GE-EPD Real-time Auctions

Dear Friends,

Welcome to the 17th annual joint sale of Heart River Ranch Red Angus and Open A Angus. Last year I wrote that 2019 was a pretty crazy year – who would guess 2020 could have topped that and 2021 is well on its way. Trying to stay positive, I will focus on the blessings – we had many, first good health, wonderful time spent with kids and grandkids, and the cattle did well considering a dryer than normal year. More than ever we are grateful for the customers we have the opportunity to work with and the country we live in. Nothing being perfect we take comfort in the fact that country folk still stand for common sense, morals and timeless values, and are still the kind of people you can do business with on a handshake.

Given the uncertainty in the cattle markets, weather, and other ag challenges it becomes more important than ever for the cattle enterprise to manage resources efficiently and optimize production. Our programs have retained their focus on the maternal end of the business while incorporating genetics which bring adequate growth and consumer acceptability to the table. We hold true to the task of selecting for those essential traits that enhance operational efficiency and longevity as it is critical in reducing the replacement costs on the expense side and is a large driver of overall profit.

We thank you for your continued interest and patronage of the genetics that we present for your consideration. We welcome your inspection of the bulls and any questions you may have about our programs. You can view the bulls at your leisure at the development lot just 3 miles south of Belfield on HWY 85, turn west on 40th St SW and continue to the top of the hill.

Additional information will be provided and posted online as sale day approaches and as data is collected at [www.openaangus.com](http://www.openaangus.com) and [www.heartrivergenetics.com](http://www.heartrivergenetics.com). Carcass ultrasound data, videos and updated EPDS will be provided as they become available.

We will listen to Lisa Pederson, ND Beef Quality Assurance Coordinator and hear from the residents of Home on the Range after a prime rib dinner the evening of March 9th at the sale location. Come early to inspect the bulls and we will look forward to an enjoyable evening ahead of the sale.

## Internet and Absentee Bids

We would prefer to visit with our customers in person but realize that not everyone can be at the sale; therefore we have made arrangements to bid through telephone or internet. Bids will be handled in strict confidence by any of the publication representatives or the respective ranches. If you would like to discuss the sale offering call us preferably several days before the sale, and we can help select your genetics. Keep in mind that we are sure that we have a bull that will fit your needs. After the sale you will need to contact Annette at 701-575-8145 or 701-290-9745 to make arrangements for payment of telephone purchases.

## Storm Date

In case of postponement please listen to the Northern Ag Network, KLTC 1460 AM or go to **northernag.net**, **ndstockmen.org**, **heartrivergenetics.com** or **openaangus.com** for any postponement announcement. Postponement sale date is set for pre-sale activities: March 12, 2021, 6:00 p.m. and sale March 13, 2021, 1:00 p.m.

## Transportation

Belfield, ND and Dickinson, ND are both served by bus. Dickinson, ND is also served by United, Delta and Frontier Airlines. Please call 701-290-9745 if you need transportation from the bus or airport.

## Lodging

Lodging is available in Belfield, ND.

### Trapper's Inn Motel

801 Hwy 85 N, Belfield, ND ..... 701-575-4261

## Sale Video

Theresa Howie and Ken Howie

## Announcements

Errors discovered in the catalog will be corrected by announcements from the auction block at sale time and such corrections will take precedence over the printed matter in the catalog.

## Liability

All persons who attend the sale do so at their own risk. Neither the owners, management, sales staff, facility or any person connected with this sale assume liability, legal nor otherwise, for property loss or for any accidents that may occur.

## Delivery

Free Delivery to central points up to 500 miles. Balance will be at cost. We will make every effort to assist in deliveries of greater distance or by private arrangements and volume purchases. Delivery will be made at our convenience and efforts will be made to have bulls delivered by April 1.

## Feeding and Development of Bulls

All bulls of Heart River Ranch were weaned in September and the Open A bulls were weaned in late October. The bulls did not receive creep feed except for a few Open A bulls that were ET calves produced at a recipient herd. Calves received their pre-weaning and weaning vaccinations and were handled in every respect as all natural. Bulls were fed to gain 2.5 lb. per head per day on a 1% grain and by product rotation. Bulls were fed free choice mineral, salt, and hay. We took yearling weights at approximately 105 days post weaning with no post weaning adjustment period or warm up period. Our intent is to grow out the bulls for maximum longevity and integrity of the bull.

## Historic Photos

Most of the historic photos in this catalog were taken by Inez Kessler, Annette's great grandmother between 1905 and 1908 in the Gaylord, ND area. Inez was the only person to have a camera in the area and as a result she took pictures of many people and events. The town of Gaylord was located about 13 miles south of Belfield, ND along US Highway 85. The Gaylord Post Office and store was a stop for travelers going south. This building still stands at the Curt Molm place.

## Sale Terms & Conditions

The terms of the sale are cash. No release will be given until satisfactory settlement has been made. All settlements will be made with the clerks of the sale immediately after the sale. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure date. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. All sales are subject to an acceptable semen examination. Semen evaluation certificates will be furnished to the buyer at delivery.

Bulls were carcass ultrasounded on approximately February 25.

Updated EPD information, carcass ultrasound, and 50K data will be provided at the sale and available at [www.heartrivergenetics.com](http://www.heartrivergenetics.com) or [www.openaangus.com](http://www.openaangus.com). This information will be available as soon as it is received from the Red Angus Association of America or the American Angus Association.

All bulls have been tested using the Zoetis HD50K genomic test or Neogen's HD genomic test and parent verified. All bulls sold will be DNA tested free of any known genetic defects.

Health certificates and brand releases will be furnished for shipment anywhere in the United States.

Each animal carries a readable tattoo or freeze brand.

## Insurance

Ownership risk to purchaser commences when the auctioneer's hammer falls. Insurance will be available sale day. It is recommended that buyers insure their purchases for safe delivery. Purchaser assumes the risk of death or injury to their livestock immediately after the sale.

## Heart River Ranch and Open A Angus

### Loss of Use Policy

2021 optional loss of use policy: Heart River Ranch and Open A Angus are striving to offer the best options not only in beef animal genetics but also loss of use protection for bulls and/or females we offer to our customers. We strongly recommend that our buyers purchase insurance on their animals. Animals that will be fed for an extended period need to have insurance on them.

Heart River Ranch/Open A Angus will pay 4% of sale price toward the insurance policy. The balance of the policy will be paid by the customer. If the customer chooses to decline the policy, Heart River Ranch or Open A Angus has no obligation to cover any losses due to injury, sickness or death. Heart River Ranch/Open A Angus does guarantee all cattle to be sound the day of the sale. All bulls will be semen tested by the Wibaux Vet Clinic in March/April 2021.

**Breeder's Guarantee:** All bulls sell fully guaranteed to be fertile and reproductively sound according to the terms and conditions of the Red Angus Association of America and the American Angus Association. All bulls are guaranteed to be breeders. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event a bull is claimed to be a non-breeder, the purchaser may return the animal to the ranch of the seller if in good condition and complying with the health requirements of the Seller's state. The Seller will be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the Seller shall be obligated to replace the animal with another of equal value or to refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. If the Seller proved the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal at the purchaser's expense.

**Implied warranty:** Except for those stated in the terms and conditions, there are no warranties or implies, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in the terms and condition are in lieu of all other warranties, either expressed or implied and the remedies provided therein shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer, for any breach of warranty or guarantee therein provided and all other obligations or liabilities.

## Health

Bulls and heifers were treated with Enforce at birth and branding and were calf hood vaccinated with 4-way and 7-way. At weaning, calves were given a 5-way, 7-way and One Shot, boosters were also given. Calves and cows were poured with Dectomax in the spring, fall and late winter. All bulls will be vaccinated with Preg Guard, Endovac and wormed prior to delivery. All females are bangs vaccinated and on a fall vaccination program.

**Semen Tests:** Bulls will be semen tested after the sale.

### Semen Interests:

Heart River Ranch and Open A Angus are each respectively retaining 50% revenue-sharing semen interest in every bull selling in this sale. Full possession and full salvage value sells on all bulls. If a buyer chooses to collect and market semen, the seller will share proportionately in the collection costs and revenues earned. In the event that the seller chooses to collect semen for "in herd" use, it will be done at the seller's expense and at buyer convenience. Semen will be made available to buyer at cost.

## Volume Discounts

We are pleased to give a volume buyer discount. You will receive 5% off of purchases of 5 to 9 bulls, and 10% off of 10 or more bulls. Please notify the clerk when you check out to receive your discount. This is another way to say "Thank You" for your trust in our program.

# A-BAG-A-BULL

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. Cattle enrolled in the FCCP are accepted into the exclusive Choice+ and G.O. Red grids. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

with use in the states. His daughters in production are some of our favorites. He ranks in the top 15% of the breed for HB, DMI and ME. Feet and udder structure on his offspring are his forte. We were fortunate to team up with Sand Bur Ridge and Arrowsmith Red Angus to be able to own a semen interest in the bull and we will continue to use him AI.

U-2 Authentic 139A is an AI sire we sampled given the accolades granted to his sisters in production out of the renown Red Minburn Copenhagen 3Y bull. Authentic himself is a smooth-made, attractive power bull. His offspring were accepted well in the U-2 dispersal.

**BIRNIE EXPRESS 353A**

even in her late years she maintained a perfect udder and sound feet and legs. The paternal dam, MLK CRK Sheba 043 was a tank of a cow that stood out in a very reputable Milk Creek program. His sire, MLK CRK Express 9127, is known for his daughters and we used him AI last year on heifers because we appreciate those females that much. Rockstar ranks in top top 1% for Stay.

Bernie Express 353A also known as "Rockstar" is a bull we selected specifically on the cows in his pedigree. His dam, OTT-Mona-758-970 produced offspring at 19 years of age and has produced 28 total natural and ET calves. We had the fortune to flush 970 and

**HRR EXPRESS 5142**

holding ground with other sire's calves. His pedigree is based on three lines that are known for their females, Shoco Data 102, Milk Crk Lakota 850 and Milk Crk Express 9127. He ranks in the top 3% or better for ProS, HB, CEM, Stay and is in the top 3% for CED while being in the 50% of the breed for 7 other traits. We moved HRR Express 5142 into the two-year-old pasture to get more of his offspring. His dam, HRR Lakota 115 is a donor at HRR with a 99 BW, 105 WW, 104 YW and a 104 MPPA on 8 natural calves. You will note some standout sons in this sale.

Shoco Data 102 is a bull that needs no introduction in this program, now almost 20 years old, Data still holds his own in the EPD ranks for most maternal, growth and carcass traits. Several outstanding flush sons in the sale.

# Red Angus Guide to EPDS and Indexes

**ProS...** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB.....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED .....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW .....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW .....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW .....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG .....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI .....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK .....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME .....** Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG .....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM .....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY .....** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB .....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG .....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW .....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA .....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT .....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

## American Angus Association® Selection Tools

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an “I”, and may or may not include the animal’s own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

### GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire’s calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire’s ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire’s ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire’s genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire’s ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire’s ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire’s calves.

### MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire’s daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire’s daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire’s genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf’s weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire’s daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

### CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis.

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire’s progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire’s progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire’s progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire’s progeny compared to progeny of other sires.

### \$VALUE INDEXES

**\$Value indexes**, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for pre-weaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Feedlot Value (\$F)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

**Grid Value (\$G)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for carcass grid merit compared to progeny of other sires.

**Quality Grade (\$QG)** represents the quality grade segment of the economic advantage found in \$G. \$QG is intended for the specialized user wanting to place more emphasis on improving quality grade. The carcass marbling (Marb) EPD, which is influenced by carcass marbling scores and ultrasound percent intramuscular fat (% IMF) measurements, contribute to \$QG.

**Yield Grade (\$YG)** \$YG represents the yield grade segment of the economic advantage found in \$G. \$YG is intended for the specialized user wanting to place more emphasis on red meat yield. It provides a multi-trait approach to encompass ribeye, fat thickness and weight into an economic value for red meat yield.

**\$G** combines both \$QG and \$YG, and may be the best carcass decision tool for focusing on quality and red meat yield simultaneously.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

HRR Hondo 0251 is a moderate birth bull that blew the doors off the scales, coming from a first calf Ridge Pragmatic 6098 daughter that has a beautiful udder. A standout all summer, this bull packs a lot of width of top and volume into a moderate frame. When you review his EPD's, it made sense for him to lead off the sale with 13 EPDs in the top 1/3 of the breed and several in the top 10 percent. His sire, HRR Express 5142 earned his way into being used heavily at HRR with his maternal strength through the foundation Lakota cow family and his progeny's proven performance. Herd sire potential with a quiet disposition.

HRR Final Approach 0305 is a rare genetic find for the Red Angus breed with a pedigree of tried and proven ancestors. Originating from the renowned SAV Madame Pride 0075 – dam of SAV America – the gold standard in the Angus breed – and the ever-popular SAV Final Answer 0035, combined with the Shoco Data 102 – the paternal sire of herd building red angus dams. 0305 validates that proven genetics never get old. Looking the part of a herd bull all summer, HRR Final Approach 305 was the top weaning and yearling weight bull coming out of our ET program. He ranks in the top of the breed in most of the growth and carcass traits while maintaining a top 8% Herdbuilder ranking. Phenotypically solid with a wide stance, depth from corner to corner and fluid movement, 0305 brings a total package of genetic opportunity to the most discriminating breeder. HRR will retain a half interest to use 0305 in our AI program.

A full ET brother to lot 2, HRR Final Approach 0307 didn't let his brother out class him phenotypically or in performance. This bull is very similar in confirmation and stature. The ET sisters to these bulls are doing a nice job in our herd, note Lot 8 in this sale is one of the elite dams in our herd.

HRR Merl 0210 is a high performance, top gaining WFL Merlin 018A son that has an abundance of volume. His dam, HRR Lakota 819 is a first calf heifer that comes from the same cow line as our HRR Express 5142 herd bull. That cow family has done a nice job at HRR with five generations of dams averaging an MPPA of 105 in his pedigree. Do not miss an opportunity to bring functional females with performance and udder correctness into the genetic equation. When a bull is born into this cow family you will find them in the catalog. Herd bull prospect with top growth, milk and carcass EPDS.

HRR Impact 0220 is a top calving ease prospect with strong performance sired by Schurr MCD Impact of Garton. This black red carrier bull stems from the Lakota cow family and his grand dam, HRR Lakota 090 is still producing for us into her 11th year. That says something for a cow to stay in the herd that long given the elevation and traveling required at the ranch. We rotate pasture twice over and water is often a good distance away. You will like his noticeable strong top, length, profile and balanced EPDS. Schurr MCD Impact of Garton daughters are reported to be doing a good job. This bull could be used on larger heifers.

HRR Rock Star 0294 is a calving ease- growth combination bull. His sire, Birnie Express 353A was well accepted in our 2020 sale and this bull shows why. There are balanced EPDs with three generations of calving ease behind this bull. He should work in the heifer and cow pasture as well. He is one of the top weaning weight bulls as well. The cow family posts MPPAs of 102+ average over the last 4 generations.

HRR Franchise 0216 is a long sided, clean made bull with a lot of muscle expression over his top. This bull weighed over 700 pounds at weaning from the strong Starlight cow family. This calf looked good on pasture this summer but had an ear infection after weaning which we did not catch right away. We would think he could mature into an attractive bull.

Both lots 124 and 125 are sired by Open A 55R Homer D606 a calving ease OCC Homer 650H son and a Bon View New Design 878 daughter.

## Home On The Range Program

For the 12th year in a row, Home On The Range is participating in the embryo transfer program. Home On The Range has entered into a contract with Open A Angus (Jim Arthaud) and Heart River Genetics (Annette Stefan). The staff and children bring in the cows, implant the CIDRs (a progesterone impregnated device), inject GnRH (gonadotropin hormone), remove the CIDRs and, finally, the embryologist transfers the frozen embryo into the cow.

The children are a little apprehensive at first, never really being around cattle and such a procedure, but once they get comfortable and know what their job is, they take responsibility. They put in ear tags and even learn how to palpate the cow later to see if she is pregnant.

It is a great program for Home On The Range and teaching children about cattle and animal reproduction.
