Annual Bull Sale

March 7, 2022

At the Ranch • Watford City, ND

85 ANGUS BULLS • 30 FANCY COMMERCIAL HEIFERS
 2 RANCH-BROKE HORSES

www.BestAngusAndQuarterHorses.com

Welcome!

Team Best Angus, Back Row, L to R: Lyle and Sue Best, Vawnita and Pete Best, Jaden Murphy, Kim and Lee Murphy; Front: Kyle Best, Rita Hovet and Morgan Murphy

Thanks so much for your interest in our program. We are excited to welcome everyone to the ranch again this year. We loved having the sale at home last year and the customer feed-back was positive, as well. The bulls will be penned on sale day by 11 a.m. around our barn. It will remain a video auction and will be broadcast on DVAuction again, just like previous years, for those of you that can't make it to the sale.

This past year was trying, as severe drought continued. Most of our cattle handled things well, but some didn't and are no longer a part of our program. You need stress and adversity to test your genetics and your breeding program. We've had plenty to test the last couple of years.

We have enjoyed feeding the bulls at the ranch again this year. They like the extra space, and I like the fertilizer they are depositing on our fields.

Thank you!

Thank you to our friends, family and neighbors who help and support us year-in and year-out. We thank God every day for our village. We would like to extend a special Thank-You to Tracy Davis. Each and every day she has a smile on her face and a positive outlook regardless of what the task list is for the day. Lastly, thank you to each and every one of you for what you do...you are vital to what we do, so if there is anything we can do to better serve you, please share those suggestions. We want to hear them.

BEST Angus BULL SALE

Profitable *by* DESIGN ~ Efficient *by* NATURE

March 7, 2022

SALE: 2 P.M. CST

LUNCH: 12 P.M. NOON

****AT THE RANCH****

Watford City, ND

North Dakota Stockmen's Association

SALE TERMS & CONDITIONS: Terms of the sale are cash. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale will do so at their own risk. Neither the owner, nor any person connected with this sale assumes any liability, legal or otherwise.

SALE FORMAT: The bulls will be on display at the ranch prior to the sale. The auction sale will be conducted at our ranch. Please see the next page for details. DV Auction will produce a video prior to sale day that we will be using to conduct the sale instead of running the bulls through an auction ring.

VOLUME DISCOUNT: We will discount 3% on purchases of 3 or more bulls, 5% on 5 or more bulls, and 10% on purchases of 10 or more bulls by one buyer or buying group.

SEMEN INTEREST: We are keeping a semen interest in many of the bulls. These are bulls that we may want to collect semen on in the future. If any semen is sold, we would share in the revenue generated from the sale of semen. Buyer has full possession and full salvage value of the bull.

GENETIC CONDITIONS: All bulls are guaranteed free from all known genetic conditions recognized by the American Angus Association (as of March 1, 2021).

SIGHT UNSEEN PURCHASE PROGRAM: If you are unable to attend our sale, but you would like to purchase a bull, please give us a call and we'll be glad to help you with your selection. Describe what you are looking for in a bull, and what your price range is. We can assure you that your bid will be handled with integrity and your money will be handled like it is our own. If you do not like what we selected for you, we will keep the bull and you can keep your money.

DELIVERY: We offer free delivery for the bulls within a 300 mile radius of Watford City. The heifers will be ready to go following the sale.

LUNCH: Please join us at the ranch for lunch beginning at noon CST.

Strommen Livestock Services
Fort Rice, ND • (701) 290-3886

We live at the end of the road. Navigation to **1930 118th Ave NW** should send you southeast of Watford City. If it doesn't, please call Vawnita (701) 580-1862 or Kim (701) 866-7813 for directions.

There will be sale-day signs at Hwy 85, east bypass of Hwy 23 and at 120th Ave. Navigation works most of the time, if you type in our address. THE RANCH IS SOUTHEAST OF WATFORD CITY.

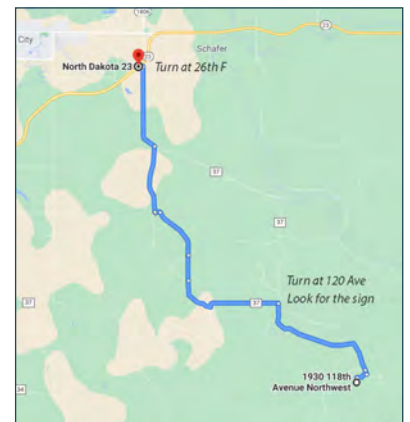

DRIVING FROM WEST, NORTH OR SOUTH

You will want to take US Highway 85 until you come to the County Road 37 intersection. Once on County Road 37 you will drive 7.8 miles to 120th Ave. The intersection is on a curve with an old school house and you should see a sign as well. You will be turning off pavement at 120th Ave and you will stay on the gravel and scoria road for 3 miles until you arrive at the sale location.

DRIVING FROM THE EAST

You will be driving in on Highway 23 take the Watford City Bypass. Once on the bypass you will take the first left turn onto 26th F for just a few feet. You need to quickly turn right onto County Rd 37. Stay on County Rd 37 for 7.5 miles until you get to 120th Ave. You will see signs and an old school house by the curve intersection. You will now be on a gravel and scoria for the next 3 miles to the sale location.

CAR HICKORY 547

CAR Hickory 547 traces nine times to Lady Traveler 449

We have been big fans of Connelly Angus Ranch in Valier Montana for over 20 years. My favorite cow family at their place is the Marie family. We have purchased a cow and a featured flush from them in the past. The Marie's have adapted extremely well to our environment. Hickory is linebred top and bottom tracing back to Lady Traveler 449 nine times. He traces many more times to Lady Viking 131, the dam of 449 and the Matriarch of all the Marie lines at CAR.

Viking 977 GDAR was the sire of Lady Viking 131 and the landmark sire at CAR. Viking GDAR 977 was a maternal bother to the great maternal sires; Rito 054 GDAR and Traveler 1148 GDAR. I have been impressed by the Hickory sons CAR have been selling. He is a calving ease sire that puts a lot of length and more performance than you would expect. They perform well and demonstrate agreeable dispositions. The bulls look stylish and the daughters look incredible. Hickory genetics will definitely be a big part of our genetic profile moving forward.

It was a fine, healthy life, too; it taught a man SELF-RELIANCE, HARDIHOOD, and the VALUE OF INSTANT DECISION...I enjoyed the life to the full."

- President Theodore Roosevelt on his time spent in the North Dakota Badlands.

A special bull out of an exceptional cow. She has daughters working as donors in our herd and at Badlands Angus. This stand-out ratioed 110 at weaning and is doing well on feed. He should be a sure-fire heifer bull.

How we do business:

We want to earn a reputation of having excellent quality cattle, but even more importantly we want our customers to feel they have been treated fairly and received excellent value in their purchases. Not every animal we sell will turn out as anticipated. We want to know about it, so we can make it right.

#Sinclair Fortunate Son
Miss Wix 662 of Best Angus
#Miss Wix 307 of Best Angus

This is a really nice bull for use on cows. His dam is doing an excellent job. She is moderate-framed, stays in good shape and has been solid on fertility. Teats get a little bigger than I like right after calving, but they are not a problem at all.

S A V RESOURCE 1441

We are excited to be offering Resource genetics again this year. They have been my favorite sire group everywhere I've seen. We would have used him earlier, but we feel strongly that it is our responsibility to our customers to make sure the females are going to fit our breeding philosophy and our unique environment that we call home.

Resource is a complementary mating for most of our cows. We have a high maternal calving ease cow herd. Resource adds muscle, rib, fleshing ability, and performance to our cattle. It is rare when a bull comes along that breeds as true as Resource. He has been bred to almost every kind of cow in the Angus breed and the progeny are powerful and extremely consistent regardless of the cow's pedigree. Resource progeny are not only stout, but they have great breed character, and excellent feet. Resource will moderate frame size and milk. We are very confident these are "Badlands" bulls that will sire some of the best calves you have ever sold. These bulls will also leave you daughters that are easy fleshing and will add longevity to your cowherd. Resource passed away in November, 2019. We feel strongly these genetics will be timeless and in strong demand for many years.

Lassie 104 has been a tremendous donor for us. We have used sons of her and many daughters have been retained in the herd. Her disposition is really special; she is a gentle mother and easy to handle. Her Resource sons have been excellent bulls. I would love to see these brothers sell as a group and really help build someone's herd.

We have never had a cow give so much to our herd. She maintained her Pathfinder status right up until the end. Her calf died last spring or she would probably still be producing. She has passed her longevity on to her progeny. We have a daughter that will be 15 this spring and one of her sons was still running with cows at age 10. Buy these bulls with confidence. Their genetics are as proven as you can get.

INVESTING IN YOUR *future*

Daily management determines whether or not you can pay your bills today. Sobering fact is you will not receive return on your investment for at least 18 months when you sell your first calves out of your new bull.

Investopedia defines a long-term investment as any asset that a company plans to hold for more than a year. Purchasing a bull is long term investment

in all of our futures. If you are keeping your own replacements or selling females, your bull purchases will affect your future and your children's future indefinitely.

The market determines a base price for all bulls, but the extra investment that will impact your family's future for potentially multiple generations is often times the cheapest part of the purchase. Most calculations that I have seen are based on selling more weight. This value can not be over looked, but there are a whole lot of other issues to consider.

- Do you think fuel costs and other inputs are likely to decrease in the future?
- Is it going to be easier to hire people if you want to expand your cow herd in the future?
- Do you think the price of cattle will go up or will you need to spread your costs over more cows to improve profits in the future?
- What kind of cattle will be in demand in the future?

CATTLE THAT ARE EFFICIENT WITH NATURE ARE TIMELESS GENETICS AND AN INVESTMENT IN THE FUTURE.

Thoughts about FERTILITY

I attended a meeting in Kansas City where we were discussing fertility in the Angus cow herd. Using the heifer pregnancy EPD as our measure, the Angus cowherd has reduced its fertility over the last 50 years. I find this fact very concerning. I started thinking back to all the recent conversations with producers that are concerned by their larger open rates.

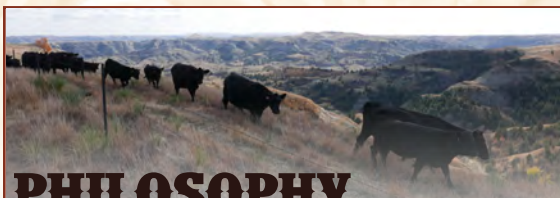

I am sure this same observation would be seen in all of the major breeds in the United States as well. The first thing I thought of is if fertility/ longevity is the most important trait for the profitability of commercial ranches, how can nearly every other EPD be increasing and the fertility EPD be declining. How could we as breeders let our priorities so far out of line. We are enrolled in Maternal Plus to aid in improving fertility trait collection and improving accuracy and reliability of the fertility EPDs for the Angus Association.

I think there are a few reasons that this has happened.

1. Obviously, other traits are taking priority when breeding and selection decisions. The industry has seen increases in growth, mature size, and milk, and improvements in carcass traits. I am not saying those traits don't matter because they do. However, fertility can't be an after-thought when making breeding decisions. At Best Angus, we have always taken a balanced approach to trait selection trying to improve our cattle, but we will not sacrifice fertility. It is the first trait that we think about. We have sent a lot of beautiful cows to the sale barn because they were open or late.
2. The second issue is our national cow herd may still be just as "fertile", but we have bred for an animal that no longer functions in the natural environment and needs additional inputs to breed in a timely fashion, neither of which help your bottom line. The result is the same; open cows for you, or a much larger feed bill. Our ranch and management style really challenges fertility. This challenge is good for our customers (but an expensive challenge for us). The breed up on the females we have sold to other producers has been excellent. We are proud of those reports.
3. Not intentionally, but it is likely that breeders are selecting genetics from lines of cattle that have fertility issues. Fertility has always been a front of the brain trait when making breeding decisions because it is the #1 economic trait. At Best Angus, we keep daughters and bulls from cows that breed up early to use for our next generation of genetics. When we bring in outside sires, we investigate the programs and the genetics these bulls come from to make sure fertility is one of their top priorities as well. We feel there is a body type that works in our environment as well. We want our cows to be wide bodied, but wedge shaped with refined shoulders and neck. Last, but not least they need to have a feminine triangular shaped head, a critical phenotypic indicator of fertility.

BUILDING BLOCKS OF A BEST

PHILOSOPHY

- The basics of breeding cattle is to concentrate favorable genetic combinations over and over again
- There is a visual “type” that works in our environment. It is imperative we continue stacking that type
- The dam is the most important member of a pedigree
- If you keep stacking great cows, you can’t help but end up with a great herd of cows

TESTING GENETICS

The only true way to determine what genes should be concentrated is to test the animals under certain management.

- We do not creep feed. It is the best way to determine maternal prowess of a cow.
- Our cows run in big pastures and rough terrain. These pastures put tremendous pressure on survival instincts, libido, sound feet and legs, fleshing ability, and above all else, fertility.
- We winter graze as long as possible. Our cows need to hustle to find top forages, flesh easily and stay sound.
- We pasture calve, if the weather allows. Our cows need to find a place to calve, clean up their babies and get them up and nursing. We weigh and tag them in the pasture, so they need to be calm and trusting of me, or they find a new home.

DEVELOPMENT

Our method to develop the bulls is slow and steady. On sale day our bulls would look more impressive and would sell for a higher price, if we fed them more, but:

- We want our bulls to be hard and sound, so they can cover your cows and come back home in decent flesh.
- We want to feed the bulls aggressively enough so we can test feedlot performance and carcass traits, but we refuse to overfeed our bulls jeopardizing their feet and long-term metabolic health. We have customer reports of 10 year old bulls still covering cows.
- The bulls are developed in large pens, so they get plenty of exercise, making sure they are athletic and ready to go to work.

ST ANGUS BULL

In theory our perfect bull would look awesome, gain well, have a clean pedigree backed by many generations of great cows. He will be developed responsibly for longevity and raised in a similar environment to our commercial customers. Of course, he would have an agreeable disposition and moderate birth weight.

REPORT CARD

Cow Prowess	A+
Big Pasture Ready	A+
Winter Grazing	A+
Pasture Calving	A+

SIRE

- Focus on proven bulls with high EPD accuracies over 90%
- Proven bulls mean less genetic "surprises"
- Pathfinder sire, with great reputation as a female sire
- We travel to look at progeny in a variety of environments before selecting a new sire
- We try to incorporate fresh genetics, but shy away from certain bloodlines that do not meet our standards
 - Dam is extremely important in sire selection

DAM

- We believe the cow is the core building block behind our bulls
- Generations of top cows make up a great breeding bull
- Easy to buy sons out of sire X, but it takes years and generations to develop a cow that fits your environment
- We like 10 year old cows, because they have to be fertile, sound and productive to last that long
- We tend to focus on low birth weights cows with above average nursing ratios and marbling

Hello, my name is Justin Dahl. I grew up on my family's farm and ranch in Keene, ND and cattle have always been my favorite part of the operation. I started in the registered Angus business in 2016 when I purchased four heifers from Martin Schaff. From there, I set out with a goal to breed cattle that are functional and productive in a commercial setting. My cows are managed in the exact same manner as our commercial cow calf operation. Doing this has allowed me to narrow down which genetics will work for the commercial cattlemen.

While in college, I got the opportunity to do an internship here at Best Angus and Quarter Horses. It was a great experience and I was excited when Pete offered me a part time job upon my graduation from MSU Bozeman. I've learned so much about the breed and business from Pete and Vawnita in the last two years and am thrilled to be a part of this operation. I've found we share the same beliefs in how cattle are managed and produced and I'm grateful to be able to consign bulls in this sale. I look forward to meeting you all!

It is very rare for us to use an unproven outside bull. It is also not very often a bull like this comes around. We tried to purchase Tribute, but came up short. Tribute was an extremely impressive individual as a yearling. He crushed his contemporaries at nearly every important measurement. The Lassies are my favorite cow family currently at McCumber Angus Ranch. We are very happy with the Tribute calves. He is a pure calving ease bull. What has been impressive to me is the power that he puts into his calves in such a clean attractive pattern.

The daughters are what I was hoping they would be. They have deep sweeping rib, a wide hip, and clean necks. They are very attractive. I was pleasantly surprised last spring calving the first daughters. They were kind and gentle mothers that always knew where their calves were. They definitely have the look of badlands cattle.

We used these 4 Tribute sons on our registered cows last summer. They stayed in good shape throughout the summer, especially considering the circumstances. We are excited to get calves out of these bulls this spring. We are optimistic these sons out of 367 will have additional performance and a little more consistent dispositions and intelligence. We AI'd the heifers to 0028 and used him clean up on the same heifers. The tribute daughters we calved last spring were a delight. They were calm, attentive mothers with excellent udder structure.

**THANK
YOU**

We are very thankful for Tracy and Jon Davis for all they do at Best Angus. Tracy has worked alongside us since 2016.

ANGUS ALLIANCE WINCHESTER 975

He has a gold star, proven pedigree. Winchester is one of the highest performing direct sons of N Bar Emulation EXT. EXT is one of the most influential herdsires of all time, with 38,000 progeny reported. His dam is the great Coleman Donna 386, the matron of the Donna family for Coleman Angus. This may be an "old pedigree", but the bull has a strong EPD profile. I have been pleasantly surprised by the bull calves. They are thicker and much more masculine than EXT sons typically are. They have good muscle with a wide hip and excellent rump shape.

The Winchester bulls were our high selling sire group in our 2017 sale. They were the second highest marbling and the highest ribeye sire group. We were so impressed, we purchased Angus Alliance International's semen interest. He is a true heifer bull that will give you plenty of performance when used on mature cows. This spring we will be finally getting a true test on what the daughters are like. They are absolutely gorgeous. This is not very surprising considering the sisters to Winchester that I saw in Missouri last year were three of the nicest cows I have ever laid eyes on.

Coleman Donna 386, Dam of
Angus Alliance Winchester 975

[DAKOTAWESTCU.COM/PETE](https://dakotawestcu.com/pete)

I TRULY APPRECIATE THE TRUST AND SUPPORT

our bull customers have given us over the years. Dakota West Credit Union approached me after our bull sale last spring and asked if I would consider coming back to work at the credit union. I needed to give this a lot of serious thought. Fast forward almost a year, I am convinced I made the right decision.

I am very fortunate to be working for a forward-thinking financial institution that allows me to work with customers all over our trade area. We offer a wide range of loan products from operating, cattle, equipment and real estate. I feel this position allows me to provide a new a valued service for many of you.

I care if your operation is around for future generations. I take great satisfaction in helping my customers become more efficient and profitable with the goal of creating a better quality of life for you and your family.

Best Rainmaker 7008 was our high selling bull in 2019; he sold to Perry and Sandy Ecker. We used him clean up in 2018, and we AI'd to him the past two years. He is one on my favorite bulls that we have raised. He was one of the heaviest calves at weaning and blew away his competition on our high forage feed test. He has an extremely laid back, easy going demeanor. He stays in excellent shape and is a very efficient breeder. He is moderate framed and very stout. We do not have many daughters in production yet, but we purchased him back from Perry and Sandy Ecker this year. We look forward to many more daughters in our herd going forward.

For those of you following our program you, know how much I like Sitz Rainmaker 11127. I would go back and use 11127, but I think 7008 will be more consistent siring the type that we like. He is heavier muscled and more moderate in his frame. His offspring still are soggy, deep, fast growing and have the same terrific dispositions. His dam was an absolutely perfect uddered, 1200 pound, soggy, easy fleshing, five frame cow. She is a member of the outstanding Marie cow family from Connely Angus in Valier MT. His maternal sister has become my favorite donor cow. The Rainmaker daughters are making excellent young cows.

DVAuction

Broadcasting Real-Time Auctions

Can't make the sale? **Bid from home with DV Auction's "real-time" internet bidding service!** Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab.
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction - a DV representative will notify you when you are approved.
3. Tune in for the sale and make your purchases!

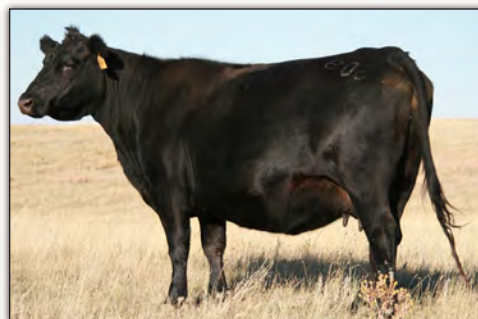

After the sale, contact Pete to arrange transportation and payment. High speed internet is required for successful bidding – be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding: If you can't make time to watch the sale, register a proxy bid and DVAuction represent your bid while you're away. Look for the "proxy bid" tab on the auction listing and fill in your maximum bids. They'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. DVAuction support can always be reached at (402) 474-5557.

PICK OF THE ENTIRE 2021 HEIFER CROP

Pick of the entire 2021 heifer crop. Vawnta and I are excited to offer the pick of our entire 2021 Heifer Crop. Sires represented are the same as their bull mates, along with a few nice Box-Cross heifers out of first-calf heifers. We have sold females in the past that have gone on to be donors at their new prospective herds. I'm sure there is a donor or two in this crop, as well. Selection needs to be made prior to June 1, 2022.

30 COMMERCIAL HEIFERS

We decided to offer 30 head of commercial heifers. These heifers are out of our registered herd out of our bulls. We will sell them as groups of 5 head or more. High bidder will have the ability to purchase all 30 head.

Adam and "Y"

"Rita" Tell and Katie

Genuine Hombre
Zandys Red Queen
Two Bucks A Jack
Twisten Four Parr

Y is a good horse to have around. After Tracy started him, Pete and I both rode him as a 3 year old, Kyle and Justin rode him as a 4 year old, and Pete's cousin, Adam rode him last summer. Kyle hauled him to town last summer for the 4-H horse show and Justin turned a few steers on him last fall.

Anybody can get along with him. He's low geared by nature, not a huge fan of hard work, but takes everything he's been asked to do in stride... be it a long, slow stride.

The Y problems: he jumps cattle guards, has a naturally high head set, and is so long spined and strided that he isn't super handy in small spaces. If you want to try him before the sale, just give us a ring. He will be close and handy.

"Rita" is our go to ranch horse. She is a 5 year old registered Dunn mare that we purchased from Best Angus. Her extensive use on the ranch includes moving cows, sorting pairs, opening gates, doctoring in the pasture, dragging calves to the fire. Most anyone can ride her. Rita has had many rides in the heart of the Badlands. She is sure footed and will go any direction you point her. Tel has her going in the arena too. Head or heel steers all day long on her. He has been hauling her to local jackpots and winning on her. Leave her sit, pull her out of the pasture and jump on her and go. She is willing to go in any direction you want her to.

We have been patiently looking for a stud for several years. First, we wanted something that was from a strong, proven, Pitzer mare family. Over the years, some of the nicest, quick-footed, hard-stopping horses were Mr. Joes Song's. Bringing him into our pedigrees would be a bonus. Because of the palomino and dun factors that we have picked up from Shining Spark and Genuine Hombre over the years, we needed a base color. Joey put all these things into a pretty little package with the bow on top being his quiet, kind, gentle personality.

Joey will spend the rest of this winter in Nebraska with Clayton Sc Wenger working on a Performance ROM in healing.

We will take a handful of outside mares for 2022. If all goes as planned, we will start offering yearling prospects at our 2024 sale.

JOE JACK
