2021 BULL SALE

Thursday, March 25, 2021 - 1:00 p.m.

Sitting Bull Livestock Auction, Williston, ND

Dear Breeder,

When Kevin and I moved back nearly a decade ago, we carefully considered the herd and what should signify a Glasoe Angus cow, as well as her future with us as stewards. An obvious and desired distinction was performance; the dams that raised heavy, stylish and profit-driving calves earned a secure role pretty fast. We soon also gained an abiding preference for cows that display consistently calm and gentle temperaments. Third, calving ease scenarios typically produced vigorous calves, dams immediately eager to nurture those calves and a better night's sleep for us and hopefully our buyers down the line. So, these initial experiences are what quickly led us to our Glasoe Angus motto. Calving ease. Docility. Performance.

Those simple ideals still guide us, but the consideration, nuance and execution of those foundational beliefs are hopefully both more profound and profitable for you as the next generation of Glasoe Angus prospects find their home and make their mark. The Glasoe Angus cow we raise today stems from nearly fifty years of meticulous internal selection and the utility of our foundational maternal genetics. She is backed by decades of maternal lineage that go beyond paper promises to provide proven, real production and maternal performance. The Glasoe Angus cow is built to endure. She must be sturdy-made with steadfast fertility and nurturing ability to fulfill her destiny here. Our two dams selected for donor service this summer are both fourteen-year-old Pathfinders that each raised twelve calves.

We also carefully determine and test Glasoe sires against breed standouts utilized in our artificial insemination and embryo flush lineups. Many of our Pathfinders have resulted from those Glasoe sires, and on sale day we will showcase two Glasoe sires of our 2021 breeding season lineup: five-year-old G A Regard 633 and two-year-old G A Raindance 922. Sale day sons of G A Reign 610 and G A Genesis 721 are once again offered, as well as Resource, Colonel, No Doubt, Elation and more. These yearlings represent the next generation of breeders, and they are among the most sound-structured, performance driven and docile bulls we have ever offered. We have high expectations for these featured prospects and hope they will benefit your herd for years to come.

Sydney Glasoe Caraballo

COMMENTS FROM THE SALE MANAGER

Tom Burke

Kurt Schaff

(816) 520-6447

Jeremy Haag

(816) 516-1309

CALVING-EASE * DOCILITY * PERFORMANCE

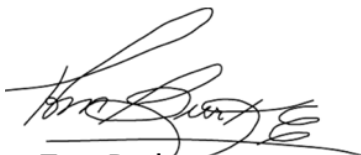

Established in 1973, the Glasoe Angus program is now nearly five decades strong. Ever since, it has been breeding for the needs of the commercial cowman. Kevin and Sydney and their family carry forward the Angus tradition established by Art and Lance. Each year the results have shown continuous strides forward, and 2021 is no exception!

The sale will again feature an excellent selection of sons of SAV Resource 1441. In addition, an impressive array of bulls sell sired by SAV Rainfall 6846, SAV Elation 7899, Jindra Blackout, Hoover No Doubt, Baldrige Colonel C251, SAV 654X Rainmaster 6849, SAV Exceptional 7279, GA Genesis 721, GA Reign 610, and more.

Plan now to be on hand, Thursday, March 25, 2021, for this exciting event comprised of outstanding yearling Angus bulls. Once again, a substantial proportion of the sale offering will stem from the great Glasoe foundation female, SAR Colossal Anne 3095 7, who was selected from the Paul Schaff Estate Dispersal in 1980 and remained a pillar of production in the Glasoe breeding program through 19 years of age.

It is a sincere pleasure and privilege to work with everyone at Glasoe Angus on this sale, featuring the genetics of herd building prospects with the potential to positively impact the herds that they go into. Please don't hesitate to call on us at American Angus Hall of Fame if we can be of any assistance in any way.

Sincerely,

Tom Burke

Kurt Schaff

Jeremy Haag

Our mission is to raise cattle that showcase structural longevity, fleshing ability, steadfast fertility and excellent nurturing traits. Our breeding philosophy is to ensure their progeny inherent the genetic potential and exhibit the actual performance we expect and demand. Our promise is to provide cattle born and bred on our ranch that display generations of calving ease, docility and most importantly, superior performance.

~ Sydney Glasoe Caraballo

SIRE S A V RESOURCE 1441

17016597

LOTS: 1, 2, 3, 4, 5, 6, 7, 8, 9

Our Resource sons offer the rare opportunity to add direct descendants of this legendary sire to your herd. Resource was transcendent. Deceased since 2019, he was an international presence in multiple cattle breeds for his sheer ability to improve seedstock performance in Black, Red Angus, Simmental, and Balancer programs. Countless producers chose Resource to stamp progeny with superior muscle, fleshing ability and pure mass into a moderate and splendid design. He was the number one bull for semen sales at Genex AI Stud for multiple years. More than 16,000 registered progeny carry Resource's name; he remains a landmark Pathfinder sire whose EPDs and reputation only got better after thousands of progeny performances were recorded and became standouts in herd after registered herd.

His dam, S A V Blackcap May 4136, was the iconic, record-earning revenue cow in the Schaff program. Admired worldwide, she earned \$10.2 million in direct progeny sales of 221 direct sons and daughters. Glasoe Angus is incredibly grateful for Resource and his influence in our program. His daughters are beautifully structured brood cows; 30 of our 95 dams producing calves this spring are Resource daughters or granddaughters. His sons have been sale favorites for multiple years, and we continue to rely on them in our natural service sire and AI lineup.

G A Realm 026 is a soggy and sporty bull who impressed us from the day he was born and never stopped. He exhibits a natural stride with good heel topped by a wide, correct stance and ample muscle expression. His production performance as a calf and post-wean has been steady and superior. Even more profound than his phenotype is the powerful pedigree backing this prospect. His Pathfinder grandam raised our 2020 sale powerhouse – Lot 7 G A Raindance 922, who was purchased by Erickson Ranch of Powers Lake, ND. We plan to have this maternal brother on display sale day. Realm's dam is a young, feminine and well-made daughter of V A R Generation 2100; she is a Pathfinder prospect who adds marbling and tenderness, as well as milk production, to the Resource pairing. Realm's milk score is the highest of the Resource sons.

Realm earns well-balanced bulk, fleshing efficiency and performance on a moderate frame. His mature weight EPD places him in the top 25 percent of the breed but in the bottom 55 percent for mature height. Furthermore, he scores in the top 25 percent or higher of the breed in fourteen categories after genetic testing. His Angus GS Genomic Percent Rank is a 2 for carcass weight, 4 for ribeye and yearling weight, 6 for wean weight, 12 for milk and 25 for heifer pregnancy. He earns a +.37 (top 10 percent) Angle EPD for feet, and his \$Value Index EPDs are in the top 2 percent for Feedlot Value, top 10 percent for Beef Value, and top 15 percent for Wean Calf Value and Combined Value.

G A Regalia 011 earned his namesake for the distinctive badge of elevated status he exhibits in the history of our Resource sons. Square-made Regalia is THICK and tremendously deep bodied on an incredibly correct and efficient frame. He will downsize height and frame while volumizing pounds in all the right places. (He scores in the top 5 percent for mature weight and bottom 65 percent for mature height on his Maternal EPDs).

Regalia earns the EPDs and genomic ranking that seedstock producers chase. His Genomic Percent Rank scores a 1 on wean weight, yearling weight and carcass weight, a 2 on mature weight and a 3 on ribeye. Whether producers sell at weaning or background calves, Regalia scores in the top 1 percent of the breed EPDs for both on a moderate frame. He should improve feet quality with a top 10 percent score in claw and top 30 percent in angle EPDs. His PAP EPD scores in the top 20 percent for higher elevations.

Regalia's potential testifies to the careful breeding selection of a pedigree dedicated to simultaneously enhancing production performance while preserving maternal excellence. His maternal production elevates in EPDs and lineage. He scores a +14.1 heifer pregnancy and an ideal +24 milk EPD. His young dam of excellent hoof and udder is stacked with Glasoe genetics and is AI bred for the third consecutive year. Her Pathfinder dam, G A Ebony 556, is also AI bred and raised our top-selling 2020 sale Lot 4 bull – G A Real Estate 925, who sold to Johnny Moe of White Earth, ND. Both dams are on track for donor status in our herd.

The bulls were photographed January 14th at ten months and younger. Featured dams were photographed October 7 several weeks before our calves were weaned. Our cover photo, as well as other featured fall photos in pasture, was taken October 26 shortly before we weaned calves on October 30.

G A Regulator 047 is a rough-made tank of a bull for covering and claiming territory – both literal and figurative when it comes to performance. He earned our second highest projected yearling weight at 1,453 pounds. He scores in the top 25 percent or higher in scrotal circumference, heifer pregnancy, mature weight, claw, angle and ribeye EPDs. His granddam is one of our absolute best – fourteen-year-old G A Colossal Anne 7120. This Woodhill Foresight daughter and Pathfinder raised her twelfth consecutive calf this summer while entering full-time donor status. She is an absolute cow-maker and her daughters, granddaughters and great-granddaughters in production are revered here on the ranch. Regulator's 2014 dam is a capacious and consistent performer in our herd and carries forward with one of the best and prolific maternal pedigrees we offer.

		Glasoes Anne 973	AAA 16613888	

G A Regime 048 is thus named for his pedigreed potential to promote structural integrity, balance and eye appeal. We have bred Regime's dam to Resource for five consecutive years because we love the result every time. She boasts a calving interval of 368 on 6 calves with a 103 wean ratio and is AI bred to Resource yet again. Length of spine, smoothness, a bit more frame and feet and udder excellence have been stamped time after time into her Resource progeny; Regime is no exception.

5 G A RESOURCE 036

This Resource son offers a bit more frame and scores in the top 30 percent or higher in EPDs for wean weight, yearling weight, mature weight, docility, PAP, ribeye and fat. His V A R Generation 2100 dam earns a tight calving interval of 348 days and is AI bred to Resource this spring.

6 G A REAL ESTATE 028

G A Real Estate 028 showcases muscle, moderation and maternal excellence in his pedigree and phenotype. He and his dam were hauled down to rural Belfield, ND, when he was just a few weeks old so that his dam could be prepared and flushed through last summer for our embryo program. She records an impressive 97 birth ratio on five calves for an average birthweight of 76 pounds that spread to a 107 wean ratio against contemporaries each year. Real Estate's dam is deep-bodied, wide in her top and stance, beautifully uddered and exhibits a great temperament while being a third-generation Pathfinder. She is AI bred to S A V America after two flushes, and her 2010 dam is AI bred to Hoover No Doubt this year.

Real Estate scores in the top 30 percent or higher in EPDs for wean weight, yearling weight, scrotal circumference, heifer pregnancy, docility, angle, PAP, carcass weight, ribeye, and feedlot value, yet the bottom 95 percent for mature height.

If more frame is desired with Resource pedigree, Lot 9 brings both to the table. He scores in the top 20 percent for a mature weight EPD and the top 25 percent for mature height. His dam is a proven third generation Pathfinder who notches a wean ratio of 107 on seven consecutive calves.

Rainfall belongs to the world-record-selling flush from the 2017 S A V sale — the breeding result of S A V Blackcap May 4136, Resource's dam and arguably the most influential cow of the modern-day breed, and Coleman Charlo. Rainfall's sire boasts the unique combo of great calving ease, fleshing ability and thickness. Charlo is also a Pathfinder-qualified sire and has produced many Pathfinder daughters.

Rainfall has topped semen sales at Select Sires AI Stud and offers the compelling combination of low birthweight and proven calving ease on heifers while also showcasing capacity, muscle and marbling. He scores top marks for foot improvement, as well as docility, milk and heifer pregnancy. His seven sons in our sale all offer phenotypical style and substance; we would be comfortable using the majority of them on heifers while also expecting herd sire potential in pounds and presence.

10 G A BIG RAIN 001

G A Big Rain 001 is a stocky and broad-made bull who earned the heaviest 205-day and projected 365-day weight of the Rainfall sons while still offering calving ease and potential qualification on heifers. Big Rain was the first calf his V A R Heritage dam raised, and she offers frame, carcass quality, docility and generations of excellent mothering ability. Big Rain scored quite well in his Genomic Percent Rank from the Rainfall and Heritage pairing: a 1 for docility and a 6 and 7 for wean weight and yearling weight. His maternal traits earned a 6 for heifer pregnancy, a 23 for mature weight, a 32 for milk and a 33 for calving ease maternal. He also shined in carcass: 3 for tenderness, 7 for carcass weight and ribeye, 10 for fat and 36 for marbling.

(Lots 10 and 11 combine S A V Rainfall, V A R Heritage and our Colossal Anne pedigrees for an excellent pairing. Lots 13 and 16 come from different maternal Glasoe Angus heritage but also come from V A R Heritage daughters).

11 G A RAINFALL 002

This sire provides Rainfall, Heritage and Colossal Anne pedigree – just like Lot 10. Similar in expected carcass and maternal traits, he also scores a +.40 claw EPD and +.41 angle EPD to place him in the top 15 percent of the breed for expected hoof quality. His docility is top-notch, as is his Genomic Percent Rank in calving ease direct (14) and birthweight (11).

12 G A TORRENT 054

G A Torrent 054 displays a torrent of great calving ease in his pedigree – from Coleman Charlo to S A V Bismarck 5682 to Connealy Impression, all of whom earned Pathfinder status and produced an impressive lineup of females across the industry. Torrent's dam is backed by two generations of top Pathfinders in our herd – both are serving as donors and have loads of longevity and performance as 2011 and 2007 dams who both raised calves this summer. His dam also earns an ideal 365-day calving interval on six calves, as well as a spread of a birth ratio average of 95 (75 pounds) and a 103 wean ratio.

G A Storm 016 is a testament to our commitment to provide calving ease and heifer qualified bulls that still bring production performance to the table. Storm offers superior length of spine and frame with a smooth front shoulder and elongated head in order for calves to arrive easy with the capacity to thrive from the get-go. He provides the highest calving ease direct score and a negative birthweight score to be highly heifer-qualified. His Genomic Percent Rank scored him in the top 3 for docility, 7 for calving ease maternal and 8 for calving ease direct. He also gets a 13 for milk and the top 34 and 33 for wean weight and yearling weight. His angle and PAP EPD place him in the top 25 percent of the breed.

Storm's dam is an absolute bull-maker. G A Colossal Anne 224 is also the dam of Genesis, whose sons are lots 39-50. She is a perpetual Pathfinder with a 365-day calving interval and an average birth ratio of 94 and wean ratio of 111 on seven consecutive calves. She is AI bred again this spring to Baldridge Pappy.

Squirt was a stout and square-made calf that endeared himself to every visitor on the ranch. His 2011 Pathfinder dam, who serves as a donor in our herd, lost some milk production this year so his 205-day weight did not reflect his full genetic potential. He has poured on the pounds post-wean and offers a well-balanced combination of EPDs, as well as a proven pedigree. His Geonomic Percent Rank is a top 1 for carcass weight, 2 for ribeye, 3 for tenderness, 5 for wean weight, 14 for yearling weight, 19 for docility and 21 for heifer pregnancy and milk. His claw and angle EPD place him in the top 20 percent of the breed.

G A Regard 633, who will be on display, is a maternal brother to Squirt.

A flush brother to Rainfall, Rainmaster also offers great performance opportunities with calving ease, power and style. He posted an 86 birth weight ratio against a 106 wean weight ratio, as well as a 103 intramuscular fat for marbling ratio and a 103 ribe eye area ratio in the Schaff herd.

Lot 18, our only Rainmaster son, earned a great birth to wean spread as well. He weighed 78 pounds at birth for a 94 birth weight ratio in our herd and 787 pounds for his adjusted 205-day weight to earn a 105th percentile in wean ratio. We first utilized his dam, G A Colossal Anne 627, as a recipient dam in our embryo program due to her maternal pedigree with exceptional fertility. We entrusted her with our second ever embryo flush, and she raised a beautiful Exceptional son last year while showcasing great mothering ability. We then chose to artificially inseminate her to Rainmaster for her next calf. She is the daughter of G A Colossal Anne 224, a Pathfinder dam with tremendous power, length of spine and capacity that has raised seven consecutive calves ratioing in the 94th percentile at birth and the 111th percentile when they wean. Her impressive Rainfall son is Lot 14. Both of these sons from our Colossal Anne dams impress in phenotype and performance.

Elation sold as the world-record-selling bull of the 2018 S A V sale for \$800,000 to Square B Ranch and Cattle of Warsaw, MO. His sire, Sinclair Emulation XXP, provides exceptional maternal traits for fertility and structural longevity, as well as sound, correct udders and feet. Elation's dam, S A V Blackcap May 1782, has earned more than \$1 million on 24 direct progeny sales.

The Emulation and Blackcap May pairing resulted in Elation's dramatic performance, athletic structure and great temperament that should appeal for those who want scale-stomping steers, as well as heifers made for brood cow, front-pasture appeal. We chose some of our best dams to pair with Elation, and his three sons testify to Elation's future contributions to the Angus breed.

Exceptional earned the highest 205-weight in SAV history at 1,097 pounds when he was sold to ZWT and Buford Ranches in 2018. He was the third lead-off bull of that sale and the careful breeding result of Kelly Schaff reintroducing the Emulation line of cattle in his herd lineup. Exceptional and Elation share the same sire. Exceptional's dam — a Resource daughter — goes back to the Pathfinder Duke Girl family owned by Scott Davis of White Earth, ND. With Exceptional, she recorded a wean ratio of 111 on four calves.

Exceptional's lot 22 son hails from a young Colossal Anne dam with an abundance of thickness and frame. She earned a calving interval of 352 days, an average of 74 pounds at birth and a 105th percentile in wean ratio on her first two calves. Her Lot 22 son weighed 781 pounds for his adjusted 205-day weight.

We chose Colonel for his production performance, docility, hoof quality, ribeye and outstanding carcass value. Like Resource, Rainfall and Elation's dam, we also chose Colonel due to the pedigree and performance of his outstanding mother — Baldridge Isabel Y69. She is a beautiful, deep-bodied and wide-topped brood cow who has produced multiple standout AI sires — Colonel, 38-Special, Beast Mode, Bronc and more. Isabel, valued at one million dollars, is impacting the industry with her daughters as well and ranks in the top one percent for wean and yearling performance and dollar wean value with more than 100 direct progeny.

Colonel also carries the illustrious Pathfinder sire Hoover Dam, Sitz Upward 307R and Baldridge Kaboom K243 KCF pedigrees. Our calves sired by him exhibit capacity and frame, muscle with fleshing ability and superior docility. His daughters are blossoming with the look and presence of powerful brood cows; our first daughters will deliver calves this spring. We have high expectations for their future in our herd.

I buy Glasoe bulls because of the genetics and performance. ~ Dave Veach of Ray, ND

G A Lieutenant 035, who we photographed February 25, is a personal favorite – loaded with volume and style in a high-quality package. He demonstrates 360 degrees of correct stature with natural width and rib, generous length of spine, a level hip, square stance, a well-heeled hoof and great eye appeal. This standout owns the rights to the top 365-day weight at 1,454 pounds and an excellent 205-day weight of 786 pounds. His superior phenotype is backed by genetic testing and EPDs, as well as his pedigree.

Lieutenant's Genomic Percent Rank includes a 1 for yearling weight and scrotal circumference, 3 for carcass weight, 5 for wean weight, 8 for milk and 11 for ribeye. He ranks in the top 25 percent and well higher in 18 EPDs. He shows great potential for improving progeny feet quality, docility and milk production in addition to production performance and carcass quality. He also earns the Certified Angus Beef Targeting the Brand logo.

His young dam is well-regarded, as are her dam and Pathfinder grandam in production. They are feminine-fronted with great length and beautiful udders. G A Colossal Anne 710 earns a wean ratio of 104 on her first two calves. Heavy Glasoe pedigree backs this young stud — from G A Dakota 571 to G A Montana 216, the son of herd matriarch G A Minnabelle 709.

G A General 052 boasts the heaviest 205-day weight of all his contemporaries with 861 robust pounds. He offers a bit more frame than Lieutenant and similar production performance, scrotal circumference and milk production in his EPD profile. His Genomic Percent Rank is a 2 for carcass weight, a 3 for yearling weight and mature weight, a 5 for wean weight, a 6 for scrotal circumference and milk, and a 12 for ribeye. General is backed by a 2014 Pathfinder dam who earns a wean ratio of 107 on five consecutive calves.

Calving Ease. Docility. Performance.

No Doubt has caught the attention of seedstock and commercial producers alike for his width, capacity, superior hoof quality, docility, marbling and carcass quality. His sons are topping sale after sale this year, and his daughters in production are known for well-made udders, capacity and excellent temperaments. Multiple Pathfinder sires back his pedigree. We utilized No Doubt in an embryo flush pairing this summer with our esteemed herd matriarch, G A Minabelle 709. Minabelle sired G A Montana 216, who we used as a natural service sire and whose progeny were a huge favorite with our commercial buyers. Minabelle's No Doubt ET calves are due this spring, and we hope to offer more No Doubt sons in next year's sale from this flush.

Two special No Doubt options are offered in this sale. We selected phenotypical standouts — G A Mag 615 and G A Colossal Anne 624. These two Resource daughters are stout, capacious and beautifully made while expressing ample muscle and sheer width. Lot 25's dam was the leadoff to our 2020 female sale and sold for \$4,700 to Erickson Ranch of Powers Lake. Powerful pedigrees with maternal excellence frontline our No Doubt sons.

G A No Doubt 051 and his stout Resource dam caught the eye of producers at our North Dakota Angus Association Tour stop this past September. This appealing No Doubt son showcases the potential to increase pounds, docility, feet quality and the dollar value assessed to his calves. He earns the second highest wean weight EPD of his Glasoe contemporaries at +85 and third highest yearling weight EPD at +149 (the top 2 percent of the breed for both scores).

Blackout, the high-selling bull of the 2018 Jindra sale, weighed 74 pounds at birth, 965 pounds at weaning and 1,549 pounds as a yearling. He was our choice for utilizing the esteemed Jindra Acclaim pedigree. Blackout, an Acclaim son, offers a more moderate frame, more ribeye and docility, as well as a better scrotal circumference EPD than Acclaim. The Jindra program is also known for honoring and preserving the great Scotch Cap pedigrees of the Hoff program. Blackout presents Scotch Cap lineage on top and bottom, as well as Connealy Impression, who provided deep and wide daughters with exceptional udders and mothering ability in our herd. Blackout scores in the top 15 percent for the combined value (\$C) index, which includes traits from both the maternal weaned calf value (\$M) and beef value (\$B) index.

G A Good Night 039 is thus named for his heifer-qualified EPDs in calving ease direct and birth weight; he also boasts the best production EPDs in wean weight and yearling weight of the Blackout sons. He scores in the top 30 percent or higher in 12 EPDs.

30 G A BLACKOUT 015

19889094

03/05/2020

G A COLOSSAL ANNE 614,
MATERNAL SISTER TO LOT 30

G A Blackout 015 also offers heifer-qualified EPDs in calving ease direct, birthweight and calving ease maternal. He is a stylish bull on a quite moderate frame. His dam carried a lot of visual appeal on a small frame but unfortunately died the beginning of July this year. Lot 30's 205-day weight was certainly impacted by the loss of his dam, but he has thrived in the post-wean environment and has practically doubled his wean weight.

Broken Bow is a highly-balanced sire with double-digit calving ease, production performance, maternal stability, and carcass quality. We have several heifer daughters due to calve this spring. Lot 32's dam is a very moderate dam that carries excellent carcass value from both PA Power Tool 9108 and PA Safeguard 021 in her pedigree. Her dam, G A Colossal Anne 311, is a beautifully-made Pathfinder and dam of G A Reign 610, whose sons are featured lots 33-38.

Our Glasoe Angus calves put on solid weight, and when it comes to weaning, they seem to adjust without losing. They carry the docile trait. We like happy and heavy cattle versus stressed and sassy.

~ Kelly Skor of Wildrose, ND

Reign exudes sheer muscle and sire dominance in his eye appeal. He is one of the most easy fleshing, athletic and powerful bulls we have raised. Reign hails from a beautiful, moderate P A Safeguard daughter, G A Colossal Anne 311, and Resource. Reign was used three breeding seasons in our program to add females that exhibit good bone, a thick base and width on a moderate frame while also adding increased milk production and heifer pregnancy performance to the Resource pedigree.

Reign scores in the top 10 percent for ribeye and 30 percent for mature weight and yet is in the bottom 75 percent for mature height — true capacity on an efficient frame. His maternal EPDs are ideal for building and enhancing a cow herd. Regarding fertility, he scores in the top 15 percent for scrotal circumference and his heifer pregnancy EPD is in the top 15 percent. He carries a milk score of +23 for adequate supply and longevity of production. His hoof structure, scoring in the top 5 percent for claw and 20 percent for angle, also protects longevity. His 2013 dam remains productive in our herd and will eventually enter donor service; her son is Lot 47.

Reign's 2020 daughters as a group excelled in phenotype and 205-day weights — averaging 718 pounds on moderate frames. His sons carry that maternal lineage forward while also providing the presence and bone of a front pasture herd sire. These sons are on average a full month younger than other AI contenders, but they are exhibiting ample muscle and herd sire appearance. Like Resource, Reign truly stamps his progeny. We have Reign semen available for sale.

G A Reign 093 is a rugged-made, super thick and long-quartered prospect that travels well from front to back stride. His distinctive pattern of muscle, width and athleticism start with feet quality and bone structure made for supporting sheer volume. He scores in the top 1 percent of the breed for his hoof angle EPD and the top 3 percent for claw EPD. His Genomic Percent Rank is a 3 for ribeye, 6 for mature weight and carcass weight, a 7 for yearling weight and 9 for wean weight. He earned the third highest 365-day weight of his contemporaries. His lineage utilizes the performance of three proven Glasoe sires: G A Reign 610, G A Score 304 and G A Montana 216. All three of these sires were considered among the best of their contemporary groups.

G A Reign 061 provides more frame and capacity from the breeding selection of Reign to G A Minnabelle 334, a second-generation Pathfinder and daughter of herd matriarch G A Minabelle 709. Minabelle 709 is fourteen years old and now serving as a donor in our herd for embryo transfer. The Minabelles showcase volume, steadfast fertility and exceptional nurturing ability. Demonstrative of these traits, Lot 34's Genomic Percent Rank scores include a 2 for heifer pregnancy, 4 for scrotal circumference, 6 for mature weight, 15 for calving ease maternal and 27 for milk.

LOTS: 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50

Genesis boasts an excellent disposition and production performance. He weighed 74 pounds at birth and 863 pounds at 205 days while depending solely on his dam's milk and available pasture for that gain. His yearling weight was 1,425 pounds. Genesis offers frame, length of spine, a smooth front and long flank. He scores in the top 15 percent for calving ease direct on heifers while earning the top 25 percent for wean weight performance. He offers great fertility with a scrotal score in the top 10 percent and heifer pregnancy in the the top 25 percent. His milk production score of +28 is also ideal for maternal performance.

His Pathfinder dam, G A Colossal Anne 224, boasts a 365-day calving interval on seven consecutive progeny and an exceptional birth to wean ratio. She averages a 74-pound birthweight in the 94 percentile for birth ratio and the 111th percentile for wean ratio. This sheer bull-maker has produced six sons and one daughter; her 2020 Rainfall son is Lot 14.

We would be confident using the majority of Genesis sons on our heifers.
24 GLASOE ANGUS 2021

39 G A GENERATOR 070

G A COLOSSAL ANNE 013,
GRANDAM OF LOT 39

G A Generator 070 hails from a long and smooth, feminine-fronted dam. Like his sire, Generator excels in maternal production for heifer pregnancy and milk with a score of. +14.9 and +27. His production potential is also top tier with a WW of +76. His grandam and great grandam are proven Pathfinders.

40 G A GENESIS 073

G A COLOSSAL ANNE 819,
DAM OF LOT 40

G A Genesis 073 and G A Genesis 084 are great prospects with nearly identical lineage and actual performance. These two young bulls boast similar 205-day and 365-day weights and EPD performance. Both should be suitable on heifers. They are the first calves raised by two embryo transfer (ET) daughters who are full sisters. Lot 41's dam was the number two feature at our 2020 female sale and sold to Fred Gretsche of Lexington, GA. These young dams are Resource daughters out of our Pathfinder G A Colossal Anne 113 flush. Their fourteen-year-old grandam is in full-time donor service after raising her consecutive twelfth calf.

We are always happy with how docile the Glasoe bulls are, along with the ease of calving they give us. The bulls have been a great addition to our herd to help us maintain our moderate frame and uniformity.

~ Jason and Stevie Howe of Tioga, ND

Hero was the careful breeding result of line-bred pedigree with Connealy Consensus 7229 in both the maternal and paternal lineage. Consensus 7229 was the number three bull in the breed for Pathfinder daughters in the 2018 Angus Pathfinder Report. Lee and Erin Vassen of Ambrose bought Hero in our 2019 sale.

Hero's 2015 third-generation Pathfinder dam, G A Minnabelle 512, is AI bred for a Baldrige Pappy calf this spring. Her two daughters are also AI bred. This massive and capacious dam is backed by G A Minnabelle 334, who ratios 6 calves at a 105 wean ratio and is the dam of Lot 34.

Hero's great-grandam is herd matriarch G A Minabelle 709, who is now serving as a donor in our embryo program at fourteen years old. She ratios twelve calves in the 110th percentile for wean ratio. Her flush of Hoover No Doubt calves arrive this spring.

These dams attest to superb fertility, longevity and sheer maternal performance, but Hero's maternal lineage is also a bull-making trilogy of excellence. He scores in the top 3 percent (+294) for \$ combined value index and the top 10 percent for \$ beef index. His carcass EPDs are outstanding: he ranks in the top 10 percent for marbling, the top 10 percent for carcass weight, and top 15 percent for \$ grid index. His dollar index EPD start to finish place him. In the top 15 percent or higher of the breed.

Lot 51, Hero's son, also carries G A Reign 610 in his lineage. His young dam sired by Reign is also backed by two generations of Pathfinders.

Diverse offers a unique pedigree from the legendary Graham program. He is thick-quartered, highly docile and earns double-digit calving ease, as well as genetic carcass merit. He scores in the top one percent for docility and the top three percent for calving ease direct on heifers.

We utilized Lot 52 as a natural service sire in our herd last year. He was raised by an S A V International daughter; he was her first calf and earned an impressive adjusted 205-day weight of 804 pounds. He offers frame, hoof integrity, production performance and docility. His grandam and great-grandam both earned Pathfinder status.

Thank you

Each year as I prepare for our bull sale, I am excited and yes, nervous, about how the sale will go. Last year when COVID hit, we weren't sure we would be allowed to have a sale. Then we weren't sure if buyers would show up. But you did in both person and with phone bids to make it one of the best sales we've had. Your steadfast loyalty and faith in us and the support that you give is a tremendous blessing to us and our cattle. We can't thank you enough for entrusting Glasoe Angus with a place in your contributions to the cattle industry while you help feed the world. We're so grateful for you. We wish you much health and happiness and look forward to seeing you all sale day!

All the best to each of you.

~ Sydney

SALE INFO

Location:

Sitting Bull Livestock Auction, Williston, ND,
701.572.6701

Lunch:

Served before the sale and begins at 11:30 a.m.

Health:

Bulls have been vaccinated with Bovi-Shield Gold 5 and Oneshot Ultra 7, poured with Dectomax and have been given their first round of foot rot vaccination. It is the responsibility of the buyer to provide the second round. Health papers will be furnished to cattle going out of state.

Feeding:

We want our bulls to express fertility, structural integrity, and growth with muscle expression while protecting overall gut health and hoof longevity. We began utilizing Brandon Weidert, a nutrition consultant with CHS, two years ago with those goals in mind. The bulls are fed a high roughage diet with minimal amounts of starch; our chopped corn silage and hay are tested and fed in a mixed ration with bull challenger pellets. We stay between a 48 to 50 NEg and 14 protein for optimal bone development and growth. We also feed flax-lick tubs for our mineral program for a minimum of 45 days to promote sperm motility.

Papers:

Papers will be furnished upon request. We reserve 1/3 semen interest in all bulls that are sold.

Terms:

All animals will sell fully guaranteed according to the terms and conditions of the American Angus Association.

Purchaser's Risk:

Each animal becomes the risk of the purchaser as soon as sold, but shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser until loaded for shipment or until the expiration of forty-eight (48) hours after the sale.

Attendance:

All persons who attend the sale do so at their own risk. We assume no liability, legal or otherwise for any accidents.

Insurance:

Haugland Insurance Agency of Crosby, ND, will be available sale day to provide insurance policies on the sires. For more information, please contact Amber Haugland at 701-641-8792.
