SALE TERMS & CONDITIONS: Terms of the sale are cash unless prior arrangements have been made. Every lot will be sold to the highest bidder with the auctioneer settling disputes as to bids. All cattle are the buyer's property as soon as sold. All announcements made from the auction block on sale day by the owner or auctioneer will take precedence over statements in the sale catalog.

Guarantee: Every animal in this sale is, to the best of our knowledge, free from any disease or defect. All animals are guaranteed breeders. We guarantee the first 60-day breeding season, not to exceed 6 months from the delivery date. If an animal fails to breed after a period of six months, it may be returned to the seller in good condition and in compliance with Montana Health Regulations. The seller reserves the right to try said animal for six months and if it proves to be a non-breeder, either an animal of comparable value will be substituted or credit will be given in a future sale on an animal for animal basis. All pregnant females are considered breeders. No other warranty of any nature is express or implied.

Health: Each bull will pass a semen test before leaving the ranch. The health of the herd is excellent. We guarantee that all sale cattle will be able to ship to any state, Mexico or Canadian province. All females are officially calf hood Bangs vaccinated. All cattle are on a pre-conditioning program and herd health program.

Feed Arrangements: Bulls will be fed until April 1 at no cost. After said date, buyers will be charged for feed until delivery, at buyer's risk.

Delivery: Free delivery within 1,000 miles on purchases exceeding \$5000. Additional delivery beyond 1,000 miles will be charged at cost to central points anywhere in United States. For Canadian buyers, we will deliver up to nearest points of entry. Reputable purebred livestock haulers will be contracted for delivery.

Liability: All persons attending the sale do so at their own risk. Neither the owners nor any person associated with the sale assumes any liability, legal or otherwise.

Semen Interest: L Bar W retains the right of a ¼ in-herd semen interest in all bulls selling

Accommodations: Ask for the L Bar W Sale Rate at the Super 8, Columbus – 406-322-4101
Numerous other accommodations available in Billings and Bozeman, Montana

2022 HERD HEALTH

All bulls received a breeding soundness exam on February 3, 2022, by Dr. Lacey Fahrmeier of Stillwater Veterinary Clinic. Scrotal measure listed in catalog were taken at this time.

BULLS

BIRTH: Calf Guard, Alpha C&D, & Multi-Min

BRANDING: Inforce 3, Ultrachoice 8, Multi-Min, & Pink Eye

PRE-WEANING: Bovishield Gold One shot, Ultrachoice 8, & Multi-Min

POST WEANING: Pyramid 5 Plus Presponse, Poured with Ultra saber, and drench with Valbazen.

MID DEVELOPMENT: Multi Min and Cleanup pour on. All bulls received 2 rounds of Fusogard Foot rot vaccine

BREEDING SOUNDNESS EXAM: Bovishield Gold FP5VL5

REPLACEMENT HEIFERS

BIRTH: Calf Guard, Alpha C&D, & Multi-Min

BRANDING: Inforce 3, Ultrachoice 8, Multi-Min, & Pink Eye

PRE-WEANING: Pyramid 5 plus Presponse, Pink Eye & Multi-Min

POST WEANING: Pyramid 5 plus Presponse, UltraChoice 8, and drench with Valbazen.

Pre-Breeding Shots: By sale time heifers will have received 2 rounds of Bovishield Gold FP5VL5 and poured with Dectomax Pour-on. They have been freeze branded to match tattoo numbers

Bangs Vaccinated November 5, 2021

TWO-YEAR OLD PAIRS

Cows are on a spring breeding vaccination protocol with Bovishield Gold FP5VL5. They were poured with Dectomax December of 2021. Their calves at side have received the following at birth: Calf Guard, Alpha C&D, & Multi-Min

Welcome Friends

We appreciate you all taking part in our sixth annual L Bar W Cattle Company 2022 Spring bull sale. We know you have lots of other options, so we want to thank you for coming to our ranch to

participate in the sale. We have a superior group of yearlings, two year old bulls and heifers on display. We continue to grow our offering as we strongly believe a business such as ours needs to continually provide leading edge herd improvements for our customer base.

It has been a quite a year for all of us. Covid, supply chain disruptions, and the drought provided the cattle business with unparalleled challenges. But we are a resilient group, and we will get through these times. That is what is so great about being associated with the cattle community. No matter what, we all step up to these times and overcome our challenges.

Once again, we are working hard to use only the best genetics available in the Hereford breed to continually improve our herd. Using all the tools at our disposal, our AI and ET program lets us provide the bulls you need to maximize your profit potential. Quality runs deep in this group of bulls. They are moderate framed, thick made and fast growing. All our bulls exhibit outstanding performance coupled with strong carcass and maternal traits. We focus on providing sound structure, good feet and superior udders and fertility. We will always continue to focus on those traits which are most in demand by the commercial cattleman.

We think the Hereford breed has a bright future. Our bulls on black cows produce the perfect beef cow, the black baldy. More commercial cowmen have discovered the value this cross brings to their herds. As I travel the western United States, I am amazed at how many Hereford cattle I have run across. In areas where there were none just ten years ago, I now see those beautiful red and white bulls and cows. It is truly gratifying to see the progress we have made.

All our offering has been fully vaccinated and given a full health check and are fully guaranteed.

If you have any questions, please feel free to contact Carl, Mike or Denise.

Thank you

Mike and Jeannette Walen and Carl and Denise Loyning
Bo LeBrun, Taylor and Amanda Romine

AHA GE·EPD

The Power of Genomically Enhanced EPDs

The American Hereford Association (AHA) has embraced the use of genomics into their genetic evaluation by launching a first of its kind single step analysis that utilizes the marker effects of specific traits. Likewise, AHA is directly estimating accuracy values rather than approximating. The direct estimation of accuracy results in a more conservative value but a more accurate value than previous methodologies. The AHA is producing the most reliable genetic evaluation that is supported by Whole Herd TPR™ and genomics, which will give prospective buyers added confidence in purchasing young and unproven animals.

Buying animals that have a genomic profile incorporated into their Expected Progeny Difference (EPD) offers many advantages that allow for quicker breed and herd improvement. Below is a table showing the average increase in accuracy when buying a young animal with a Genomic Enhanced EPD (GE-EPD) versus an animal without a GE-EPD. Similarly, an effective progeny number increase is listed by trait that shows how many progeny equate to a genomic enhancement of a young animal (e.g. yearling). That's right, buying a young animal that has been genotyped is like having 2-17 progeny, depending on the trait. The proof gained on young, non-parent animals, through a genomic enhancement is valuable and greatly mitigates the risk and allows for more directed selection.

Each animal tested is recognized with the AHA GE-EPD logo.

AHA Trait	Accuracy Improvement	Effective Progeny Number Increase*
Calving Ease	0.09	17
Birth Weight	0.12	8
Weaning Weight	0.14	12
Yearling Weight	0.16	9
Scrotal Circumference	0.17	6
Mature Cow Weight	0.12	4
Udder Suspension	0.17	7
Teat Size	0.17	7
Carcass Weight	0.11	3
Fat	0.08	2
Rib-Eye Area	0.07	2
Marbling	0.10	3

* Effective Progeny Number Increase (EPNI)- EPNI is the difference gained for genotyped animals versus non-genotyped animals.

L-W Our decision to keep a half possession of 901G was probably the best thing we did all year. He has proven to be a solid replacement for his now deceased sire 6128D. His first calves are hitting the ground and they are good. He is adding thickness, hip and depth to his progeny. We are super excited about his future here and at Fawcetts Elm Creek Ranch.

L-W We were able to purchase half possession of 9108G in Cooper's 2020 sale. 9108G is a really powerful 7156E son that is short-marked, good pigment, outstanding balance, and has lots of muscle and substance. He has a big top and his muscle carries down into his lower quarter. 7156E is a moderate made bull that they have used successfully on mature cows and heifers. 9108G should follow in his footsteps as a very complete, well-structured bull with unlimited potential. We expect his daughters to be moderate, thick made, and good uddered. Owned with Johansen Herefords, UT and Cooper Hereford Ranch.

L-W The now deceased 6128D was the high selling bull in the Cooper Herefords 2017. He is leaving his mark by siring progeny that makes you take notice of their presence with their length of spine, square hip, flat top and wide base. His dam is leaving an impressive mark on the Hereford Breed, with tops sons including CL 1 Domino 215Z and CL 1 Domino 5110C. Owned with Stuber Ranches, ND, Krebs Ranch, NE and Churchill Cattle Co. MT.

YEARLING BULLS

This group of yearling bulls represents our top 60% of our 2021 calf crop. We again scanned the bulls for carcass data end of January so please note that the EPD's were current as of 2/1/2022, they did not have the updated carcass data calculated as of this date. Updated EPD's will be available March 1, on our website www.lbarw.com.

We take pride in raising our bulls in a commercial cattleman's environment. Therefore, their individual data are actual birth weights and weaning weights are from August 17, 2021. These bulls are developed on a high roughage ration of dryland alfalfa hay, corn and a complete amino grower pellet under the direction of Josh Stroh and Calvin Bacon of Hubbard Feeds. Our avg. daily gain on a 120 day test period was 3.45lbs.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Pelton Livestock's Sale Day Conference Call.

SIRE OF 1019J, 1054J AND 0202H

The females I purchased from L Bar W have proven to be great young mommas with strong maternal traits. They adapted to the environment well while raising solid calves. The customer service and friendship with L Bar W is second to none! Carl and Denise always make the time to go through the cows to show the maternal foundation that are behind the great set of bred females they offer. They serve as a great mentor and fellow cattlemen dedicated to this breed and industry.

CHURCHILL LADY 700E
 2017 NILE CHAMPION HEREFORD FEMALE

L-W HERD BULL ALERT!! This bull is unique in so many ways. He could be the thickest bull that we have ever produced. His sire 901G has set the bar high as one of the best breeding bulls that we have produced and this guy is proof. The combination of this pedigree is very unique, we won't find this combination on every street corner this spring. Terms: Selling ½ Interest and ½ Possession. L Bar W retains the right for spring possession for 2022.

- Impressive performance with over 3# per day on test
- Big Ribeye bull with 12.97 REA and 3.25 IMF

L-W He's the sleeper in the sale. If you need an all-around bull to complement your cow herd either as a commercial producer or a seed stock producer here he is. Just take a look at his EPD profile. Curve bending EPD's from front to back. He's gonna leave you a set of front pasture females. His mother is dog gentle and known as "Cookie Monster" here at the ranch as she will follow you anywhere for her cake.

- WW ratio of 106
- Impressive performance of a ADG of 4lbs on test

L-W Herd Bull Alert!! Man do we love the combination of the 4126B bull and the 958W donor. Those two just put it all together. Full brothers are at Behm Hereford Ranch in North Dakota and Larry Stangles in Marsland, Nebraska. Balanced set of EPD's. We thought really hard about keeping him. We just might. Terms announced sale day.

- Crossed the scale on February 4th at 1455lbs
- Boosted a Scrotal of 42 cir.

FEMALES

The drought of 2021 here in Montana has made us reevaluate replacement heifers. With that being said we are going to offer for the 1st time 10 head of registered replacement heifers. We decided this just days before the footnotes were due, therefore, at catalog print time the Enhanced EPD's were not completed. They should be available by sale day. We have also decided to sell 3 head of 2 year old pairs and a select lot of baldy females.

L-W Here is classic Hereford female from front to back, she still has her horns too. One of the very last flushes to the 8006 donor before we sold her was to 6128D. We don't have any more of these embryos she is a one of kind. She is due to calve February 19th to our Baumgarten bull 914G, we are really liking his progeny for their light BW and growth.

L-W Well this one hurts to sell, but sometimes we have to make those tough decisions. Here is a moderate framed, very feminine 776E daughter out a fancy 8050U daughter that we love. Honestly, she was on her way to being in the donor pen. The maternal and growth on both top and bottom is second to none. She is due to calve February 18 to the 0123H bull.

COMMERCIAL BALDY HEFIERS

We are going to offer a select set of commercial baldy heifers. These heifers are front pasture females. We are cutting into our future recip herd by offering these sale day. That should tell you the type and kind they are.

Just when we thought 2020 was the year of all years here comes 2021. We have said before and we will say it again, we are so blessed to live where we do, and be involved with this industry. Six years ago when we started this adventure, and let me tell you it has been an adventure, we had no idea the behind the scenes stuff that goes on at a production sale or the sheer amount of extra things that comes with a seed stock operation. This is not for the weak of heart. We are so thankful for the individuals behind the scenes that have given advice, showed up to help on picture day or video day, helped haul cows home, and the list goes on. We cannot thank you all enough for everything you do for us. They say it takes a village to raise a family, well it takes a village to be in the seed stock business. Thank you all, your friendship means the world to us.

A SPECIAL THANK YOU:

As we all know in this business nothing is ever constant. We want to give a special thank you to Bo LeBrun for everything he has given to our operation since he joined us in 2019. He has done a fantastic job feeding the bulls for us the last 3 years and getting them ready for their new homes and everything else in between. We wish him the very best in the next chapter of his life. Thank you from the bottom of our hearts.

Stand out with Proven Genetics

THE HEREFORD ADVANTAGE PROGRAM

Increase added market power and brand recognition with feeder cattle sired by a Hereford bull battery ranking in the top 50% for CHB\$ index.

PROGRAM BENEFITS:

- ✓ EPD ranking summary
- ✓ Added market exposure
- ✓ Genetic improvement tool
- ✓ Access to AHA resources
- ✓ Get started at HerefordFeederCattle.com

Certified Hereford Beef Index(CHB\$) is a terminal sire index that is built on a production system where Hereford bulls are used on Angus-based cows with a focus on feedlot performance and end-product merit. To qualify for the Hereford Advantage program, cattle must be sired by registered Hereford bulls with transferred ownership, and the Hereford bull battery must have a CHB\$ value ranking in the top 50%.

Take advantage of hybrid vigor by capitalizing on Hereford genetics.

The Maternal Advantage program generates females with added longevity, more docility, increased fertility and more profit per year.

Can be utilized by producers using Hereford bulls on British-based cows or Brahman-based cows in their breeding program.

Producers utilizing the program will have access to a sire EPD summary, added market exposure, replacement selection tools, genetic improvement tools and access to AHA resources, marketing and staff.

Qualifications

- Producers must verify that eligible females are sired by registered Hereford bulls with transferred ownership.
- Participating bull batteries must rank in the top 50% of the breed for Baldy Maternal Index (BMI\$) if used on British-based cows or the top 50% of the breed for Brahman Influence Index (BII\$) if used on Brahman-based cows.
