

GNERER ANGUS

Annual Bull Sale on
February 20, 2021

Lunch 11:30AM • Sale 1PM • Olive, MT

AUCTIONEER

Mick Mosher: 406-670-7581

SALE DAY REPRESENTATIVES

Chris Gnerer: 406-861-6794

Joe Gnerer: 406-498-6113

Bill Pelton: 406-671-5100

Greg Gnerer: 406-860- 0244

Steve Gnerer: 406-860-8081

John Kimbrell: 229-798-0111

Jeff Mosher: 406-670-5320

HERD HEALTH

Broadus Veterinary Clinic

Birth: Alpha 7, weighed & tagged

Branding & Weaning: Pyramid 5 plus Presponse, In-force 3, BarVac7 plus Somnus, Multi-Min & Ivermectin;
Clean-Up 2 prior to sale day.

FERTILITY

All bulls have passed a breeding soundness exam and fertility check performed by Dr. Liam Robbins of Fallon County Vet Clinic.

DELIVERY & WINTERING

Free delivery up to 300 miles on all bulls. Free delivery up to 500 miles on purchases exceeding \$5000 & at cost beyond 500 miles. Bulls will be kept until April 1st, 2021, then we will contact you to arrange a delivery date. If you are unable to receive them in April, feeding arrangements can be made at buyers expense.

SALE ORDER & BIDDING

Bulls will sell in numerical order starting with Lot 1.

If you are unable to attend the sale, bulls can be bought online using Frontier Live Sale or via telephone by contacting any Sale Day Representative or by pre-registering with Bill Pelton by calling 406-671-5100.

BREEDING SEASON GUARANTEE

Full Breeding Season Guarantee (90 days from turn out) on bulls purchased for \$2500 or more. If a problem occurs, we will give you a suitable replacement bull if one is available, or you will receive full credit minus the salvage value at next year's sale. Notify us of injury as soon as possible on all bulls. We reserve the right to a second opinion by the veterinarian of our choice.

LEGAL

All persons who attend do so at their own risk. Gnerer Angus assumes no liability, legal or otherwise, for any accidents which may occur. Owners will retain 1/3 semen interest on all bulls.

SALE LOCATION: Sale held in a heated facility. Ranch is between Miles City and Broadus, MT, located 13 miles north of Broadus on HWY 59 on Ash Creek Rd. Signs will be posted.

Complimentary lunch served at 11:30am (MST) & sale begins at 1pm (MST) on sale day.

HORIZON MARKETING AGENCY

HMA

Welcome, friends!

2020 was a bit of a roller coaster for our family and many others around the world, but there were some positives we can choose to reflect on! Chris, Krista and the 3 girls welcomed a little brother, Silas Robert Gnerer on October 7th, our new future ranch hand! Grandma Maureen and Grandma Jaci love the opportunity to watch and spoil the kids while Mom and Dad are busy with the cows and the ranch. Joe completed his final round of chemo and radiation in Billings on January 27th for nasopharyngeal cancer. Chris had an accident in June after his motorcycle and a rock had a discrepancy while moving cows. Chris suffered severe concussion and a broken neck but is fully recovered and back in full swing. Also, our mild fall/winter has been a big help to conserve our hay stacks and realize the importance of efficient cows.

As we have stated before, our number one goal at Gnerer Angus is to help our customers be profitable. Our own success is measured by the satisfaction and profitability of our customers. We appreciate the opportunity to serve you and let us know how we can help reach your goals! Your feedback is very valued!

The foundation of our program has been centered around an efficient, easy fleshing, maternal cow. Producing problem free cows with correct structure, longevity, and good temperament is our top priority. She needs to bring in a big calf in the fall and breed back early in the spring to fit into our tight calving program. All bulls have had the Angus GS testing to enhance the EPD accuracy, from birth to rail to better help you find the traits you would like to improve in your herd. More info on Angus GS on page 4.

If you are unable to make the sale, we will again have Frontier Live Sale for online bidding and Pelton Livestock for phone bidding. You are welcome to call Joe or Chris or any other sale representative for phone bids also. We would love to see you in person on sale day if at all possible! God Bless!

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

www.angus.org

PERFORMANCE LEGEND

Birth Weight (BW) – Actual birth weight

Adjusted 205 Day Weaning Weight (AWW) – Standard weaning weight adjusted for age of dam.

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the respective breed's database. EPDs listed in this catalog were obtained from the breed associations, and they are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I" and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE. Please keep in mind that EPDs can change each time breed associations update their data. EPDs should not be used to compare bulls of different breeds.

Birth, Weaning, Yearling and Milk EPDs are expressed in pounds of calf. Differences in EPDs between two bulls within the same breed indicate the expected difference between their calves. A bull with a weaning weight EPD of +40 would be expected to produce calves that averaged 10 pounds heavier at weaning compared to calves produced by a bull of the same breed with a +30 weaning weight EPD. The same is true for birth and yearling EPDs. Milk EPDs are an indication of the added weight at weaning of a bull's daughter's calves due to the bull's transmission of milking ability.

Calving Ease Direct (CED) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal Milk (MILK) is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is

that part of a calf's weaning weight attributed to milk and mothering ability.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (MARB), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (FAT), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Value Indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Limousin Mainstream Terminal Index (\$MTI) predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

***Adj. % IMF** – The percent intramuscular fat (marbling) adjusted to 365 days of age. Heritability of marbling is in the moderate range.

***Adj. Rib Fat** – Backfat measured in inches adjusted to 365 days of age.

***Adj. REA** – Ribeye area measured in square inches and adjusted to 365 days of age.

**Individual ultrasound measurements are adjusted to 365 days for bulls and 390 days for heifers.*

Sale Day bidding options if you can't attend:

FRONTIER LIVE SALE

This Sale will be broadcast live on www.frontierlivesale.com. To view a sale,

1. Create an account, if you have already done so skip to next step. To create a new account, click on the word **Registration** in the upper right hand corner. You must fill out the information requested. Then click **Create Account**. An email will be sent to your email account you provided. Please click the link in the email to activate your new account.

2. Once you click the link, your account will now be activated

3. At this point, you may click **Continue To Browse Our Site**. This will allow you to view all upcoming auctions.

4. Once you see the auction you are interested in, click **Get Approved To Bid** for absentee and live bidding.

5. Please enter your information in the form. Depending on the auctioneer, different information may be requested. Click **I agree to sale terms and conditions**. Congratulations! You are now approved for the auction. Now that you're approved you can participate in the auction and bid on its items.

6. Login on sale day with the credentials provided at registration.

Call 866-313-0123 for tech help.

Sale Day Conference Call

It's as easy as

1. Pre-Register for your buyer number
2. Receive toll free call in # and pin
3. Get last minute instructions for call

Give Bill Pelton a call in advance

"Our goal is to get you in the seats but if you can't make it on sale day, we're fixin' to get you On The Line"

Winston 2165 was the second highest selling bull at the 2016 VanDyke Angus Bull sale. He is a quiet, complete, and long bodied Churchill 1063 son out of DFA Hero 6017. With a CED of +12, he is a proven calving ease sire with muscle to back it up. Winston produces a uniform, perfectly proportionate, excellent calf crop. His bulls are structurally sound, straight backed, and quiet. His females are in production and they are very mellow, moderate-framed, and feminine with great foot structure.

This bull lives up to his name! We chose to use Stout because we like his mother, who has entered the donor program at VDAR. His sons are phenotypically correct cattle with phenomenal front ends and lots of muscle. He has the traits and numbers that will produce long lasting females.

SONS ON NEXT PAGE!

Tahoe is arguably one of the most complete Angus bulls in the breed. He ranks in the top 1 percent of the breed for CED and top 10 percent for WW and YW all while adding body, fleshing ability and base width. Use to reduce mature size without sacrificing performance. He will improve MARB and REA while adding eye-appeal, dimension and improving feet and udders. We had heard nothing but great feedback from the producers who have used Tahoe so we chose him and are glad we did!

Showdown packs a punch! A son of the Genex sire, Sonny Boy 1194, Showdown has been a complete standout with a weaning ratio of 109 and YW of 106. But what we like even more is the impressive cow behind him, VDAR Forever Lady 1409. A Pathfinder dam that has a calving interval of 369 days and a weaning ratio of 107 on 6 head. She has had 4 Bull calves averaging \$20,000 each at the VDAR sale. The feet and disposition of Showdown are remarkable and he exhibits muscle shape and growth wrapped in a stylish package!

Son Shine was our favorite Sonny Boy son at the 2018 VDAR Bull Sale. He is thick, long and well made. He has a quiet disposition just like his father, VDAR Sonny Boy 1194 We are excited about his dam ECC Mix Wix 1107-408, and to add some Mix Wix genetics into our herd. This is Son Shines first calf crop and we are happy with his complete and sound bulls and females. We will be using him extensively in our program.

In the past we used Basin Payweight and we were happy with the thick bulls and gorgeous females he produced. Last year his semen was hard to come by so we decided to use his most complete son, Tex Playbook. He is a proven low birth weight, calving ease sire that does not sacrifice body dimension or growth and a breed leader for \$Weaning, Docility, and Milk. We are super impressed with the quality calf crop he has sired at Gnerer Angus. The bulls are quiet-tempered, deep-bodied, structurally correct cattle with exceptional eye-appeal and performance. We are excited to watch his progeny perform in our herd and excited to breed with him again in the future.

SEMEN AVAILABLE!

Titan 8154 is sired by the great McCumber Titanium 5005. We are very impressed with his structure. He is a heavy muscled, stout rumped, wide based herd bull with great hoof shape. The calves are deep and wide. Titan is a maternal brother to McCumber Tribute 702 and looks to be a tremendous cow maker as he has a combination of Miss Wix and Lassie in his pedigree. 8154 is bred to sire forage efficient, fertile females and his progeny will be a great addition to any herd.

Gnerer Black Granite 4038, our top pick of the 2014 calf crop, is our go to calving ease sire! His dam 038, is sired by TC Franklin 619, one of the top sires we have used. His momma is a favorite on the ranch with a calving interval of 368 days, she is a smaller cow but she always brings a big calf in the fall. She has weaned 9 calves that had an 104 average weaning ratio. She is an ideal cow with perfect udders, perfect feet, and spot on maternal traits. We used 4038 on 50 heifers and we never had to touch a calf (except to weigh them!). He sires low birth weight, vigorous, jet black calves! If you need a SURE FIRE calving ease bull that will produce you ideal females then our Gnerer Black Granite 4038 is your bull!

We have been rally happy with our True Grit off spring and kept a Bull to keep in our herd from our 2018 Bull Sale. Hilltop True Grit is maybe the easiest fleshing calving ease bull in the breed. His low birth weight, high growth, balanced EPD's and moderate mature height make True Grit one of the most unique bulls in the breed. We also really liked the feet of his offspring and the calf vigor at birth.

Winston 2165 was the second highest selling bull at the 2016 VanDyke Angus Bull sale. He is a quiet, complete, and long bodied Churchill 1063 son out of DFA Hero 6017. With a CED of +12, he is a proven calving ease sire with muscle to back it up. Winston produces a uniform, perfectly proportionate, excellent calf crop. His bulls are structurally sound, straight backed, and quiet. His females are in production and they are very mellow, moderate-framed, and feminine with great foot structure.

This bull lives up to his name! We chose to use Stout because we like his mother, who has entered the donor program at VDAR. His sons are phenotypically correct cattle with phenomenal front ends and lots of muscle. He has the traits and numbers that will produce long lasting females.

Gnerer Rocky 8112 and Gnerer Rocky 8663 are sired by KCF Bennett Boulder. They have great marbling, \$B values, great temperament and have a great topline. We are very pleased with their calves. 8112 is a great calving ease bull also. Their progeny will be a great asset to any herd! Semen is available on both of these bulls.

SEMEN AVAILABLE!

6924 was our top Gnerer Really Windy 3601 son from our 2017 Bull Sale. A big bodied, fleshy, and deep Bull that weaned off at a whopping 803 pounds! 6924's dam, 924, is a big bodied cow with perfect udders and that ideal rectangular body shape. Born in 2009, 924 is a pathfinder dam and she will be raising her 10th calf. She is again AI'd to calve early, breeding back first year after year. 6924 will add pounds and longevity to your herd!

7571 was our favorite Winston son from our 2018 bull sale. His momma was sired by TC Franklin, and our Franklin cattle have become some of our favorite mothers. His sons will be great to use on heifers and produce great females.

Vintage Angus Ranch's Index is one of our sires we chose to use on our heifers. He was bred to increase carcass traits while maintaining a moderate BW and CED, and he does just that. He ranks in the top 1 percent of the breed for REA at 1.29 and top 25 percent of the breed for Marbling and \$B, all while keeping offspring moderate framed! He has been a bullet proof heifer bull.

We purchased this Cedar Wind 8111 son at the 2019 VanDyke Angus sale. You can not help but to love the VDAR Cedar Wind 8111 offspring. They are gentle, complete, and beautiful, the bulls and heifers alike. These bulls will be great to use on heifers. Cedar Wind 8111 pictured above.
