**SELLING**

**60 Yearling Bulls • 5 Elite Open Heifers  
5 Bred Heifers • 5 Bred Cows**

**RED ANGUS • SIMANGUS • BLACK RED CARRIERS  
MONDAY, FEBRUARY 28, 2022 • 2 PM MST**

*At our Sale Facility in Meadow, South Dakota*

# *Welcome!*

## **Fellow Cattle Producers,**

Welcome to our 10th Annual Production Sale! It seems like the last 10 years have flown by, but as the saying goes time goes by fast when your having fun! I would like to thank all of our customers, family, and friends that have helped get us to this point over the last decade.

I think the future is bright for the red angus breed and the cattle industry as a whole. We were excited to hear the big announcement from USDA which now allows Red Angus to be included in Angus labeled branded beef programs. While there still is a lot of work to be done, this is a giant leap in the right direction!

As always we continue to use all of the tools at our disposal. This includes observations at calving including foot, udder, and disposition scores on the dams. Every bull will also sell DNA tested insuring accuracy of their EPDS and parentage. All of the bulls have been evaluated by Top Dollar Angus and many of them qualify for this value added program.

We will once again be hosting our sale at our sale facility in Meadow, S.D. All of the cattle will be available for viewing the day before the sale. Of course we welcome visitors to our ranch to view the sale cattle anytime prior to the sale.

Please don't hesitate to call and discuss any lots that may work best in your program!

Thank you for your interest,

**Brad Schecher**

# Sale Information

**> TWO YEAR BREEDING GUARANTEE:**

We guarantee all of our bulls to be fertile and sound for their first TWO breeding seasons. This guarantee does not cover death and is void if improper management is apparent.

- Year one through October 1st 2022: We will provide a back-up bull or credit the full cost of the bull minus salvage value to the next years sale.

- o Example: You pay \$5,000 for a bull and an injury occurs. He pounds out for \$1200. You would receive a \$3800 credit.

- Year two, Oct 1st 2022 through Oct. 1st 2023: One-third of the full cost of the bull minus salvage value will be credited toward the next years sale.

- o Example: You pay \$5,000 for a bull and an injury occurs. He pounds out for \$1,200. You would receive a \$1,266 credit.

**> RETAINED INTEREST:**

We are retaining ½ revenue sharing semen interest in all bulls in the sale.

**> DELIVERY AND BOARDING:****BULLS:**

**OPTION 1** – We will provide free keep on the bulls until April 15th and deliver them free within a 300 mile radius. For distances further than 300 miles bulls will be delivered at a fair price to central locations.

**OPTION 2** - We will provide free keep on the bulls until June 1st if picked up from the ranch.

**OPTION 3** - Receive a \$200 discount on any bulls picked up on sale day

**FEMALES:** Transportation for the open heifers and bred cows can be arranged with buyer responsible for delivery cost.

**SALE DAY PHONE NUMBERS:**

**Sale Barn Phone 605-788-2500****> ABSENTEE BIDS:**

Internet Bidding:

Phone Bidding:

If you wish to bid on the phone you may contact Brad or any of the sale staff to discuss different options.

We will contact any successful absentee bidders the day after the bull sale for purchase conformation and delivery arrangements.

This sale will be broadcast live on the internet.

[www.dvauction.com](http://www.dvauction.com)**> ANNOUNCEMENTS:**

Announcements from the auction block will take precedence over any information contained in this catalog

**> VIDEO:**

A video of each lot offered in the sale will be available at

[www.dvauction.com](http://www.dvauction.com)**> SUPPLEMENT SHEET:**

A supplement sheet will be available including actual scrotal measurements and updated information the week before the sale.

**> BREEDING SOUNDNESS EXAM:**

All bulls sell as guaranteed breeders. The bulls will be examined by West River Veterinary Clinic, prior to the sale, to determine they are developing correctly for their age. We highly recommend you have these bulls tested closer to your turnout time. We guarantee they pass a fertility test by turnout time.

**Complimentary Prime Rib lunch will be served by TNT Steaks & Burgers.**

**OUR SALE FACILITY LOCATED  
ALONG HIGHWAY 20 IN MEADOW, S.D.**

# BULL DEVELOPMENT

- Our bulls are developed in a pasture setting which allows for plenty of exercise.
- They are developed at a modest rate of gain which produces a bull ready for a long life of productive service.
- Our development pasture is lined with high tensile electric, which creates respect for other fences later in life.

He should be a calving ease specialist with his top 10% CED and top 18% BW while also maintaining good growth with his above breed average performance EPDs.

# PROFIT. REPEAT.

**Generate repeated profits with the industry's most-favored female.**

Independent research from a decade of data collection showed Red Angus-sired heifers commanded \$66/head more than females of other breed types. That's nearly \$5,300 on a single load of replacement heifers to boost profits on your operation.

Visit **RedAngus.org** for details on the industry's most-favored female.

A large Red Angus cow stands in a field of tall, dry grass, looking directly at the camera. A yellow ear tag is visible on her left ear. In the foreground, her calf is grazing on the grass. The background shows a hazy landscape with rolling hills and some trees under a clear sky.

**RED ANGUS**  
RANCH TESTED. RANCHER TRUSTED.

Heifer Calf Due: 3/27/22 to LSF SRR SMOOTH FATOR (4110382). Black-Red Carrier- This bred heifer is going to be a hard one to let go. This mating impressed us so much we ended up flushing 065 to Thomas Jefferson this last spring. With the maternal qualities that 065 brings to the table, together with Jefferson's end product merit you end up with a powerful combination. If this calf comes out red, you may have just won the lottery.

# Top Dollar Angus Feeder Calf Program

## Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

### How it Works:

Our program begins with a FREE genetic evaluation based on the current/past herd sires used in your program. We evaluate the sires used in your herd based on their growth and carcass merit characteristics. A herd that qualifies for Top Dollar Angus has cattle that are at least 50% Angus or Red Angus and also ranks in the top 25% of its respective breed for growth and carcass merit.

Once qualified, our team provides boots on the ground to share this valuable information with buyers looking for high quality cattle that will go on feed and perform. Our team has experience coast to coast and works directly in all channels (video, local auction, direct and internet). Plus, we have the resources to provide a very fast turn-around.

### What our Customers Say:

*"Top Dollar Angus is a program that benefits all levels of the industry. The seedstock producer is rewarded for providing superior genetics to the commercial cattleman, who in turn supplies the feeder with efficient cattle that will produce top-end carcasses. As Top Dollar Angus continues to raise their qualifying standard, these cattlemen will have to up their game to purchase the genetics that will fit the program. These cattlemen will see a return on investment when offering reputation feeders at market time."*

— Jon Pedotti — San Simeon Creek Ranch, California

# Red Angus Guide to EPDS and Indexes

**ProS...** Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

**HB .....** HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

**GM.....** GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

**CED .....** Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

**BW .....** Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

**WW .....** Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

**YW .....** Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

**ADG .....** Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

**DMI .....** Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

**MILK .....** Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

**HPG .....** Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

**CEM .....** Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

**STAY .....** Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

**MARB....** Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

**YG .....** Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

**CW .....** Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

**REA .....** Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

**FAT .....** Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
