SALE TERMS & CONDITIONS: Terms of the sale are cash unless prior arrangements have been made. Every lot will be sold to the highest bidder with the auctioneer settling disputes as to bids. All cattle are the buyer's property as soon as sold. All announcements made from the auction block on sale day by the owner or auctioneer will take precedence over statements in the sale catalog.

Guarantee: Bulls selling are guaranteed for the first breeding season. Every animal in this sale is, to the best of our knowledge, free from any disease or defect. All animals are guaranteed breeders. If an animal fails to breed after a period of six months, it may be returned to the seller in good condition and in compliance with Montana Health Regulations. The seller reserves the right to try said animal for six months and if it proves to be a non-breeder, either an animal of comparable value will be substituted or credit will be given in a future sale on an animal for animal basis. All pregnant females are considered breeders. No other warranty of any nature is express or implied.

Health: Each bull will pass a semen test before leaving the ranch. The health of the herd is excellent. We guarantee that all sale cattle will be able to ship to any state or Canadian province. All females are officially calf hood Bangs vaccinated. All cattle are on a pre-conditioning program and herd health program.

Feed Arrangements: Bulls will be fed until April 1 at no cost. After said date, buyers will be charged for feed until delivery, at buyer's risk

Delivery: Free delivery within 500 miles. Additional delivery beyond 500 miles will be charged at cost to central points anywhere in United States. For Canadian buyers, we will deliver up to nearest points of entry. Reputable purebred livestock haulers will be contracted for delivery.

Liability: All persons attending the sale do so at their own risk. Neither the owners nor any person associated with the sale assumes any liability, legal or otherwise

Accommodations: Ask for the L Bar W Sale Rate at the Super 8, Columbus – 406-322-4101
Numerous other accommodations available in Billings and Bozeman, Montana

DEAR FRIENDS AND HEREFORD AFICIONADOS

2021 HERD HEALTH

All bulls received a breeding soundness exam on February 3, 2021, by Dr. Lacey Fahrmeier of Stillwater Veterinary Clinic. Scrotal measure listed in catalog were taken at this time. All bulls have received the following health protocol:

Birth: Calf Guard, Alpha C&D, & Multi-Min

Branding: Inforce 3, Ultrachoice 8, Multi-Min, & Pink Eye

Pre-Weaning: Bovishield Gold One shot, Ultrachoice 8, & Multi-Min

Post Weaning: Pyramid 5 Plus Presponse, Poured with Ultra saber, and drench with Valazen.

Mid Development: Multi Min & Cleanup pour on.

Breeding Soundness Exam: Bovishield Gold FP5VL5, Multi-Min, and Ultra choice 8

BRED HEIFERS:

Sale females were re-preg checked on February 10, 2021 by Dr. Lacey Fahrmeier of Stillwater Veterinary Clinic and confirmed pregnant.

Females are on a spring vaccination protocol.

Spring 2020 – Bovishield Gold FP5VL5 HB (2 doses), Multi-Min and Poured with Ultra Saber.

Fall 2020 – Ultra Choice 8, Poured with Clean-up

At Re-preg – Poured with Ultra Saber

W

elcome to the 5th annual L Bar W Cattle Company production sale. We are so pleased that you have joined us. We believe we are presenting the best that the Hereford breed has to offer.

We are proud that our program

continues to grow and mature and that our customers are finding the bulls that will improve their herds. We will always strive to provide you sound, functional cattle with traits sought out by the commercial cattleman.

This has been a year that we all are glad to see in the rearview mirror. We faced many challenges, but I think we can all be proud that the cattle business and all the people involved in it, stepped up and showed the resilience so typical of our fellow cattlemen. We pray that this meets you all healthy and safe.

We were blessed with an easy winter, wet spring and a spectacular grass and hay crop. That gave our calves a great start. Our calf crop is uniform across the board. All have shown our best growth profile yet, with outstanding muscle development, bone thickness, length, pigment and carcass traits. We have raised some nice- looking studs. We hope you agree.

We pledge to always work to improve the genetic potential of our herd. To that end we added new genetics this past year. We are confident that these new bulls will add pounds to your calf crop. While we continue to add to our herd only the best in Hereford genetics, we are also able to provide top notch bulls at an affordable price.

All the bulls have undergone a full vaccination regimen and they are fully guaranteed.

We appreciate so much our return and new customers. Without your support we would not be here. Thank you!

Also, thanks to all the folks who help during the year and sale. You do not know how much you are appreciated.

Mike & Jeannette Walen | Carl & Denise Loyning

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

L-W 745E is one of the best 334A son's we raised. He has matured to be a deep sided, easy fleshing power house. He is siring progeny with the classic Hereford look. His dam will enter the donor pen this year, and she is well deserving. She has a picture perfect udder, feminine and just beautiful to look at. If you need to up your maternal genetics without sacrificing performance; look at the son's in the sale offering.

L-W We were able to purchase half possession of 9108G in Cooper's 2020 sale. 9108G is a really powerful 7156E son that is short-marked, good pigmented, outstanding balance, and has lots of muscle and substance. He has a big top and his muscle carries down into his lower quarter. 7156E is a moderate made bull that they have used successfully on mature cows and heifers. 9108G should follow in his footsteps as a very complete, well-structured bull with unlimited potential. We expect his daughters to be moderate, thick made, and good uddered. Owned with Johansen Herefords, UT and Cooper Hereford Ranch.

L-W Last year we headed out to Colyer's looking for an outcross bull to add to our bull pen. We came across 8319; we found his mother and loved her look and progeny. 8319 is going to be a great outcross option for us in the coming years. He has bone, maternal and carcass merit. So far his 1st calves are looking great as he is adding thickness, depth and that deep dark red color. 2021 is getting exciting.

YEARLING BULLS

This group of yearling bulls represents our top 75% of our 2020 calf crop. This will be our largest offering to date. You will notice this year we have added carcass scan data. This is our first year doing this and we are beyond pleased with the carcass data we received back. Please note that the EPD's were current as of 1/28/2021, they did not have the updated carcass data calculated as of this date. Updated EPD's will be available March 1, on our website www.lbarw.com.

We take pride in raising our bulls in a commercial cattleman's environment. Therefore their individual data are actual birth weights and weaning weights. These bulls are developed on a high roughage ration of dryland alfalfa hay, corn and a complete amino grower pellet under the direction of Josh Stroh and Calvin Bacon of Hubbard Feeds. Our avg. daily gain on a 120 day test period was 3.42lbs.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Pelton Livestock's Sale Day Conference Call.

SALE DAY CONFERENCE CALL

It's as easy as

L-W HERD BULL! This 6128 son is awesome. Big, dark red bull, with big scrotal development, wide based and just a beast. His donor dam 1005Y gave us a great set of ET calves, and is now owned by B&D Herefords of Kansas.

- Impressive Carcass data: ratioed a 114 on REA and a 106 IMF
- Gained over 4 lbs per day on test
- Moderate BW with excellent growth numbers
- Retaining a 1/4 in-herd semen interest

L-W New and exciting genetics in this set of three flush brothers out of the CL 1 Dominette 1116Y donor and C CJC Belle Heir. We really thought outside of the box here. This is a great combination of the maternal Line One female and the stoutness and carcass merit of a Colyer bred bull. These bulls could change a program, either on the maternal side or on the feeder side.

- 078H is 2nd high gaining bull of the offering: impressive 4.3lbs per day
- Bone, body and, red to the ground

L-W Here is an opportunity to get an older fall bull straight out of the Jim Baker program. His sire is a full brother to the great 5044C bull. His donor dam has sons working for purebred operations all over the country. This guy will get out and cover some country. Big, dark and, long.

- 100% eye pigment
- Projected sale day weight of 1800 lbs

L-W A great calving ease option for a little older bull, he is fall born Churchill bred bull. His dam won the Supreme Hereford Female at NILE in 2017.

- Outcross pedigree with HH Advance 5044C and C Miles McKee 2103

Pulled my bull this past summer, no corral just horse trailer and a bucket of cake. I highly recommend L Bar W Cattle Company.

Jeff Meir – Columbus, MT

BRED FEMALES

Our bred females offering is small this year but the quality is outstanding. There is some opportunity here to get your hands on future donor cows. Last year we bred all the heifers for January/February calving dates; if they did not settle to this window, then we bred them for an April/May calving window.

ABOUT HEREFORD GENETICS

7%

Higher pregnancy rates

\$30

Advantage in feedlot profitability

\$51

More per cow, per year

\$20

Advantage in feed efficiency

Hereford genetics maximize the value of your herd by leveraging traits such as fertility, feed efficiency, docility and feedlot profitability to your advantage.

*Compared to Angus-sired calves. Source: Daley, David A. and Early, Sean P. Impacts of Crossbreeding on Profitability in Vertically Coordinated Beef Industry Marketing Systems. American Hereford Association. Retrieved from <https://hereford.org/wp-content/uploads/2017/02HarrisHeterosisReport.pdf>. 57100C06

The one thing that 2020 taught us was to be even more thankful for where we live, our families, friends and most importantly our industry. It takes such a great team of individuals working behind the scenes to make our operation successful. We are so blessed and honored to have who we feel are the very best as what they do. It brings tears to my eyes to think of how blessed we are, as we would not be successful without you. There is no way we can ever repay you for your advice, support and help. We thank you from the bottom of our hearts.

Stand out with Proven Genetics

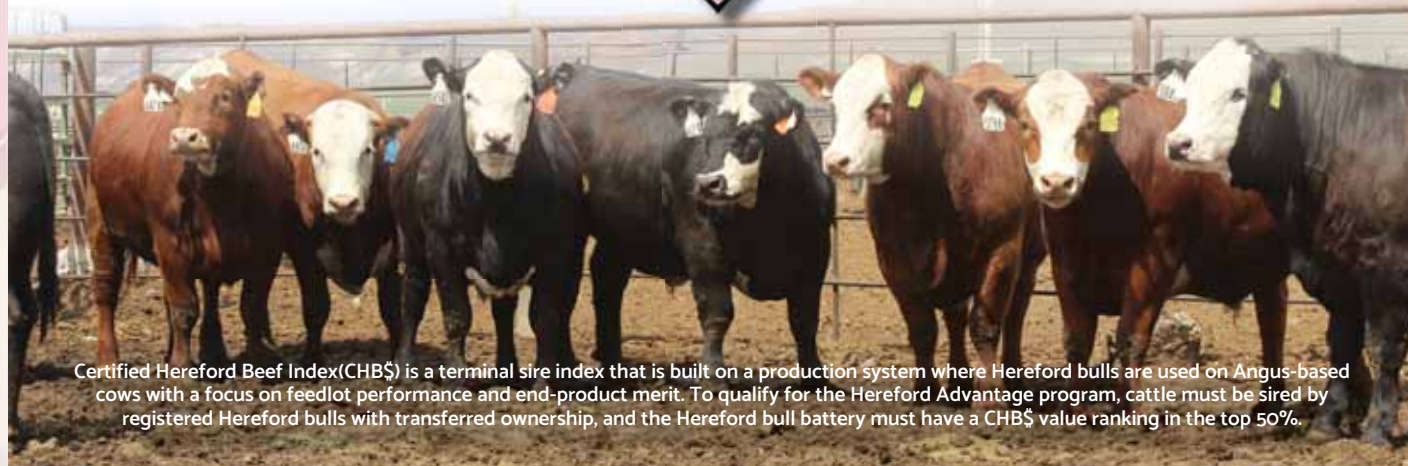

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for CHB\$ index.

PROGRAM BENEFITS:

- ✓ EPD ranking summary
- ✓ Added market exposure
- ✓ Genetic improvement tool
- ✓ Access to AHA resources
- ✓ Get started at HerefordFeederCattle.com

Certified Hereford Beef Index(CHB\$) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a CHB\$ value ranking in the top 50%.
