HAGUE ANGUS RANCH 3RD ANNUAL BULL SALE

OGALLALA LIVESTOCK AUCTION | OGALLALA, NEBRASKA

RAISED IN OUR ENVIRONMENT TO THRIVE IN YOURS

HAGUE ANGUS RANCH HISTORY

If it interests you, keep reading for a little history of the ranch and my roots as a cow calf producer in western Nebraska.

The name Hague comes from the original settler of the land during the Homestead Act that we are now on. There is not a lot of information about him, other than his name was Hague and the Peterson brothers, my Great Grandpa and Uncles, acquired the land in the early 1920's.

The Peterson brothers split the 100,000 acres into four individual places. The land that Gust and Flossie (Great Grandparents) got was comprised of the Miles, the Gentle, the Kickin', and the Hague. My grandma had a sister that led to another split of the land. Martha and John (grandparents) got the Kickin' and the Hague; her sister and family got the Gentle and the Miles.

My grandpa John and Dad incorporated, forming 9 Over 9 Cattle Company in the 80's which came fully under my dad's control in 1985. Half of that is now Hague Angus Ranch.

The Hague Ranch has been around for even longer than the Peterson's and my family in the Sandhills. We were just fortunate and blessed to have acquired it many years ago. Grandpa through the 1960's and 1970's had Hereford's. Dad introduced Red Angus and Simmental in the 70's (my dad got good at pulling calves). After doing percentage cattle for a number of years, my dad bought his first Angus bull in 1986. We haven't turned back since.

Luckily my dad did not follow the fads too much, and didn't get caught up in the numbers and growth. A lot of milk and growth made sense when you calved in January and fed your cows every day with a mixer wagon. My dad saw the light though and started moving calving dates back to late March and feeding the cows out on range. When he started pulling the groceries, he saw more opens, mastitis, and overall problems. He knew his cows got too big and had too much milk, which is when he took his first step in the right direction and visited Tim Ohlde.

That was in 1998. He knocked out some frame and added efficiency from 1999 to 2007. Well, that is when I got back to the ranch from college and wanted to take things even further down the low input grass genetic road. I have maintained the body type that my dad proved to work. All I did was fine tune the genetics and bring registered cattle into the operation, but believe me, papers never changed the way we run them. And there still ain't a bit of sympathy for the ones that aren't working for us!

In recent years, my brother and I, along with our families and on good terms, have divided the ranch that Dad and Mom took over from my grandparents. Dad, Justin, and I are the only remaining family members on the land from the original 100,000 acre – four Peterson brothers ranches. All this history has led to the formation and creation of Hague Angus Ranch. I am a 5th generation rancher on this place and hopefully, with God's direction and grace – will continue on through my kids as the next generation.

HAGUE ANGUS RANCH PRODUCTION BULL SALE

FRIDAY, DECEMBER 10, 2021 • 12:30 PM MST

Ogallala Livestock Auction | Ogallala, Nebraska
Visit <http://www.ogallalalive.com> for details, directions, and dates.

SELLING ◊ 55 Forage Developed Long Yearling Bulls

***"Raised in Our Environment
to Thrive in Yours"***

Raised in our Environment to Thrive in Yours is not just a catch phrase, it is a reality. At the ranch we have a no mercy policy that resembles that of a low input commercial cow calf producer, rather than that of a typical seed stock producer.

We are commercial cowmen and treat everything here as so. Longevity is the single most profitable trait in cow calf operations, but most leading bulls in the country or the major stud catalogs are out of cows that have only had 4 or 5 calves or less. The matriarch dams at Hague Angus like 912, 708, 443, etc. stuck around until they were 14 or more years.

Our environment sorts for us, and not a computer generated program full of algorithms. Cattle here are not fed up and flashy, but hardy and built to last. There aren't any silage piles or ethanol plants around our place. So why on earth would I rely on that for a long-term feed source?

We are just shy of 4000ft elevation with a 10-12 inch rainfall average. However, from 2002 through 2012 we averaged 5.2 inches of rain. Another downfall here is getting trees to grow. There are Zero trees on our place except for the homestead locations. We get 105 in the summer and can have wind chills as low as 60 below. The girls stay out on pasture year-round being fed Rio Nutrition mineral tubs, Hay and fresh water.

We believe in the hidden values of beef production. While most worry about how much their calves weigh, I care far greater for Longevity, fertility, Feet, Structure, Environmental adaptability, and efficiency. We live in an area that takes about 26 acres to run a cow. Our hills are made up of very fine blow sand and high alkaline ph, which leads to poor quality forage. The land here is very fragile and moves quick in a steady wind causing erosion very fast.

The good Lord blessed us with this little corner of the earth and we will continue to operate it and improve the things we can control. Which are heal the land, make hardy adaptable Angus cattle, and serve you as our customer to increase your success and simplify your life in the process.

Josh

Lot Numbers:	Ear tags correspond with numbers in catalog.
Feed Test	Ryan and Brooke Amateis fed the bulls with a target gain of 2.25 pounds per day on a high roughage ration near Bridgeport Nebraska. They do a great job of growing the bulls and not getting them fat, to ensure structural soundness and longevity for our customers. They were fed for 100 days and anything that didn't fit the mold was cut in the spring.
PRE-REGISTER TODAY!	Pre-registration is preferred, not required. If you will be attending, you may register the day of the sale. For those unable to attend, please pre-register by calling or emailing your name, address & phone number. Pre registry will get you in a drawing for 20 units of semen of one of four HAR herd bulls.
Volume Discount	Hague Angus Ranch offers 3% off each bull if three are bought. 4% off each bull on four. And on up to 8% on eight bulls. For example: You buy 6 bulls for a \$4500 average, that's 6%, so you get \$270 off each bull. Max of 8 bulls, so if bless your heart you buy eleven bulls, then it is still the 8% off each bull.
Delivery	FREE DELIVERY on bulls to central points within 500-mile radius from Hague Angus Ranch. Beyond 500-mile radius, we will work with friends and fellow breeders to get your bulls to you for a very reasonable and fair rate at a convenient time for ourselves and the purchaser of the bull/bulls.
Hauling Discount	\$50.00 per bull if bulls are hauled home from sale barn after the sale.
Wintering Arrangements	Bulls can be wintered thru February 1 for free. A fee of \$3.00 a day after that up unto the day of delivery. All bulls will be delivered by May 1 to their new homes.
2/3 Interest & Full Possession	Hague Angus Ranch is retaining one-third revenue sharing semen interest all bulls. Full possession and full salvage value to new owner.
Calving Ease Scoring	Calving ease rating is based on a star rating at the end of the bull footnotes. * Cow Bull ** Large frame heifers and Cows *** Heifer bull
Loss of Use Policy	Hague Angus Ranch does not guarantee bulls; however, we deal with guarantees on a case by case basis. We do have contacts for Livestock Insurance Agencies for Mortality, Loss of Use, Etc. that is available and affordable. If you would like to insure your bull, we will put you in touch with them.

DNA through Neogen will be provided on sale day.

Videos will be available on DVAuction.com

The 1624 cow did it again. 001's brother last year topped the sale, and this dude is the first bull out for a reason. The only Unlimited bull in the sale this year. He has been a favorite from day 1 showing all the characteristics of herd bull potential and his disposition is second to none! Collect him and breed them all AI, then turn him out to clean up, cuz you'll want them all sired by this meat wagon. I will collect him down the road. ***

Its not everyday you see a pedigree like this. He had the highest performance of any bull on the sale and his daughters will be the kind that make the banker happy. I did this flush to in a sense recreate Traveler 6807, so I guess you be the judge. W222 is in prime condition at over 12 years old and she is bred up again! This is a bull I will want to collect at some point in the future to continue on with the legendary Traveler line. Keep everything you get out of him! **

DAM OF LOTS 3-10

MH MELISA 311

"MH Melisa 311 is in the top 10 cows to ever walk our pastures here at the ranch. She was flushed to many great bulls and I still have a lot of her embryos in the tank. This line up of bulls out of her from 003 up to 010 are the kind of bulls that you can build a foundation with to move forward on in any herd. She always breeds up in the first cycle, and always brings in a calf towards the top. 003 to 009 are ET calves raised by top commercial females, and 010 is a true treat being her natural calf out of the 202 bull I sold to Diamond D Angus and has made an impact in many herds around the country. You don't see matings like these calves everyday combining the special gene pools put together out of a female like her."

Him and 016 are out of the same dam. A full sister to OCC Paxton, and if you have Angus, you've heard of Paxton. This is a top cow on the ranch and I have flushed this girl a whole bunch. This is a unique opportunity to own a natural calf out of one of my top donors.*

Another great pedigree of long lived cows. Another great heifer bull. The best of Monte Howrey breeding behind this bull. Big ribbed fancy steers and long lived efficient females make for profitable operations. Efficiency matters! ***

Cleaning the barn.

This cow was raised on fescue in an all forage outfit and I am sure glad I got her. She is awesome and I will use 6141 in the future again because of what I see from her. Keep all the daughters out of this great udder making machine. **

One of the first females I bought and she is still going strong at over 12. Combines old wye foundation Scottish and prover OCC blood. Carcass, Power, calving ease and Maternal all in one package.***

Old school blood. Jake and Lodge are both from the 60's. When the Angus breed became the greatest. This bull is built for breeding heifers! And is very moderate. Performance isn't everything. If you grass finish, take a hard look at this rascal.***

A very deep ribbed big volume cow behind this bull. I lost this cow about 2 months before weaning, and this rascal still shocked me with how he looked so he stayed intact and didn't disappoint. Hardiness is bred into them to last.*

Awesome combo of OCC and Shoshone blood here. 669 never brings in a very big calf, but she will probably live to be 20. Perfect udder, perfect structure and perfect balance. Improve the hidden traits with him.***

JAKE OF TURIHAUA

These commercial bulls are all recommended for large framed heifers and cows. I would put any of these commercial cows up against any registered females in the country in quality and the ability to work for you. These next 9 bulls didn't get to stay intact by accident. They are out of commercial cows that meet the very top of my expectations in our herd and you can buy them with confidence papers or no papers. They are built for grass with the **"Raised in Our Environment to Thrive in Yours"** mentality.

LOW COST LICK TUBS.

AVERAGE
29¢
COST/HD/DAY

- Semi load pricing (Whole or Split-Shipped)
- Free ranch-direct delivery
- Powerful digestion package
- 100% protected key trace minerals
- Plastic or biodegradable containers

**WE'VE HELPED
6,000+
RANCHES ACROSS
NORTH AMERICA.**

PLUS SAVE ENOUGH HAY/FORAGE TO COMPLETELY PAY FOR THE TUB!

If your hay is costing you \$200 a ton and you're feeding 30 lb/head/day, that's \$3 of hay/head/day. Conservatively saving 15% using Riomax®, you're saving 45¢ of hay/head/day and Riomax® is only costing you 29¢/head/day. You do the math.....5

Now, you may be thinking, "Yeah, but does that actually happen or are you just sayin' that?" Well, we'd encourage you to hear it straight from the horse's mouth in our most recent Hay Savings 101 Webinar Recording where 3 ranchers share what they've seen on their operations and hear about the University Study to back it. Visit RIOMAX.NET/RRR or scan the QR code with your phone camera to watch for yourself. Alternatively, you can call **866.977.7415** to talk with a herd health guide and get started today!

**SCAN TO LISTEN TO
THESE GUYS FOR 2
MINUTES!**

HAGUE ANGUS RANCH
13702 ROAD 130
ALLIANCE, NE 69301

*I press toward the mark for the prize of
the high calling of God in Christ Jesus
