Greg & Joan

John & Alli

Faith, & Michael

Daniel

Dear Friends,
Welcome to our 2022 production sale. Let's start by saying, "Thank You" to Hyline Angus! We also want to say, "Thank You" to all of our customers and friends. We appreciate all of your support for our program.

We are a family operation with everyone participating in some way with the many tasks associated with the cattle operation. 2021 was a year filled with challenges. 2022 can only be better!

The 2-year-old bulls in this year's sale have grown out well. We don't push the bulls the first year but strive for solid growth at 2 years of age. Our goal is to provide you, our customer, bulls with the following criteria: fertility, great disposition, exceptional feet and leg structure, and calving ease in a balanced, trouble-free package. All bulls have a complete breeding soundness exam, parentage and DNA genetic testing, and are all PAP tested.

We offer the same guarantees and customer service that Hyline Angus is known for and that are set forth by the American Angus Association. We invite you to join us on sale day! Please call if we can help you in any way.

Thanks,
Greg Lucht • 406-570-7300
John Lucht • 406-570-7303

Explanation of High Mountain Disease

High Mountain Disease, or commonly known as Brisket Disease, is a very common condition seen in cattle raised in regions greater than 5,000 ft of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure. Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be “sub-clinical”, meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal’s potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the angus breed, we can evaluate that animal’s potential to pass on genetic traits that can greatly influence the performance of that animal’s offspring. The PAP test can be influenced by several factors other than genetics but because it is an actual measurement, it is far more accurate and reliable than the current EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.

Welcome

HYLINE
ANGUS

Ken and Alice

Ben, Kirby & Leo

Dear Cattlemen,
Welcome to our 43rd Annual Bull Sale. Since the inception of our cattle business 63 years ago, we've always strived to identify cow families that thrive under western range conditions. We've managed to do this first through Montana Beef Performance Association and now thru AHIR. Individual performance and cow production records have always been the driving force in our program. We know each cow family's strengths and weaknesses and mate them accordingly. Our cowherd is culled relentlessly for mothering ability and fertility. The sires we use in our program make practical and predicable progeny.

We don't use bulls just because they are supposed to be the "next big thing." My dad always told me if a young, hot bull is good, let someone else prove them out and once they have proven themselves, we will use them. If they bomb out, then we didn't make the mistake of jumping on the bandwagon too soon.

The bulls selling are stout and will increase weaning weight and leave a mouth-watering set of females that will add value to your herd. Our bulls are grown out in a 30-acre pasture, sensibly developed, and are hard bodied and athletic. They don't just lay in a feedlot getting fat and lazy. They have been performance tested, PAP tested, fertility tested and ready to go to work for you. When you view the bulls, you will see functional cattle full of muscle, length and structural correctness. Remember when you are buying bulls, they are only as good as the cows in his pedigree. As my dad Raymond always said, "Hyline Angus, Where the Cowherd makes the Difference!" That's what makes our bulls better – the cowherd behind them.

I would like to say the young females in the herd, sired by Revolution and the 338 Derivatives are making some really great females. By reintroducing the Wye bloodline through Candolier Forever 376 into the herd, we accomplished just what we thought it would do when we purchased Revolution. Functional, fertile, feminine females that raise monster calves and really turn heads!

We are proud to be a family operation. Ben and his wife Kirby, and their son Leo, make this a fourth-generation operation. Mark and Kenny and their families farm here in the valley and in Chester, MT, and Ryan and his family have a large property maintenance and snow removal business. They are all willing to lend a hand when we need them. Thanks also to my wife Alice for all her help.

This year once again we welcome Lucht Angus to our sale. They will bring 30 coming 2-year-old bulls with some of the best genetics from the cow families of VDAR. They are turned out on high-mountain pasture and taken off grass in late fall. It's been really great working with them. They are always willing to lend a hand when we need help, and we've enjoyed helping them also. That's the way it ought to be!

New this year the sale will be broadcast on DVAuction, we will have videos of all the bulls prior to the sale.

Join us on February 25, 2022, at Headwaters Livestock for a delicious tri-tip lunch at noon with the sale starting at 1 p.m. Good conversation and a great set of bulls.

Thanks, Ken and Ben Van Dyke
