# Welcome to the Koenig Ranch 16<sup>th</sup> Annual Production Sale!

**Thank you** for your support and interest. 28 years producing 100% IA Registered **Red Angus** seed stock. Our program is based on the wisdom and policy of the **Red Angus** Association founders in 1954. In general, to discourage the more artificial practices in purebred cattle production ... performance test and appraise for quality and soundness right off the **pasture**; ... no over-fitted animals or doctored pictures, no nurse cows, no excess feeding, etc. ... Bring out all the good characteristics and not waste time concealing the bad... Instead of changing what you have, make what you have work. **Nature** perpetuates the ultimate test, and **adaptability** is the most important trait, assuming **fertility** and livability... More **efficient** beef production to improve the breed\*. Those foundation genetics are still Breed Leaders today.

We offer **Herd Builder** and **Stayability** genetics second to none. Developed in the extreme climate (90° change in 48 hours), high plains desert pastures (crested wht., native, timber) of the Missouri Breaks from birth to finish. **Nature** has little use for high indexes, or freaks and faults caused by environment or genetics. Identified, reduced or eliminated, over time they **adapt** and maternal efficiency, calving ease, growth, disposition, fertility, longevity, and phenotype keep improving. All cattle do well in a feed yard, where most numbers are calculated, foragers excel.

\* Bred **Natural Service** at 40 cows per bull requires. **Fertility**. AIing heifers and a few select cows only.

\* All classes calved, weighed and tagged in sagebrush pastures.

\* Weaned on pasture. Trained on electric fence. Rationed long-stem hay, cow cake, and natural mineral (Redmond and New Life) for overall health when needed.

\* Sale Bulls get selected at 10 months (approximately 1/3 of the crop) to naturally mature and prove themselves. Tested and worked one week before sale day and hauled to Glasgow. Sale Heifers from the heart of the herd - right off the pasture.

We bring the best to you – fit, fertile and ready for breeding.

Sincerely, Francis & Arley Koenig

**FERTILITY** affects the economic viability of every beef operation - critical for sustainable, efficient, profitable beef production.

**STAY...Stayability** is the most important trait if your goal is developing cows that stay productive, thus increasing your productivity. Bulls with a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age. (2018 RAAA Stay)

**Koenig Ranch Reds** had a **FABULOUS** sale today at Glasgow Stockyards! Highway 2 was wet going and coming from central MT...never turned wipers off for 150 miles! Francis & Arley started calling their sale "The Rainmaker", and boy is it living up to its name!

# RED ANGUS MARKETING PROGRAMS

## How to Enroll in FCCP and AA

1. The producer contacts the Red Angus Association of America at (940) 226-4762 and answers a short supplier enrollment questionnaire over the phone. RAAA staff will ask general management, animal identification and breeding questions. If needed, the producer may be asked to supply additional documentation on breeding such as semen receipt, lease agreements or information on purchased females.
2. After all documentation is recorded, staff will ship the tags directly to the producer who must tag the calves before they leave the ranch of origin – birth, branding, preconditioning, weaning or before loading on the semi.
3. The producer will receive a customer enrollment agreement to fill out and return to RAAA with a copy of their calving records.
4. Staff will issue the USDA-approved Certificate of Compliance upon receiving the customer enrollment agreement and calving record.
