FRONTIER LIVE SALE

This Sale will be broadcast live on www.frontierlivesale.com. To view a sale,

1. Create an account, if you have already done so skip to next step. To create a new account, click on the word **Registration** in the upper right hand corner. You must fill out the information requested. Then click **Create Account**. An email will be sent to your email account you provided. Please click the link in the email to activate your new account.

2. Once you click the link, your account will now be activated

3. At this point, you may click **Continue To Browse Our Site**. This will allow you to view all upcoming auctions.

4. Once you see the auction you are interested in, click **Get Approved To Bid** for absentee and live bidding.

5. Please enter your information in the form. Depending on the auctioneer, different information may be requested. Click **I agree to sale terms and conditions**. Congratulations! You are now approved for the auction. Now that you're approved you can participate in the auction and bid on its items.

6. Login on sale day with the credentials provided at registration.

Call 866-313-0123 for tech help.

Directions to Sale Site:

Turn into Hobson from Hwy 87 and turn right before crossing the railroad tracks - follow signs to our white and green calving barn.

Bull and First Breeding Season Guarantee:

We guarantee the fertility status on all our bulls.

All bulls are guaranteed to be sound breeders for the first breeding season unless injury is caused by the buyer's negligence or an act of God. (Breeding season is defined as the 90-day period following the first turnout of the bulls). If a bull needs to be replaced the buyer gets a 50% credit minus salvage value at the next year's sale, a replacement if one is available, or 50% of your money back minus salvage value. The guarantee does not cover death of the bull or any treatable condition such as foot rot or pink eye. Please notify us as soon as possible should an injury occur, and prior to the bull being sold for salvage.

Delivery:

Bull delivery within the state of Montana is free.

We will work with out of state buyers to arrange delivery. Let us know at check out when the best time to deliver the bulls will be. A \$50 discount will be given for bulls picked up on sale day.

Sight Unseen Purchase Guarantee:

If you are unable to make the sale, let us or any of our representatives know what you are looking for and we will take care of your bid. We guarantee complete satisfaction for bulls purchased in this manner.

Viewing the Cattle:

Cattle will be available for viewing at the sale site in Hobson on April 7th. You are welcome to walk through the bulls before the 7th - just give us a call.

Terms & Conditions:

Bulls sell under the suggested terms and conditions of the American Angus Association. All bulls sell with full possession and 1/2 semen sharing interest.

Carr Angus

Welcome to the Fourth annual Carr Angus Production Sale. First, we would like to thank everyone who has attended and purchased in our past sales. Looking forward we are continuing our goal of providing high quality genetics from some of the breed leading AI bulls available. We keep an eye towards improving production while maintaining a sound, well balanced bull that is ready to go to work for our customers. With these goals in mind we are excited to see you at our 2021 sale here at the Carr Angus Ranch facility.

We believe that to produce quality bulls we need a quality herd of cows. To maintain this we demand our cows breed back quickly and produce quality calves every year, with no tolerance for missed or extended calving seasons. This rigorous selection has led to 18 of our 160 cows qualifying as pathfinder dams this last year, including 9 dams of bulls in this offering.

All bulls offered have been DNA tested with Zoetis Genetic testing to improve the accuracy of our data and give a more reliable product. We are strong believers in the idea that you need to use every tool available. While we have endeavored to continually improve our EPDs through more accurate selection with DNA testing we have also worked just as hard to maintain a set of cows that will produce calves with outstanding phenotype that are able to work for the commercial cattleman.

This set of yearling bulls consists of our top January through early March bull calves. Coming off a dry summer where we faced fires causing limited feed, these bulls still averaged 722 pounds on September 21st. We culled heavily among the bull calves retaining only those with the quality we want to offer our customers. Top to bottom this is an excellent set of calves that really display what we strive to produce.

We look forward to having you be part of our sale. If you are unable to attend on April 8th, you can reserve a bid with us or one of our representatives. Bulls will be available for viewing at the sale site on Wednesday, April 7th. If you would like to view them ahead of time, call either Kyle or Clint and we would be happy to accommodate you.

Thank you for taking the time to consider our offering. We'll see you on sale day!

Sincerely,

The Carrs

Clint & Valerie Carr

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

About our cattle . . .

After calving, our pairs spend the Spring and Summer on pasture near Hobson and North of Moccasin. Our calves are raised with NO creep feed.

After a summer of drought and fire, all our bulls were weaned September 21st and put on feed. They are fed by Jeremy Grove at his facility near Moccasin. They are on a high roughage ration and on average gained 3.18lb per day between weaning and yearling weight. They were vaccinated at branding and weaning with Vista 1, Vision 7 Somubac and Ultrabac. The bulls were fertility tested on March 1st and were poured again.

At weaning on October 6, our heifer calves averaged 645 lbs. They wintered very well and are ready to set up for mid April AI breeding.

Over the past 9 years we have intensively selected and culled our mother cows for phenotype, performance, mothering ability and disposition. We are pleased with the results of our program as we continue to move our Angus herd forward to provide the best possible genetics not only for our program but for improving our customer's cattle herds.

How to read the information printed with each sale lot

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait.

GROWTH EPDs:

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW) & Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit weaning & yearling growth to his progeny compared to that of other sires.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL EPD:

Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

EPD Percentile Ranking

Angus breed comparison of EPDs to other non-parent bulls.

CARCASS EPDs:

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. **\$Values are reported in dollars per head.** The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

CAB Target the Brand

Indicates bulls with greater genetic potential to produce calves that meet the most challenging specifications of Certified Angus Beef. **70% of the bulls in this offering meet this elite criteria.**

HD50K - Indicates bull is 50K genomic tested. See information on facing page. Actual Data on each bull is available on on page 17.

\$VALUE INDEXES:

Weaned Calf Value (\$W), is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Beef Value (\$B), is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

ANGUSLINKSM
VALUE ADDED PROGRAMS

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

- Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs
- Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)
- The ability to make more rapid progress for traits that are important to you, due to:
 - more accurate selection
 - easier identification of genetic outliers
 - the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GSTM powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis.
