Diamond

D

ngus

Welcome

Many difficult times have occurred for cattle producers. We are dealing with one of the driest years on record, followed by a very dry year last year. We are very thankful for the cattle genetics that we have developed over the last 55 years. We have had zero tolerance for cattle that have problems of any kind. We strive for trouble free genetics that last for many years. Due to the fact that our cattle have already been put through a rigorous test, they are able to survive much better than most. In the same year of dealing with extreme drought, we are also dealing with skyrocketing input cost. Our cattle have also already been developed for minimal input cost.

This will be our second year of doing a 100 percent online sale. We feel that this type of sale will give every one of our customers equal opportunities of purchasing any of our offering. Bidding will start December 10th and close on the 12th. Please check out our offering on either billpelton.com or diamonddangus.com. Our forage developed, long yearling bulls represent fertility and durability. Most were conceived in the first heat cycle and all were developed on grass hay, salt and mineral. We don't hide shortcomings behind concentrate feed, foot trimming or hair spray. We demand fertility, good feet, soft temperament, good scrotal and eye appeal. Since the majority of our customers are commercial producers, these bulls are bred and developed for real world condition. Their daughters will become some of your favorite cows.

My father taught me many years ago that any time a person puts too much "emphasis on one trait then, something else important is lost". So, life is too short to make too many mistakes in the cattle business. I will never forget this great advice. So, what you will find at Diamond D Angus is not extreme in anything, except, **EXTREMELY FUNCTIONAL.**

Hope to hear from you,

Mark DeBoo

Payment Options

Method 1

Pay full purchase price. This will allow your bull or bulls to be delivered fall of 2022 or spring of 2023. Wintering charges will apply if you decide to have Diamond D Angus winter your bulls. If you want to have your bulls or bulls delivered fall of 2022 you will have the option of buying insurance or not. If you would like Diamond D Angus to winter your bull or bulls insurance will be required.

Method 2

You will be required to pay a nonrefundable 50% of purchase price on your bull or bulls. The balance owed, including wintering charges will be required at time of delivery. Insurance will be required. Delivery charges will be the same as fall delivery.

2/3 Interest & Full Possession

Diamond D Angus is retaining on-third revenue sharing semen interest on every bull selling in this sale. Full possession and full salvage value sells on all bulls. Diamond D Angus will contact the new owner if they would like to collect semen and it will be done at the new owner's convenience, and Diamond D Angus' expense.

Herd Health

Bulls sell 100% guaranteed to be fertile. We do not guarantee against injury. However, we will pay partial insurance if desired on bulls \$4,000 or over. All females selling have ultrasound tested and fetal aged by Dr. Robert P. Lee (406) 466-5333 Double Arrow Vet Clinic, Choteau, Montana.

Register to Bid

PRE-REGISTRATION IS REQUIRED FOR THE ONLINE SALE!

Volume Discount

Diamond D Angus offers a \$100 discount off third bull purchased, and \$100 off for each additional bull purchased by a single buyer.

Hauling Discount

\$50.00 discount if you haul within one week of the sale.

Wintering Arrangements

Your bulls may be wintered at Diamond D Angus until the end of April at the cost of \$5.50 per head/ per day, payable upon delivery of pickup.

Delivery

FREE DELIVERY on bulls to central points within 500-mile radius from Diamond D Angus. Beyond 500-mile radius, to central points at cost of \$.25 per mile per bull anywhere in the continental USA.

Purchaser assumes cost of shipping on females, at a cost of \$.25 per mile per head from Diamond D Angus anywhere in the continental USA.

Canadian Delivery

COVID will not effect cattle moving into Canada. Cattle will be delivered via Sweet Grass. Diamond D Angus will pay half the cost of health papers on animals sold into Canada.

Online Sale

The sale is ONLINE this year. You are welcome to come and see the cattle if you would like.

Great Falls is served by Delta, Horizon and Northwest Airlines. Great Falls is about an hour and a half from Diamond D Angus. Available if you would like to come and look at the cattle.

Lot Numbers

Ear tags and freeze brands will correspond with numbers in catalog.

Prebidding opens December 10th

Auction Closes @ 1:00 pm MST December 12th

**ONLINE INTERNET AUCTION BY
PELTON LIVESTOCK
[HTTPS://BID.BILLPELTON.COM/](https://bid.billpelton.com/)**

How This Sale Close Works

The Diamond D Angus online auction will close with horse race style bidding or extended bidding. This means that when the online auction event comes to its scheduled end time there will be 5 more minutes of extended bidding. If bidding continues the sale will stay open until there is a 5-minute stretch with no bidding on any lot. Once there is a full 5 minutes with no bidding on any lot, the whole event will close.

**THIS AUCTION IS SCHEDULED TO CLOSE AT
1:00pm ON DECEMBER 12th.**

Example 1: The auction closes at 1pm and goes into extended bidding. If there are not bids on any lots between 1pm and 1:05pm, the whole sale is declared closed at 1:05pm.

Example 2: The auction is scheduled to close at 1pm and goes into extended bidding. There is a bid on a lot at 1:02pm. Every lot remains open to bids. If there are no bids on any lot by 1:07pm, the whole sale is declared closed at 1:07pm.

Example 3: The auction is scheduled to close at 1pm and goes into extended bidding. There is a bid on a lot at 1:02pm. Every lot remains open to bids. Another bid is placed at 1:06pm. Every lot remains open. Another bid is placed at 1:10pm. Every lot remains open. If there are not bids on any lot by 1:15pm, the whole auction is declared closed at 1:15pm.

Buyer FAQ

Please read Buyer FAQ on the upper right-hand side of the screen in the navigation/menu bar to learn how to bid, use watch lists, maximum bids and more.

Creating an Account with Pelton Livestock Online Auctions

Only registered bidders over the age of 18 can participate in Pelton Livestock Online Auctions. To register, select the Login/Register link on the right top side of the screen in the navigation bar. Register for a new account by entering your contact information, email address, desired password, etc. Once you submit the auction registration form, an email will be sent to the email account provided. Please click the link in that email to activate your account. Prior to Prebidding opening day, view auction and click "request to bid" on any lot to be approved for bidding. Request will be sent to Seller and once approved, you will be notified that you can now bid live for that auction. Please keep your user information (email address and password) in a secure place as you can use the same account login for all online auctions hosted by Pelton Livestock. If you have any questions or need assistance with creating an account or bidding, please call PELTON LIVESTOCK Darci Sachdeva at 406-794-3174.

Auction Demo Available

Login with credentials provided at registration and enter "Demo Auction" to practice bidding. For help call Darci Pelton Sachdeva at 406-794-3174

Is The Auction Platform Mobile Friendly?

Yes, the auction platform and entire site is mobile friendly. So, no matter the device (computer, cell phone, tablet, etc.) you are utilizing to view and/or bid on an auction, the site is responsive to your screen, so you have the most optimum viewing and bidding experience.

Thank You Jordan!

We would like to give a huge shout-out to our herdsman Jordan! We would not have been able to have this sale and successful herd without him! He has worked wonders with our cattle. We are so happy to have him a part of the Diamond D Angus Family!

The Diamond D Advantage

- ✦ *More fertile and will cover more cows.*
- ✦ *Will continue to gain weight through first breeding season.*
- ✦ *No bulls' feet or legs ruined due to hot feed.*
- ✦ *More years of service from forage bulls.*
- ✦ *Less injuries and breeding problems.*
- ✦ *Bulls are more conditioned to the environment.*
- ✦ *Bulls have been put through a rigid test.*

If you want to produce cows that will last a long time, it is important to use bulls from a herd that has cows that have proven record of calving every year on time for 10 or more calves. We cull our herd for udder quality and temperament and refuse to trim feet. If an animal needs feet trimmed, we eliminate it.

Most pure-bred producers will make excuses for the problems you see on their cattle.

The reality is almost everything you see is a result of genetics. When you listen to a producer talk mostly about performance and EPD numbers, chances are they have left most functional traits behind and the genetics will not last for very many years.

Performance Information

Line Breeding

In the notes of all the bulls selling, we talked about pedigrees in hopes of helping our customers understand our breeding program. We strongly believe that our customers greatly benefit from buying linebred bulls. The benefits include:

1. If you like what you see in a bull or cow family, by line breeding it intensifies these traits. A line-bred bull will breed more true to himself than a non-line bred bull.
2. Line breeding intensifies all traits, good and bad. If genetically there were a problem, it would show up in our herd. We would identify the problem and eliminate the use of these traits.
3. The cows and bulls that we have talked about in the notes have already gone through many generations of line breeding and put through a very rigid test. To pass the test they need to be of moderate frame, easy fleshing, adequate performance, structurally correct, and good udder quality. The bulls must be very masculine.

Performance Key

BW - Birth Weight

WW - Weaning Weight

- Pathfinder

Cow/Calf Ratio - Adjusted Wean Efficiency

Percentage of cow's weight that the calf weaned.

Weight, Scrotal, and Hip Height

All Data was pulled on October 28, 2022

Calving Ease Prediction

1 Cows Only

2 Fair Calving Ease

3 Good Calving Ease

4 Outstanding Calving Ease

This is only a prediction by Diamond D Angus.

This is not a guarantee. The sire provides only

1/2 of the genetics in determining birth weight.

Cow/Calf Ratio

We calculate adjusted wean efficiency for each cow/calf pair. Adjusted wean efficiency is computed as the ratio of the calf's adjusted 205 day weight to the cows adjusted weight. The adjusted cow weight is estimated by a process of rating each cow's body condition and giving her a score. A score of "5" is the median (no adjustment taken), 80 pounds is subtracted from her weight for a score of "6" and 80 pounds is added to her weight for a score of "4". By adjusting cow weights to equal body condition scores, it rewards cows that produce a bigger calf while maintaining her own body condition. Adjusted cow/calf ratio is shown for each sale bull in the catalog.

Temperament & Udder Score

Diamond D Angus feels it's very important to record temperament and udder scores. There are no EPDs on some of these very important traits. Considering the safety of the crew and the ease of handling the cattle, we feel it's well worth our time to score and cull the animals that don't meet the standards we have set. The performance, efficiency, and meat quality will improve the docile cattle. There is no such thing as a perfect cow, and you have to decide which traits you want or need. Many years ago we started a program of keeping records on the temperament and udder qualities of our females. We score them from 1-5 in each category. Each of our bulls was given a score for his dam's udder at time of birth. This and a score for his temperament are listed with each bull's data.

Temperament Score

- 1 - Calm.
- 2 - Slightly restless, shifting.
- 3 - Squirring & occasionally shaking the squeeze chute.
- 4 - Continuous vigorous movement.
- 5 - Berserk, rearing twisting.

Udder Score

- 1 - Very good
- 2 - Above average
- 3 - Average
- 4 - Capable of raising a calf
- 5 - A non functional animal

The Pinebank SE9D and 10D are ¾ brothers. Unfortunately the 9D had an injury that ended his life. Fortunately the 9D has left us with some very good daughters. The mother to both 9D and 10D was my favorite cow when I visited the Pinebank herd in New Zealand. I believe that even when people are uncertain about what bull or cow to concentrate on, just by looking at a pedigree and knowing the number of good proven cows and bulls in it, it is a good yard stick on what the offspring will do. Structure and feet are second to none on these good Pinebank 10D sons. Sons selling include 19Y,51Y, 103Y, 115Y, 128Y and 137Y. Average birth weight was 74 pounds.

 DDA KERRY 365

The DDA Pondera 10u is a bull that was sold at our 2018 sale and we had the opportunity of buying him back. He has grown into one of my favorite herd sires. He was a younger and smaller bull that threw into the multi sire breeding group that ended up siring many calves. This tells me a lot about a bull when he is capable of that. He has Lodge of Wye in his pedigree many times. Also, mother to our great DDA Galetea 859 who is mother to a herd bull we use heavily for multiple years, DDA Great Plains 57R. The DDA Galetea 031 is also the mother of our DDA B&T 18k. Buy sons of this great young sire with confidence they will sire some of your very favorite daughters. Sons selling include 23Y, 43Y, 96Y, 110Y, 149Y 170Y and 180Y.

We wanted to replace our 202 bull, so we looked at what was available from our DDA Stella 443. She was sold to Josh Freiburger who owns Hague Angus ranch in Nebraska. She has been flushed many times and Josh has had great success with here in Alliance Nebraska. The number of calves this good young bull sired impresses me. Hopefully we will have many next year. However we did lose him from our breeding group this summer. He may have frozen his testicles. His sons selling this year will be. 33Y, 44Y, 56Y, 111Y, 112Y, 122Y, 125Y, 129Y, 133Y and 183Y. Average birth weight from mature cows is 79 pounds.

I love the fact that DDA Just Right 30U has sired 12 sons that made it to our sale. As you are able to see, he is a DDA Lodge E5H. No question about the quality of the E5H daughters. They look like the DDA Melisa 824 cow, who stayed in production until she was 22 years old. You will find her in almost every pedigree, here at Diamond D Angus. Grandmother on mothers side will wean here 13th calf this fall. She is a DDA Fahren 21X who is also related to DDA Melisa 824. The sons selling that are sired by DDA Just Right 30U are, 5Y, 32Y, 50Y, 65Y, 76Y, 82Y, 90Y, 100Y, 109Y, 120Y, 162Y, and 184Y. The average birth weight on these twelve sons is 80 pounds on mature cows.

Longevity in our herd indicates many things about an animal. First of all any time an animal gives problems, she is gone. If she loses a calf she is gone. If she has a runt calf she is gone. If she has feet or structure problems she is gone. If she has udder or temperament problems, she is gone. If she does not breed back quickly she is gone. So with that said any time a cow is old, and still here, she has passed a rigid test. We have identified the mother, the grand mother and great grandmother as a cow family that has passed the rigid test. We saved sons of the great Hana 940, DDA Bar Lad 177U and DDA Alliance 142V. The 177U was born when the 940 cow was 18 years old and the 142V she was 19 years old. Cattle selected for the most in anything typically are the most in that trait because they were selected for the most. However any time an animal is the most in one thing they have lost a very important trait or traits in order to be the most in something else. Sons selling of 177U are 20Y, 24Y, 26Y, 38Y, 70Y, 77Y, 87Y, 92Y, 104Y and 117Y. The average birth weight on his 10 sons selling is 73 pounds on mature cows. The 48Y is a sone of DDA Alliance 142V.

We have no drought about the quality of daughters the DDA Great Plains 57R sons will produce. OCC Great Plains 943G is the sire of some of the best females in the world. The DDA Great Plains 57R is also has Dixie Erica of CH 1019 in both sides of his pedigree. The number of offspring that is produced in a multi sire breeding group is also a yard stick of the fertility and drive that this great bull has. The DDA Galatea 859 was sold to Loyning Angus and Wyatt DeVries and in embryo production. She is a direct daughter to the great DDA Galatea 031 who is the mother of DDA B&T 18K. Sons selling at this years sale are. 45Y, 57Y, 63Y, 79Y, 85Y, 86Y, 91Y, 93Y, 121Y and 148Y. The averaged 76 pounds on mature cows.

I am not able to say enough good about this Great Plains son. He is as close to perfect phenotype as a bull can be. Phenomenally good feet and an unbelievable athlete. The mother being a full sister to DDA Lodge E5H. She is also a beautiful cow that weaned 10 calves here at Diamond D Angus. I have talked about the good in DDA Melisa 824, so let's talk about her mother, DDA Melisa 545 is a cow that Howrey Angus purchased many years ago and was a cornerstone for his herd. Monte flushed here many times and kept many daughters. He also sold many sons from her, including a son we bought MH Mick 53. Please do not pass these DDA Great Plains 77U sons up. The 77U also was very active this year in a multi sire breeding group. His sons selling this year are. 27Y, 28Y, 61Y, 62Y, 71Y, 88Y, 101Y, 119Y, 134Y, 144Y, 146Y, 161Y, and 169Y. The average birth weight on 3 year old cows was 72 pounds

Wow is the first thing that comes to mind when I look at this great line bred pedigree. Notice DDA Lodge E5H in bottom and top of his pedigree. The E5H has sired some of our very favorite cows. His mother sired by the great DDA Pinebank 50H. He was sold to the Ole Farms in Canada many years ago. His sons are top sellers it their sale every year. I wish I had a bunch of his semen here in the USA. The DDA Sandy cow as the grandmother is also a wonder addition. She was one of our favorite E5H daughters in our herd.

Loyning Angus is the breeder of this great Shoshone bred sire. Ben and his wife are doing a fabulous job in northern Wyoming. The dam to this good maternal bull is double bred to our DDA Melisa 824. She is mother to multiple great herd sires. DDA Emblazon 27C and DDA Lodge E5H. Both showing up in her pedigree. The Melisa 824 also is sired by a bull that left many great cows in our herd. Shoshone 130. The Sandy cow family is the same cow family that traces to our famous old DDA Sandy 404.

Studding this good pedigree, I would expect a little more frame than average. Many good cows showing up. The DDA Zelda 674 was a very good cow and the reason we became more interested in the Pinebank herd in New Zealand. She was a very deep bodied cow that stayed in production long enough to have 12 calves. His mother is a very nice 7 year old Fremont daughter. The Fremont daughters are proving to be very nice cows.

The OCC Great Plains daughters are the reason I continue to use this great sire and his sons. Our DDA Emulation 77U has proven to be a very valuable young sire in our herd. Look for semen on him in our next sire directory. No question this young herd sire will sire many of your favorite daughters. His mother is one of those great 0668 daughters we think so highly of. We have very high marks on this good bull.

The DDA Boss 88U has a mother that weaned 17 natural calves here at Diamond D Angus. She was 17 years old when 88U was born. Function and Longevity is what is most lacking for many cattle producers. Chasing extremes in whatever is popular has destroyed what made Angus famous in the first place. We make sure that is not happening here. The mother to this good bull has Pinebank in both sides of here pedigree. The Pinebank herd in New Zealand also is selecting for function and longevity. The thing that most impressed me at Pinebank was the number of old granny cows they had. Like us they never sell a cow just because she is old. In fact those old granny cows have already proven their ability to stay in production.

Another very good 202 son. We understand the value of multi sire breeding groups. However the years we have time we chose to A. I. a limited number of cows. One of the reasons to us A.I. is for the fact that we are able to use a few bulls that are dead and gone. The 202 is one of the bulls that we chose to use. We have very good marks on this good herd sire prospect.

In a good maternal sire you will find maternal goodness in every line for many generations. The higher the number of lines filed with good maternal genetics the higher the likelihood of this bull producing good females. So this is why it is important to choose your genetics from someone that has been doing this for many generations. Buy from Diamond D Angus with the knowledge; this is not a new direction for use.

I see Pinebank on both sides of this good pedigree. Bill Hodge called me many years ago and he mentioned that they had two brothers out of the same cow that they were looking to sell. At that moment I felt I was not willing to buy any bull, especially not seeing their mother is what I told Bill. He said in response, Mark you have seen the mother to these two bulls. So he sent me the photo that I sent him many years previously, he said I would recognize it because I was the one that took the photo. So I looked at the photo he emailed me and I see my favorite cow I saw at the Pinebank herd. She was 17 years old at the time of the photo I took. Bill had a photo of the same cow he took about 10 years before the one I took. It was clear to me that this conversation was going to cost some money. I am very happy that we bought both the Pinebank SE 9D and Pinebank SE 10D.

If you like function and longevity, take a look at the sire of DDA Bar Lad 20Y. The mother of 177U had 18 natural calves and no twins. The DDA Hana 940 was the last daughter that our 368 cow had. She was 20 years old when she had the 940 as a calf. Trust me when I say function and longevity are heritable, I have more that I could tell about this cow family, however I am limited on space. I can tell you that we kept another herd sire from this great cow. He is DDA Alliance 142V. Many years ago we kept a full brother to the DDA Hana 940. He was called DDA Banjo E2B. For a short story on the mother refer to 19Y comments.

Many years ago we used a son of the great 0668 sire. I onetime had a customer from Alabama here and he told me that this 0668 son was not only the best bull he saw here, he was the best bull he ever saw. Trust me when I say he sees a lot of cattle. He was injured at a young age from fighting. The DDA Pondera 10U is a great addition to our herd, hopefully a replacement of the 0668 bull and the 0668 son that was injured. The 23Y has a good pedigree on the dam side as well.

I absolutely love this pedigree. The mother of DDA Great Plains 77U is a full sister to our DDA Lodge E5H. The DDA Great Plains 77U may be one of the most correct bulls we have ever raised. He is an amazing athlete and has great feet. His mother is one of the reasons we like DDA Lodge E5H as much as we do. His flush sisters all look just like her and her mother DDA Melisa 824. On mothers side is Pinebank SE 10D and DDA Emulation 30K was another great female making sire.

Very closely related to 27Y. I just cannot say enough good about DDA Great Plains 77U. On bottom of pedigree is DDA Magnum 40M was a great looking sire that was injured way too young. However we do multi sire breeding now and it is a rough very competitive work. The most fertile aggressive bulls are siring most of the calves.

We have very good marks on another 202 son. No question about the goodness in this great pedigree. These 202 sons look like the great 202 sire. On the mother side of this pedigree you will find our DDA Zelda 860 cow. She is a direct daughter to our 580/368 cow family that I talk about in the comments of 20Y. I would hate to try and build a herd of trouble free cows without this great cow family. Also mother is a good E5H daughter.

Not many pedigrees you will find cows that were born in 1983 still in a 3 generation pedigree and have zero embryo offspring in it. This is what I see in Diamond Henretta 368 who stayed in production until she was 20 and her daughter DDA Hana 940 who had DDA Bar Lad 177U at 18 years old. We also kept her next son 142V. Diamond Henretta 368 was one of many good cows here at Diamond D Angus when I returned home in 1988.

There is no question the 38Y will produce great trouble free daughters that will last for many years.

DDA EMBLAZON E41
DDA SANY E802

Notice the DDA Pondera 43Y young sire. We feel the DDA Pondera 10U will leave many good daughters in our herd that will stay in production for 10 to 20 years. The 43Y has a mother who is a result of semen that came from the great Pinebank herd in New Zealand. This is the same herd as our 202 bull. On very bottom of pedigree you will find DDA Sandy E802. Many years ago we collected embryos on the Great DDA Sandy 404 who we sold as a donor in our sale. She went to Wyoming and stayed in embryo production until she was 22 years old.

The mother to our DDA Great Plains 57R was sold as a donor to Loyning Angus and Wyatt DeVries. She is a nearly flawless cow. One of my very favorite cows in the herd. When I sold the 859 cow she was somewhat elderly and sometimes elderly cows have a difficult time producing embryos. So in the sale I decided to flush her the first time just to make sure we was able to collect embryos. The 0668 that shows up as sire to dam in this pedigree is the sire that I chose to use on her. I see the same Melissa cow family as that is in our DDA Melissa 824 on very bottom of this pedigree.

In the chase of big EPD numbers, most herds today struggle with many functional problems, including feet. I know one herd in the world that puts a guarantee on feet and that would be the Pinebank herd in New Zealand. We are not 100 percent on feet, however we are close. I DDA B&T 18K daughters have been great cows.

Diamond D Angus has selected for cattle that will stay trouble free and last for an extended length of time. We have been doing this for so long that when I look at most pedigrees, they are stacked with good cows and bulls that have proven to sire good replacements. The DDA Just Right 65Y is no exception. He is line bred back to Lodge of Wye.

I know of at least 3 times this pedigree traces to our great DDA
 Melisa 824. I see full sister to E5H in Sire side and E5H in
 mothers side. If you like DDA Freman 80R take a look. Due to
 injuries, on this great sire, sons and daughters will be in short
 supply.

Our critique looks very good across the board on DDA Trouble Free 85Y. The DDA Great Plains 57R left many good offspring in our herd. No surprise, the DDA Galatea 859 and 031 were flawless cows. The mother to 85Y will wean her 5 calf this fall. His grandmother will wean her 9th calf this fall. I see the 85Y traces to our DDA Melisa 824 at least 3 times, also back to our 580/368 cow family.

A great pedigree on DDA Pondera 110Y, who scored very high marks on our critique list. The 0668 and 27C are the sire to some of our favorite old cows in our herd. Keep every daughter the 110Y produces. I look at a pedigree like a group of cows. The more good animals in the pedigree, the higher the likelihood of that bull siring good daughters.

JAD FREMONT Z6306
DDA SANDY 331

DDA Alliance 112Y sire is a maternal brother of our 202 bull.
The maternal grandsire is our line bred DDA Melisa 824.
Due to multiple injuries we have lost DDA Freman 80R from production.

The DDA Zelda 674 is one of many reasons we became more interested in the Pinebank herd. She was a long deep bodied cow with a good udder. She was a very good mother and weaned 12 natural calves hear at Diamond D Angus. The mother to this good bull is sired by a bull that left many good daughters in our herd.

I see a half brother sister mating on the DDA Back To The Future 117Y. Also DDA Zelda E803 is line bred to our 580/368 cow family. This same 368 cow shows up on sire side. She stayed in production for over 20 years. The Paternal grandmother DDA Hana 940 had 18 natural calves her. We are using two of her sons DDA Bar Lad 177U and DDA Alliance 142V.

There is no question about fertility, drive and durability on DDA Great Plains 57R. Due to Diamond D Angus has been multi sire breeding and DNA testing for parentage there is no question about the breeding ability on a sire. The sons from this type of breeding will have the ability and drive to sire more calves than that hot AI sire that has never seen a cow.

Another good line bred OCC Great Plains son, back to a DDA Lodge E5H. So due to DDA Melisa E808 is a full sister to E5H, means that this bull is also line bred back to the E5H and DDA Melisa 824. Buy him with confidence he will sire many of your favorite mother cows.

At the moment we do not have a registration number for DDA Trouble free 169Y. The sire to his mother we believe is DDA Clearwater 113F who is a DDA Banjo E2B son out of Diamond Henretta 368. This is an extremely rare and good pedigree. We will know by sale day if we are correct.

Here is another good pedigree, if you like trouble free mother cows, that stay in production for many years. DDA Pondera 10U back to 0668. The mother to DDA Pondera 170Y will wean her 7th calf this fall. DDA Zelda 103 will wean here 11th natural calf this fall. She traces to our great DDA Zelda 055, then DDA Zelda 791, then 580 and 368 cow family. Mixed with some Favour of Wye. This is a no miss pedigree.

We have very high marks on this good bull. His sire is a maternal brother to our 202 bull. The mother to this good bull will wean her 7th calf this fall. The Grandmother will wean her 11th calf this fall. I also see DDA Emulation 30K. No question the 183Y will produce some of your favorite mother cows, which will be trouble free and stay in production for a long time.

Sires on both sides of this great pedigree are half brother and sister. I also see DDA Lodge the sire of grandmother on mothers side. This puts our DDA Melisa in his pedigree 3 times in 4 generations. I also see our Diamond Henretta 368 as mother to DDA Hana E606. She is in almost every pedigree we sell. She is one of the corner stones in our herd. She is one of the key cows we have used for her function and longevity.
