58th Annual Production Sale

NEW THIS YEAR
DVAuction
Broadcasting Real-Time Auctions

FRIDAY, MARCH 17, 2023

Selling 130 Yearling Angus bulls raised at 6,000-9,000 feet in elevation.
1 PM | AT THE RANCH | LEADORE, IDAHO

Dear Friends and Fellow Cattlemen,

It is our great pleasure to welcome you to our 58th annual production sale at Leadore Angus. We want to thank all our valued customers who have helped us make this program a success. We are excited to extend to you the opportunity of quality bulls at a competitive price. Without great customers like you, we would not be here doing what we love. Thank you for your support and friendship.

We are once again pleased with this year's bull crop! We feel we have put together a very strong set of bulls that will not only help our customers raise great females but also produce calves that will perform well on feed and on the rail. We develop our bulls at the ranch in Leadore; therefore, we are able to closely assess their progress. In fact, our entire herd, including our bulls, are born and raised year-round on the ranch which lies at elevations between 6000 and 9000 feet ensuring that natural selection is helping us eliminate problems with Brisket Disease. We work closely with Dr. Ben Abbey, D.V.M. on PAP testing, semen testing and general herd health consistently. This allows us to be sure we are producing a quality product that we feel will be beneficial to your program.

The Leadore Angus crew understands the importance of suitable breeding for calving ease, accelerated growth and profitability. We have an appreciation for quality cattle that meets the needs of everyone from the producer to the customer at the grocery store. We also recognize the necessity of rough range bulls that can thrive under any range condition. Each time we work cattle, we take careful consideration of inheritable traits such as feet, udder, fertility and longevity, culling everything that does not fit the program. Our desire is to be ever improving our herd so we can provide our customers with the best product possible. Finally, we would like to leave a legacy of fertile, right sized, long living cattle that are able to work in real life conditions.

It is our pleasure to talk cattle with you before or after the sale as well as at the sale. We look forward to seeing you on sale day. As always, if you would like to look at the cattle, they are constantly available. Please contact Charlie Stipe at 406-239-1696 to set up a time that works for you.

Thank you very much for taking time out of your busy lives to look at these incredible bulls.

Sincerely,
Leadore Angus

Karl and Donna Tyler, Owners

LEADORE ANGUS

Sale Information

BULL DELIVERY

Bulls are delivered free to Idaho and adjoining states. \$100 per bull credit for buyers who pick up their purchases sale day. **Roundup Your Bulls on Sale Day and Receive \$100 CREDIT Per Bull!**

MANAGEMENT PROGRAM

Last year we calved about 750 registered cows. We handle the cows just like commercial cattle. Cows never eat anything but grass and hay. Replacement heifers are grown out on USFS range up Little Eight-mile Creek. All cows with heifer calves spend the summer on USFS range up Railroad Canyon between Leadore and Horse Prairie. All cows with bull calves spend the summer at Eighteenmile Creek on the Ox Bow Ranch above Leadore. We start feeding the young cows in mid-December. We feed the mature cows a partial feed of alfalfa hay as a protein supplement. The cows are comingled for calving, then separated into age groups again with their calves. None of the females on the ranch ever receive any grain – this is a grass deal.

GENETIC PLAN

Our focus at Leadore Angus is to develop cattle that are the Cowboy Kind. Our cows run in dry, rough country and if they don't hold up and perform in those conditions, they go down the road. Since 1941, our goals remain strong maternal traits, calving ease and growth. We want more, heavier calves walking on the truck in the fall. We select bulls that we feel have these qualities and the pedigrees to back it up.

BREEDING SOUNDNESS EXAM

Pioneer Animal Health will examine each bull prior to the sale. Any bull not meeting the Society for Theriogenology standards will be culled. A copy of the Breeding Soundness Exam for each bull is available upon request.

BREEDING GUARANTEE

50% Coverage of Purchase Price for 60-Day Breeding Season. All bulls selling \$3,000 or more will be given 50% of the value of the injured bull, minus any salvage value, **IN A FUTURE SALE OR TOWARD A REPLACEMENT BULL IF ONE IS AVAILABLE.** All injured bulls must be diagnosed by a veterinarian. Please contact us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. Those injuries include broken penis (ruptured penis), broken legs, stifle and disposition. Leadore Angus does not cover cuts, illness and items out of our control. All claims must be made by September 1, 2023. This does not include death, mismanagement or neglect. Nor does it include injuries that occurred prior to breeding season if your bull is turned out with other bulls. A copy of the sales receipt must be received by Leadore Angus to receive proper credit.

***Mortality Insurance available for purchase on the day of the sale.**

HEALTH PROGRAM

Our health program is aimed at prevention. We vaccinate at branding with 8-way Clostridium and modified live IBR-BVD-PI3-BRSV. We give the same vaccinations plus Pasturella a couple of weeks prior to weaning. The heifers get Bangs vaccinated after weaning. About a month before breeding, the yearling heifers get another shot of IBR-BVDPI3-BRSV. On the day the bulls are examined for breeding soundness, they get 8-way Clostridium and IBR-BVD-PI3-BRSV. We also give a wart vaccine to the bulls to reduce the number of penile warts. This herd has been on a modified live BVD vaccination program for many years, and it is pointless to test for persistently infected BVD individuals. We tested a couple of times and have never found even one in the herd.

You can be sure that if a bull makes it to the sale on this outfit, he is fertile, healthy, functionally sound, and his performance data and EPDs are as accurate as we can make them.

About the Data

EPDS (EXPECTED PROGENY DIFFERENCES)

EPDS ARE CURRENT AS OF 2/17/2023
View current EPDs at www.Angus.org.

CED (CALVING EASE DIRECT) This EPD is a direct expression of calving ease when the bull is bred to replacement heifers. In this case, the higher the number, the less calving difficulty. This measure is highly correlated with BW EPD. Breed average CED EPD for non-parent bulls is +6. Leadore's 2023 sale bull CED EPD average is +7.

BW (BIRTH EPD) The weight in pounds that this bull should add or subtract from his calves at birth when compared to the average of all Angus bulls in use in 1979. BW EPD has been shown to be nine times as accurate as birth weight in predicting size of calves from a bull. Breed average BW EPD for non-parent bulls is +1.2. Leadore's 2023 sale bull BW EPD average is +0.4.

WW (WEANING WEIGHT EPD) The weight in pounds that this bull should add to his calves at weaning when compared to the average of all Angus bulls in use in 1979. Breed average WW EPD for non-parent bulls is +61. Leadore's 2023 sale bull WW EPD average is +60.

YW (YEARLING WEIGHT EPD) The weight in pounds that this bull should add to his calves at yearling when compared to the average of all Angus bulls in use in 1979. Breed average YW EPD for non-parent bulls is +108. Leadore's 2023 sale bull YW EPD average is +106.

MILK (MILK EPD) The additional weight in pounds that should be produced by daughters of this bull when compared to the average of all Angus bulls in use in 1979. Breed average Milk EPD for non-parent bulls is +27. Leadore's 2023 sale bull Milk EPD average is +28.

\$W (WEANED CALF VALUE) Index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size. Breed average \$W for non-parent bulls is +57. Leadore's 2023 sale bull \$W average is +63.

\$F (FEEDLOT VALUE) Index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. Breed average \$F for non-parent bulls is +85. Leadore's 2023 sale bull \$F average is +77.

INDIVIDUAL PERFORMANCE

BIRTH WEIGHT Actual weight of the calf within 24 hours of birth. Affected by calf sex, age of dam, feeding level, temperature during late fetal development and genetics.

WEAN WEIGHT Weight at weaning adjusted for days of age and age of dam

WEAN RATIO A within herd ranking of adjusted weaning weight. Calculated as the calf's adjusted weight divided by the average weight of the contemporary group within which he was raised to weaning. A ratio of 100 is always the average of the group.

YEAR WEIGHT Weight of yearling adjusted for days of age and age of dam.

YEAR RATIO A within herd comparison of all bulls tested based on their adjusted 365-day weight. A ratio of 100 is the average of the contemporary group.

COW PRODUCTION

Reported as number of calves weaned and average WR and number of calves tested to YW and average YR. The current calf is included in average YR.

ANGUS MEDIA

EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink™, CAB®, Pathfinder®.

DEFENDER
TOUGH. CAPABLE. CLEVER.

Why do we put so much effort into engineering the Can-Am® Defender? Why do we equip it with tough Rotax® engines featuring best-in-class torque? Why do we give it industry-leading towing and hauling capabilities? And why do we make it clever with versatile cargo solutions and much more? Well, why do you put so much effort at everything you do?

Because a job worth doing, is worth doing right.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association®, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 10-36 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

Trait	Progeny Equivalent	Trait	Progeny Equivalent
Calving Ease Direct	26	Heifer Pregnancy	17
Birth Weight	23	Calving Ease Maternal	20
Weaning Weight	27	Milk	36
Yearling Weight	23	Mature Weight	15
Dry Matter Intake	12	Mature Height	9
Scrotal Circumference	15	Carcass Weight	15
Docility	12	Yearling Height	17
Claw Set	10	Carcass Marbling	11
Foot Angle	10	Carcass Ribeye	17
		Carcass Fat	14

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k by partner Zoetis. These images indicate animals for which low-density or high-density genomic testing has been conducted and incorporated by AGI into GE-EPDs

www.angus.org

YOU'VE EARNED IT

You've made a significant investment in your genetics, but does the market recognize that? The AngusLinkSM Genetic Merit Scorecard was created to objectively describe the genetic merit of your feeder calves. The scorecard gives buyers the confidence they need to pay more for your quality calves.

In 2022, users of the Genetic Merit Scorecard earned a **\$12.94/CWT PREMIUM** on average. Give us a call and we can help you earn what you deserve.
