We would like to extend our thanks to our existing customers and a welcome to new ones. We appreciate your interest in our program. We can all agree it has been a challenging time for everyone. But we continue to have faith that things will turn in the right direction.

The ranch is all dryland, so we rely heavily on mother nature. The cows must be efficient in these dry years to make a living. We strive to produce cows that are highly maternal. This includes many things such as easy fleshing, soundness, mothering ability and phenotype. We believe phenotype is of the utmost importance when selecting cattle. EPDs are a tool to help select them but not to be relied on completely. We strive to make improvements to our herd every year. By making these improvements, we are developing a more consistent herd, which provides a deeper selection to use as replacements. With these times it is more important than ever to have cattle that will be profitable.

We are extremely excited and grateful to be offering this set of bulls to you. Please feel free to come for a visit and view the bulls any time. If you can't make it out to the ranch please take a look at pictures, as well as the videos on the website. Feel free to give us a call with questions or concerns.

Thank you again!
