HERD HEALTH

Broadus Veterinary Clinic

Birth: Alpha 7, weighed & tagged

Branding & Weaning: Pyramid 5 plus Presponse, Inforce 3, BarVac7 plus Somnus, Multi-Min & Ivermectin; Clean-Up 2 prior to sale day.

FERTILITY

All bulls have passed a breeding soundness exam and fertility check performed by Dr. Liam Robbins of Fallon County Vet Clinic.

DELIVERY & WINTERING

Free delivery up to 300 miles on all bulls. Free delivery up to 500 miles on purchases exceeding \$5000 & at cost beyond 500 miles. Bulls will be kept until April 1st, 2022, then we will contact you to arrange a delivery date. If you are unable to receive them in April, feeding arrangements can be made at buyers expense. Buyers that pick up their bulls before April 5th, 2022 get \$50 off each bull. Please let the clerk know when you pay.

SALE ORDER & ONLINE BIDDING

Bulls will sell in numerical order starting with Lot 1.

If you are unable to attend the sale, bulls can be bought online using Frontier Live Sale or via telephone by contacting any Sale Day Representative.

BREEDING SEASON GUARANTEE

Full Breeding Season Guarantee (90 days from turn out) on bulls purchased for \$2500 or more. If a problem occurs, we will give you a suitable replacement bull if one is available, or you will receive full credit minus the salvage value at next year's sale. Notify us of injury as soon as possible on all bulls. We reserve the right to a second opinion by the veterinarian of our choice.

LEGAL

All persons who attend do so at their own risk. Gnerer Angus assumes no liability, legal or otherwise, for any accidents which may occur. Owners will retain 1/3 semen interest on all bulls.

SALE LOCATION

Sale will be held in a heated facility at the Ranch right off HWY 59 on Ash Creek Road. The Ranch is located 15 minutes from Broadus -13 miles North on HWY 59. The Ranch is 1 hour from Miles City- 65 miles South on HWY 59.

MARKETING

Catalog, ad designs, bull photos & videos by Horizon Marketing Agency.

Complimentary lunch served at 11:30am (MST) & sale begins at 1pm (MST) on Saturday, March 19, 2022.

GNERER ANGUS

Hello from Gnerer Angus!

It is snowing as I write this! All of us are looking forward to and praying for more of the white stuff and abundant rain over the whole region.

It is the second full year of these terrible dry conditions and we know that things are going to look up in the moisture department. The cows bred up despite the lack of good green forage and we are so pleased. It is a little over 2 weeks into calving and we are half way calved out. The cows and calves alike are doing great on the limited, lower quality feeds we have available and the efficiency of our herd is shining through.

The harsh terrain of Southeastern MT paired with the ever present up and down drought conditions are a constant battle the ranchers in this area face. But on that same note we are thankful for the unrelenting perseverance of the good Angus cattle we raise. Low input, fertile, and functional cows equals profit for us and the ultimate goal of profitability for our customers.

We have several sires represented this year. There are lots of options and we believe all good ones. A few embryo bulls are available in the offering that will bring in some outcross genetics to our long time customers.

We're looking forward to seeing you at the sale on March 19th. If you cannot make it to the sale we will have Frontier Live Sale for online bidding or you can always give us a call!

Thank you for the continued support of our program. We are thankful for the privilege to work with our customers and strive to deliver to them the best possible bull for their herd.
Call or stop in anytime – we would love to hear from you!

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

www.angus.org

PERFORMANCE LEGEND

Birth Weight (BW) – Actual birth weight

Adjusted 205 Day Weaning Weight (AWW) – Standard weaning weight adjusted for age of dam.

Expected Progeny Difference (EPD) is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the respective breed's database. EPDs listed in this catalog were obtained from the breed associations, and they are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I" and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE. Please keep in mind that EPDs can change each time breed associations update their data. EPDs should not be used to compare bulls of different breeds.

Birth, Weaning, Yearling and Milk EPDs are expressed in pounds of calf. Differences in EPDs between two bulls within the same breed indicate the expected difference between their calves. A bull with a weaning weight EPD of +40 would be expected to produce calves that averaged 10 pounds heavier at weaning compared to calves produced by a bull of the same breed with a +30 weaning weight EPD. The same is true for birth and yearling EPDs. Milk EPDs are an indication of the added weight at weaning of a bull's daughter's calves due to the bull's transmission of milking ability.

Calving Ease Direct (CED) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Maternal Milk (MILK) is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is

that part of a calf's weaning weight attributed to milk and mothering ability.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (MARB), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (FAT), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$Value Indexes are multi-trait selection indexes, expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk and mature cow size.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Limousin Mainstream Terminal Index (\$MTI) predicts genetic differences in profit per carcass by combining the potential for and value of post-weaning growth, quality grade and yield.

***Adj. % IMF** – The percent intramuscular fat (marbling) adjusted to 365 days of age. Heritability of marbling is in the moderate range.

***Adj. Rib Fat** – Backfat measured in inches adjusted to 365 days of age.

***Adj. REA** – Ribeye area measured in square inches and adjusted to 365 days of age.

**Individual ultrasound measurements are adjusted to 365 days for bulls and 390 days for heifers.*

Winston 2165 was the second highest selling bull at the 2016 VanDyke Angus Bull sale. He is a quiet, complete, and long bodied Churchill 1063 son out of DFA Hero 6017. With a CED of +12, he is a proven calving ease sire with muscle to back it up. Winston produces a uniform, perfectly proportionate, excellent calf crop. His bulls are structurally sound, straight backed, and quiet. His females are in production and they are very mellow, moderate-framed, and feminine with great foot structure.

Tahoe is arguably one of the most complete Angus bulls in the breed. He ranks in the top 1 percent of the breed for CED and top 10 percent for WW and YW all while adding body, fleshing ability and base width. Use to reduce mature size without sacrificing performance. He will improve MARB and REA while adding eye-appeal, dimension and improving feet and udders. We love our Tahoe cattle, females and bulls alike. Take a look and you will see there is a lot to love.

FRONTIER LIVE SALE

This Sale will be broadcast live on www.frontierlivesale.com. To view a sale,

1. Create an account, if you have already done so skip to next step. To create a new account, click on the word **Registration** in the upper right hand corner. You must fill out the information requested. Then click **Create Account**. An email will be sent to your email account you provided. Please click the link in the email to activate your new account.

2. Once you click the link, your account will now be activated

3. At this point, you may click **Continue To Browse Our Site**. This will allow you to view all upcoming auctions.

4. Once you see the auction you are interested in, click **Get Approved To Bid** for absentee and live bidding.

5. Please enter your information in the form. Depending on the auctioneer, different information may be requested. Click **I agree to sale terms and conditions**. Congratulations! You are now approved for the auction. Now that you're approved you can participate in the auction and bid on its items.

6. Login on sale day with the credentials provided at registration.

Call 866-313-0123 for tech help.

Bred Females Available via Private Treaty

Contact Joe or Chris for more information.
