IN THE REAL WORLD SALE

IN THE REAL WORLD SALE

March 2021

Dear Cattle Producers:

Please accept this invitation to **Harrer's Lost Lake Ranch**, with our partner **Windy Ridge Angus Ranch**, 27th Annual "In The Real World Sale" ... emphasizing that cattle must be bred, fed, and managed to work in the real world. This is the 85th year that Harrers have been breeding and selling Angus cattle!

This year, we are offering 100 yearling bulls and 12 open yearling heifers. Over 50% of the bulls qualify as "heifer bulls".

All cattle are fed at Lost Lake Ranch. As we've done in prior years, all registered cattle are sire-parentage verified by DNA testing ... you really get the cattle you think you are buying! We have obtained genomically-enhanced EPDs (GE-EPDs) using Angus GS (Gene Seek) on all the registered sale bulls. These provide substantially higher accuracy values on the cattle's EPDs. Thus buyers can purchase bulls with less risk and greater confidence! We are again providing very extensive data on the cattle in the catalog and at our web site (changed to www.HarrersLostLakeRanch.com) not to mention the American Angus Assn website. You'll note that the American Angus Assn Selection Tools (page 8).

A clarification about genomic tests, if you look at the raw data from them before they are incorporated into the EPD: each trait is expressed as a percentile rank within the entire population data base, from 1 to 100%. For each trait the top (best) percentile is 1% and the bottom (worst) percentile is 100%. Thus a 1% CED is top, a 1% Docility is top, a 1% Marbling is top and so forth. Another clarification is that genomic tests clear away the bias added for bull management and environment ... genomic tests strip away the difficulty in comparing bulls fed heavily and those fed leaner rations. Enjoy knowing even more about your purchase with higher accuracy EPDs.

As important as the numbers are, it is the physical traits of a bull that allow him to deliver his genetic information during breeding season. Such traits as structural correctness, body volume, and reproductive characteristics.

To assist in making your decisions ahead of time, visit our web site at www.HarrersLostLakeRanch.com which will be posting videos, scrotal size, and final weights. We are again offering on-line viewing and bidding through www.DVAuction.com. As they say, "Tune in for the sale and make your purchases." As always, calling in your order and/or bid is also readily available. See details on page 4.

A reminder that we still offer the following value-added options: free delivery (minimal qualifications, see page 3); discounts for those delivering their own cattle; volume discounts; wintering agreements (free until 4-15-21); shared Loss of Use/Mortality Insurance; and Harrer's Satisfaction Guarantee.

There are reasons for optimism in the coming year, though primarily in the second half of 2021: 1) Beef demand remains strong domestically and globally (we do have challenges to food supply chains, though improved); 2) The nation's calf crop is smaller, and with that decreased supply, we may well have higher prices at weaning time; 3) Total cattle slaughter is expected to continue its decline; and 4) Indications are that the impact of the Corona Virus pandemic will lessen as vaccination implementation rises. The unknowns are especially the risks of drought and the cost of feed.

We hope you can join us in person or by phone or online on March 29, 2021, whether looking to buy, just looking, or just visiting. Thank you to our previous buyers and bidders ... we really appreciate your support!

Sincerely,

Grant & Deanna Harrer and Family

Grant & Deanna Harrer

March 1, 2021

Greetings Angus breeders,

Welcome to our 27th annual joint production sale with Lost Lake Ranch. We appreciate your interest and confidence in our cattle and breeding program.

Our goal is to have animals in the 700 pound 205 day weight range. This year our steers weighed 732 pounds at weaning, our heifers 708 pounds, and our bull calves weighed on average 773 pounds. That is across the board. Our emphasis is on weaning weights without giving up on maternal traits.

I have been negligent in reporting docility scores to the Angus Association. They use these numbers to calculate EPDs for docility. The evaluation is done when taking yearling weights. 1 being docile, 2 restless, 3 nervous, 4 flighty, 5 aggressive, and 6 very aggressive. People, who have been around my cattle, either the vet, the photographer, or prospective cattle buyers, comment on how calm the cattle are. They are either 1's or 2's. It is important for more than safety in handling the cattle. Flighty heifers have an 8% lower pregnancy rate, nervous feeder cattle have lower meat quality leading to \$30 reduction in the uneasy cattle. The cows still will protect their calves, ask my cow dog. Reinaldo Cooke of Oregon State University has said "You can make a calm cow an aggressive one; you can make an aggressive one into the devil".

Please take note of the bulls sired by Windy Ridge Swagger714. They are a uniform group with great structure. This sire group was the top selling bunch in last year's sale.

Many thanks to Grant and Deanna for their cooperative effort in this bull sale. Thank you to Jeff and his crew for feeding and taking care of the bulls and heifers in the Development Center. A shout out as well to our vet Pat Trindle for being in charge of the cattle's health. Last but certainly not least, THANK YOU to our buyers, past, present, and future.

We certainly hope to see you sale day but if your cows won't allow it, please watch and bid on line at DVAuction.com, be sure to register a day ahead. If you have any questions call me at 406-737-4320 or email at windyridge@itstriangle.com.

The bulls and heifers can be seen at the Lost Lake Ranch facility, give me a call and I can give you a tour.

Thank you for your interest,

Karen H. Davis

27th Annual Production Sale

General Information

Monday, March 29, 2021
1 pm MST

Auctioneer:

Kyle Shobe - Office 406/ 538-5125
Cell 406/ 366-0472

Sale Location:

Western Livestock Auction, Great Falls, Montana. Take I-15 west of Great Falls for approximately 5 miles, then take the Manchester Exit 286. See map page on 47.

Sale Day Contacts:

Western Livestock Auction 406/ 727-5400
Grant Harrer Cell 406/ 899-9061
Karen Davis Cell 406/ 750-7133

Livestock Press & Ringmen:

John Goggings, *Western Ag Reporter* 406/ 698-4159
Kurt Kangas, *Regional Manager, American Angus Assn.*
. 661/706-2041
. 406/ 366-4190
Devin Murnin, *Western Livestock Journal* 406/ 696-1502
Bill Pelton, *Bill Pelton Livestock* 406/ 671-5100

Consultant:

Gary Wall, *ORIGen Genetics Unlimited*
. 406/ 208-8536

Food and Refreshments:

Complementary food throughout the day by Lost Lake Ranch and Windy Ridge Ranch, including morning snacks, lunch at 11:30 a.m., and snacks after the sale. Prepared by Pam Birkenbuel.

Sale Order:

Ear tags will correspond with lot numbers in the catalog. Heifers will sell first, then bulls. Within each group, sale order will be the catalog order.

Genetic Verification:

All registered cattle have been parentage verified by DNA testing and all registered bulls have genetically-enhanced EPDs (AngusGS).

Bull Development:

All the bulls have been fed at the Lost Lake Ranch Bull Development Center, since the day they were weaned. A high roughage diet is fed, to demonstrate the animal's potential, but they are conditioned to pass it on.

Fertility Testing:

All bulls have passed exams including reproductive tract physical, scrotal measurements, and semen analysis, by Pat Trindle, DVM.

Health:

Cattle have all been vaccinated for PI3, IBR, BVD, BRSV, Clostridials, Hemophilus and Pasturella. All poured for parasites. All have tested (ear notch) negative for persistent BVD infection.

Individual Animal Data:

Extensive data is provided on all registered cattle. All catalog EPDs are current as of the first week of March. Updated EPDs can be viewed online at www.Angus.org. Final weights and scrotal measurements will be available at the sale or at www.HarrersLostLakeRanch.com

Bull Videos:

These are posted on DVAuction.com and HarrersLostLakeRanch.com

Inspection of Cattle:

The cattle are available for your inspection any time prior to the sale at Lost Lake Ranch (see map on page 47). View all the sale cattle at Western Livestock Auction on Sunday, March 28 and Monday, March 29.

Announcements:

Announcements from the auction block take precedence over any printed matter.

Bids:

Same except On line bids via DVAuction.com see page 4 Bill Pelton will perform sale day Conference Calls (see page 4 for details). Also, call absentee bids to auctioneer or any of the owners or any of the ringmen before the sale.

Retained Interest:

Lost Lake Ranch and its associates are retaining one-third revenue sharing semen interest on every registered yearling bull selling in this sale. Full possession and full salvage value sells on all bulls.

Terms and Conditions:

The terms of the sale are cash or check, and all settlements must be made at the close of the auction. All animals are 100% guaranteed in accordance with the updated (2014) rules and regulations set forth by the American Angus Association. A copy of these rules and regulations is printed on the last page of this catalog.

Insurance:

Cattle Mortality, Loss of Use, and Major Medical coverage will be available through Stockmans Insurance Agency LLC. Bill Pelton, agent, will be at the sale. The sponsoring ranch will pay half the premium. See page 4 for details.

Liability:

All persons who attend the sale do so at their own risk. Neither Lost Lake Ranch or Windy Ridge Ranch, nor their employees, assume any liability for any accidents which may occur.

Delivery:

Free delivery with single ranch total purchases of \$3,000 or more, within Montana; \$75 for delivery to adjacent states. Buyers who pick up bulls within 2 days of sale day will receive a \$75 discount per bull. Arrangements can be made on delivery of females if needed.

Volume Discounts:

Buyers purchasing 5 bulls or more will receive 5% off all their bull purchases.

Wintering:

Free through 4/15/21, then boarded at \$3/head/day. Bulls are kept **at buyer's risk** from time of sale.

Special Thanks:

Special thanks to our families and friends for all their help and support; to Jeff Schile (manager), Andy Rice, Josh Hewlett and Shana McCarthy (the Lost Lake crew); to all the vendors that partner with Lost Lake throughout the year; and to all our bidders and buyers!

Credits

Credits to Texas Bix Bender from his "A Cowboy's Guide to Life" published by Gibbs-Smith (1992) for the words of wisdom scattered throughout this catalog.

Calving Ease Codes:

Star ratings are a subjective estimate of a bull's calving ease.

There will be four (4) convenient options:

1. **In the stands** We want everyone to do what they are comfortable doing. Anyone with fever and/or cough should not physically attend (see other options).
2. **Online or "Click to Bid"** DV Auction will broadcast the sale live. Go to DVAuction.com on page 4 to set up an account and arrange bidding at least one day before the sale (use Google Chrome as the internet browser; can download for free from the DVAuction site). If help is needed call them at (402) 316-5460 or support@dvauction.com.
3. **On the phone** Call Pelton Livestock (Bill Pelton at (406) 671-5100 or call Western Livestock Auction / Lynn Perry at (406) 727-5400.
4. **Leave your order** Whether the issue is distance to the sale, "social distancing", calving, bad weather, or other plans, call any of the ringmen, the auctioneer, DVAuction, Grant or Karen (numbers on page 2 of the catalog).

WE WOULD BE HAPPY TO HELP YOU WITH ANY OF THESE OPTIONS!

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

COVID-19 AND THE LOST LAKE RANCH PRODUCTION SALE

COVID-19 precautions will be everyone's personal responsibility, including:

- Wearing masks is not mandated. Wearing masks is suggested when you can not socially distance. Wear your mask over your nose and mouth and secure it under your chin.
- Socially distance when possible.
- Wash hands frequently, especially before putting on your mask. Or use a hand sanitizer.
- Minimize the size of groups you join.
- COVID-19 vaccination is encouraged when available and if no contraindications.
- Participating in the sale by Phone or On-line is definitely available.

TAKE CARE!

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits
(such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

MANAGEMENT

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

Claw Set (Claw), is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

Foot Angle (Angle), is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees

at the pastern and appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with current production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

Cow Energy Value (\$EN), is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), an index, expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

- Sure-fire heifer bull that is a paternal brother to the bull at Midland that is tearing it up for gain through the first weigh periods. Two-thirds of the way through the test, he has a 130 gain ratio with a 4.67 ADG compared to the average of the second test group at 3.60. That bull is Lot 334 at Midland.
- Payweight 037 has white on his sheath but is registration legal.
- He has a great phenotype. Dam is a good producer.

- These last few bulls to sell are younger with late March and early April birth dates. History tells us that they are some of the best buys in past sales; not everyone is turning out bulls to get January / February calves next year. Do you remember the "Polar Vortex" in mid February this year?!
- Ratioed 89 for BW, 102 for WW with 76 contemporaries.

- Recommended for heifers.
- This young Absolute bred bull ratioed 83 for BW and 103 for WW with 76 contemporaries.
- Top 10% for DMI (Dry Matter Intake) excelling in reduced feed inputs for efficiency.
- Data suggests he will do well at higher elevation conditions with top 10% PAP EPD (Pulmonary Artery Pressure) ; unlikely to develop Brisket Disease.

An Autumn Lunch

YEARLING BULLS

READ THIS MANUAL

Before he goes to pasture

On the surface, a bull isn't as complicated as the latest electronic gadget, but every year you expect Angus bulls to improve your calves.

Unpack the genetic potential in those bulls with an "owner's manual" of management and marketing tools that will help you get the most out of your new investment.

Updated with EPD recommendations for 2009, the manual is available online at www.CABpartners.com. For free copies by mail, call 800-225-2333, ext. 298.

Notes

Becca, Grant and Deanna Harrer

Thanks for coming to the sale!

**From our family to yours,
HAPPY EASTER and wishing
you a successful 2021!
Hope to see you back
again next year.**

SUGGESTED SALE TERMS AND CONDITIONS • AMERICAN ANGUS ASSOCIATION • February 21, 2014

UNLESS OTHERWISE EXPRESSLY STATED IN THESE SALE TERMS AND CONDITIONS OR ANY OTHER WRITTEN AGREEMENT BETWEEN THE PARTIES RELATING TO THE SALE OF ANGUS CATTLE UNDER THESE SALE TERMS AND CONDITIONS, SELLER MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EVEN IF SUCH PURPOSE IS KNOWN TO THE PARTIES. THE REMEDIES PROVIDED IN THESE SALE TERMS AND CONDITIONS ARE THE EXCLUSIVE REMEDIES OF THE BUYER, OR ANY PARTY CLAIMING THROUGH THE BUYER, AND UNDER NO CIRCUMSTANCES WILL THE SELLER BE LIABLE FOR ANY INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES UNDER ANY INDEMNITY PROVISION OR OTHERWISE.

Announcements

1. If there is any inconsistency in the terms of any sales materials, including sale books, supplement sheets or day-of-sale announcements, (i) the day-of-sale announcement will control over both the supplement sheet and the sale book, and (ii) the supplement sheet will control over the sale book.

Cash Sale

1. All sales are for cash unless satisfactory credit arrangements, including any possible reservation of security interest by the seller, have been made with the seller prior to sale.

Buyer's Risk at the Time of Sale

1. The risk of loss and injury of each animal passes to the buyer as soon as it is sold; however, it is the obligation of the seller to ensure that sold animals are fed and cared for free of charge to the buyer until loaded for shipment or until the expiration of 24 hours after the sale, whichever occurs sooner.

Identification Responsibilities

1. Prior to the sale, the seller must ensure that each animal has a readable permanent identification mark (e.g., tattoo, hot-iron brand or freeze brand) corresponding to its registration.
2. The buyer must check all permanent identification marks for accuracy upon possession and report any discrepancies or irregularities to the seller immediately.
3. In those cases where a nickname is used by the seller, the nickname must also be accompanied by the official registered name and number of the animal.

Certificates of Registration

1. A transferred certificate of registration must be furnished by the seller free of charge to the buyer for each animal within 45 days following the later of either the date of sale or upon the receipt of full payment.

Artificial Insemination (AI) Service Certificates

1. AI Service certificates will be the responsibility of the buyer unless otherwise specified by the seller.

GUARANTEES

Health

1. Unless otherwise announced, the seller guarantees that all animals are eligible for interstate shipment as required by applicable federal and state regulations.

Conformance with Registration

1. The seller guarantees that all sold animals are registered in accordance with the rules of the American Angus Association.
2. The seller guarantees to the buyer that all sold animals conform to the registration certificate as entered in the Herd Book of the American Angus Association.
3. The seller guarantees to the buyer that with respect to all females exposed to multiple service sires, each such service sire will have parentage markers on file with the American Angus Association. (As adopted February 21, 2014)

Pedigree, Performance and Genetic Information

1. The seller guarantees to the buyer that the pedigree, performance data and genetic information, as represented in any sales materials (including any sale book, supplement sheet or day-of-sale announcement), are accurate. The seller shall provide "as of" date for all information from the American Angus Association database.
2. The absence of any such designation on the pedigree of an animal, as set forth in any sales materials, does not establish that the animal in question is not a carrier of any such genetic factor.
3. In those cases where a commonly understood nickname is used by the seller, the seller guarantees the pedigree of the animal based on the commonly understood nickname.

Sex

1. Unless otherwise represented by the seller, there are no guarantees that offspring will be of a particular sex.

Breeding Guarantees

1. The seller guarantees that all animals are breeders, with the exception of: (a) calves under 12 months of age at the time of the sale; (b) animals shown after the sale has occurred (in such cases, the breeding guarantees, if any, will be those guarantees as are agreed upon between the seller and the buyer); (c) animals who suffer injury or disease following the sale; and (d) animals subjected to gross negligence by or willful misconduct on the part of the buyer.
2. The seller guarantees that all bulls are breeders for a period of 90 days following the initial turn out with buyer's herd, but only if such bulls are at least 12 months old at the time of sale and have not been allowed to run with the herd until at least 14 months of age. A bull that settles a cow by natural service and passes a fertility test performed by a competent veterinarian or reproductive technician mutually agreed upon by the buyer and the seller will be considered a breeder. Unless otherwise agreed by the buyer and the seller, the seller makes no guarantees with respect to the ability to freeze semen.
3. Cows with calves at their side are presumed to be breeders with no further fertility guarantee.
4. "Safe-in-calf" females are guaranteed by the seller to have been examined by a competent veterinarian or reproductive technician and determined to be safe-in-calf by examination or other proven method (e.g., ultrasound, pregnancy blood tests, and rectal palpation).
5. "Served" females are not guaranteed to be in calf.
6. "Pasture-bred" females have been exposed but are not guaranteed to be in calf.
7. "Open" females are guaranteed by the seller to be without calf.
8. Donor females:
 - a. Unless otherwise agreed by the buyer and the seller, a female that has been used in an embryo transfer program is not guaranteed to be a breeder after the date of the sale.
 - b. Unless otherwise agreed by the buyer and the seller, a female is not guaranteed to be a breeder after the date of the sale, when that female is to be used, or attempted to be used, in an embryo transfer program.
9. The seller makes the following guarantees with respect to all "pregnant recipients": (i) that the female is pregnant, (ii) that the resulting calf is of the pedigree represented, and (iii) that the resulting calf is of the sex represented (if so represented).

Semen

1. Unless otherwise agreed by the buyer and the seller, with respect to the sale of semen the seller makes no guarantees with respect to the performance or characteristics of such semen and the buyer is purchasing such semen "as is."

Embryos

1. Embryos being offered for sale will be sold "as is" unless the seller provides additional guarantees.

Privileges of Return or Adjustment: Options

1. With the exception of any applicable transportation expenses described herein, a seller shall never be liable to a buyer for an amount greater than the original selling price of any animal sold under these Sales Terms and Conditions.
2. Unless otherwise stated, all claims for adjustment or refund must be made in writing to the seller within 180 days following the sale of the animal in question.
3. If an animal is claimed to be a non-breeder, the animal may be returned to the seller if it is in good condition and complies with the health requirements of the seller's state. At the option of the buyer, the seller may issue a credit to the buyer for use in a future purchase or provide an animal of equal value subject to the approval of buyer. If the buyer exercises either such option, the claim shall be deemed fully and satisfactorily resolved. However, in the event that the buyer requests a refund of the purchase price, the seller may, at its option, either issue a refund of the full purchase price or, shall have 180 days from the date the animal is returned to the seller's farm to conduct a trial to demonstrate the returned animal is a breeder. Refund of the full purchase price or demonstrated proof that the animal is a breeder during the test trial shall be deemed full satisfaction and settlement of the claim.

Any expense incurred for transporting an animal claimed to be a non-breeder will be the responsibility of the buyer, except that the seller will be responsible for transportation costs in excess of the distance between the buyer's farm and the location where the sale took place. If the seller proves the animal to be a breeder, it will be the obligation of the buyer to take delivery of the animal and pay all transportation expenses.

4. If a female sold as "safe in calf" proves not to be in calf, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be made in writing to the seller on or before the first anniversary of the date of the sale.
5. If a female represented as "safe in calf" to a certain bull at the time of sale proves to have been bred to a different bull, the seller must make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be made in writing to the seller on or before the first anniversary of the date of sale.
6. If a female sold as "open" proves to be with calf, the buyer may return the animal to the farm of the seller prior to calving for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer. The Seller is responsible for all transportation expenses.
7. White skin or hair must not be painted or altered. If such painting or alteration has occurred, the buyer may return the animal to the farm of the seller for a refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer.
8. If an animal is sold and subsequently becomes ineligible for registration under the rules of the American Angus Association for reasons other than incorrect parentage, the seller must make a satisfactory adjustment on the purchase price to the buyer, or at the option of the buyer, refund the purchase price upon the return of the animal to the farm of the seller.
9. If an animal (including the offspring of a pregnant recipient) is sold and through parentage verification is proven to have incorrect parentage, as represented by the animal's certificate of registration, and for which correct parentage can be determined, the seller is obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be made in writing to the seller on or before the second anniversary of the date of the sale.
10. If the resulting calf of a pregnancy is not of the sex represented at the time of the sale, the seller is obligated to make a satisfactory adjustment on the purchase price to the buyer or, at the buyer's option, refund the purchase price upon the return of the animal to the farm of the seller. Any claim for adjustment or refund under this paragraph must be made in writing to the seller on or before the first anniversary date of the sale.
11. Unless stated otherwise, all transportation expenses incurred will be the responsibility of the buyer, except that the seller will be responsible for transportation costs in excess of the distance between the buyer's farm and the location where the sale took place.

Disclosure or Retention of Genetic Materials

1. If seller retains any genetic materials of an animal being sold that can be used for cloning, the seller must disclose such fact to any potential buyers prior to the sale.

GENETIC CONDITIONS: REQUIRED DISCLOSURES RELATING TO CERTAIN TEST RESULTS OR POTENTIAL CARRIER STATUS OF AN ANIMAL.

1. In advance of any sales of an animal, the seller shall have the affirmative duty to notify any potential buyer of (1) any test results in which an animal for sale has tested positive (under a test and at a laboratory approved by the American Angus Association) as a carrier of any genetic conditions recognized by the American Angus Association, and (2) whether the animal has a potential carrier designation on its pedigree for any genetic condition that is recognized by the American Angus Association.

Optional Guarantee: Genetic Conditions

1. The buyer and seller may determine the scope and duration of a guarantee, if any, on an individual basis. The seller may, but is not required, to provide a guarantee to the buyer relating to genetic conditions.
2. Nothing contained herein should be construed to relieve the parties from complying fully with all the rules and policies of the Association relating to genetic conditions generally or individually.

MISCELLANEOUS

1. The above terms and conditions of sale constitute a contract between the buyer and the seller of each animal and are equally binding upon both parties. Each sale or resale of an animal constitutes a separate transaction.
2. Neither the American Angus Association nor any director, officer, employee or representative of the Association or any of its related entities assumes any liability, legal or otherwise, in connection with any sale or transaction conducted under the terms of the Suggested Sales Terms and Conditions. Nor shall the American Angus Association, its directors, officers, employees or representatives assume any liability or be responsible in any way for enforcing the terms and conditions of any agreement between buyer and seller.
3. Neither the sponsor or sponsors, the sale manager, nor any other person connected with the management of the sale, assumes any liability, legal or otherwise.
4. These sale terms and conditions and all rights, obligations and duties arising hereunder and all disputes arising hereunder will be construed in accordance with, and governed by, the laws of the state in which the sale of the animal or animals occurs, without giving effect to such state's choice of law rules.
