– From the Heart of Big Sky Country –
CENTRAL MONTANA GELBYIEH & ANGUS GENETICS
29th Annual Production Sale

We started selling bulls 29 years ago – and we are still at it! Our sale has seen a lot of great seedstock producers come and go through the years and we miss them all, but it is easy to understand because raising a registered herd means extra tasks at calving and a lot of extra computer work! However, I still enjoy raising seedstock and, luckily, Omie takes care of the chores involving the computer – so I have no plans to stop! (Although I probably will have to face downsizing a bit.)

Obviously, without co-consignors, we made a decision last year to go to a strictly online bull sale and, unfortunately, lost a few long-time customers and we miss them and the fun and comradery of the old-style auction day. We did gain a few new customers and have adapted to the online way of doing things – thanks to the help and professionalism of the Bill Pelton Livestock crew (billpelton.com). We will do all we can to help you with the details on how to go about bidding for your favorites and Bill's daughter, Darci, is also available with the technical expertise and easy way of talking you through the process. She is very personable and easy to reach on the phone. Most of our customers actually enjoyed the ease of the online auction.

We are keeping the same sale date for the final bids (the third Saturday in March – which is March 16th this year). We still have a viewing of the bulls Friday night (along with some finger food), but we have it at the ranch now. The bulls are fed at the ranch so you are welcome to give us a call and stop by to check them out anytime! As always - even if you are unable to take a look at the bulls, rest assured that you are protected by our "sight unseen" guarantee of satisfaction should you have an interest in any of the bulls.

We have built our reputation on offering bulls that will help you succeed in today's market – adding pounds and increasing the percentage of your calves grading choice!

We guarantee our bulls through the 1st breeding season. We retain ½ semen interest on all the bulls.

Please join us for a PRE-SALE GATHERING at the Danell Diamond Six Ranch on Friday, March 15th starting at 4 P.M.

This is a great chance to check out the bulls AND a good excuse to get our friends and neighbors together for a visit!

DNA TESTING: All homozygous black and homozygous polled bulls are guaranteed by birth right or by DNA testing.

SEMEN TEST and HEALTH INFO: Full Breeding Soundness Exams have been performed. Scrotal measurements and foot scores are listed with the performance data on each bull. Bulls were tested and examined by Dr. Greg Carlson, Horizon Veterinary Clinic of Lewistown. Bulls have also been BVD tested and vaccinated with Preg Guard 9.

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 63% Gelbvieh Balancer heifer/cow bull with a 73# birth-weight! DAM: JOB DANELL Star 30E is beautifully-uddered, good-footed, and a calm momma cow with a 92 BW ratio and a 100 WW ratio on 5 calves! SIRE: JOB DANELL CD Raven 23J is a sire we raised and chose to use him as clean-up on heifers and cows. We chose to use him because of his low 74# birthweight (84 ratio) and exceptional calving ease and carcass traits - 4.227 IMF (122 ratio) – Ribeye EPD Top 35% and Marbling EPD Top 20%! Raven has put some really good females in our heifer replacement pen and 2 other bulls (JOB DANELL Stitch 68L and JOB DANELL Sparks 71L) in our bull sale this year! PIPELINE, himself, is a calm bull with EPDs CE Top 4% of the breed and BW Top 10%, with daughters' CE Top 1%, PG30 Top 5%, and all his carcass trait EPDs in the Top 15% - 20%! Pipeline is long-made and straight-backed on a larger frame and almost perfect feet (5 heel/4.5 claw) with a good disposition.

HOMOZYGOUS Polled, Single Black (red carrier, but solid black) 93% Purebred Gelbvieh heifer/cow bull with a 76# birth-weight! DAM: JOB DANELL RD Ginger 49J is our only red cow and is co-owned with our 6 y/o grandson, Remy Danell. She has a good udder and excellent feet. SIRE: JOB DANELL Napoleon 01E is a tried & proven heifer/cow bull that has produced some of our Top females (JOB DANELL Sassafras 07G and JOB DANELL Cutie 20G) and Napoleon is out of our Top producing "money-maker" donor cow, JOB DANELL Josephine 33C! COOKIE (named by our grandson because mama's name is ginger, so "it should be Cookie") is a moderate to smaller framed stout-made calving ease Purebred bull. He is wide at the hip, clean fronted, and excellent, almost perfect feet (5 heel/4.5 claw) with an easy-going temperament! His CE, CEM, and BW EPDs put him in the Top 15% and Milk Top 20%! Cookie is an excellent Purebred heifer bull that would work as a definite Herdsire prospect!

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 47% Gelbvieh Balancer cow bull with an 82# birthweight and a perfect Tenderness score of 10! DAM: JOB DANELL Sandy 60H is a young female that goes back to one of our foundation Purebred Angus donor dams – Monarch Sandy Pride S132! Sandy is good uddered and good footed with an easy-going disposition and has produced a great bull calf! SIRE: JOB DANELL Salvador 69J is an AI Sire we raised and used for his incredible Calving Ease, potential growth, and he is a 10 for Tenderness! Two of our favorite heifers in the heifer replacement pen are sired by him - his dam, JOB DANELL Sal 9C, is one of our favorite beef producing machines!

SANDMAN is on a moderate frame and is that soggy-made bull that will catch your eye – wide-topped, big-hipped, a nice spring of rib, and stands on sound, almost perfect feet (5 heel/ 5.5 claw)! He is a bull that seems to want to work himself to the back of the group, so I would not recommend him to a small, one bull herd. (He has not shown any aggression, just seems to stay back from people.) He should put some fine replacements in your heifer pen!

HOMOZYGOUS Polled, HOMOZYGOUS Black 84% Purebred Gelbvieh cow bull with a 94# birthweight and a 6 for Tenderness! DONOR DAM: JOB DANELL Jojo 13Y has been quite the producer for us with a 91 BW ratio on 15 calves and a 106 IMF ratio on 7 calves – and she is the mama of DONOR DAM JOB DANELL Josephine 33C! Jojo had a perfect udder and feet at 12 y/o and we kept her open to flush again. SIRE: JOB DANELL Paygrade 68E is the sire of JOB DANELL Pay Pal 12H, who was our all-time high selling bull at our 2021 sale for \$33,000! Paygrade had explosive personal growth – 84# birthweight (97 ratio), 773# weaning (116 ratio), and 1413 yearling (110 ratio)! EPDs for growth Top 15%, Milk Top 25%, and PG30 Top 4%! He typically gives a moderate frame, big scrotal circumference, wide hip, and lots of eye appeal in his bull calves – and females you don't want to part with!

IRON MAN is wide on top and soggy-made, big-hipped, 4/6 (heel/claw) foot score and has a big scrotal and lots of eye appeal! EPDs put him in the Top 2% for PG30, Top 15% for BW, Top 30% for CED and SC – and a weaning weight of 774#! This bull works for a commercial or registered herd.

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 84% Purebred Gelbvieh cow bull with an 89# birthweight and a 6 for Tenderness! DAM: JOB DANELL Ashley 33H is a coming 4 y/o that has done quite a job raising this bull! She is beautifully uddered and good footed on a very moderate frame. Bloodlines show her going back to M/L Encore 493E, M/L Advantage 345C, JOB DANELL TD Chico Loco 28Y, ELK CK Crazy Horse 138P, and JOB DANELL Absolute 21U! SIRE: JOB DANELL Pay Pal 12H is one of the best performing bulls we have ever used – BAR NONE! We are excited to be calving out his first heifers this year! As far as performance and eye appeal, he is the best answer in our herd.

ASHTON is soggy made, big hipped, eye appealing, has a big scrotal, a 4/6.5 (heel/claw) foot score and had a 732# weaning (105 ratio). His EPDs are Top 2% for PG30, Top 4% for CW, Top 10% Ribeye and YW, Top 15% for SC, Top 20% for YG and WW, and Top 30% for TM. Ashton is a good Herdsire prospect!

HOMOZYGOUS Polled, solid Black (wild type) 67% Gelbvieh Balancer cow bull with an 87# birthweight and a 7 for Tenderness! DAM: JOB DANELL Heidi 08H is another coming 4 y/o that has knocked one out of the park! She is good uddered, good footed, and comes from one of my favorite cows, JOB DANELL Tyra 82F. SIRE: JOB DANELL Pay Pal 12H did it again, producing another top-quality bull! I could write a page about how excited we are with his offspring!

GOOSE is clean-fronted, clean-sheathed with a large scrotal, wide-hipped, and long-made with a long stride. He has a near perfect (5 heel/ 5.5 claw) foot score and scanned a 14.4-inch ribeye (101 ratio) and a 2.88 IMF (100 ratio). In my eye, he is a masterpiece – his picture tells the story! We will likely collect Goose for in-herd use before he leaves.

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 42% Gelbvieh Balancer cow bull with a 98# birthweight and a 9 for Tenderness! DAM: JOB DANELL Butterfly 53G has good feet and one of the best udders on the place! At 5 y/o, this is her 2nd time raising a Top bull for our sale – JOB DANELL Kickstart 65K was one of our last year's top sellers and is now an AI Sire (semen available at Bull Barn Genetics). Both bulls are at the top of the list for carcass traits and that is no surprise as mama, Butterfly, has a 6.6 IMF ultrasound score (132 ratio) and a Marbling EPD of .68 (Top 2%), CW 54 (Top 3%), and FPI Top 5%! SIRE: JOB DANELL Pay Pal 12H hit another home run with this son! We normally won't keep a bull calf with a birthweight over 95#, but when the performance and eye appeal is there and they come from an exceptional Dam – we will sometimes wait to see how the calf matures. MONARCH has proven his worth! He is long-made, clean-fronted, clean-sheathed, and big-hipped with a big spring of rib and a big scrotal and a near perfect (5.5 heel/ 5 claw) foot score and great eye appeal! His EPDs are great for WW, YW, Milk, TM, PG30, DOC, and SC along with excellent Carcass EPDs – ALL in the Top 20% or better! He scanned a 15.1 inch ribeye (107 ratio) and a 3.4 IMF (120 ratio) and is a bull we will be using in our program! He will be collected and have an AI permit when he leaves the ranch.

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 84% Purebred Gelbvieh heifer/cow bull with a 79# birthweight. DAM: JOB DANELL Nessie 78E is another favorite female at the ranch – she always brings in a good one! Her progeny performance shows a 96 BW ratio and 105 WW ratio on 4 calves and a 99 YW ratio, 107 Ribeye ratio, and 117 Marbling ratio on 3 calves! With stats like these, we will consider flushing her this spring! SIRE: JOB DANELL Ol' Timer 19J was our herdsire in 2022 and now resides with Bob and Barb Marx in Bozeman, MT. We selected him because of his calm demeanor, good feet, CED 19, BW -3.7, and good looks! We named him Ol' Timer because we looked back and used his sire from 25 years ago, MLLC M/L Encore 493E, because of his calving ease, calm disposition, and the beautiful females he produced! JESSE is long-made on a bigger frame (6 to 6.5) with CE and BW in the Top 5%, CEM Top 10%, and Marbling Top 25%! He scanned a 14.2-inch ribeye (100 ratio), a 3.09 IMF (108 ratio), with minimum back fat .21 (90 ratio). He scored a 4.5/6 (heel/claw) foot score.

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 49.9% Gelbvieh Balancer cow bull with a 92# birthweight, and a Tenderness of 7! DAM: JOB DANELL Mandarin 55G has an 89 BW ratio and 101 WW ratio on 3 calves, and a 104 YW ratio on this calf! She has a beautiful udder and good feet and is sired by JOB DANELL Paygrade 68E, who has sired many of our great ones – including Pay Pal 12H! Mandarin is another favorite moderate framed female with EPDs of Milk in the Top 15%, and growth – WW & YW Top 45%! SIRE: BARG Go Time 781J was the 2022 Balancer Futurity winner and this is the first year we used him and you will be seeing more calves from him in the future! He obviously has great style and structure to be picked the winner, but he also has a nice set of EPDs – CE, Milk, and Marbling Top 40%!

GO-GETTER is what you want to see in a bull – soggy-made, big-hipped, smooth-shouldered, clean-sheathed, with a big scrotal, and he is very easy on the eye! He has EPDs – WW TOP 35%, YW Top 45%, Milk Top 25%, HP Top 25%, PG30 Top 2%, Ribeye Top 20%, Marbling Top 30%! He should put some nice replacements in your pen and to top this off – he has a 766# 205 (117 ratio), yearling weight 1290# (104 ratio), scanned a 15-inch ribeye (101 ratio) and a 3.15 Marbling (111 ratio), scored a 4.5 heel/ 5.5 claw foot score and a Tenderness of 7! Go-Getter is a great Herdsire prospect!

HOMOZYGOUS Polled, HOMOZYGOUS Black 86% Purebred Gelbvieh cow bull with a 93# birthweight, and a Tenderness of 6! DAM: JOB DANELL Desi 14D is a moderate framed, good footed female that has outdone herself! Dusty weighed 930# off Mama and scored an 839# 205 WW (121 ratio) and a 1346# yearling weight (108 ratio)! Desi is in the Top 10% for CED, Top 30% BW, Top 45% Milk, and Top 5% CEM! Her EPDs also show Top 30% for Ribeye and Marbling – she scanned a 5.129 IMF (125 ratio) and a 9.48 ribeye (101 ratio) and she was born 79#! SIRE: JOB DANELL Pay Pal 12H, as I keep saying, has done it again and really did a great job producing this beef machine! DUSTY is extremely long-made, deep-bodied, clean-fronted, and clean-sheathed with big testicles and a near perfect (5.5 heel/ 5.5 claw) foot score - this may be one of the best Pay Pal sons available! EPDs – CED Top 30%, WW Top 10%, YW Top 10%, Milk Top 20%, TM Top 10%, CEM Top 15%, PG30 Top 2%, YG Top 20%, Ribeye Top 15%, Marbling Top 15%, and FPI Top 10%! He stands on a 6 – 6.5 frame, has nice neck extension and a good disposition. He scanned a 16.8-inch (118 ratio) and a 2.43 IMF with a 96 fat ratio. We will be collecting Dusty for in herd use before he leaves the ranch!

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid black) 75% Gelbvieh Balancer heifer/cow bull with an 84# birthweight, and a Tenderness of 9! DAM: JOB DANELL Doesy Doe 05D has raised other herdsires and one of my favorite bred heifers! She offers exceptional CED, BW, WW, YW, Milk, CEM, HP, PG30, Marbling, and FPI. Doesy Doe is another cow we may consider flushing. SIRE: JOB DANELL Ol' Timer 19J is certainly proving himself when you see calves like these, especially when you see the calving ease and growth plus carcass traits and sound feet that have been passed on to his calves – including his awesome heifers in our heifer pen.

BANJO shows the birthweight to growth spread we like to see in all our calves! Top 4% CE, Top 20% BW, Top 40% WW, Top 45% YW, Top 45% Ribeye, Top 35% Marbling, and Top 25% FPI! His feet score a perfect 5/5! This bull has great potential for a registered or commercial cattle breeder who wants to improve calving ease and birthweight in the herd while maintaining growth and carcass quality in the calves. Banjo works to make great Purebreds and/or Balancers – take him home!

HOMOZYGOUS Polled, HOMOZYGOUS Black (and solid Black) 65% Gelbvieh Balancer bull with a 91# birthweight. DAM: JOB DANELL Sachet 37D has a 106 WW ratio on 6 calves! She is a larger framed cow with sound feet and a good udder! SIRE: JOB DANELL CD Raven 23J was used because of his moderate frame, excellent CE Top 5%, BW Top 20%, CEM Top 10%, Milk Top 20% and great carcass traits, as well! Raven's mama, JOB DANELL CD Blackbird 70D is one of our Top producing females who excelled in carcass traits, CE, BW, CEM, and Milk and she is a daughter of one of our early Donor Dams!

STITCH is long-made on a 6 to 6.5 frame with good CE, Milk, PG30, CW, and Marbling, had a 717# WW (103 ratio), a foot score of 4/5.5 (heel/claw), and he will add pounds to those calves and should put nice replacements in your herd!

JOB DANELL DUSTY 49L

Donor Grand Dam of Lot 12

JOB DANELL JOSEPHINE 33C

BIDDING CLOSES MARCH 16, 2024

- AGA EPDS -

MATERNAL TRAITS

Calving ease direct (CED): Percent of unassisted births of a bull's calves when he is used on heifers. A higher number is favorable, meaning better calving ease. This EPD can be vital to a rancher looking to decrease the amount of calves pulled.

Milk (Milk): The genetic ability of a sire's daughters to produce milk expressed in pounds of weaning weight.

Calving ease maternal (CEM): Represented as percent of unassisted births in a sire's first-calving daughters. A higher number represents more favorable calving ease. This EPD is important to a rancher's bottom line because it predicts which animals produce daughters with a genetic pre-disposition to calve unassisted as heifers.

Heifer pregnancy (HP): Predicts the probability that a bull's daughters will become pregnant as first-calf heifers in a regular breeding season, expressed as a percent. A higher value of this EPD is favorable, meaning that a higher percentage of a sire's daughters get pregnant as first calf heifers compared to other sires in his contemporary group.

30-month pregnancy (Pg30): Predicts the probability that a bull's daughters will become pregnant and calve at three years of age, given that they calved as first-calf heifers. This EPD is expressed as a percent, again, with a higher number being more favorable meaning a higher percentage of a sire's daughters will calve at three years of age, given they calved as first-calf heifers.

Stayability (STAY): Predicts the genetic difference, in terms of percent probability, that a bull's daughters will stay productive within a herd to at least six year of age. The stayability EPD is one of the best measures currently available to compare a bull's ability to produce females with reproductive longevity.

Docility (DOC): Is reported as a percentage, with higher numbers indicating a higher percent of offspring receiving a disposition score of 1 (docile).

Scrotal circumference (SC): Predicts the difference, in centimeters, of scrotal circumference of an animal's male offspring at yearling compared to the SC of other animals' male offspring.

GROWTH TRAITS

Birth weight (BW): Predicts the difference, in pounds, for birth weight of the calf.

Weaning weight (WW): Predicts the difference, in pounds, for weaning weight (adjusted to age of dam and 205 days). An indicator of growth from birth to weaning.

Yearling weight (YW): Predicts the expected difference, in pounds, for yearling weight (adjusted to 365 days). This is an indicator of growth from birth to yearling.

CARCASS TRAITS

Yield grade (YG): Differences in yield grade score, which is a predictor of percent retail product. Smaller values suggest that progeny will have

a better lean to fat ratio.

Carcass weight (CW): Differences in pounds of hot carcass weight, adjusted to an industry standard age endpoint.

Ribeye area (CREA): Differences in ribeye area in inches between the 12th and 13th rib. Greater ribeye areas are preferable.

Marbling (MARB): Predicts the differences in the degree of marbling within the ribeye as expressed in marbling score units. Greater marbling numbers are preferable and are an indicator of higher carcass quality grades.

Fat (CFAT): Differences for fat thickness, in inches, for a carcass over the 12th rib, smaller numbers of fat thickness are preferable as excess fat can be detrimental to yield grade.

EFFICIENCY TRAITS

Dry matter intake (DMI): Represents the average daily dry matter intake per day consumed in pounds. A negative, or lesser value, is more favorable.

INDEXES

Total maternal (TM): An index that combines growth and milk information as a prediction of the weaning weight performance of calves from a sire's daughters. A greater TM value means a mother that returns comparatively higher weaning weights on her calves. TM Index = MK EPD + 1/2 WW EPD.

\$Cow: Represents the genetic value in dollars of profit of an animal when retained as a replacement female relative to other animals in the herd. A higher number represents more profitable genetics for maternal productivity. \$Cow will serve producers in selecting bulls that will sire daughters with stayability and reproductive efficiency as well as other traits that lead to profitability in a production system, such as milk, calving ease, moderate mature weight and the ability of calves to gain. A female's genetics also influence the performance of her calves in the feedlot and at slaughter, so traits such as feed efficiency and carcass value are also included in \$Cow.

Efficiency profit index (EPI): An economic selection index developed to aid producers in selecting for more feed efficient cattle that still have acceptable amounts of gain. The EPI provides slight negative pressure on intake, while keeping gain at a constant value. By selecting on this index, producers will be able to find those animals that gain the same amount as their contemporaries while eating less.

FPI™ which stands for feeder profit index: An economic selection index designed to aid producers in selecting sires whose progeny will perform in the feedlot and are sold on a grade and yield standpoint. Well ranking sires for FPI have higher marbling and carcass weight than their contemporaries. As a terminal index, little emphasis is put on maternal traits such as stayability and calving ease.

FOOT SCORE GUIDELINES

FOOT SCORE GUIDELINES

Claw Set (5 is ideal)

- Extremely weak, open, divergent claw set. Unsound.
- Open, divergent claw set. Marginally unsound.
- Moderately open/divergent claw set.
- Slightly open/divergent claw set.
- Ideal. Symmetrical claws, with appropriate space between claws.
- Slight tendency for claws to curl. One claw may be slightly larger than the other.
- Tendency for claws to curl, with one claw larger than the other.
- Moderate scissor claw and/or screw claw. Curling of one or both claws. Near crossing of claws. Marginally unsound.
- Extreme scissor claw and/or screw claw. Pronounced curling of one or both claws. Crossing of claws. Unsound.

FOOT SCORE GUIDELINES

Foot Angle (5 is ideal)

- Extremely straight pasterns. Very short toe. Unsound.
- Straight front and rear pasterns. Marginally unsound.
- Moderately straight front and rear pasterns.
- Slightly straight front and rear pasterns.
- Ideal. Approximately 45-degree angle at pastern joint. Appropriate length of toe and depth of heel.
- Slightly shallow heel and long toe.
- Moderately shallow heel and long toe. Somewhat weak pasterns.
- Shallow heel and long toe. Marginally unsound.
- Extremely shallow heel and long toe. Extremely weak pasterns. Unsound.
