CIRCLE L ANGUS

Annual Production Sale

MONDAY, FEBRUARY 25, 2019 - 1:00 PM MST

BEAVERHEAD LIVESTOCK AUCTION

DILLON, MONTANA

Offering

110 YEARLING & LONG YEARLING BULLS
12 REGISTERED HEIFER CALVES
40 COMMERCIAL HEIFER CALVES

CIRCLELANGUS.COM

Welcome *to our 12th Annual Production Sale to be held in Dillon, Montana On Monday, February 25, 2019. Our customers are the driving force behind our business and we continue to strive to produce quality Black Angus that will make an impact on your herd.*

CORY AND KARI LAMEY
62211 Hwy 43
Wise River, MT 59762
Home 406-832-3535
Cell 406-491-7363
circlelangus@yahoo.com

This year's offering of 110 bulls have been PAP and Fertility Tested. In addition, almost all of the bulls (with the exception of a few) have genomic enhanced EPD's via the Angus GeneSeek test and have been parentage verified. This advanced information adds value as it allows producers the ability to make better selection decisions.

Also offered are 12 hand-selected registered replacement heifers and 40 commercial replacement heifers. The registered heifers are right out of the heart of our program along with our home-raised commercial replacements.

The cattle were raised in the Wise River high country ranging from 6000-8500 feet, where they were PAP tested and developed at Hansen Feedlot, 5050 feet (just north of Dillon) on a high roughage ration promoting even growth, soundness, and longevity. We have taken great satisfaction in feeding the bulls & heifers again this year and invite you to preview them anytime. We are pleased with their condition, growth and excellent dispositions.

The cattle are available for previewing at Hansen Feedlot (just past Mile Marker 6 on Hwy. 91 North) until Saturday, February 23rd and then Beaverhead Livestock Auction thereafter.

We invite you to come evaluate the cattle and enjoy a complimentary beef lunch beginning at 11:30 AM Monday, February 25th. Please contact us if we can be of assistance. We look forward to seeing you at the sale.

BID LIVE ON CATTLEUSA.COM!

Visit cattleusa.com and pre-register for bidding. Click on Beaverhead Livestock Auction and login to your account or set up a new account if you have not bid before. Once logged in, click the Submit button next to Beaverhead Livestock Auction to obtain pre-approval. Please pre-register 24 hours in advance of the sale. If you have questions, call Beaverhead Livestock Auction at 406-683-2002.

CIRCLE L ANGUS

MONDAY, FEBRUARY 25, 2019

BEAVERHEAD LIVESTOCK AUCTION | DILLON, MONTANA

Lunch **11:30 AM MST** | *Sale* **1:00 PM MST**

SALE DAY CONTACTS

Beaverhead Livestock Auction.....406-683-2002
Cory Lamey Cell.....406-491-7363
Kari Lamey Cell 406-491-1800

SALE LOCATION

Beaverhead Livestock Auction is south of Dillon and east of Interstate 15. Take Exit 56 and head north or Exit 59 and head south.

AUCTIONEER

Joe Goggins.....406-861-5664

REPRESENTATIVES

Kurt Kangas, American Angus Association.....406-366-4190
John Goggins, Western Ag Reporter.....406-698-4159
Jeff Thomas, AgriMedia.....406-581-8859
Devin Murnin, Western Livestock Journal.....406-696-1502

INSPECTION Cattle may be inspected at Hansen Feedlot, Hwy 91 N (just past mile marker 6 on west side of Hwy) any time prior to the sale. They will be available for viewing at the sale site beginning Saturday, February 23, 2019.

WINTERING Free feed until April 1, 2019 and then $3 per head per day thereafter.

DELIVERY Free delivery on bulls up to 750 miles and at cost thereafter. If you choose to haul your own bulls sale day, we will deduct $100 per head.

BIDS/SIGHT UNSEEN GUARANTEE If you are unable to attend the sale, please call us, the Publication Representatives, or the Auctioneer, and we will assist you with your order and offer a sight unseen satisfaction guarantee.

SALE ORDER Bulls will sell in catalog order.

ACCOMODATIONS

Fairbridge Inn Express.....406-683-3636, ask for Circle L rate.

ANNOUNCEMENTS Check CircleLAngus.com for a supplement sheet with up-to-date information such as yearling weights and scrotal measurements. All announcements made from the auction block take precedence over printed material in this sale book.

FIRST BREEDING SEASON GUARANTEE

All bulls selling for $3,250 or more will be covered 50% by Circle L Angus if they are injured during their first breeding season. This guarantee does not include death as that can be insured for. Breeding season is defined as a 60-day period following the first turnout of bulls. Fifty percent of the value of the injured bull, minus one-half the salvage value, will be given credit in a future Circle L Angus sale or towards a replacement bull if one is available. Salvage value, if any, will be split equally between Circle L Angus and the buyer. All injured bulls must be diagnosed by a veterinarian. We also reserve the right to a second opinion by a veterinarian of our choice. Please notify us as soon as possible should injury occur and prior to the injured bull being sold for salvage. All claims must be made by September 1, 2019.

FERTILITY Joe Hartley, DVM performed a breeding soundness exam, semen test, scrotal measurement and BVD test on all bulls.

HERD HEALTH All bulls are guaranteed virgin bulls and were vaccinated with Ivermectin Injectable, Pyramid 5 Presponse, 7-way with Somubac, wart vaccine, Fusoguard, and Pour On. Bovi-Shield Gold 5 - January 2019.

PAP TEST All bulls in the offering have been PAP Tested by Tim Holt, DVM and Pap Testing expert. Circle L Angus spring bulls were born at 5860 feet and summer ranged from 6000-8500 feet from June to October. The fall bulls ranged at 6000 feet from April through October. All the bulls were PAP Tested in Wise River and the PAP scores are in this catalog. For more information or recommended scores specific to your operation, contact us or Dr. Tim Holt, DVM at 970-596-1470 or timholt@colostate.edu.

RETAINED INTEREST Circle L Angus is retaining one-third revenue sharing semen interest in any bull sold in this sale. Full possession and full salvage value sells on all bulls.

TERMS AND CONDITIONS This sale is being conducted under the suggested sale terms and conditions adopted by the American Angus Association.

GENOMIC ENHANCED EPDS

Sale bulls that have genomic enhanced EPDs through the GeneSeek test are noted by this logo.

ANGUSGS Powered by Neogen GeneSeek

American Angus Association® Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

GROWTH

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height EPD (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first–calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight EPD (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height EPD (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

Cow Energy Value ($EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow $EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

$VALUE INDEXES

$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. $Values are reported in dollars per head, where a higher value is more favorable. The $Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value ($W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. $W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value ($F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Grid Value ($G), an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

Quality Grade ($QG) represents the quality grade segment of the economic advantage found in $G. $QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to $QG.

Yield Grade ($YG) $YG represents the yield grade segment of the economic advantage found in $G. $YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.
$G combines both $QG and $YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

Beef Value ($B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- **more accurate selection**
- **easier identification of genetic outliers**
- **the ability to propagate young animals with confidence earlier in their lives**

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	28	Milk	33
Birth Weight	21	Mature Weight	11
Weaning Weight	26	Mature Height	8
Yearling Weight	21	Carcass Weight	9
Dry Matter Intake	8	Yearling Height	11
Scrotal Circumference	13	Carcass Marbling	9
Docility	10	Carcass Ribeye	12
Heifer Pregnancy	14	Carcass Fat	10

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS ™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs.
