Very rarely does a bull like Crossbow 120 come along, he will be the highlight of the spring sale season. Out of a first calf heifer sired by the SureShot heifer bull, Spring Cove Crossbow, his dam not only raised this calf, but bred back on her first cycle and calved under a year. She now has a calving interval of 2 @ 330 days. His featured grandam has a calving interval of 7 @ 357 days. This young standout started at 70 lbs, and went on to wean at 820 lbs, to ratio at 105. With a 1.8 birth and a 120 yearling, he covers all the bases. He not only had an actual pap score of 39, but follows that with a .83 marbling. Some people say we have hit the optimum for weaning weight without sacrificing other traits! This is the kind of bull that needs to be propagated and he will see heavy use within our own herd.

DAM OF 120
Sired by SVR Revolution 3173

GRANDDAM OF 120 AND DAM OF 310

Born, Bred & Raised at 6,000 Feet

Selling 70 PAP tested fall yearlings & 2 year olds

WELCOME TO THE SALE

Dear Cattlemen,

Welcome to our 42nd annual Bull Sale. Since the inception of our cattle business 62 years ago, we've always strived to identify cow families that thrive under western range conditions. We've managed to do this first through Montana Beef Performance Association and now thru AHIR. Individual performance and cow production records have always been the driving force in our program. We know each cow family's strength and weakness and mate them accordingly. Our cowherd is culled relentlessly for mothering ability and fertility. The sires we use in our program make practical and predicable progeny.

We don't use bulls just because they are supposed to be the "next big thing". My dad always told me if a young, hot bull is good, let someone else prove them out and once they have proven themselves, we will use them. If they bomb out, then we didn't make the mistake of jumping on the bandwagon too soon.

The bulls selling are stout and will increase wean weight and leave a mouthwatering set of females that will add value to your herd. Our bulls are grown out in a 30 acre pasture, sensibly developed, and are hard bodied and athletic. They don't just lay in a feedlot getting fat and lazy. They have been performance tested and PAP tested at 6000 feet, fertility tested and ready to go to work for you. When you view the bulls, you will see functional cattle full of muscle, length and structural correctness. We will feed and care for the bulls till you need them at no cost to you. Remember when you are buying bulls, they are only going to be as good as the cows in his pedigree. That's what make our bulls better, the cowherd behind them.

I would like to say the young females in the herd, sired by Revolution and the 338 derivatives are making some really great females. By reintroducing the Wye bloodline through Candolier Forever 376 into the herd, we accomplished just what we thought it would do when we purchased Revolution. Functional, fertile, feminine females that raise monster calves and really turn heads!

We are proud to be a family operation. Ben and his wife Kirby welcomed their first child, Leo, last year, and we are excited to see a 4th generation cattleman in the making. Mark and Kenny and their families farm here in the valley and Ryan and his family have a large property maintenance and snow removal business. They are all willing to lend a hand when we need them. Thanks also to my wife Alice for all her help.

This year once again we welcome Lucht Angus to our sale. They will bring 30 coming 2 year old bulls with some of the best genetics from the cow families of VDAR. They are turned out on high mountain pasture and taken off grass in late fall. It's been really great working with them. They are always willing to lend a hand when we need help, and we've enjoyed helping them also. That's the way it ought to be!

Also selling this year will be 25 outstanding bred heifers from the Diamond S Ranch, all from Hyline genetics. They have purchased bulls from us for long time, and we appreciate their business. They are all March calvers.

Please join us on February 26, 2021 at Headwaters Livestock for a delicious Tri-Tip lunch at noon, sale at 1 pm, good conversation and a great set of bulls.

Thanks,
Ken and Ben Van Dyke

AN OLD FARMER'S ADVICE

1. Your fences need to be horse-high, pig-tight and bull-strong.
2. Keep skunks and bankers at a distance.
3. Life is simpler when you plow around the stump.
4. A bumble bee is considerably faster than a John Deere tractor.
5. Words that soak into your ears are whispered...not yelled.
6. Meanness don't jes' happen overnight.
7. Forgive your enemies. It messes up their heads.
8. Do not corner something that you know is meaner than you.
9. It don't take a very big person to carry a grudge.
10. You cannot unsay a cruel word.
11. Every path has a few puddles.
12. When you wallow with pigs, expect to get dirty.
13. The best sermons are lived, not preached.
14. Most of the stuff people worry about ain't never gonna happen anyway.
15. Don't judge folks by their relatives.
16. Remember that silence is sometimes the best answer.
17. Live a good, honorable life. Then when you get older and think back, you'll enjoy it a second time.
18. Don't interfere with somethin' that ain't botherin' you none.
19. Timing has a lot to do with the outcome of a rain dance.
20. If you find yourself in a hole, the first thing to do is stop diggin'.
21. Sometimes you get, and sometimes you get got.
22. The biggest troublemaker you'll probably ever have to deal with, watches you from the mirror every mornin'.
23. Always drink upstream from the herd.
24. Good judgment comes from experience, and a lotta that comes from bad judgment.
25. Lettin' the cat outta the bag is a whole lot easier than puttin' it back in.
26. If you get to thinkin' you're a person of some influence, try orderin' somebody else's dog around.
27. Live simply. Love generously. Care deeply. Speak kindly.

Fixx is a tremendous growth bull and all-around sire that will add length and muscle. He stems from the great 186 cow that posts 5@112 for weaning and is truly one of the great cows ever born here. We chose to use him for his great maternal heritage and superior phenotype.

Don't be afraid of the road less traveled! Sired by the maternal legend Candolier Forever 376. His calves are averaging 108 at weaning. You will not give up growth with Revolution. His progeny will make a great outcross for today's genetics! The first daughters are calved out and have tremendous udders, they are very feminine fronted, and are great mothers. His daughters will be sought after for years to come. He is destined to make an improvement to the Angus breed.

LUCHT ANGUS

Dear Friends,

Welcome to the third year of selling Angus bulls with Hyline Angus. We appreciate the opportunity to sell our 2 year old bulls with Ken Van Dyke and his family. Let us just say how much we respect Ken and his knowledge of Angus cattle. He knows good cattle, and most importantly he knows cows. From structure, fertility, breeding, nutrition and every management step along the way, his keen eye and years of experience (he's been at this since he was 7 years old) are a tremendous advantage for his customers. He doesn't have all the answers, but he has a bunch of 'em! We appreciate him, his family, and their friendship.

Lucht sale bulls have been DNA tested and were PAP tested at 5,923 feet of elevation. Eighteen months is the prime age for PAP testing. We feel that this is one of the most important things that we can do for our customers. The bulls spent the summer in the high elevation, walking up and down the rocky ground for water and grass. This daily routine builds strong muscles and sound feet. Our goal is to sell functional breeding bulls ready to work as 2 year olds. Our emphasis in herd culling consist of the following criteria: Fertility, Maternal instincts at calving, Feet and structure, Disposition and Fertility.

I know we listed Fertility twice, but that's because it is so important.

We offer the same guarantees and customer service that Hyline Angus is known for and that are set forth by the American Angus Association. We invite you to join us on sale day. Please call if we can help you in any way.

Thanks,

Greg Lucht 406-570-7300

John Lucht 406-570-7303

ML

COMMERCIAL HEIFERS

Years of Hyline Angus genetics specially selected for maternal ability, milk production, feed efficiency, and docile temperament. Our heifers consistently calve without assistance and are great mothers. Their mothers and grandmothers are from registered herds. These bred heifers were poured with Dectomax, got shot of Multimin and Bovishield Gold VL 5 One Shot, in late October when they were ultrasounded. Bred by LBW Hyline Angus Bulls for 45 days. Due February 25th. On winter range, hay, lick tubs, salt and mineral.

42ND ANNUAL BULL SALE

FEBRUARY 26TH, 2021

1PM @ HEADWATERS LIVESTOCK

High Mountain Disease, or commonly known as Brisket Disease, is a very common condition seen in cattle raised in regions greater than 5,000 ft of elevation. The disease is characterized by ventral edema in the brisket region that is caused by high blood pressure in the lungs and right sided heart failure. Cattle mortality from this disease can result in the loss of 3% to 5% of the calf crop but has been reported to be as high as 25% and morbidity greater than 40%. Historically, Brisket Disease has been a problem of higher altitude environments but recent evidence has shown that cattle at much lower elevations are being affected, particularly in the high plains feedlots. All breeds can be affected and often times animals will be "sub-clinical", meaning that they do not show outward signs of being ill but will not grow or produce like they should.

Through PAP (Pulmonary Arterial Pressure) Testing, we can determine an individual animal's potential to develop Brisket Disease and because High Mountain Disease is moderately heritable in the angus breed, we can evaluate that animal's potential to pass on genetic traits that can greatly influence the performance of that animal's offspring. The PAP test can be influenced by several factors other than genetics but because it is an actual measurement, it is far more accurate and reliable than the current EPD that is being used making yearling PAP the most common phenotype used to determine if cattle are tolerant to high altitude production systems.

A crucial component to the PAP test being more reliable and accurate than the EPD is that cattle are tested at the appropriate age and elevation. It is important that cattle being tested are at least 12 months of age when the test is performed and that those animals have resided over 5500 feet of elevation for at least 30 days. The higher in elevation that the animals reside, the greater the confidence we have in our PAP testing data.
