- Going Strong at 9 years of age • Superior phenotype and style
- Excellent Pap Sire and very gentle • High customer satisfaction on daughters • He will clean up bad-fronted cattle • Super Docility, Excellent feet • Calving-ease with added fleshing ability • A Strong maternal Density pathfinder Dam • A highlight for Pap programs

Welcome to the McConnell Angus Ranch
Developing Bulls for Longevity and Feed Efficiency

Welcome Fellow Cattlemen, Producers and Friends!

The McConnell Angus Family invites you to our Annual Bull and Female Sale, Friday, **January 28, 2022** at 12:30 pm MST at the Ranch, 5740 Road 52N, Dix, Nebraska.

It's good to be a cattleman and in agriculture - it is our future.

We are grateful for your trust in our program and are thankful for your purchase of our cattle. Our success is because of you, and we hope to continue building that relationship in the future. We strive to improve the quality and performance of the Angus breed in our operation. Because of that, we are excited about our offering in this sale and the value they will bring to your program. What is available today in our genetics genepool helps us breed cattle that have a greater chance for more profit now and later. Our focus each year remains on performance and maternal traits, along with the basic traits of fertility, feet, structural soundness, longevity, fleshing ability and productivity. In turn this adds efficiency and profit.

Once again, we have an excellent selection of High Altitude PAP tested bulls. Our bulls have been at Laramie, WY, with a PAP test elevation of 7360', tested by Dr. Tim Holt. If you are in need of high-altitude bulls, you can be sure these bulls will work for you.

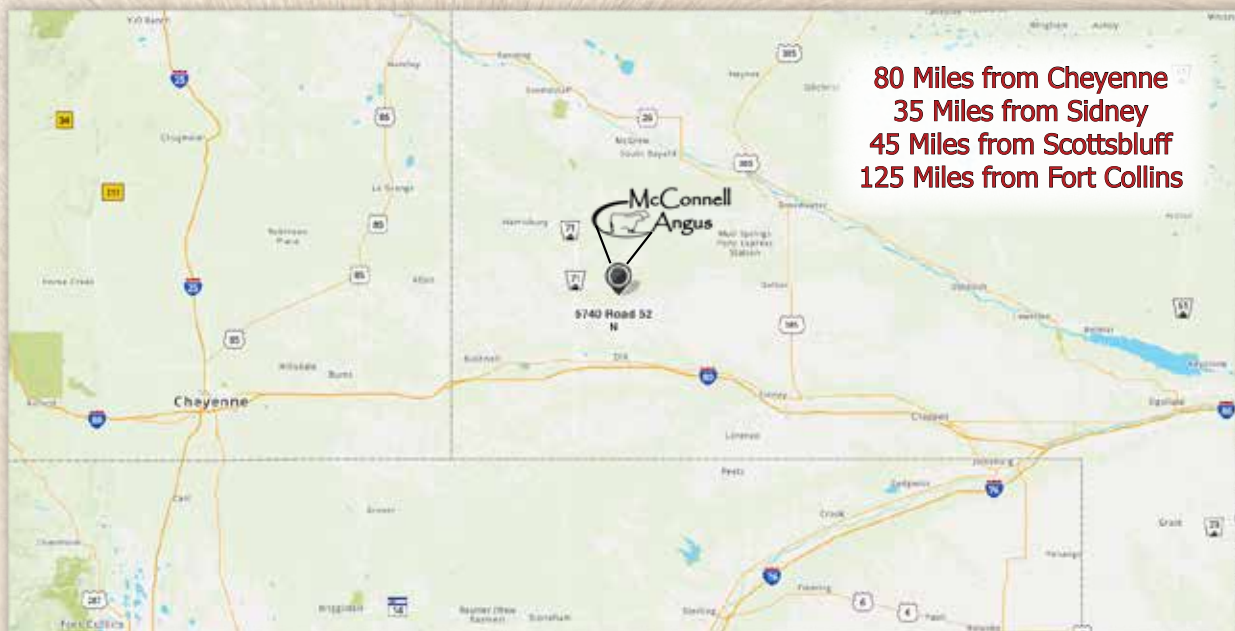

As always, we stand behind our bulls. Our priority is that they work for you and increase your profitability.

Our sale will be broadcast live on DVAuction. Please register with them at least one day before the sale at www.dvauction.com.

Enjoy our complimentary meal starting at 11:00 am sale day. We appreciate your continued support. Visit the ranch and check out the bulls any time. Feel free to contact any of us for additional information and visit our web page, www.mcconnellangus.com for videos and pictures of the lots selling.

Thank you! We look forward to seeing you sale day - **Friday, January 28th.**

Sincerely,
The McConnell Family

Guarantee

All bulls selling over \$2750 are guaranteed against breeding injury for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a replacement bull is not available when needed, credit toward one bull will be given in the following year's sale less salvage value. Salvage value will be valued at \$2750 and McConnell Angus will provide credit on any amount over that. Buyers will receive whatever the amount of salvage value is. Verification of salvage value is required. Please notify McConnell Angus as soon as possible should injury occur. All claims must be made by September 1, 2022.

INFORMATION

SALE DAY: Friday, January 28, 2022

SALE TIME: 12:30 MST

LUNCH: Complimentary lunch will be served beginning at 11:00 AM.

ACCOMODATIONS: There are a number of motels in the Kimball area. These motels are conveniently located along Interstate 80/Highway 30.

Days Inn Kimball	(308) 235-4671
First Interstate Inn	(308) 235-4601
Super 8 Kimball	(308) 235-4888
Hampton Inn	(308) 254-2111

• Cabela's is 30 miles from Exit 29

INSPECTION: Bulls can be seen anytime at the ranch.

HERD HEALTH AND SEMEN EVALUATION: All bulls sell with proper health papers for interstate shipment. A rigid herd health program is followed. All bulls selling have been Calfhood vaccinated with 7 Way Somnus at branding and again at weaning along with IBR, P13, BVD, BRSV and Ivomec Pour On twice. All bulls will be fertility tested and scrotal measured and are guaranteed breeders.

TERMS AND CONDITIONS: All bulls sell under the terms and conditions of the American Angus Association.

• All AI Sires are AMF (Arthrogryposis Multiplex Free), NHF (Neuropathic Hydrocephalus Free), CAF (Contractural Arachnodactyly Free), and DDF (Developmental Duplication Free).

RETAINED INTEREST: Full possession sells on all bulls. McConnell Angus is retaining (1/3) revenue sharing semen interest in every bull in this sale.

PAP TESTING - Most Fall and Two-year old bulls were ranged and pastured at Laramie, WY (7350 -7600 Ft.). Pap tested by Dr. Tim Holt.

Pfizer 50K test: Several bulls have EPD's enhanced by Pfizer i50K  and ANGUS GS .

CALVING EASE: We have implemented the following scoring system for Calving Ease:

- ★ ★ ★ ★ Indicates an extremely calving ease bull.
- ★ ★ ★ Indicates a super calving ease bull.
- ★ ★ Indicates a calving ease bull.
- ★ Indicates a bull recommended for larger framed heifers.

• All two-year-old bulls sold out of state will meet state health requirements. The bulls will then be delivered by McConnell Angus shortly after sale.

DELIVERY: Free delivery on all bulls. However, if buyer wishes to take a Spring or Fall bull home on sale day, \$100 will be deducted from the sale price per bull. The \$100 deductible does not apply to two year olds. All two year old bulls will be delivered by McConnell Angus shortly after sale.

WINTERING: Free wintering on fall and spring bulls until April 1, 2022. We will begin delivering bulls the last week in March. Wintering does not apply to the two year olds as they will be delivered by McConnell Angus shortly after sale.

VIDEOS OF SALE BULLS: Taken in December.

www.mcconnellangus.com  

BULL VOLUME DISCOUNT: Purchase 5 or more bulls and receive 5% off of your total bull purchases.

• Announcing McConnell APP 042! A six frame power bull with a stunning phenotype. He stands in an elite crowd, 18 out of 28 EPD traits of his are ranked in the top 10% of the Angus Breed; only a few bulls can reach this pinnacle with a CED +15. This Growth Fund son is recommended for heifers. APP is the go-to bull when looking for calves that come easy, excel past weaning, and mature to an optimum package. Phenotypically, he transitions smoothly through his neck, shoulders, rib and length of body ending with a long rear quarter. His pedigree is one of the strongest in our herd, descending from the Pridella family, who has brought many herd sires and replacement heifers to our pastures. His Pathfinder grandam raised McConnell Final Choice 8036, who stood as a stud in Genex and was known for his growth, easy fleshing ability and good udder structured progeny. She is still alive and going strong at the age of 19 years old! His dam has an outstanding calving interval of 366 days on six calves and records a birth ratio of 100, a weaning ratio of 102 and a yearling ratio of 105 on six calves. Standing on stellar feet - scoring 5 for claw and 5 for angle with big scrotal and low PAP of 36.

• Representing herd bull material at its finest, this Growth Fund son blends muscle-expression, maternal strength and carcass value. This stand-out bull is attractive, clean-fronted, deep-ribbed, and smooth-made from front to back. He ranks in the top 10% or better in 10 traits: weaning, yearling, RADG (Residual Average Daily Gain), heifer pregnancy, carcass weight, ribeye, \$Weaning, \$Feedlot, \$Beef, and \$Combined. His highly productive dam is the front pasture kind descending from the Lucy family who has always been known for easy fleshing. She stacks a powerful production record with a birth ratio of 96, a weaning ratio of 101, and a yearling ratio of 104 on five calves. She also has an outstanding calving interval of 367 days on five calves. This gives her a lofty status in the herd and proves her great fertility. Good feet, big scrotal, and low PAP of 36.

• This standout Growth Fund son has a double digit CED of +10 with yearling spread of +129. He ranks in the top 2% in CEM (Calving Ease Maternal), which is expressed as a difference in percentage of unassisted births indicating greater calving ease in first calf heifers. To top it off, he ranks in the top 15% in HP, Marb, \$M, and \$W. His dam, who is one of Woodhill Broker's best daughters, is long-bodied with tremendous rib and great udder quality. She records 4 calves with a birth ratio of 99, weaning ratio of 98, and yearling ratio of 100. Good feet and big scrotal.

• Recommended for large frame heifers. This thick bull is easy to look at from every side with his wide girth and hips. Standing on great feet, he has a clean sheath and travels well. His dam is a Pathfinder out of the Miss Burgess family. She is a tremendous cow with great rib capacity and a grand production record with a birth ratio of 102, a weaning ratio of 105, and a yearling ratio of 106 on four calves. She also has high fertility with a calving interval of 363 days on four calves. Great feet, big scrotal, and low PAP.

• Recommended for large frame heifers. Here is a structurally-sound, moderate-framed, gentle son of Growth Fund. Thick topped with a powerful hip and rear leg-he will add style and uniformity. His grandsire, Upshot, was a member of the 2011 National Western Grand Champion Carload selling for \$200,000 half interest. His dam is a deep-ribbed, nice-uddered cow, recording a birth ratio of 94, weaning ratio of 100 and yearling ratio of 101 on three calves. Big scrotal, good feet and low PAP.

• Recommended for heifers. Here is a Growth Fund bull that will capture your attention from every angle. He is structurally sound with a powerful hip and rear leg. He exhibits extra neck extension, a smooth shoulder, and is wide topped with a clean sheath. His profitability comes from his calving ease, high weaning, and yearling. This is a moderate-framed size bull with top-rated CW (Carcass Weight). His dam, from the Lady Ida family, is very easy fleshing and records a birth ratio of 98, a weaning ratio of 106, and a yearling ratio of 104 on four calves. Great feet, big scrotal, and low PAP.

• Here is an exciting Monumental son that should be named Transition. His profile transitions super well from neck extension, to rib capacity, and on into his rear quarter. When selling calves by the pound or keeping replacement heifers, this bull will check the box. His easy- fleshing Altitude dam has wonderful rib capacity with an excellent udder. She is on her way to Pathfinder status by recording 2 calves with a weaning ratio of 110 and yearling ratio of 101. Big scrotal, good feet, and tremendous muscle.

EXAR Monumental 6056B - Sire of Lots 6&7, 132-136

- People's Choice in 2017 at National Western carload and high seller
- Leading edge for \$Weaning and \$Beef
- Our Likes: His length and his growth
- Offers muscle with calving-ease
- A big top and nice PAP bull

• He shows calving-ease on his top side, ideally, he would be better suited to go back on 1st calf heifers. His strength is in dry matter intake ability to convert and energy value in saving cost per year per cow. He is in the Top 15%. His productive dam records a birth weight ratio of 105, weaning weight ratio of 103 and yearling weight ratio of 104 on 10 calves.

• Recommended for heifers. Here are a set brothers built for calving-ease with added muscle in a moderate, easy fleshing package. An ideal EPD profile with a strong maternal background. Their prolific dam raised McConnell Independent 8434, the leading and top selling bull in our 2019 Bull Sale. She is a full sister to SAV Resource 1441 who is one of the breeds leading sires who passes on tremendous power, growth and great dispositions. These bulls are extra thick-topped with great muscle expression; they should leave thick steers and great replacement females.

Donor Dam of Lot's 42-44 & 141

• This bull will add a lot to the table. Starting off with the maternal side, his dam is from the Basin Lucy family and Pridella 349, the cow that produced MA Final Choice 8036 who was at stud at Genex. He has a great EPD tabulation ranking in the top 10% in yearling, scrotal, and Marbling. This gentle, deep-ribbed bull also qualifies for Certified Angus Beef and will up the marbling by bringing a .96 EPD without losing performance, eye appeal and thickness. Big scrotal, good feet and low PAP.

• A very impressive Home Town son with 15 EPDs in the Top 10% that is loaded with carcass genetics, growth and muscle. The highest weaning EPD and \$Beef selling second highest \$Combined, third highest Ribeye and fourth highest Marbling. And to top that off with a 941 pounds 205 adjusted weaning weight. He will catch your attention in the pen and on paper.

G A R Home Town - Sire of Lots 74-80

Very popular for his type and kind. One of the most heavily used bulls in 2020. A phenotypic standout - big-hipped, wide-based with an attractive herd bull presence all in a moderate stature. Calving Ease, performance and elite EPDs for carcass with a great attitude. You won't find many higher for Marbling or \$Combined and backed up by generations of proof like this one.

• Recommended for heifers. Stout made and muscle in this dominant Altitude son, he conveys herd making ability and a highly maternal pedigree. His dam is deep ribbed with a ton of capacity, the kind you want replacement heifers out of. She records a birth ratio of 99 and a weaning ratio of 106 on her first calf. His grandam is a long time doner cow in out herd and has great phenotype with a great disposition. Great feet and a big scrotal.

• His sire increases structural size and overall real thickness throughout. He will add growth and length to his calves. He records weaning and yearling in the Top 45%. There is longevity and maternal strength in his pedigree.

McConnell Avalanche 69 is a top Altitude son for phenotype and overall stunning appearance for size, length of body, muscle density, leading to heavy in weight. His mature weight came in at 2810 lb. Perfect on his feet and leg structure. A calving-ease sire that will add structure size at weaning. A solid EPD profile.

Testimonials from other Breeders...

"I really like the McConnell Altitude bull Genex has. I was really impressed with Altitude as a calf. Thick, deep bodied and very docile.

His calves are thrifty at birth. Many of his calves weaned right with my Simmy crosses and the best part, his heifers/momma cows are great. He is the only bull we have AI'd to three years in a row."

- Lloyd Gerard

"Altitude is the easiest calving bull we have ever used. This was our fifth year in a row to use him again."

- J T Nunn

Altitude exhibits tremendous phenotype combining eye-appeal and power with calving-ease. His first daughters are in production and they have great udders, excellent teat placement, and they are breeding back very well. The calves are coming easy, unassisted with quick get up and go. There is exceptional growth in his calves with muscle, width and depth displaying tremendous expansion of rib.

• He is stout, wide-based, carrying good bone. A rugged-built ranchers bull with volume. Strong maternal cow families - top and bottom. His dam, a stout made Ten Speed records a birth ratio of 101, weaning ratio of 104 and a yearling ratio of 103.

- High selling bull in 2019
- Out of SAV President - the \$750,000 lead-off bull in SAV 2017 sale
- His Sire also produced SAV America
- His Dam a very productive Resource Donor
- Our Likes: His thickness. He adds body mass
- His length and overall width are impressive
- Will add extra bone and substance
- Excellent Disposition

• Here is a bigger framed daughter out of Resource 3112, she has nice length and depth of rib. Descending from the Pathfinder, Blackbird 3172, who was a great doner cow in our herd. She records a birth ratio of 105 and a weaning ratio of 103 on two calves. Also, a granddaughter of the famous SAV Blackbird 3172 that records a birth weight ratio of 102, weaning weight ratio of 108 and a yearling weight ratio of 106 on 8 calves. Son sells as Lot 182. Pasture exposed to McConnell Yeti 672 from 10-5-2021 to 1-15-2022. Has a bull calf Lot 274a, out of McConnell's Independent 8434, born 9/16/2021 birth wt. 85 lbs.

***“In the end, it's not the
years in your life that count.
It's the life in your years.”
- Abraham Lincoln***

PAP and Foot Score

What Is PAP?

Pulmonary Artery Pressure (PAP) is the measure of blood pressure in the pulmonary artery. What is blood pressure? Blood pressure is the force that blood exerts on the walls of blood vessels. The higher the blood pressure or PAP score can result in a decrease in performance, cause of illness, and even more severe stroke or brisket disease. It is known that at higher altitudes the cow/bull has to work harder to process oxygen. So if the cow/bull already has a high PAP score then they are more likely to develop brisket disease when moved to a higher altitude.

Is PAP relevant to my herd?

PAP scores are mainly monitored for cattle going to range in high elevations. However, PAP is applicable to all herds. The PAP score is also useful in determining the amount of arterial stress the cow/bull can handle which can be related to the performance of a cow/bull.

First let's explain this... Muscles need oxygen to function, and arteries carry oxygenated blood to the muscles. So with the example of a bull in breeding season when traversing through pasture from cow to cow, their body has to process oxygen at an alarming rate by allowing larger amounts of blood to pass through arteries in order to feed the muscles. The arterial wall needs to withstand higher amounts of pressure from the blood. So the lower Pulmonary Artery Pressure (PAP) score, may result in a more athletic performing bull.

PAP scores are also genetic. This makes it important to pass on bloodlines that improve the overall health and performance of a cattle herd.

American Angus Association® FOOT SCORE GUIDELINES

Foot Angle (5 is ideal)

Claw Set (5 is ideal)

EPD and \$Values

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

PERCENTILE RANKINGS for the EPDs and \$Value Indexes are listed to allow you to see how the cattle in the sale offering stack up to other animals in the breed.

Production EPDs

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Maternal

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass weight, marbling score, Ribeye area and fat thickness. The units of measure are in carcass trait format and analyzed on an age-constant basis. Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness EPD (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

WEIGHTS

BW (Birth Weight): The actual weight in pounds at birth.

Adj. WW (Adj. Weaning Weight): The weight in pounds at weaning adjusted to 205 days of age.

\$VALUE INDEXES

\$Value indexes, an economic selection index allows multiple change in several different traits at once pertaining to a specific breeding objective. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if the sires were randomly mated to cows

and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

Feedlot Value (\$F), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics for postweaning feedlot merit compared to the progeny of other sires. The underlying objective assumes producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis, but with no consideration of premiums or discounts for quality and yield grade. Traits contributing directly to the index are as follows: yearling weight (gain), carcass weight and dry-matter intake.

Grid Value (\$G), an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above-industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

Beef Value (\$B), a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

Combined Value (\$C), an index, expressed in dollars per head, which includes all traits that make up both Maternal Weaned Calf Value (\$M) and Beef Value (\$B) with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid. Expected progeny differences (EPDs) directly influencing a combined index: calving ease direct (CED) and maternal (CEM), weaning weight (WW), yearling weight (YW), maternal milk (Milk), heifer pregnancy (HP), docility (DOC), mature cow weight (MW), foot angle (Angle), claw set (Claw), dry matter intake (DMI), marbling (Marb), carcass weight (CW), ribeye area (RE) and fat thickness (Fat).

CAB TARGETING THE BRAND

The CAB® icon will appear on the pedigree of those animals that meet the criteria for targeting the Certified Angus Beef® brand.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.
