LUFKIN CATTLE COMPANY

Wednesday, March 18, 2020

11:30 A.M. Lunch • Sale at 1:00 P.M. MST • At the Ranch • Salmon, ID

Auctioneer:

Trent Stewart - Redmond, OR

Press Representatives:

Jared Patterson - American Angus Association 208-312-2386

John Andras - Western Livestock Journal 406-670-5074

Mark Frisbie - Western Livestock Reporter 208-890-4517

Jeff Thomas - Agri-Media Livestock 406-581-8859

State Brand Inspector:

Jay Wiley

Website: www.lufkincattlecompany.com

Sale Location:

**Sale held at the Ranch
71 Price Creek Road**

- 17 miles south of Salmon, Idaho
- 32 miles north of Leadore, Idaho
- Traveling on Highway 28, turn west on Haynes Road, go about 1 mile then right on Price Creek Road for about another mile heading north.

Carl Lufkin • 208.303.0438 • LufkinCattle@Gmail.com

Dear Friends,

Welcome to our 5th Production Sale. As many of you know, we started selling bulls in 2004. There is nothing new about the breeding philosophy exemplified in this set of bulls. Our program will continue to be breeding cattle with strong maternal traits, calving ease, and growth - practical range cattle with some capacity and volume. Check out the EPD Distribution on our sale bulls – note that our average bull genetically is in the top 85% of the breed for CED and top 75% for weaning weight.

We have broadened the herd genetics with our sire battery this year. We are featuring sons of Sitz Logo 12964, Sitz Stellar 726D, TEX Playbook 5437, and Riverbend 1682 E219. Each of these bulls brings a little something different to the table.

The sale order is by size and growth performance to early February. There are good bulls throughout the sale. We believe in performance records. We have not subscribed to the notion that you can learn everything about an individual from DNA. The accuracy of EPDs from just Pedigree and DNA is really poor, consequently the possible change is really high. We still collect all actual data including Weights, Ultrasound, and PAP score. Most of the bulls have complete information. This year we DNA tested most of the bulls. You can look up any of the bulls by registration number on the Angus website (www.angus.org) and see that the EPDs are as accurate as you can get without getting calves by the bulls, they are not just calculated from pedigrees and DNA. If you would like more information than is printed in the catalog on any bull, just ask us – our records are open.

Cattlemen are finally getting paid for good calves with some program behind them. In 2019 on the video auctions it was not uncommon to see a price spread of \$20-40/cwt for calves of similar weights from the same geographic area if the producer could demonstrate outstanding genetics and an excellent animal health program. Buyers are finally recognizing that there are huge value differences in calves from generic and program herds.

From end to end, this is the most phenotypically correct set of bulls we have ever offered for sale. We look forward to seeing all our old friends and making some new ones at our sale barn on Price Creek. The bulls won't be at the ranch until about mid-March, but if you get over our way before the sale, we would love to show you our cows and talk cattle with you.

The bulls were fed again this year at Riverbend's feedlot in Dillon. We would like to thank Jason Ward and crew for doing such a great job. The bulls gained just what they were projected to gain and they aren't fat.

Carl & Robin Lufkin Family

RON FRYE | MARKETING

Welcome To The Lufkin Cattle Company Annual Bull Sale!

It's once again my pleasure to assist this outstanding ranch family with their Annual Bull Sale.

I've been through the bulls several times and can answer any questions you may have about an individual bull or a sire group of bulls. I will also be available sale day to assist anyone that cannot attend the sale in person.

I believe the beauty of Lufkin Cattle Company is two fold. First their understanding of the commercial cattle industry is on par with anyone in the purebred industry, and because they run a large commercial herd themselves it gives them insight that other breeders may not have. Carl understands just how important bull selection is on a commercial operation, from a live calf to creating a load of calves that are in demand from a multitude of feeders. Calves that have eye appeal, weight, and end carcass merit a win everyday wherever they are sold. Secondly, Carl understands how important your family is to whatever operation you're on, because his is extremely important to him. The quality of bulls bought this spring will leave a lasting impact on the cow herd and the family that owns them for many years to come.

Carl has spent decades perfecting his approach to breeding high quality Angus genetics. He will tell you that his commercial customers in the seats on March 18th are the reason for his purebred journey. The relationship between purebred breeder and commercial cattleman needs to be one of trust and honesty, it is in full view at Lufkin Cattle Company. I hope you can be with Carl, Robin and the entire family for a truly special event.

Ron Frye 406-600-7514 (call or text anytime)

SALE INFORMATION

We try to provide our customers with as much information as we can on each bull in the sale. This year we genomic DNA Tested most of the bulls with the AGI test. So, the EPDs are a result of both the DNA and the actual performance of the bull. The bulls were weighed off test the first week of February, so a handful of bulls were too young to have “official” Yearling Weights. Those numbers are marked NA (Not Available) in the catalog.

When we DNA tested the bulls, we found that we had misidentified the Sire of four bulls. Since we have DNA tested all the sires we used, we were able to identify the correct sire on each bull. The pedigrees are correct in the catalog.

MANAGEMENT PROGRAM

Last year we calved about 285 cows. We handle the cows just like commercial cattle. Cows never eat anything but grass and hay. Mature cows with heifer calves and replacement heifers are summered on BLM range on Baldy Creek. Mature cows with bull calves spend the summer at home or on Sandy Creek. All young cows were pastured at Scott Tyler’s Ranch on Mill Creek. After weaning, all cows winter pasture on wet meadows along the Lemhi River. We start feeding the young cows in mid-December. The cows are comingled for calving, then separated into age groups again with their calves. None of the females on the ranch ever receive any grain – this is a grass deal.

GENETIC PLAN

Our whole deal is developing cattle that will make commercial producers money. We focus on light birth cattle to reduce your labor load and result in more live calves at weaning. We focus on growth because you get paid for pounds. We try to stay away from huge frame cattle and excessive milk production. We don’t spend much time checking out what bulls are popular. We focus on functional cattle that work under range conditions.

HEALTH PROGRAM

Our health program is aimed at prevention. We vaccinate at branding with 8-way Clostridium and modified live IBR-BVD-PI3-BRSV. We give the same vaccinations plus Pasturella a couple of weeks prior to weaning. The heifers get Bang’s vaccinated after weaning. About a month before breeding, the yearling heifers get another shot of IBR-BVD-PI3-BRSV. On the day the bulls are examined for breeding soundness, they get 8-way Clostridium and IBR-BVD-PI3-BRSV. We also give a wart vaccine to the bulls to reduce the number of penile warts. This herd has been on a modified live BVD vaccination program for so long, that it is pointless to test for persistently infected BVD individuals. We tested a couple of times and have never found even one in the herd.

PATHFINDER COWS

Pathfinder cows are the cows in the herd that always calve on time and raise a calf at least 5% heavier than the herd average. A cow has to raise three calves to qualify. We currently own **29 active Pathfinder cows. Upward 307R, Hero 0616, Alliance 431N, and Sitz Final Statement 618X** are Pathfinder bull that we proved. In the Angus breed, less than 1% of cows are Pathfinders. In this herd, over 10% are Pathfinders. **All Pathfinders will be marked with the pound (#) sign in their pedigrees in this catalog.**

You can be sure that if a bull makes it to the sale on this outfit, he is fertile, healthy, functionally sound, and his performance data and EPDs are as accurate as we can make them.

EXPLANATION OF TERMS USED IN SALE BOOK

INDIVIDUAL PERFORMANCE

Birth Weight (BW) – Actual weight of the calf within 24 hours of birth. It is affected by age of fetus, age of dam, feeding level, temperature during late fetal development, and genetics for birth weight.

Weaning Weight (WW) – Weight at weaning adjusted to 205 days and for the age of dam.

Weaning Weight Ratio (WR) – A within herd ranking of adjusted weaning weight. Calculated as the calf's adjusted weight divided by the average weight of the group with which he was raised to weaning. A ratio of 100 is always the average of the group.

Yearling Weight (YW) – Weight at Yearling adjusted to 365 days and for age of dam.

Yearling Weight Ratio (YR) – A within herd comparison of all bulls tested based on adjusted 365-day weight. A ratio of 100 is the average of the contemporary group.

Scrotal Circumference (SC) – Adjusted scrotal circumference in

centimeters. This measurement is correlated to two things – age at puberty of daughters and serving capacity of bulls. SC is affected by bull age, feeding level, bull weight, season, and age of dam. These bulls were measured 1/27/2020 by Dr. John Copeland. Because of season and age, the younger bulls will develop rapidly by sale date.

Cow Production – Reported as number of calves weaned and average WR and number of calves tested to Yearling and average YR. These bull calves are included in average YR (ex. 5/100, 4/99).

PAP Score – We PAP Tested every bull in the sale. The bulls were tested January 29 at Riverbend's feedlot in Dillon by Dr. Ben Abbey. PAP scored animals are assigned a specific number. This number is a predictor of susceptibility to HMD (High Mountain Disease). Animals should be evaluated in ranges rather than by specific numbers. Animals over a score range (2-4 points) have the same likelihood of succumbing to HMD. In general, for bulls tested at 4000 to 5500 feet, and used at elevations up to 7500 feet, bulls scored 34-39 have a Low Risk, 40-45 have a Moderate Risk, and 46+ have a High Risk and should not be used. More than 60% of the bulls in this sale are considered Low Risk.

EXPECTED PROGENY DIFFERENCES (EPDs)

Calving Ease Direct (CED) – This EPD is a direct expression of calving ease when the bull is bred to yearling replacement heifers. In this case, the higher the number, the less calving difficulty. This measure is highly correlated with BEPD. Breed Average for non-Parent bulls in 2020 is +6. Lufkin Sale bulls average +10.

Birth EPD (BW) – The weight in pounds that this bull should add or subtract from his calves at birth when compared to the average of all Angus bulls in use in 1979. Breed Average for non-Parent bulls in 2020 is +1.3. Lufkin Sale bulls average +0.3.

Weaning EPD (WW) – The weight in pounds that this bull should add to his calves at weaning when compared to all Angus bulls in use in 1979. Breed Average for non-Parent bulls in 2020 is +54. Lufkin Sale bulls average +61.

Milk EPD (MILK) – The additional weight in pounds that should be produced by daughters of this bull when compared to daughters of the average of all Angus bulls in use in 1979. Breed Average for non-Parent bulls in 2020 is +25. Lufkin Sale bulls average +29.

Yearling EPD (YW) – The weight in pounds that this bull should add to his calves at yearling when compared to the average of all Angus bulls in use in 1979. Breed Average for non-Parent bulls in 2020 is +96. Lufkin Sale bulls average +107.

OTHER MEASURES NOT IN SALE BOOK

Ultrasound Data – The bulls were ultrasounded 2/18/20, that data will be available on our website and at the sale.

Dollar Values (\$W & \$F) – These values are based on the performance, ultrasound, DNA, and pedigree information available. They are an estimate of how much money each

offspring of the bull will produce at current prices at the end of weaning or feedlot phases of growth. Current breed averages for non-Parent bulls are shown in the table. Final data on the Sale Bulls will be available on our website and at the sale.

Breeding Soundness Examination – The bulls were examined by Willow Creek Animal Hospital. Any bull not meeting the Society for Theriogenology standards will be culled. A copy of the Breeding Soundness examination will accompany the registration papers to the buyer for each bull.

REFERENCE SIRE

Logo is becoming one of the great bulls of the breed. There are more things right about him and his progeny than any bull currently in use. These **Logo** cattle really grow on you. They are pretty common at birth, get better at weaning, and you really like them as yearlings. **Logo** gets exceptional growth without huge frame size. We have produced about 100 calves by him. We calved the first daughters last spring. They are exceptionally docile and easy to handle. Logo is definitely a teat and udder improver. The Heifer Pregnancy number is real. These are fertile cattle. **There will be about 12 sons in this sale.** They have continually improved as they grew and you are going to like them. They have average BW 80 pounds, BEPD -0.2 pounds, WW 702 pounds, WR 101, YR 102, WEPD +60 pounds, and YEPD +102 pounds.

Stellar is a young bull that you are going to hear a lot more about. His first few sons sold in Sitz's fall sale. He sired the high selling bull, Lot 28, at \$165 thousand. We raised 30 Stellar calves in 2019 out of a cross-section of the herd. From birth through the bull test, they were the most outstanding sire group. They are light birth and middle of the road for frame size with outstanding growth. Stellar checks about as many boxes as any sire we have used. **There will be 10 sons in the sale.** They averaged BW 79 pounds, BEPD +0.4 pounds, WW 699 pounds, WR 106, WEPD +70 pounds, YW 1118 pounds, YR 104, and YEPD +119 pounds.

Payweight was our pick of the bulls in Riverbend's 2017 sale. He is a Basin Payweight 1682 son. This is a pedigree that we have been trying to add to our herd. We have raised 59 calves by this sire, mostly out of first calf heifers. They are moderate frame cattle with excellent growth. Payweight really excels in marbling and \$Beef. **There will be 16 sons in the sale.** They averaged BW 74 pounds, BEPD +1.3 pounds, WW 643 pounds, WR 105, WEPD +68 pounds, YW 1105 pounds, YR 104, and YEPD +124 pounds.

REFERENCE SIRES

Blacksmith cattle are light birth with good growth performance. We raised 22 calves out of a variety of cows in 2019. **There will be 11 sons in the sale.** They averaged BW 77 pounds, BEPD +0.5 pounds, WW 649 pounds, WR 101, WEPD +62 pounds, YW 1083 pounds, YR 99, and YEPD +110 pounds.

We are always looking for a little different pedigree to try on our cows. Jim Sitz was high on **643D** so we decided to give him a test. These cattle will not do a lot for growth in their calves; however, they will definitely improve carcass traits and reduce mature size in the daughters. **There will be about 7 sons in this sale.** They have average BW 81 pounds, BEPD +1.4, WW 687, WR 100, YR 99, and YEPD 99.

Lufkin Cattle Company Guarantee

**We are not lawyers, so our guarantee is simple:
If you are unhappy with any bull you purchase from this sale,
call us and we will make the deal right for you.**

Call Carl Lufkin 208-303-0438

Sale Terms and Conditions

This sale is being conducted under the sale terms and conditions adopted by the American Angus Association. If you want to read the entire terms, go to the Angus website (www.angus.org).

Bidding

Each bull will be sold to the highest bidder. The auctioneer will settle any disputes as to bids and his decision shall be final.

Terms

Terms of the sale are cash unless credit arrangements are made with Carl or Robin Lufkin.

Transfers – Registration papers will be transferred to buyer if he informs the sale clerk.

Health

Interstate health papers will be furnished for each bull requiring them.

Announcements

Any changes from information in the Sale Book will be announced from the auction block.

Retained Interest

Lufkin Cattle Company reserves the right to retain a breeding or AI interest in any bull sold in the sale. Retained interest will be announced from the auction block.

Genetic Defects

All bulls in the sale are tested free of genetic defects or have no potential carriers in their pedigree. Lufkin Cattle Company reserves the right to obtain DNA for testing from any bull suspected of carrying a genetic defect.

Rights and Obligations

The above terms and conditions shall constitute a contract and shall be equally binding on both buyer and Lufkin Cattle Company.

Bull Delivery

Bulls will be delivered free to Idaho and adjoining states.

Liability

All persons who attend the sale do so at their own risk. Lufkin Cattle Company assumes no liability, legal or otherwise, for any accidents that may occur.
