GE-EPD Real-time Auctions

Dear Friends,

Welcome to our 19th Annual joint sale of Heart River Ranch and Open A Angus. I had to read last year's letter to get perspective because no doubt 2021 has been nothing but a constant "unbelievable" series of events which are far from what one would have ever expected, whether it be political, weather or otherwise. It is hard to believe how the course of this past year has transpired into "lost ground". One can only pray and trust in faith that better days are ahead to correct the lost ground this country has suffered. I believe we need to be active in standing up for what is right and just – at whatever level of local or regional governance you can and if one isn't able to do that, support those who do. Enough said, but don't give up, we cannot give up our constitutional rights and the foundations that have made this country great.

The cattle market is showing signs of improvement driven by consumption and inventor albeit – there are fights to be fought there as well. Hopefully there will be some reprieve from the drought situation as some areas have seen some improvement already. Our hope is that the cattle we are presenting will put you in a position to manage resources efficiently and retain longevity in your herd which by far has the greatest economic impact in a beef herd.

We are grateful for the interest and patronage in both of our programs, and we stand ready to assist you in any way we can in future selections or in sharing what experiences we have had in managing resources on our ranches and how these genetics integrate in that management.

As always you are welcome to view the bulls at any time at the development lot just three miles south of Belfield on HWY 85, turn west on 40th St SW and continue until you are at the top of the hill. Additional information will be provided and posted online as sale day approaches and as data is collected at [www.openaangus.com](http://www.openaangus.com) and [www.heartrivergenetics.com](http://www.heartrivergenetics.com). Carcass ultrasound data, videos and updated EPDs will be provided as they are made available.

We will have a program on Tuesday afternoon at 3:00 PM MST. Dennis Froemke will be speaking on range grazing plans and managing for moisture. Dennis is a retired SCS specialist and now owns his own company. We will also have a prime rib dinner Tuesday evening as we have previously with a short program. Come early to inspect the bulls and be ready to learn a little and relax a lot. Thank you again for your loyalty and support of our programs.

## Internet and Absentee Bids

We would prefer to visit with our customers in person but realize that not everyone can be at the sale; therefore, we have made arrangements to bid through telephone or internet. Bids will be handled in strict confidence by any of the publication representatives or the respective ranches. If you would like to discuss the sale offering call preferably several days before the sale, and we can help select your genetics. Keep in mind that we are sure that we have a bull that will fit your needs. After the sale you will need to contact Annette at 701-575-8145 or 701-290-9745 to make arrangements for payment of telephone purchases.

## Storm Date

In case of postponement please listen to the Northern Ag Network, KLTC 1460 AM or go to [northernag.net](http://northernag.net), [ndstockmen.org](http://ndstockmen.org), [heartrivergenetics.com](http://heartrivergenetics.com) or [openaangus.com](http://openaangus.com) for any postponement announcement. Postponement sale date is set for pre-sale activities: March 10, 2022 6:00 pm and sale March 11, 2022, 1:00 pm.

## Transportation

Belfield, ND and Dickinson, ND are both served by bus. Dickinson, ND is also served by United, Delta and Frontier Airlines. Please call 701-290-9745 if you need transportation from the bus or airport.

## Lodging

Lodging is available in Belfield, ND.

## Announcements

Errors discovered in the catalog will be corrected by announcements from the auction block at sale time and such corrections will take precedence over the printed matter in the catalog.

## Liability

All persons who attend the sale do so at their own risk. Neither the owners, management, sales staff, facility or any person connected with this sale assume liability, legal nor otherwise, for property loss or for any accidents that may occur.

### Delivery

Free Delivery to central points up to 500 miles. Balance will be at cost. We will make every effort to assist in deliveries of greater distance or by private arrangements and volume purchases. Delivery will be made at our convenience and efforts will be made to have bulls delivered by April 1.

### Feeding and Development of Bulls

All bulls of Heart River Ranch were weaned in September and the Open A bulls were weaned in late October. The bulls did not receive creep feed except for a few Open A bulls that were ET calves produced at a recipient herd. Calves received their pre-weaning and weaning vaccinations and were handled in every respect as all natural. Bulls were fed to gain 3 lb. per head per day on a 1% grain and by product rotation. Bulls were fed free choice mineral, salt, and hay. We took yearling weights at approximately 105 to 120 days post weaning with no post weaning adjustment period or warm up period. Our intent is to grow out the bulls for maximum longevity and integrity of the bull.

### Historic Photos

Most of the historic photos in this catalog were taken by Inez Kessler, Annette's great grandmother between 1905 and 1908 in the Gaylord, ND area. Inez was the only person to have a camera in the area and as a result she took pictures of many people and events. The town of Gaylord was located about 13 miles south of Belfield, ND along US Highway 85. The Gaylord Post Office and store was a stop for travelers going south. This building still stands at the Curt Molm+ place.

### Sale Terms & Conditions

The terms of the sale are cash. No release will be given until satisfactory settlement has been made. All settlements will be made with the clerks of the sale immediately after the sale. We reserve the right to withhold animals from shipment for whom payments have not been received prior to departure date. Every animal sells to the highest bidder and in cases of disputes, the auctioneer's decision will be final. All Sales are subject to an acceptable semen examination. Semen evaluation certificates will be furnished to the buyer at delivery.

Bulls will be carcass ultra sounded on approximately February 25.

Updated EPD information, carcass ultrasound, and genomic data will be provided at the sale and available at [www.heartrivergenetics.com](http://www.heartrivergenetics.com) or [www.openaangus.com](http://www.openaangus.com). This information will be available as soon as it is received from the Red Angus Association of America or the American Angus Association.

All bulls have been tested using the Zoetis HD50k genomic test or Geneseek HD genomic test and parent verified. All bulls sold will be DNA tested free of any known genetic defects.

Health certificates and brand releases will be furnished for shipment anywhere in the United States.

Each animal carries a readable tattoo or freeze brand.

### Insurance

Ownership risk to purchaser commences when the auctioneer's hammer falls. Insurance will be available sale day. It is recommended that buyers insure their purchases for safe delivery. Purchaser assumes the risk of death or injury to their livestock immediately after the sale.

### Heart River Ranch and Open A Angus

#### Loss of Use Policy

2022 optional loss of use policy: Heart River Ranch and Open A Angus are striving to offer the best options not only in beef animal genetics but also loss of use protection for bulls and/or females we offer to our customers. We strongly recommend that our buyers purchase insurance on their animals. Animals that will be fed for an extended period need to have insurance on them.

Heart River Ranch/Open A Angus will pay 4% of sale price toward the insurance policy. The balance of the policy will be paid by the customer. If the customer chooses to decline the policy, Heart River Ranch or Open A Angus has no obligation to cover any losses due to injury, sickness or death. Heart River Ranch/Open A Angus does guarantee all cattle to be sound the day of the sale. All bulls will be semen tested by the Wibaux Vet Clinic in March/April 2022.

**Breeder's Guarantee:** All bulls are guaranteed to be breeders. All claims for adjustment or refund must be made in writing within six months of the sale date. In the event a bull is claimed to be a non-breeder, the purchaser may return the animal to the ranch of the seller if in good condition and complying with the health requirements of the seller's state. The seller will be entitled to six months trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months, the seller shall be obligated to replace the animal with another of equal value or to refund the purchase price. The return of the full purchase price shall in any case be deemed full satisfaction and settlement. If the seller proved the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal at the purchaser's expense.

**Implied warranty:** Except for those stated in the terms and conditions, there are no warranties, either expressed or implied, as to merchantability or fitness for a particular purpose with respect to the cattle being sold in this auction. The warranties set forth in the terms and condition are in lieu of all other warranties, either expressed or implied and the remedies provided shall be the sole and exclusive remedy of the buyer, or any party claiming through the buyer for any breach of warranty or guarantee therein provided and all obligations or liabilities.

#### Health

Bulls and heifers were treated with Enforce at birth, branding, weaning and were calf hood vaccinated with 4-way and 7-way. At weaning, calves were given a 5-way, 7-way and One Shot, boosters were also given. Calves and cows were poured with Dectomax in the spring, fall and late winter. All bulls will be vaccinated with Preg Guard and wormed prior to delivery. All females are bangs vaccinated and on a fall vaccination program.

**Semen Tests:** Bulls will be semen tested after the sale.

#### Semen Interests:

Heart River Ranch and Open A Angus are each respectively retaining 50 percent revenue-sharing semen interest in every bull selling in this sale. Full possession and full salvage value sells on all bulls. If a buyer chooses to collect and market semen, the seller will share proportionately in the collection costs and revenues earned. If the seller chooses to collect semen for "in herd" use, it will be done at the seller's expense and at buyer convenience. Semen will be made available to buyer at cost.

#### Volume Discounts

We are pleased to give a volume buyer discount. You will receive 5% off purchases of 5 to 9 bulls, and 10% off of 10 or more bulls. Please notify the clerk when you check out to receive your discount. This is another way to say "Thank You" for your trust in our program.

# A-BAG-A-BULL

If you purchase a bull from us, we will provide you with credit equal to the value of one bag of Feeder Calf Certification Program or Allied Access tags for each bull you purchase. To redeem your credit, bring your receipt for the tags to next year's sale and we will apply it to your bull purchase.

The FCCP provides age, source and genetic verification for calves sired by registered Red Angus bulls. Cattle enrolled in the FCCP are accepted into the exclusive Choice+ and G.O. Red grids. The FCCP 'yellow tags' are recognized by buyers nationwide and return a premium for Red Angus calves enrolled in the program.

The Allied Access program provides age and source verification for commercial cattlemen whose bull battery does not exclusively contain registered Red Angus bulls. Whether you are utilizing multiple sire breeds or halfblood bulls, enrolling in Allied Access demonstrates to buyers that you are taking an extra step in marketing your calves and adding value throughout the production chain.

To enroll in the FCCP or Allied Access, contact the Red Angus marketing department. Enrollment is simple and free of charge.

## **DVAuction** *Broadcasting Real-Time Auctions*

Watch and Bid Online at [DVAuction.com](http://DVAuction.com)

Can't make the sale?

We are pleased to bring you real-time internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at [www.dvauction.com](http://www.dvauction.com)
- Click on the "Creat New Account" tab
- Enter a user name, password and your contact information.
- Complete the Banking Information. (If you are only interested in viewing you can skip this section)
- Select your Time Zone, Accept the Terms and Conditions and click "Create Account"
- Complete the process by answering a few questions, selecting your subscription choices
- Click on "Apply for Bidding" in the upper left corner of your screen to select the sales you wish to bid on
- Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.
- If you would prefer to be approved using your credit card, call (402) 316-5460.
- Please be sure to apply for bidding at least a day in advance of the sale-every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

**Please Note:** High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 316-5460 or email [support@dvauction.com](mailto:support@dvauction.com).

**Proxy Bidding:** If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Red RMJ Redman 1T was used in our ET program over 10 years ago. When Red Minburn Copenhagen 3Y surfaced, we traced the pedigree and then the Redman daughters in our herd and found them to be the kind that were easy to look at and very productive. One of his 10-year-old daughters in our herd will likely go into our ET program when her time comes.

## RED ANGUS GUIDE TO EPDS

RedAngus.org

**ProS**..... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB**..... HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM**..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED**..... Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW**..... Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW**..... Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW**..... Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG**..... Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI**..... Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK**..... Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**ME**..... Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

**HPG**..... Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM**..... Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY**..... Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB**..... Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG**..... Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW**..... Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA**..... Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT**..... Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)

### AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

**Expected Progeny Difference (EPD)**, is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

**Accuracy (ACC)**, is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Yearling Weight (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

**Scrotal Circumference (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

#### MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

#### MANAGEMENT

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

**Claw Set (Claw)**, is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

**Foot Angle (Angle)**, is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth.

**Pulmonary arterial pressure EPD (PAP)**, is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

#### CARCASS

**Carcass Weight (CW)**, expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling (Marb)**, is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

#### VALUE INDEXES

**SValue Indexes**, reported in dollars per head, are multi-trait economic selection indexes where a higher value suggests more profit when comparing two individuals.

**Maternal Weaned Calf Value (SM)**, expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving docility, foot structure and fertility while maintaining weaning weights consistent with current production.

**Weaned Calf Value (SW)**, expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

**Cow Energy Value (SEN)**, is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

**Feedlot Value (SF)**, expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

**Grid Value (SG)**, expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (SB)**, expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

**Combined Value (SC)**, an index, expressed in dollars per head, includes all traits that make up both SM and SB with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

# CARY HANDE

Our good friend ... rest in peace.  
 May 24, 1951 to January 21, 2022

OH LORD, NO MAN-MADE PORTALS SHOW YOUR REALM TO ME,  
 I SEE IT IN MY LIFE IN SPACES WIDE.

WHERE TOWERING MOUNTAINS REAR THEIR HEAD IN TRIBUTE,  
 BEYOND THE QUIET PEACEFUL COUNTRYSIDE.

IT'S HERE I SEE THE WONDERS OF CREATION,  
 FROM BUD TO LEAF, FROM TWIG TO STATELY TREE.  
 THE GROWTH OF THINGS FROM HUMBLEST BEGINNING,  
 CAN ONLY HELP INSTILL HUMILITY.

THE BALANCE OF THE POWERS YOU CREATED,  
 THE TUMBLING STREAM CONTAINED BY QUIET LAKE,  
 THE GENTLE BREEZE THAT'S ALL THERE IS REMAINING,  
 OF HIGH, WILD WINDS THE MOUNTAINS TURN AND BRAKE.

PLEASE HELP ME FIND THE TRAIL THAT WEARS YOUR BLAZES,  
 AND GUIDE ME 'TILL THE CLOUDS OF TROUBLE PASS.  
 MAKE ME AS BIG AS MOUNTAINS HIGH ABOVE ME,  
 YET HUMBLE AS THE SMALLEST BLADE OF GRASS.

JUST LET ME BE AS HONEST AS MY PONY,  
 AND LEAD A STRING FOR CAMPS ALONG THE WAY,  
 TO HELP OUT THOSE WHO MAY NOT HAVE AN OUTFIT,  
 SO ALL WHO CAN MAY REACH THE PASS SOMEDAY.

POEM BY C.B RICH

**HRR BLOCKANA 013**  
Dam to Lots 1-9

*HRR Blockana 013 originates from the infamous Blockana cow family from Feddes Red Angus. Her legacy will be her calving ease, maternal strength, longevity, and an udder structure that held true through the years while being passed on to her daughters. HRR Blockana 013 was a prolific embryo producer and there will be more offspring to come. Phenotypically sound footed, straight topped with a big barrel, she epitomizes the kind of cow that could hold her own in the less than forgiving pine hills of Northwestern SD. She posts a 90 BW, 104 WW, 104 YW, 116 IMF, 106 REA and a 104 MPPA. There are 5 consecutive generations of dams represented here with an MPPAs over 101. Here is an opportunity to advance your cow herd with sons sired by some of the top maternal bulls in the breed and a foundation cow family.*

*HRR ZEPPELIN 1208 is the last natural calf out of HRR Blockana 013, one of our favorite donor cows. His phenotypic outline is hard to miss with his added length, straight top, deep rib and overall muscle. I don't know if we have raised one as complete as HRR ZEPPELIN 1208. His dam was badly injured last spring so she came home and was put into our ET program. This calf consequently was taken out of the contemporary group given the change in environment – but HRR Blockana 013, given her injury, did a heck of a job raising this calf. He continued to develop well post weaning as well with a 2.96 ADG. This is a moderate-framed bull that should add style and length into his offspring and pass on the maternal value of his dam. High marks in the EPDs for Herdbuilder, milk and stay. Herd Bull Prospect.*

*HRR Traveler 1222 is one of the highest performing bulls in the offering out of the proven Ridge Traveler 5412 bull. If you need more growth to sire a top set of steers, this would be a good option. An added plus is that he goes back to the Blockana cow family that has been a foundation line in our herd. His dam, HRR Blockana 741 is long, deep, and great footed with a correct udder. Herd bull potential with a maternal power dam behind him.*

*HRR Traveler 1232 is a moderate growth bull out of a good cow, HRR Firefly 240. Nothing earth shattering here unless you like a 10-year-old cow with a 92 BW and 99 WW, 99 YW ratios with a great udder and good feet. His dam consistently brings calves to the pay window and is bred AI for 2022. She is one of the reasons we dug up some semen on her sire, Ridge Julian S005-0099 to breed to in the 2022 breeding season even though he would now be 12 years old. This dam crossed well with Ridge Traveler 5412 and should make some really good females with excellent udders.*

*HRR Express 1216 is a great dispositioned bull that is complete in his type and kind. He is out of the sire that is the foundation to most of our young cows, MLK CRK Express 9127. Despite his sire being 13 years old, this bull holds his own and starts with a 87 BW ratio and goes to a 107 WW. Following the form of MLK CRK Express 9127 who has a moderate mature weight, HRR Express 1216 moderates to a 101 YW ratio. You will find him when you look at the bulls. The MLK CRK Express 9127 daughters don't go out of style.*

## HRR COLLEEN 308

Dam to Lots 40-42

*HRR Colleen 308 found her way to the donor pen after producing some high performing sons right from the get-go and did it with a moderate frame and birth weight. She has a 16-point spread between her BW and WW ratios. An excellent uddered cow that possess the kind of efficiency you need on the western plains. These ET calves should provide calving ease, moderation and maternal.*

*What a looker! Open A 783E Rear End J1336 is one bull that is easy on the eyes from his smooth and symmetrical front one third, to his level and wide top, and down to the square and wide foundation he stands on. His exceptional dam, OCC Dixie Erica 783E is clean fronted and displays added rib shape and fleshing ability. The combination of her and OCC Rear End 751R really worked here.*

Here is one bull you really have to appreciate for what he brings to the table. Open A A3156 Beast J1057 is deep sided, heavy muscled, and very stylish through his front one third. He definitely follows the phenotype of his sire, OCC Beast 709B who consistently stamps his progeny of which this bull is no exception.

Open A A3123 Jarvis J1051 is a really stout featured bull that really tracks wide and square and carries this width over his top and into a square hip, that is also very extended from end to end. This bull is out of Open A Z2236 Wart D330 who is a powerhouse cleanup bull out of the foundation Krystle cow line. His dam, Open A Pride Ruby A3123 is part of the Pride Ruby foundation cow line at Open A. These are soggy easy fleshing cows that hold their own in the rugged badlands.

Open A C115 Deadline J1191 is a powerhouse, stout-framed bull that is very three dimensional in his muscle pattern. He offers a substantial amount of depth, one that is built to sire those easy doing type of cattle. Not sure how this bull ended up toward the

end of the sale order. He comes from a cow with a lot of dimension and volume, Open A Krystle C155. She is a granddaughter of SSAFE General Sully 167 who was a powerhouse bull. Sully is also the grandsire of the massive lot 47 black-red carrier 2-year-old bull, HRR General Franchise 0332 that is offered in the Red portion of this sale. Combine the muscle of the bottom side of this pedigree with the efficiency and moderation of the top side through OCC Deadline 775D and you have a mating that really worked.

## Home On The Range Program

For the 13th year in a row, Home On The Range is participating in the embryo transfer program. Home On The Range has entered into a contract with Open A Angus (Jim Arthaud) and Heart River Genetics (Annette Steffan). The staff and children bring in the cows, implant the CIDRs (a progesterone impregnated devise), inject GnRH (gonadotropin hormone), remove the CIDRs and, finally, the embryologist transfers the frozen embryo into the cow.

The children are a little apprehensive at first, never really being around cattle and such a procedure, but once they get comfortable and know what their job is, they take responsibility. They put in ear tags and even learn how to palpate the cow later to see if she is pregnant.

It is a great program for Home On The Range and teaching children about cattle and animal reproduction and we enjoy being a part of it!
