Real-time Auctions

Welcome

Thank you for taking the time to view our offering of Red Angus genetics that have been developed using our eastern Montana environment to sort out the sustainable traits that make a cow herd profitable. Throughout this catalog we have assembled information on this year's offering that we feel is beneficial to aide you in sorting through the bulls and hopefully selecting the best genetics that will help you meet the goals of your operation. If there is additional information that we can provide that is not found within the catalog, please contact us so we may provide additional information to help you in your selections.

Throughout the years of being involved in the Red Angus business, we have experienced a variety of environmental challenges that has changed how we operate our ranch, select our genetics and manage our time. 2023 was a year that brought new challenges along with opportunities to grow and adapt to the challenges that were presented to us. The challenges most of the time are out of our control such as: weather, parasites, labor and a whole host of others. No one is exempt from these challenges. We know that in 2024 we will be faced with a new set of challenges that will help us develop enhancements to our management practices. We continue to allow the environmental challenges to improve our genetics so that our business will remain financially sustainable through each trial that comes our way. Through these decisions, our goal is to develop genetics that will help our customers enhance their cowherd to be economically sustainable within whatever environment they are placed or developed in.

The U.S. cattle industry has seen some record setting prices throughout all classes of cattle in the second half of 2023 and it appears that the current cattle inventory would support an extension of those prices into 2024 and maybe beyond. Within our region, we have seen a large number of cull cows hit the market from August until now which is a result of the lower pregnancy rates brought on by grasshoppers, stable flies, and hay produced in 2022 that was below the nutritional needs of the cattle being fed. Some producers saw anywhere from 15-65 percent open rates in both replacement heifers and cows. This reduction in cow numbers coupled with drought in parts of central and southern U.S. that reduced the cowherd even more will have an impact on our cattle markets going forward.

As we put this sale offering together, the bulls will sell in catalog order. We begin the sale with a pen of high indexing moderate birthweight bulls and follow with a group of high indexing, low birthweight heifer bulls. After these first two pens we arrange the remaining pens by sire groups allowing for good bulls to be cataloged from the beginning to the end. Some pens will have a mix of one or more sires if there isn't enough progeny from a sire group to fill a pen. We hope that as you view the bulls live, via video or within these pages you will find consistency in type and kind throughout.

Additional information such as scrotal measurements and frame scores and carcass EPDs will be posted on our website as well as DV Auction as they become available. We look forward to meeting and visiting with new and existing customers that have a passion for the ranching lifestyle that we get to live every day.

May God Richly Bless You,
Bruce, Tena, Jaclyn Ketchum and Jeff, Cele, and Blaze Menees

As servants of the Lord, we are striving to be stewards of the land and cattle that He created and allowed us to manage so that we may glorify Him.

Sale Information

Milk Creek Reds Bull Sale Saturday, March 16, 2024

1 p.m. MDT • Milk Creek Reds Ranch • Plevna, MT

Selling:

**100 Yearling Red Angus Bulls
3 Red Angus Donor Cows**

SALE DAY LUNCH:

Complimentary lunch and pie will be served at 11:30 a.m.

SALE LOCATION:

At the Ranch (see map on page 2 for directions)
2093 Plevna Road South, Plevna, Mont. 406-778-3819

CATTLE VIEWING:

The bulls can be viewed at Bruce and Eric Bowman's feedlot 1 mile south of Rhame, N.D., until March 13th. After this time the bulls will be at the ranch.

SUPPLEMENTAL SHEET

Supplemental sheet with updated carcass EPDs, scrotal measurements and frame scores will be available online a few days before the sale and on sale day.

SALE VIDEO

The video of the sale cattle will be available to view by March 1, 2024 at www.milkcreekreds.com or www.dvauction.com. If you don't have high speed internet or are unable to view the video over the internet, contact us for a DVD on the sale cattle.

SALE FORMAT:

Once again we will be offering the bulls through a rancher's auction. We will have an auctioneer that will auction the sale in a relaxed atmosphere. Each interested buyer will be able to bid on the bull of their choice with low pressure and the ability to be comfortable.

Online bidding will take place on DVAuction. Go to www.dvauction.com.

PHONE ORDERS

Buyers unable to attend the sale may call or send their bids to the owners, Bruce or Tena Ketchum. If you would like to discuss the sale offering, call us and describe your needs and budget and we can select your genetics for you. We can bid on the animal for you and you pay only the bid price established by the auction. Bids are handled in confidence on all orders. If there are several people needing to use this method for the sale we will set up a conference call for you to call into during the sale. Please call a few days in advance if this is needed so that we may set this up and get you the necessary phone number and information ahead of sale time.

SALE CONTACTS:

LIABILITY

All persons who attend the sale or view the cattle do so at their own risk. The owners assume no liability, legal or otherwise, for any accidents that occur on the sale or viewing premises.

Catalog and video online at www.milkcreekreds.com

ACCOMODATIONS:

Baker, Mont.
(If planning to stay please reserve early as the oil field activity can cause room shortages.)
Montana Motel.....406-778-3315
Red River Inn.....406-778-3321
Miles City, Mont.
Sleep Inn & Suites.....406-232-3000
Miles City Inn & Suites.....866-599-6674

TERMS

The terms of the sale are cash. All settlements will be made with clerks of the sale immediately following the conclusion of the sale and before any cattle will be released. We will follow the Terms and Conditions set forth by the Red Angus Association of America. Announcements made by seller on sale day take precedence over any statements printed in this catalog or advertisement.

DELIVERY

We will provide delivery up to 500 miles. Over 500 miles we will work with the buyer to make arrangements on delivery. **A \$100 credit per bull will be applied to the purchase price of the bull if the new owner picks up the bull(s) on the day of the sale.** Delivery of the bulls will start the week after the sale.

BULL HEALTH PROGRAM

The bulls received Vision 7 at branding, preconditioned in August with Bovishield Gold One Shot and Vision 7 Somnus. The bulls were boosted with Bovishield Gold in October. They received a Fusogard injection in December and a booster in February. The bulls were drenched in November with Safe-Guard, poured with Justify in November, StandGuard in December and Permethrin CDS in February. Semen evaluations were performed by Fallon County Vet Service prior to the sale and all the evaluation forms will be available sale day. Bulls that do not pass the semen evaluation will be available for sale after they have a satisfactory evaluation.

BULL DEVELOPMENT

The bulls are fed on a ration to develop them into sound functional useable bulls that will work in every environment. The ration consists of rolled corn (7.5 lb. average), dry distiller's (2.25 lbs.), and the balance of chopped hay that consists of grass, alfalfa, barley hay for a 48 mcal diet, along with a vitamin-mineral supplement. This ration is developed to use 1% of the feed base being grain to reach our goal of 2.5 lb. gain. They have been developed at Eric and Andrea Bowman's feedlot which is located 1 mile south of Rhame, N.D.

SEMEN INTEREST

Milk Creek Reds is retaining one-half revenue-sharing semen interest in all bulls in the sale. The retained semen interest by Milk Creek Reds allows us to collect semen, use semen on the bull in our herd, as well as share in semen revenue if the bull would develop interest to be used in other herds or semen marketing companies. Any semen collection would be at the buyer's convenience in the off-season use. Full possession and full salvage value sells on all bulls in this sale.

Sale Information

WATCH AND BID ONLINE AT DVAUCTION.COM

Can't make the sale?

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DV Auction. To watch or bid online, simply complete the following steps:

- Visit the DVAuction web site at www.dvauction.com
- Click on the "Register" tab
- Enter a user name, password and your contact information.
- Click on "Apply for Bidding."
- Select the sale from the list of other auctions and click "Apply".
- Complete the process by filling out the Banking & Lending information requested.

Be sure to include a personal contact at your bank, we will contact them in order to get a credit reference.

If you would prefer to be approved using your credit card, call (402) 474-5557.

Please be sure to apply for bidding at least a day in advance of the sale—every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchases.

Please Note: High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at (402) 474-5557 or email support@dvauction.com.

Proxy Bidding: If you can't access a computer during the sale, you can now place a "proxy bid" through DVAuction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DVAuction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Scan this code with your smart phone for directions to the ranch.

RIDGE ADMIRAL 3411

tered customers and the oldest females are now 9 years old and bringing in good calves while functioning very well in our environment. You will see some of his daughters bringing bulls to this offering and you will continue to see sons offered in future sales. When you study the numbers he is a bull that does well on all the indicies and yet has growth EPDs that are not what some people would say are ideal yet it is where we like it to be for the female to fit our eastern Montana environment. Owned with Sandbur Ridge Red Angus.

are the largest sire group in our cow herd because of the ability of this sire to produce higher performance with good carcass and leave the right size and kind of females in the herd. If you are looking for bulls that offer maternal, growth, and carcass traits look at the 4304 sons. The visitors that we have go through our cowherd usually pick out the 4304 daughters due to their appearance. They also are females that bring in above average calves in the fall of the year.

RED MINBURN COPENHAGEN 3Y

point that every cow we asked Joanne Unger about was a Copenhagen daughter. We viewed Copenhagen as an 8 year old bull and found him to be very sound and holding his condition. When U2 dispersed everyone else found the Copenhagen daughters as well and they were one of the highest selling sire groups in a record setting sale. Through the calving season, the Copenhagen daughters have nice udders and we look forward to what these cows are doing in our herd. We will only have ET calves from this sire from now on.

Fusion 5202 is a bull that the Lelands selected out of our 2016 sale. He has been a good calving ease bull for them and has provided both bulls and heifers that have been well received by their customers. We have been pleased with the calving ease that he has provided after calving three sets of heifers bred to him but the nugget in these genetics is the females he produces. He has numbers that are very attractive to the industry, minus his growth EPDs, yet his growth numbers will allow his daughters to be able to thrive on less inputs which equates to a better profit margin for the cow/calf producer. Owned with Leland Red Angus.

Foreman is a A.I. sire from 5L that we used the past 4 years because he has the pedigree and EPD profile that will fit in our program. We used him on both heifers and cows to get a good test across our female base. His sons and daughters did well at weaning, yearling and ultrasound. We are currently calving the fourth set of heifers bred to him and the second set of daughters and like the results. We feel he is an outlier that offers more growth than we normally use yet his daughters are getting bred and staying in the herd with limited feed inputs.

After 3 trips to Canada studying the cow herd at U2 we came to the conclusion that we needed to sample a pedigree that worked multiple times in their program. We selected Money Talks out of their 2019 bull sale after studying the bull calves the previous fall as well as at the sale and studying the cows in the spring and fall. We used 530F on both heifers and cows A.I. and then turned him with 50 plus head of first-calf heifers for natural service and had only 3 opens. He has now recorded 256 progeny in four calving seasons and we are very pleased in the balance of birth, performance, carcass and phenotype. His second and 3rd calf heifers that are currently calving are displaying excellent udders and feet while being good mothers.

Ridge Oak Canyon is a sire that we purchased to use as a cleanup sire and his progeny have out performed what his EPDs predict him to be. His parents are old genetics that don't have much for EPDs yet his progeny are proving that wrong. I am very pleased with his sons in the offering and daughters that we have coming into the herd. Owned with Sandbur Ridge Red Angus.

We begin the sale with an Ultra Kool son that has performed well from birth to a year of age. He is moderate framed, deep and thick. His performance is consistent with what his dark red Vigilante dam has done on her first three calves and his maternal pedigree stacks three cows still in production on the ranch with MPPAs of 105 or better. He also competes well in the marbling class, ratioing 125 against his contemporaries.

Lot 2 is closely related to Lot 1, descending from the same cow family and being sired by Ultra Kool. When you study his phenotype, his length, depth and thickness seem to stand out. 3214's dam has consistently produced above average performance and was the first cow to calve in 2024. She is an attractive, long, moderate framed cow with a beautiful udder. He also brings some carcass traits along ratioing at 139 for Marbling and 102 for Ribeye.

This bull hits all the marks. He has a moderate birthweight, high growth and comes from a good cow. In terms of looks, 3222 is about the deepest, thickest-made bull in the group. He's moderately framed but will definitely add pounds at weaning. His dam has a MPPA of 105. She is solid cow with a good udder and feet and good fertility.

Lot 15 is a calving ease Fusion son that you will want to keep the replacements out of. His paternal and maternal granddams offer longevity with great feet and udders along with above average performance. To top it off he also brings a balanced EPD and Indices profile that ranks well in the right categories.

5L Life is Good has produced very nice calving ease sons that combine low birth weights with above average growth and packs this into a nice phenotype that is pleasing to the eye. Lot 16's young Money Talks dam produced this calf and bred back to calve in the first cycle as a 3-year-old.

This Fusion son comes from a dam with a 101 MPPA and an average daily gain of 3.2lbs./day. His actual birth weight combined with his moderate Calving Ease Maternal provides confidence that this bull will sire offspring that will calve out nicely while still having some later growth which is reflected by his Yearling Weight Ratio.

Lot 46 has three generations of cows on the maternal side of his pedigree that have strong production records as well as longevity. His dam is only 4 but the three generations before her all made it to at least 13 years of age or more. 3328's production record has proved that he can hold his own within a large contemporary group of bulls.

We originally kept 0401 to use cleanup to make great females like the ones in his pedigree but he is also producing some bulls that perform well above average and bring a nice EPD and Index profile. Lot 50 is a bull with good length and thickness while ranking in the top 10% for Herd builder and ProS.

This ADVOCATE son ranks in the top 3% for the Herd Builder index, the top 4% for the ProS index and top 1% for the Heifer Pregnancy EPD. This bull had an average daily gain of 2.96lbs./day putting him in the top 33%, this coupled with him having 104 to 107 ratios for BW, WW, and YW makes him a bull that will produce females that won't eat you out of pasture but will still put on pounds of beef.

Lot 86 is the only Copenhagen son that we have in the offering this year due to our depleted supply of semen. He is a ET son out of the Mercedes 14X cow that we purchased from Bowles J5 through the Nile. He should produce progeny with longevity, performance and great feet and great udders in the females.

We purchased an embryo lot through the NILE from Clark Red Angus and Lot 87 along with two full sisters were the result. His sire, Spartacus has been widely used throughout the breed and his dam is a top producer in the Clark herd.

After seeing many daughters of 5L Body Builder, we purchased semen and flushed Lakota 173 that way. We are pleased with him and his full sisters that resulted from this mating and have more natural calves hitting the ground this year.

This True North son is out of Cele's donor cow that descends from the Lakota line. Longevity, strong fertility and high performance runs deep in this line. Being in the younger part of the offering this bull has been able to grow along side the rest of them with ease. He ratios right at the top for weaning and yearling weights. This bull would be a great addition for anyone looking to add performance and frame size to their herd.

3376 is closely related to CMK True North 3351. His mother is the daughter of Cele's donor cow, continuing the long line of longevity, strong fertility and high performance. This larger frame bull has surpassed most of his contemporaries with ease. Quite impressive for being the last calf born.

Donor Cows

RED XO CROWFOOT LADY 2444Z

genetics for us to use in our herd through daughters and granddaughters. We held her from being bred this past spring so that we could flush her and were pleased with her ability to average 12 number 1 embryos between the two flushes. She has been on rest since her last flush on 7/21/23 and sells open ready to flush.

316 is our best Redstone daughter that we have raised and has produced daughters that we have retained in the herd as well as one son. Her production record speaks for itself as she has earned a 112 MPPA within our herd. She is pushing an upper 5 frame and has

Ranch Philosophy

The cattle industry is constantly changing and feeders and packers seem to be the drivers in directing that change. Their ability to direct change is related to the concentration of ownership within these two segments of our industry. Both segments keep increasing the size of animal that they want to feed and harvest because of their efficiency of producing more pounds of beef per animal and reducing the costs by feeding and harvesting less head of cattle and leaving them within the feedlot for longer periods of time. What impacts their bottom line is diametrically opposed to what impacts the cow/calf producers bottom line.

In our segment of the industry, most cow/calf producers raise cattle in an environment that has limitations to what it can produce hindering our ability to meet the changes without increasing input feed costs to sustain the larger, higher output cattle that the feeders and packers are looking for. Coupled with this the feed input costs has increased dramatically over the past four years compounding the problems to reach profitability within our segment of the industry.

I am thankful that our Red Angus Association staff is working hard to educate the industry on the quality of Red Angus cattle and how they can reach all the requirements in the branded packer programs that have been set for Angus cattle. Through this effort, the USDA has recognized Red Angus as Angus so that they are able to qualify in all programs with the exception of CAB which is owned by the Angus Association. This education is going to take time to develop traction and will eventually open more marketing opportunities for our cattle. In the meantime, the industry is using excuses to discount red hided cattle so that they can add more profit to their segment of the industry. With the current cattle inventory, we are hopeful that the next three years will see above average feeder cattle demand which will diminish the ability for discounts because of hide color.

We continue striving to produce cattle that will be able to thrive in a grass-based environment without any inputs other than salt, mineral and some hay when needed due to drought or severe winter conditions. When you study the genetics that we are using you might ask, why don't you use higher growth sires to increase the weights of your calves? The answer lies in what we have discovered when we have attempted to do that very thing. Most sires that we have used to accomplish this, with exceptions of a few outliers, tend to produce females that have a higher percentage chance of failing to breed as yearlings or first-calf heifers because they have a higher energy requirement than what our natural environment can provide. That can become very expensive when you account for the time and dollars invested in developing those females to that stage.

The sires that we are using will still push the envelop of producing offspring with performance that is limited by our environment on any given year because our weaning weights can fluctuate 50-100 pounds based on when and how much rain falls from the sky. We continue to search the breed for the outliers that will push the performance as well as carcass traits but will not give up the fertility and longevity developed within the herd which are the key profit drivers for any cow-calf operation.
