BOWMAN AUCTION MARKET
BOWMAN, NORTH DAKOTA

McDONNELL ANGUS

Welcome to our annual bull sale!

We would like to welcome everyone to our 15th annual bull sale here at Bowman North Dakota

McDonnell Angus has been in operation for 51 years and has always had a strong performance program making it one of the older performance Angus herds here in the north. We have maintained a strong emphasis on maternal characteristics and efficiency with other traits of economic importance to the rancher.

A few years ago Leo and Sam presented us with the opportunity to take over the ranch and work alongside them and continue the legacy built by the McDonnell Family. We jumped at the opportunity to go back to the lifestyle we were both raised in, it is truly a gift to get to live the life that the ranch provides. We continue to be excited about the efficiency program that McDonnell Angus has been dedicated to the last 12 years, it is so rewarding to see the progress some of our customers are seeing in their programs.

Mathew Fischer managed the North Dakota ranch for several years and his Angus herd was born out of our genetics we appreciate having him continue with our program and contributing to our sales. Steve Williams has a nice set of Great Falls sons that will be included in the sale this year.

It's truly a team effort, while we focus on the day to day operations of the ranch it is a blessing to have Leo and Sam right there at Midland to keep a watchful eye on the bulls, and coordinate and assist with all the various testing and production tasks to put on this sale. We would not have the successful program that we do without the team. **"Team Efficiency" is McDonnell Angus.** We appreciate everyone one of our neighbors who have helped us the last couple years get settled in at the ranch, along with all the great people we do business with and especially you folks that buy our bulls. We are blessed with being able to serve you all and do not take the responsibility lightly.

2019 brought extended periods of subzero temperatures in the third trimester for our cowherd here at the ranch and our birth weights reflect that fact. We feed more, bedded more and the cows didn't get as much exercise during that time as we were all hunkered down trying to stay warm. That being said, we are all very excited about this year's offering of bulls and heifers. You are really going to like the bulls as they exhibit a lot of shape and thickness. They've been developed the right way, have a great set of feet and legs, along with a strong maternal background and pedigrees stacked generations deep in efficiency genetics. Bulls have been genomic tested, parent verified, ultra sound carcass tested, semen tested and feed efficiency tested. Heifers offered this year come directly out of our replacement pen. It is extremely hard to let some of them go but it will be enjoyable to watch them go into new environments and add value to your herds.

We understand the concern some may have attending the sale this year with the COVID-19 pandemic. We are more than happy to look at bulls and visit with you about any that you may have interest in. Frontier Sales will be providing live internet bidding, if you are more comfortable on the phone – we can coordinate to have someone on the phone with you during the sale.

We look forward to hearing from you and hopefully seeing you at the sale.

HEALTH

All calves at McDonnell Angus are given a probiotic paste and Endovac at birth. Spring turn out they are each given InForce 3, Alpha 7, Endovac. We booster with Endovac, Vision 8 with somnus, InForce 3, and Safeguard Dewormer at weaning and bull calves are boosted with Express 5 HS and Endovac again at Midland Bull Test. Heifer calves have also received pre breeding shots of Multi-Min and VISTA 5VL5 SQ in late April. For mineral we feed VitaFirm mineral year round (Heat, Concept Aid and Concept Aid with MOS depending on the season)

SEMEN TESTED

Bulls were semen tested and evaluated by Dr. Don Kruger, Bowman, ND. **We are keeping 1/3 semen interest on bulls in sale.**

ULTRASOUND

Complete Ultrasound data is available in the back of the catalog. Bulls were ultrasounded by Matt Lane on 3/17/20.

GENESEEEK

Bulls have all been Gnomics tested on new AngusGS  Powered by Neogen GeneSeek

DELIVERY

If you are needing assistance, we are happy to deliver up to the first 300 miles at no cost. If you haul your own you will receive a \$100.00 credit per bull.

TERMS

All cattle sell under the terms and conditions of the American Angus Association.

FIRST BREEDING SEASON GUARANTEE

All bulls selling for \$2,500 or more will be covered 50% by seller if they are injured during the first breeding season. Breeding season is defined as the 60-day period following the first turnout of bulls. 50% of the value of the bull up to \$8,000 in purchase cost, minus one-half salvage value, will be given as credit in a future Beef Country Sale or towards a replacement bull if one of equal quality is available by seller. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1. The guarantee does not replace mortality insurance and does not cover loss due to death or other natural occurrence or negligence. Mortality insurance is available sale day. (See page 31)

VIEWING

Bulls are on test at Midland Bull Test in Columbus, MT, and will arrive at Bowman Livestock on May 3, 2020.

GENETIC DEFICIENT CARRIERS

Any bulls showing as potential for AM, NH, CA, or DD have been tested and, if positive, removed from sale. No known carriers are being sold.

**We are so fortunate to have the friends and neighbors that we do.
From gathering eggs every day to ring service on sale day
there are more folks that lend a hand in the success of our program that
we ever could possibly mention. We are so grateful to each and
every one of you that has helped this past year.**

A Special Thank You to the following. . .

- **Steve Williams and the Midland Bull Test Crew** for taking such good care of our bull's health needs and providing a facility for the Efficiency Testing.
- **Matt Lane with Lane Livestock Services** out of Huntley, MT for Ultra sounding the Bulls this spring.
- **Don & Tammie Kruger** with the Bowman Vet Clinic in Bowman, ND for semen testing the Bulls this year and the all-too-often short notice ranch calls for brand inspections and health papers.
- **Kate Roberts** from Absarokee, MT for the photography on the Bulls.
- **Scott & Sam Fraser with Frontier Live Sale** for the Videos and Online Production.
- **Jim Erk with Erk Services** in Buffalo, SD for supplying us with VitaFirm products year around.
- **Liam Robins & the crew** at the Fallon County Vet Clinic out of Baker, MT for Preg Testing our cows and assisting with herd health throughout the year.
- **Mathew Fischer** for helping out with A.ling, Weaning & Freeze Branding
- **Paul Fischer** for wintering our Replacement Heifers and countless hours chute side.
- **Caryl & Co.** out of Billings, MT for all the amazing Ad work on Bulls of the Badlands.
- **Tanner Jensen** out of Gold Creek, MT for the fine job clipping.
- **Ravellette Publications** for the production of this beautiful catalog.
- **Harry Kerr and the crew** at the Bowman Auction Market for providing the sale venue and taking excellent care of our cattle both before and after the sale.
- **Gloria Kerr and crew of The Corral** who have previously served up a mean hot roast beef lunch before the sale.
- **Doyle & Julie Kruger with Kruger's Kitchen** of Rhame who have for many years and will hopefully again be serving us all a juicy steak dinner the night before the sale.
- **Dillon & Kalorada Eagon** for lending a hand anytime we need help working calves, A.ling or ranch sitting when we need a little break.
- **Bob Chamberlin** for all the countless hours helping work bulls at Midland this past winter – Freeze Branding, Ultra sounding, Semen Testing.
- **Rex Eagon, Oscar and Chentil Griggs as well as all our friends and neighbors.**

READING PERFORMANCE INFORMATION

GENETIC DEFECTS

We have tested and removed from the sale any known carriers for AM, CA, NH, & DD.

While some have said the Angus breed has a problem with defects, insinuating Angus have a greater problem than other breeds — that is simply not true.

All breeds have defects many similar to Angus. Fortunately the Angus breed is large enough that investments to discover the genetic marker for such defects, can be justified — not true in many other breeds.

This gives us what I believe is the Power of Angus, because like many genetic defects mother nature aborts many of these before they are born — effecting fertility.

This search by Angus to clear these up promises you that Angus will remain the Number 1 Fertility Breed.

www.frontierlivesale.com

This sale will be broadcast live over the internet via Frontier Live Sale.

You will be able to see and hear the sale live, and keep up with the bidding via a scrolling bid screen. For buyers that are unable to attend the sale, or that do not have high speed internet, you will have the option of placing a bid using the telephone bidlines. 406-860-6548

If you wish to bid on a lot via the telephone bidlines, you are encouraged to call a couple of lots in advance.

A sale order will be posted in advance of the sale and an online catalog with videos will be available at **www.frontierlivesale.com**

All buyers must register – registrations do not carry over from sale to sale or year to year. To register, go to **www.frontierlivesale.com** and click on “registration” from the home page.

From those who wish to simply view the sale without registering, simply click “VIEW LIVE AUCTION”, you will not be able to bid unless you have registered.

In order to place bids on the Internet or over the phone on sale day, you must pre-register and obtain a bidder number and a password at **www.frontierlivesale.com and clicking “registration”**

We encourage you to register early to avoid any problems and make sure you are set up to view the sale.

We continue to find a 20-30% variance in feed intake between the top 1/3 and bottom 1/3 of cattle we are testing. In 2019, we tested the progeny of 3 of our Efficiency sires against the progeny of 12 other sires---all from the same cowherd. The difference in feed costs between our 3 Efficiency sire groups and the poorest 3 sire groups was over a \$130.00/head. Against 12 other sire groups, our steers fed for \$85.00/head less. – Leo McDonnell

AB Capitalist was a high efficiency bulls out of 2015 Midland Bull Test. His progeny have done very well with a lot of substance and have excellent feet and structure. His first calf daughter have small teet with balanced tight udders. Top 5% of breed for \$Weaning. High efficiency at our 2019 steer test at Simplot Feedlot against 14 other sire groups.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand. Only 3 in 10 non-parent Angus bulls meet the Targeting the Brand genetic requirements.

Minimum Genetic Requirements

	Value
Marbling EPD (Marb)	+0.54
Dollar Grid Carcass Index (\$G)	+46.0

For more information on Targeting the Brand™ visit CABcattle.com.

COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®. Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions. A commitment to the female starts with MaternalPlus.

Contact AGI at 816-383-5100 or agi@angus.org for more information.

ANGUS. ONLY ANGUS.

There's only one DNA profile created specifically for Angus cattle.

Angus GS™ is the new standard in genetic testing for Angus cattle. Created by Angus Genetics, the profile is purely Angus DNA, so it will have better predictability and deliver more power and accuracy than any previous generation genomic enhanced EPD, and at a much greater value. Visit angus.org/agi for the test that only Angus Genetics could create.

FOR ANGUS. BY ANGUS.

Innovation is proving to be one of the high Efficiency bulls in the breed. He has balanced EPD's, and daughters that have proven themselves to last. Casey Mahar says they are clean uddered, very nice teated with capacity and fleshing ability. We really like the functionalism and disposition of this calves.

A high efficiency bull out of the 2016 Midland Test purchased by Krebs Ranch. If has been said that Believe's dam is the best cow at Winding River Angus with a great udder and small teats. He is a calving ease and performance package that sires a lot of look and shape. Great carcass numbers too.

A double bred Juneau 807 who was one of our high efficiency sires in 2015 and selling to Lucky 7 Angus. We like the extra bone and ruggedness of this bull, along with being double bred to one of the great maternal sires in the breed - Juneau 807 Top 10% of Angus breed for weaning weight and \$Maternal. Top 5% of Angus breed for Heifer Pregnancy.

Koupal Czech 158 - Sire of Performer 407

The #1 Efficiency bull in the 2016 Midland Bull Test. Owned with DeGrand Angus and Lucky 7 Angus. We really like the rib and muscle of his calves and out of a very good cow with great udder structure and teats.

Recently, we measured forage intake on cows that have survived under Arizona range conditions at the UA V-V ranch. The low RFI cows consumed hay at 1.9% of body weight while the high RFI cows consumed hay at 2.4% of BW (20% Difference in feed intake)... suggests that RFI may be useful in selecting cows that survive under arid range conditions.

RFI (RESIDUAL FEED INTAKE) (LBS/DAY)

The amount of feed intake an animal consumes daily, above or below its maintenance requirements as well as its performance (growth) requirements. **A negative RFI is a more efficient bull.**

Example: -2.0 means the bull ate 2 lbs. less feed per day than he needed to meet his body maintenance requirements and production needs (ADG). With today's feed costs, that is a savings of .40 cents/day or \$72.00 per feeding period. The difference between a -2.0 and a +2.0 bull is \$144.00 in the feedlot.

If you are keeping replacement females, by selecting for negative RFI, research has shown you have the potential to save close to \$60.00 per year on cow maintenance costs, and over \$100/cow in time by stacking generations of Efficiency genetics in your herd.

UNDERSTANDING EFFICIENCY AND RFI

Historically, the weight of an animal has been the most important component in determining value, which follows closely with production being the most heavily promoted and taught value in agriculture. However, when you consider that more than 75% of the cost of growing cattle is related to feed inputs, and that 70-75% of the feed consumed by cattle is solely for maintenance requirements, then the importance of improving the efficiency of feed intake becomes very real. With today's feed prices and narrow profit margins, improving a herd's efficiency of feed and pasture offers the greatest opportunity to improve Net Returns.

WHAT DOES THE RESEARCH SAY

- ✓ Efficiency is highly related to profit and growth is the traditional method of measuring efficiency. The problem is that using growth as a measure of efficiency also increase the size of the animal, which will increase maintenance requirements (70-75% of feed consumed goes toward maintenance requirements), which will increase appetite, which will increase the need for available feeds/grasses.
- ✓ Using RFI will lead to improvements in feed efficiency without compounding the need for additional feeds or increasing mature size in your cow herd.
- ✓ RFI allows you to produce at a level that optimizes on one's management and environment instead of stressing it.
- ✓ RFI is a highly heritable trait, meaning that through genetic identification and then selection, one can make rapid improvements.
- ✓ RFI research has shown that improvement in efficiency can be made by as much as 25%.
- ✓ Selecting for efficiency will allow the cattle industry to become more competitive in production with swine and chicken.
- ✓ Research has shown there is a 0.90 correlation (very high) between bulls measured for RFI postweaning and how their daughters will perform for efficiency in the cowherd.

QUESTIONS AND ANSWERS

- **What is the heritability of RFI (Residual Feed Intake)?**

0.38-0.40 (Moderately to highly heritable).

- **How is RFI calculated?**

RFI is looking at what the feed intake requirement is for maintenance for the individual bulls and then what the feed intake requirements are for production (each individual bull's ADG) and compares that to what the individual bull actually consumes.

- **What is Feed Conversion?**

Feed Conversion is the pounds of feed on a dry matter basis required for one pound of gain.

- **What is DMI (Dry Matter Intake) ?**

DMI, is the average daily feed intake on a dry matter basis.

- **How much difference can one expect to find in cattle?**

Research from Australia, Canada, and the U.S. have consistently found differences of up to 30%. Our first test group of 400 here at Midland, we found up to 40% variance.

- **If you have two cows weighing 1300 lbs and one produces 15 pounds of milk and the other 20 pounds of milk, wouldn't the other cow at 15 lbs require less feed?**

No, and it could just as well be that the 15 lbs. milk producer is a larger consumer of feed which compounds her inefficiency on both feed intake and lower production. That's the importance of measuring RFI. This is a case where size doesn't matter.

- **What should one be aware of when using RFI?**

First and most importantly, efficiency needs to be balanced with production and profitability. Low Intake with low production is no more cost effective than the high production and low efficiency.

- **Why can't we just use our eye and pick the more moderate, easy-fleshing cow?**

Don't confuse size or fleshing ease with efficient productive cattle. Contrary, to what some folks believe, RFI is not related to frame size, body type, or body condition. You'll find as many inefficient cows in any frame size and just because they look fat and easy-going doesn't mean they're efficient – it just means they're a fat cow.

EFFICIENCY TEST RESULTS

These bulls were all tested at Midland Bull Test in 2 different groups, as noted by their finish date. **RFI** is the index just with-in that test group, with half being over and half being under: **AAA RFI EPD** is a comparison across the Angus breed with a **NEGATIVE RFI EPD** bring the more efficient Angus bulls in the breed. **With great pride we would like to point out that all the Bulls offered here have a negative AAA RFI EPD.**

Bull Mortality and Accident Infertility Insurance

Provided through Stockmens Insurance, LLC

Coverage		
The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury. The endorsement for Accident Only Infertility provides coverage in the event of permanent impotency, infertility or the bull's inability to naturally service cows as a result of an accident sustained during the policy.		
Bull Mortality and Limited Infertility Moverage	Values: Not to exceed purchase price	
Term: Renewable one-year policy term		
Testing All bulls must be tested, certified and listed in the official catalog of a herd sale		
<u>Premium</u>	<u>Full Mortality</u>	<u>Accident Only</u>
10% of the purchase price \$150 minimum premium per policy	100% of the value of the bull in the event of death or humane destruction as a result of a life-threatening injury.	80% of the value of the bull in the event accidental and external infertility.

Value

The purchase price of the bull is considered to be the agreed value on the policy. The only exceptions are if, during the policy term, you attempt to sell the bull at auction but it does not sell, have it appraised at a lower value than the purchase price or castrate the bull.

Coverage

The coverage is available on the date of sale for those who choose to insure their bull(s). The policy will insure the bull from the date of sale for a period of one year. All claims must be immediately reported to the company. All mortality claims made to the company require a post mortem examination by a veterinarian. Accident Only: This policy is extended to indemnify YOU in the event of the ANIMAL covered by this section is proven to be PERMANENTLY INFERTILE, IMPOTENT or otherwise INCAPABLE of natural service or artificial insemination, resulting from ACCIDENTAL INJURY occurring during period of insurance, we will pay YOU the ACTUAL CASH VALUE of such ANIMAL(S) but not exceeding the sum insured stated in the DECLARATION.

SPECIAL EXCLUSIONS:

This policy does not cover losses directly or indirectly by any of the following events: Frostbite or freezing, Illness or disease, Reproductive disorders or abnormalities involving: scrotum, testis, epididymis, penis, ampulla, vesicular gland and prostate unless caused by an ACCIDENTAL INJURY.

CLAIMS

1. Claims must be reported to FLEMING & LONG AGENCY @ 406-272-1150 as soon as possible after onset.
2. Following notification to US of a possible claim, the ANIMAL must be given at least 3 months to attempt recovery unless WE agree to accept the claim before the end of such period, PERMANENT INFERTILITY, IMPOTENCY or INCAPABILITY must be total INFERTILITY, IMPOTENCY, INCAPABILITY or failure and not merely a reduction and be proved: To the satisfaction of both YOUR and OUR VETERINARIAN, and the ACCIDENTAL INJURY occurred during the policy period.

Cost

The cost of the coverage will be 10% of the hammer price per bull. Premium is due at the time of the sale to provide coverage.

The information contained herein is intended for informational purposes only. Insurance coverage in any particular case will depend upon the type of policy in effect, the terms, conditions and exclusions in any such policy, and the facts of each unique situation. No representation is made that any specific insurance coverage would apply in the circumstances outlined herein. Please refer to the individual policy forms for specific coverage details. Coverage is offered through Stockmens Insurance Agency LLC through General Security National Insurance Company.
