were all raised right here on the Ranch. I think you will appreciate the uniformity of the group and would expect these heifers to become moderate, easy fleshing females with the ability to work in any environment. In an effort, to provide our commercial customers with the opportunity to purchase females these heifers will not sell with registration papers. They have been managed exactly the same as the Registered heifers selling in this sale as well as the replacement heifers we are retaining. Many of the heifers have already been cycling, but we will have them vet checked open and breedable prior to the sale. **Selling in groups of 5 or more by numerical gate cut.**
