OCT 30 - NOV 1

CATTLE WITH  
*Maternal  
Performance*

GENETICS WITH  
*Maternal  
Integrity*

## HELLO FELLOW ANGUS ENTHUSIASTS

It is with great pleasure that we are to the point in our herd building that we can offer a small group of our registered cows and heifer calves. A lot of these cows have had bulls that have sold in our past sales and have produced daughters that will stay here and keep the cow family going. We are very proud of our cattle and the stance we taken to produce cattle that have Maternal Performance and genetics with Maternal Integrity. In a numbers driven world we have stayed the course to produce cattle that are first and foremost fertile, sound, strong uddered and produce calves that have adequate growth and can survive well into their teens. And all of this on a very limited input environment. Last year our mature cows average weight was 1266lbs and our steer calves averaged 665. I believe that is enough growth and the next challenge is to maintain it.

The cattle that we are selling this year represent a cross section of every cow family that we have here on the ranch. It was extremely tough to pick and choose which ones to sell and that customers would like to own. Several of these cows have been flushed in the past or could easily be of that quality in the future.

I will admit that I am a pedigree junky and it shows throughout all of our cows pedigree. We only use bulls that are very proven, and I take the time to find cattle sired by these proven bulls to assure that they are what we require. Numbers have absolutely no importance to us here. Not one single EPD is of any value and will never dictate what is used here. Our eye and countless hours of driving around looking at cows has a far greater accuracy than any EPD can ever give us. I have dabbled in a few of the latest and greatest to find out where we stand, and it never helped us at any point. The fact is that they fell out faster than any sire we have ever used. Not to mention in my opinion wrecked the pedigree all to hell.

The sale cattle have not had one single minute of extra time in them to make them look more pleasing. They have not been clipped, sprayed or drenched in show oils or washed. They have not received one extra pound of any supplement and have only had grass to get into shape for sale and winter. They were preg checked on a Friday and videoed on Saturday morning. I just don't see the need to do any of this.

Please take the time to look over the sale offering and if you have any questions please do not hesitate to call or email. I would be happy to answer any questions that you may have. Also follow us on Facebook as a lot of our sale cows and ranch info are available there as well.

## TRUCKING ARRANGEMENTS

Arrangements have been made with Gary Bichsel (1-406-855-0334) to deliver the sale cattle at new owners expense to a central meeting point near you. Approximately 3 weeks after the sale and when cattle have been settled on. Gary will pick up all females here at the ranch and begin delivery of all females. Unless other arrangements have been made with us, all animals will leave that day. I have used Gary for years and he has done an excellent job of taking care of the animals and getting them to me in a very timely manner.

## VIDEOS

This year myself and my sons took all the videos. I must apologize and admit that I stink at it. I will keep away from the video camera for next year.

We used Honcho AI this year because of his massive depth of body, muscle shape and fleshing ability. As well as an extremely good pedigree and light birth weight. He resembles OCC Cortez in lots of ways phenotypically. We are excited to get the Honcho calves on the ground this spring.

Best Yet comes to us strictly by the recommendation from Tim Ohlde at OCC. We were looking to use a son of OCC Great Plains this spring and it just happened that he was no longer available. We wanted to add just a slight amount of stretch and size to some of our cows. Tim had been sending me pictures of Best Yet for the past couple years and so I knew he had a lot of faith and confidence in the bull. I have heard great reports on Best Yet since this spring and can't wait to see these calves.

HBR Encore 6143

6143 was a bull that I was the contending bidder on when he sold at auction. I asked the buyer when he was done with him to give me a call. Three years later I got the call and I immediately went and picked him up. The picture we have on this sire was taken the day I picked him up and trailered him to Hawkeye to get collected. An entire book could be written on the cow lines both top and bottom of this bulls pedigree. He was the most sex driven bull I have ever been around. He walked the pasture all day long bugling away. Winter, Spring, Summer or Fall no matter when he wanted cows and his sons exhibit the same characteristics as well. The daughters are fantastic and have done a great job of keeping in the middle of the road. And now that they are 5-6-7 year old cows they are very hard to beat. There was a lot of contention amongst certain breeders that I owned the bull and hence the name. This bull will leave you females that last and last.

BAA Classic of JBob 442

I can't say enough good about the Classic bull. His pedigree is outstanding, his phenotype is impeccable and backed by the best cow to ever walk the ranch says it all. During pasture tours this summer his heifer calves were admired by everyone. He saw a lot of use this summer as he cleaned up 80 head. Mostly all of his half-sisters and even his full sisters. I am looking to find a bull out of him and his very closely related herd mates. To keep Juanada alive and up close for years to come. One of this years top calves is out of Classics full sister and OCC Missing Link. He is a STUD. Proudly Co-owned with Travis Krein of Harrison Nebraska. Semen available.

OCC Cortez 819C

I purchased Cortez in Partnership with Ray Gardner, Kenny Lee and Bryan Pike from OCC where he was the second highest selling bull of the day. Cortez has proven to be a great bull. He carries a massive amount of rib and fleshing ability in his calves that is second to none here. His bulls grew like crazy at the feedlot this spring and scanned phenomenally as well. The daughters show a great deal of broodiness and length of neck and spine. Exactly what we were looking for. Not one single Cortez daughter came up open this year and they are coming into winter in better shape than I have ever had coming 2's come in as. There is a strong chance that he may get AI'd to 150 head of our cows next year. Semen available.

*JBob Genetic Rustler 440*

An outstanding representation of his sire and carries with him the same sex drive characteristics of his father as well. He is constantly herding his cows and never letting them out of his site. I have never seen him sitting around the water and waiting for something to do. His calves display a great deal of their sire's family traits phenotypically as well. We used this bull very hard this year. His mother is a superstar in our herd, and we have used 3 bulls out of her. One is the sire to several heifers selling in the sale.

*OCC Legacy 839L*

Solitude was offered for sale in our spring sale at a very high base price with no takers. 10 days later I was offered 1.5 times the money and I turned it down. Very happy with our decision. He is sired by the female making legend, OCC Legacy and out my very favorite cow 1650 who is an Emulation 5522 daughter out of Juanada 1450. He cleaned up 25 cows for us this year and most of them being the 2016 and a few 2018 model cows. We pulled him out and he was hardly recognizable. He had grown into a massive meat machine and we are taking him to collection this fall.

*Dam of CFC Cornerstone M71*

Cornerstone came to us as the High selling bull of the Stockmans Source bull sale in Nebraska. Cornerstone is sired by CCA Emblazon 702 who is making his name as a cow making fool. And his mother is McCumber Miss Wix 2022 who has several bulls working in purebred herds all across the country. Probably the most notable son resides at Redland Angus in Wyoming. Cornerstone should be calving ease and was purchased to cover all of our OCC Cortez, OCC Big Time and other OCC influenced females. We bought him as a 18 month old bull and the breeders who raised him used him AI in there fall program. The reports are all very good on his calves. Long bodied and coming very nicely out of heifers. We have sold a fair amount of semen on the bull and semen is available. Proudly co-owned with Ryan Neiman and Travis Christman.

*Sinclair Emulation 5522XP*

822 was the high selling bull of our 2019 spring sale. Purchased by Jason Rinas from Canada. Jason calves much later than us so we were fortunate enough to use 822 for about 35 days on our yearling heifers. 822 packs a huge hip and long neck and spine. Sired by Emulation 5522 XP and out of a very fancy high production daughter of OCC Jetstream and back out of a Emulation 31 daughter from none other than Juanada 1450. I had a hard time letting him sell but was blessed with a full brother this spring who is also outstanding and probably will never leave the ranch.

## CATTLE FACTS

As I sit here and type away on the computer, we are smack dab in the middle of a nasty fall winter blizzard. I will not deny that I am concerned about my cattle and wish that they were closer to home. But the fact is that these cattle are not pampered. They have lots of grass, lots of cover and most importantly have been through this before and learned from it. I knew that the last thing I needed to go do was to go roll out a bunch of hay for them. This is a herd of great range adaptable cattle. Made to make it in our ranch environment or get shipped off.

Now a few days later I am traveling down the road for work 250 miles south of home. There are cattle along side the road and out in the hills. And in many places, you can see cattle lined up eating as the tractor and processor has just left the field. In most cases I can visually see lots and lots of grass and Alfalfa sticking out more than 8-10 inches out of the 3-5 inches of snow. I am not saying that they are wrong, and I am right. I am just saying that cattle should be smart and tough enough to rustle up their food. It's actually a very simple concept ruined by human interaction.

**Reference sire Solitude and  
his mother in August of 2018.**

## HOW THE AUCTION WORKS

**AUCTION OPENS FOR BIDDING WEDNESDAY OCTOBER 30 AT 8:00 A.M. MST. AUCTION WILL CLOSE IN A STAGGERED FORMAT.**

### SALE ORDER AND CLOSEOUT

Auction starts closing at **6:00 pm MST on Friday November 1**. There will be 3 minutes between the closing of each lot. If additional bids come in during the last 3 minutes, 1 minute will be added to that lot, and the lots following will be pushed back. Refresh your page often by pushing Control & F5 at the same time. You may have to press it many times as a lot is closing to see the most current bid.

### HOW TO REGISTER AS A BIDDER

1. Go to [www.edjeauctions.com](http://www.edjeauctions.com).
2. Click on the Hould Angus Sale, then click on "Register to bid".
3. Enter your contact information. Please remember your username and password for future use.
4. When you have been approved by the auction manager, you will re-ceive an email containing your bidding number. Please allow up to 24 hours to receive your bidding number.

**Even if you have participated in an Edje auction before, you must get approved as a bidder for this auction.**

**\*\*If you registered as a bidder for the Hould Angus Sale before or for any other Edje auctions, you should login at the top of the page in the green box (if you remember your username and password). Then click on "Register to bid" under the Hould Angus Sale. A new page will open that shows all of your contact information as you entered it the last time you registered. Confirm this information is correct and click submit.\*\***

### LOGIN TO THE AUCTION

Once you receive the email containing your bidder number; you may login to the auction. When the bidding for the auction is open you will have the opportunity to enter your bid or your proxy bid for each item. Other bidders, the seller or the auction manager will not be able to see your maximum proxy bids.

### PLACING A BID

**Do not place a bid on more bulls than you are willing to buy—once a bid is placed it cannot be removed.**

• **Manual Bids - Single Bid Button:** Click on the BID button pertaining to the lot that interests you. The single bid button indicates what the next bid needs to be in order to get "IN". Bidding will be set at increment amounts. **DO NOT HIT THE BID BUTTON REPEATEDLY** or you may actually stall your bid placement! Or you may place a higher bid than you need to. Click only once to place bid, your bid will be visible the next time your page refreshes.

• **Automatic Bidding (setting a proxy bid):** With Automatic Bidding, you can enter your maximum bid, then sit back and watch. When you set an Automatic Bid amount, the auction automatically bids on your behalf up to your maximum bid. If the lot ends for less than your maximum, that's all you'll have to pay. This means you don't have to keep coming back to re-bid every time another bid is placed. **Here's how it works:** When you set your high limit bid, you type in the maximum amount you are willing to pay for the lot. **Your maximum amount is kept confidential from other bidders, the seller, and the auction manager.** EDJE Auctions compares your bid to those of the other registered bidders --- the system automatically places bids on your behalf, using only as much of your bid as is necessary to maintain your high bid position. The system will bid only up to your maximum amount as necessary to maintain you as the high bidder. If another bidder has a higher maximum, you'll be outbid. BUT, if no other bidder has a higher maximum, you win the lot. And you could pay significantly less than your maximum price!

**Internet Auction**

"Our goal is to make the internet auction as easy as we can for both the seller and the buyer."

Easy as 1 ~ 2 ~ 3  
Go to [www.edjeauctions.com](http://www.edjeauctions.com) . . .

1. Click on the auction you want to bid on
2. Pre-register for your buyer number
3. Receive your buyer number in an email.

You can start bidding as soon as the auction opens.

Need help?  
Got questions?

This is one of several daughters that we have on the ranch out of our Juanda 1450. She has had several sons in the past sell for us and we are retaining 5522, Classic and Cortez females out of her for our future. She is a very productive high volume cow that has a flawless udder. Selling this female as well as her full sister pains me greatly. She will make her new owner very happy. Also take note that her full flush sister sells as lot 2. AI Bred to Duff Honcho 426 on 5-31-19 pasture with JBob Classic 442 from 6-8-19 to 8-3-19.

Full sister to the Lot 1 cow. This cow I purchased from the FairView ranch dispersal. Kenny Lee from the FairView leased the Juanada 1450 cow from me on an embryo share partnership. This is a very beautiful female with a great record as well. Her daughter by OCC Jetstream produced an outstanding OCC Cortez bull calf in last year's sale that sold to Kendrick Redland. We will retain her Jetstream and Classic females to keep the family going here. Again this is a very strong cow and cow family for us and this is very painful to let go. Help yourself AI Bred to Duff Honcho 426 on 5-31-19 pasture with JBob Classic 442 6-8-19 to 8-3-19.

<b>+9</b>	<b>+4</b>	<b>+25</b>	<b>+41</b>	<b>+24</b>	<b>+14</b>

Another great young cow that we purchased out of the FairVeiw dispersion as well. She is a daughter out of the Lot 2 cow and is super feminine and great uddered. Sired by the Redland Ranger bull that topped the dispersal selling to Gaugler Angus in Judith Gap. AI Bred to OCC Best Yet and pasture with JBob Genetic Rustler 440 6-8-19 to 8-3-19.

Take a close look at this cows pedigree. She is double bred to Juanada 1450 from a half brother half sister mating. I have lots of these double and triple cross Juanada cows and they make great females. Her mother was one of 1450 natural calves by 5522 and she was awesome. This one is no different. Her sire 304 was used only one year and purchased by a customer. We are hoping to get him back this fall to use again next year. They are making great cows. AI to OCC Best Yet and pasture with JBob Jet Plus 438 6-8-19 to 8-3-19.

I thought I would share one of our JBob Jet Plus daughters. Jet Plus daughters are very moderate extremely easy keeping and have beautiful udders and his first daughters calved this year and have enormous calves on them. And all bred back right on time. The mother of this cow was the spitting image of the 1119 lot 27. This should make a moderate framed easy doing mother cow. AI to CCA Emblazon 702 and pasture to JBob Emulation 822.

This cow came from us through the Strommen Ranch Dispersal. We bought her mother and she was carrying this calf. The mother and her full sister came to us and are doing a good job for us. Both of the full sisters have left us with OCC Jet stream and Emulation 5522 XP daughters. Great cow family that originated from the Basin herd and later to the Spickler ranch herd. Watch for this cows heifer later in the sale catalog. AI to CCA Emblazon 702 and pasture to JBob Jet Plus 438 6-8-19 to 8-3-19.

Another cow that came to us from the Strommen Ranch Dispersal. The only way I can describe this cow is massive. Massive middlewidth and super productive. We will be retaining her OCC Cortez and OCC Jetstream daughter to keep the family going. AI to OCC Best Yet and Pasture to JBob Jet Plus 438 6-8-19 to 8-3-19.

OUCH!!! This heifer and her mother I like a lot. This heifer will be double bred to Juanada 1450 and has all of my favorite sires in her pedigree. I want to put my best foot forward in the sale even though it is very painful. Take advantage of this young heifer. She will be a great cow.

Great potential in this Jupiter daughter out of a great Wandering Creek Dynasty daughter. Jupiter came to us from the Schaefer Angus herd in SD. Unfortunately he only made it through the first 35 days of breeding season and had to be put down with a leg injury. He was a super stout meat wagon. 9064 mother is a moderate cow with a fantastic udder and production. Help yourself.

Cortez daughters have done everything that I have hoped for up to this point. They are super easy keeping. They carry a little more frame than most OCC bred animals that I have had. And every one of them was bred in the first 30 days of breeding. 9068 mother is a phenomenal cow by GDAR Traveler 9161 and is super sharp fronted and feminine. 9068 grandmother is one of my favorite cows on the ranch. She is coming 14 this year and is AI bred just like always. Lots of potential in this young cow.

Our first crop of 767 calves and they are outstanding. We will wean soon but I am fairly certain that he will be the highest rationing sire of the entire 2019 crop. 9000 mother is a first calf heifer sired by LT Bandwagon that has done an outstanding job with her calf. This heifer is from the Delia cow family and her grandmother produced a bull calf named Duplex that went on to Hansen Registered Angus in Froid. This is an excellent opportunity here.

The chinook daughter that this super deep bodied Cortez heifer is out of has done an amazing job on both of her calves now. Her calf last year by Cortez made our sale and that is very hard to do for a first calf heifer here. Very few calves out of first calvers get to our sale. Also on a side note. The grandmother was purchased by Josh Freiburger and is no being flushed by him. A very special cow for sure. This will make a super nice cow with the depth and feminine front that she shows already.

Another 767 daughter here. 9009 mother is another LT Bandwagon daughter that is doing a superb job on her calf. These are just Bandwagons first year in production here but I really like what I see so far. They all have super udders and take care of their calves well. The cow behind the Bandwagon daughter is a super productive 222 daughter. Lots of potential here.
