www.axtellcattlecompany.com

WELCOME!

We would like to welcome you to the annual Axtell Cattle Company bull and female sale. The bulls selling are basically the top half of our calf crop. We don't keep them all, not all animals are destined for breeding stock. We feel this is a good set of bulls this year and they have lived through their share of adversity. Between bitter cold, major blizzards, a lack of grass - they've seen it all. They fought a lot of dry, dusty conditions at weaning but have still proven to be a solid set that has gained very well. You will notice a lack of ear length on a portion of the bulls and heifers. We are hoping for a little warmer start to this spring and we joke that we will guarantee these bulls and heifers to throw normal sized ears on their calves.

We feel the quality of the registered heifers is very good. This is easily our best group as a whole. We've got daughters of some of our top cows in the group this year and feel that the quality runs deep. The commercial heifers will be one group from long time customers and very good cattlemen. These heifers will be great assets to commercial herds in the area. I think you would have to run the tires off a pickup to find a nicer set of commercial heifers than this group.

Be sure to check out videos of all the bulls and heifers online at DVAuction.com. Keep in mind that they will have matured another month from the date of the videos. Please note that we will have an EPD update, as it takes nine days for the EPDS to change after data is received by Red Angus, so please look up the registration numbers for the most up to date numbers. The carcass data will be as an update as well, as we have not received that data prior to print.

We invite you to stop by anytime to see the bulls and heifers, our herd sires or cowherd. Just call ahead to set up a time and get directions. The sale offering will be available for viewing at the sale location on the afternoon of March 29th.

We look forward to seeing you sale day, but if you are unable to attend and wish to bid just contact us, the sale representatives or pre-register on dvauction.com a couple days prior to the sale. You are able to bid live on DVAuction or leave proxy bids on lots you may be interested in.

Please let us know if we can be of any assistance to you in the buying process. We love to talk about cattle and would be glad to visit with you anytime. I will shoot it to you straight on any lots you may have interest in. Our goal is to have the right animals with the right buyers. We have years of experience with these cattle and if we know what you are looking for, we can assist you in getting the correct animals for your environment and management. Also be sure to follow our facebook page and website for more details. Hope to see you March 30th.

The Axtell Family
Brian, Jamie Jo and Clay

Axtell Cattle Company PRODUCTION SALE

Monday, March 30

1:00 p.m. (MST)

Facebook: Axtell Cattle Company

Inspection of Cattle: All bulls and registered heifers can be viewed at the ranch near Anton. Please call to set up an appointment and obtain directions. All sale animals will be available for preview at the sale location on the afternoon of March 29th.

Health: Health papers can be furnished for cattle to be shipped out of state. All bulls are tested negative for BVD and have passed a fertility test.

Delivery: Free delivery up to 250 miles is available on bulls and registered heifers. Other arrangements can be made on an individual basis, please call prior to sale. **NO DELIVERY IS AVAILABLE ON COMMERCIAL HEIFERS.**

Possession: Bulls can be taken after purchase or we will care for the bulls until April 15th, free of charge.

Guarantee: All bulls have passed fertility tests. All bulls will be guaranteed sound for the first breeding season (until Sept 1, 2020); however, the seller will not be held responsible for mistreatment or mismanagement. If a suitable replacement is available he will be furnished—OR— a credit toward a purchase in next years sale if a suitable replacement is not available.

Sale Order: Commercial heifers will start the sale, followed by bulls and registered heifers in catalog order.

Semen Interest: Axtell Cattle is retaining a 1/3 revenue sharing semen interest in all bulls selling. Buyer will retain all salvage value of bull.

Volume Discount: Buy 5 or more bulls and receive a 5% discount.

EPD Updates: Please note that EPD's are now recalculated weekly. Data in the catalog is from the last week of February.

Liability Statement: All persons attend this sale at their own risk. Neither Axtell Cattle Company or any other person connected with the management of the sale assumes any liability, legal or otherwise.

Absentee Bidding: Anyone wishing to bid who cannot attend the sale may place bids by contacting us or the sale representatives listed above. Internet bidding is also available through DVAuction.com and CATTLEUSA.com. Online bidding requires pre-registration prior to the sale.

This sale will be broadcast live on the internet.

One of the best bulls to walk our ranch. He is moderate framed, extremely long bodied and full of muscle. He ranks in the top 5% of the breed for Ribeye but we feel the carcass is just an added bonus. He is a true growth sire that covers the maternal side as well. We are just calving his first daughters and they are excellent. We are just as excited about Knock Out today as we were when we purchased him. Just a great bull!

Dominator was our all-time high selling bull at \$15,000 to Feiring Angus Ranch. We A.I.'d to him one year and loved the calves and Doug offered to sell him back to us. He is a real meatwagon, with loads of depth of body and his daughters have great udders. A great all around bull for us. **SEMEN AVAILABLE**

6249 was retained to continue the Red Knight line. To this point, we feel he is doing what his sire did, but probably a little better. That is saying something, as Red Knight 86A did a heck of a job for us. If you like Cherry Red, moderate, correct cattle with ample muscle, you will like 6249.

6011 was our heifer bull for two years. He is a Dominator 1925 son and out of the P011 cow that is seen throughout our pedigrees. He is an excellent calving ease bull, but throws high quality calves as well. We expect his daughters to be outstanding.

We retained 7215 for a couple reasons. We thought he had the best feet of our 2017 calf crop, we loved his dam and he was sired by BB 6015, who we had Al'd to for outcross genetics. He has a little more frame than some of our bulls, but has great feet, great length and most importantly a great dam. A brother is working at Schuman Red Angus in Oregon. We have high hopes for him.

E5 AXTELL EPIC 511

--

511 was retained due to his excellent foot quality, calving ease and the udder and feet of his dam. He passes all of these traits to his offspring. He was a good heifer bull for us, but has grown into a good cow bull with age. Use him for calving ease and excellent udder and foot quality.

COMMERCIAL HEIFERS

This year we are offering a group of commercial replacement heifers. These heifers are owned and raised by Steve and Matt Kalous from Brush, Colorado. These heifers come from one of the top commercial herds in Northeast Colorado. Each group of heifers will come into the ring and the buyer has the option of taking 5 head up to the whole lot. We believe this is a great group of red females that will make their new owners proud. The commercial heifers will START the sale at 1:00 P.M. so be ready for these outstanding females!

Lot A: Steve and Matt Kalous – Brush, CO (970) 768-2451

Steve and Matt are offering 17 head of replacement heifers. These heifers are born in January and February and are out of a high performance / maternal cattle herd. They will have extra size and weight and will make top cows. They are sired by Axtell Nebula 9704 #1294157, our top selling bull in 2010, Axtell Emperor 4229 #1703367 our second high selling bull of all time, Axtell Dominator 5830 #3478145 the third high selling bull in 2016 and Axtell Redwing 7106 #3817937, our second high seller in 2018. They buy the good ones and it is evident in the quality of their cattle. If you want to tie into top genetics, look at these girls. I would call this group, one of the best sets of cattle to sell in the state this spring. These heifers are weighing in the 850 lb. range, but are moderate framed and backed by generations of similar type. Please call Steve to discuss these heifers. He has documented carcass data on their steer mates that will make you salivate. Just an outstanding group of heifers!

Pictured are the 2018 consignment by Steve and Matt Kalous. For this year's consignments, check out videos on DVAuction.com

We lead off with a very balanced bull that does nothing wrong. We used his sire on heifers with no issues. His sire was a heavy muscled bull with time tested maternal genetics. The dam is an outstanding cow with perfect feet and udder as was her dam. Use this bull to make outstanding females. He will add thickness and muscle to his calves and give you easy keeping cows.

Lot 1

2 AXTELL LK 9221

★ **HEIFER BULL**

Lot 2 is out of a smaller cow that has loads of capacity and a perfect udder. This bull grew well and is long and thick made. He should be a cow maker and a heifer bull that doesn't give up performance. He combines three of our top cow making bulls in his pedigree.

Lot 3

★ **HEIFER BULL**

Lot 3 is a meat wagon! He's a real chunk, is very deep bodied, has good muscle and a huge scrotal. He was a standout from a young age. Clay picked this bull out in July while changing pastures. He was correct to like this bull. It's really hard to beat a bull with Cody x Gambler on the cow side. He should add pay weight while maintaining a moderate frame and making great cows.

Lot 6

A cherry red, long bodied bull with excellent length and thickness. His dam is a smaller framed cow with all kinds of capacity and a perfect udder. She always brings in a big calf. An excellent choice for bigger heifers or cows. He will add growth while keeping a moderate frame. One of my favorites all year.

9 AXTELL REDWING 9103
BULL 3/6/19 A100% AR

9103 is a narrow shouldered bull that should be a good heifer bull. He is double bred to Cody T008, who is arguably the best bull we've used. 9103 is a bull that fits a lot of needs. He will have plenty of growth, but will be calving ease and make very useful females.

7 AXTELL DOMINATOR 9735

A very thick made heifer bull that is loaded with muscle. He's been a personal favorite all winter. His cow family goes back to the 503 cow at Sheaman's, which is one of the best Red Angus cows I've ever seen. If you want to make 1,200 lb. cows that are built like bricks, he's the one for you.

8 AXTELL 34C JULIAN 9765

Lot 8 is a maternal brother to our herd sire Axtell Redwing 7765 who produced the Lot 1 and 6 bulls in this sale. Lot 8 has more growth then his brother and is very long bodied and heavy muscled. I would call him the heaviest muscled bull in the sale. His dam is a producer, she always has a top calf. He will sire cattle with some growth.

Lot 10

Lot 10 is a classy looking bull that is clean made and very long and deep. He is a bull that will add a lot more growth than what the EPD says, but they will be fancy calves. His dam is one of my top few favorite cows. Really no holes in her. Use this bull with confidence, he's a good one.

Lot 12 is a top Knock Out son. Lots of look, length and substance. His dam produces a good calf every year and this may be the best to date. His adjusted weight is a little lower due to being born early and living through a few more blizzards than some of the others, but I feel this bull is absolutely one of the top bulls to add performance. He should be a cow maker as well!

9032 is out of probably my favorite cow. His sire is out of one that's not far behind her. Our Amber cow family is probably my favorite for the type and kind that they are. This heifer bull is one I debated at Lot 1 due to the cows behind him. He's probably not the #1 bull here today, but his daughters likely will be. I look at his pedigree and just count the great cows. A big time cow maker type bull here... and oh he's a calving ease bull to boot.

The first bull sired by 6249. His sons were the highest selling sire group last year. I loved his sire, but I think 6249 is going to outdo his dad. He stamps his calves with a cherry red color, deep body, moderate frame and great muscle and length. This one is no exception and his grand dam was one of our top cows for years.

If we get a calf at around 90 lbs, he better be a good one to stay a bull. Here is the back story. Cow 123 lost her calf during the summer of 2018 on summer pasture. When he died, she got very fat. My experience tells me that a fat cow without a calf for half a summer equates to a bigger BW calf next year. I think it is unlikely that this bull throws this much BW. He was a gainer and is one of the easiest bulls to pick out of the pen. A real standout!

Lot 23 is out of a first calf heifer that raised an insane amount of lbs compared to her weight. She is definitely one that put it all into the calf, but she bred back in time for her second calf. Definitely a hard working cow! This calf is one of my top picks for calving ease due to his extremely low BW and his excellent growth and muscle. A very classy looking bull that has udder quality and blue collar cows bred in.

A bull ranking in the top 1% of the breed for birth and one of the top gainers on test. His eleven year old dam was a great maternal ability cow with short gestation and excellent fertility. Heifer bull for big country where you don't always get the cows checked!

A good heifer bull out of Dominor. He is a stout bull that lines up some excellent cows in his pedigree. He is from the same cow family as Lot 1. Lots of maternal quality and udder quality in this pedigree!

[illegible]

9448 is a calving ease Knock Out that brings a very moderate frame and loads of depth, width and thickness. It's hard to get moderate, calving ease bulls to have this much punch to them. He will produce calves that are ideal for Eastern Colorado's environment.

His maternal brother was the 2nd high selling bull last year to Steve and Matt Kalous. If you see Steve or Matt bidding on a bull, rest assured it is one of the best ones in the sale-they know the good ones. This one is a moderate framed heifer bull out of a top cow. This bull ranks in the top 3% for HB, CED and STAY. He will make females that work!

This is the last calf crop for Scamp. He is an underrated bull. The EPD's aren't a real fan, but in the real world, he's been a solid blue collar type bull that produced more than his fair share of good daughters. 9547 is triple bred to Beckton calving ease sires. His grand dam has one of the best heifers in the sale as well.

Lot 33 pictured with his dam (pair on right)
Another KO son, Lot 10 is also pictured (left)

32 AXTELL 34C JULIAN 9515
BULL 2/28/19 A100% AR

9515 had a brother as Lot 1 in 2018. This bull is a moderate framed calving ease bull that stacks great cows and traces back to this year's Lot 1 bull. Anything that goes back to Lakota 650 is going to have a top udder and be moderate and easy fleshing.

This bull is a high performance bull that is out of a bigger cow with a record of top production! 9423's brother was purchased as Lot 2 by Arrowsmith's Red Angus last year. His grand dam produced a top bull to Arrowsmith's a few years back as well. Brad knows the ones that grow and it is consistent in this cow family. Yes, this bull was bigger at birth, but he was long and lean and will produce those market topping calves for you!

If you have been waiting for the big framed growth bull, well your wait is over. He's a big bull that has lots of growth behind him. He will produce a lot of pounds in a calf crop. For my own personal herd, he will have too much growth and frame to keep daughters. If you live in a better spot, he will make excellent females, but his bread and butter will be as a big time growth bull!

A nice Knock Out son out of an easy going OCC cow. This bull is a moderate bull that has good thickness. He will produce those elusive 1,200 lb. cows that are easy fleshing and built like tanks. Knock Out seems to click with the OCC cows. You increase length, add muscle and keep the thickness and maternal value.

9632 is a very low BW bull that is a heifer's dream. He has good depth of body and a very nice dam. She has earned a 105 MPPA over her first two calves. I think she will be one of our better cows with age. This bull will be a great heifer bull.

Lot 46 is out of one of my favorite cows. She has calved multiple times outside in blizzards and never had a problem. That is worth more than any EPD says. This calf was a very low birthweight calf that grew well and is a long a narrow shouldered heifer bull. I value the cow and I value what this bull can pass on from his mother! Did I mention his 62 lb BW?

Here is a sleeper. He's out of a top notch old cow. This calf didn't have the growth of his many brothers that sold in the top of the sale. She slowed down a little and this calf didn't have the typical weights of a 967 bull. I believe there is the genetics to really grow here. Both his dam and grand dam were outstanding cows.

We kept a son out of this outstanding cow. His first calves are hitting the ground now. The cow is a magical cow in a blizzard - her calves all live and most are dry. She should pass these wonderful maternal instincts down to this guy. He's a bigger framed bull with a good amount of growth in him. A bull to add size and maternal instincts.

We finish out the bulls with a 99.9% 1B heifer bull. He's a clean made bull that is built for calving ease and is backed by a very nice cow. He is smooth and should be excellent for calving ease.

REGISTERED HEIFERS

We will be bringing the heifers into the ring in groups of two. You will have the option of purchasing one heifer or both, your choice. The heifers in the offering are right out of the replacement pen including some from the very top. These heifers are our best set that we've sold to date. They are not big, fat heifers. They are raised right along with our other heifers and should mature into 1,000-1,100 lb. bred heifers. They will grow well once they hit green grass. We feel that over feeding young heifers is detrimental to their potential milking ability and structure. We've included some of our top growth heifers and some of the more moderate heifers in an attempt to have something for different tastes in cattle.

A nice Julian heifer going back to some real good cows that were always productive. This heifer is a nicely balanced, moderate framed heifer that should make a top cow.

Clay is selling one of his heifers since he didn't have a bull this year. This girl is the second Knock Out heifer that we've allowed to leave, the first sold last year for \$5,750 as a pick of the replacements. She has extra frame and growth and is very fancy. She may push it for size in our environment but she should make somebody a great cow.

The dam of this heifer is a product of our small ET program. We don't use ET much, but when we do, it is to an old, proven cow that has done it over and over. We don't believe in ET until they have proven they are good mothers, good producers and have longevity. This heifer has old, productive cows throughout her pedigree on both sides.

This heifer is out of a picture perfect cow. She was a little light at weaning but has grown well and is a very deep bodied, stout made heifer. She's a good one.

This heifer's dam is a maternal sister to Lot 91. A good chance to make a pair out of these two. The first 6249 daughter to sell. We have high hopes for him, we feel he is out producing his outstanding sire.

This heifer goes back to a nice cow – Miss Romeo 12. We purchased her as a calf from the Ocho Vaca Dispersal. She lasted forever and was a great cow. This heifer should carry on the legacy.

This is the youngest of our replacements, but she's out of a top notch cow that is a good producer. Lots of thickness in the cow. I feel she will make a solid cow.

OUR PROGRAM

We purchased our first Registered Red Angus cow in 1993 and started in the Red Angus business in 1997. We started small with purchases from well known herds and over the years we've been able to increase our herd through additional purchases at Boot Jack, Milk Creek Reds, Beckton and others. All of the cattle we have bought in the last five years have went back to a base of Boot Jack, Beckton, Buffalo Creek and Beeby genetics. We have used A.I.; however, our bread and butter has been buying the best bulls we can find and using them in natural service. We are also using more home raised sires in our program. We feel that our herd bulls are as good or better than most A.I. bulls in the industry. Using our home raised bulls is something that has really helped us improve our cow herd. We take a lot of pride in udder quality and mothering ability and knowing the dam of our herd sire is important to us so that we don't bring in any unwanted traits through the cow side.

Our program is focused on convenience traits. We strive for a cow herd that has sound feet, excellent udders and good fleshing ability. We live in short grass country where large pampered cattle will not work. We have found that moderate framed, easy doing cattle are the way to go here. Excessive growth EPD cattle are typically gone very quickly due to our limited feed resources. We breed for the middle and feel that if our EPD's indicate that we are near the breed average in most traits, then we are doing something right. You will not see many sires used here that are trait leaders at any one trait, yet they will be very competitive at most traits. You will notice a strong Boot Jack influence in our herd. We really like the maternal side of the Boot Jack cattle and feel that the infusion of Beckton genetics have complimented them well.

The dam's and most of the sires of these bulls are available to be seen at any time. Calving ease is also a focus of our program. We have had very few calving problems in our herd.

For more information on our program, please don't hesitate to contact us or check out our website at
