

MIDLAND BULL TEST

APRIL 6-7, 2023 • COLUMBUS, MT

Nobody gives you more because nobody has more to give!

Greetings.

We graciously invite you to the 61st edition of Midland Bull Test. A strong, powerful set of bulls is available for your selection. We look forward to your personal evaluation and attendance at the sale, April 6th and 7th at the historic Midland Bull Test sale facility.

The drought, the flooding, and the long cold winter have given us a wild ride the last few years. Those with the resilience, drive, and determination to endure through those challenging times are finally being rewarded with drastically improved market conditions. Feeder calves, bred heifers, fat cattle and even the cull cattle markets are at strong levels, the best we have seen in a few years.

While we have weathered these many trends in the cattle industry, one thing remains the same -- the cattle that check the boxes across the board for structure, performance, maternal strength, fertility, and carcass will add the consistency and value to reach herd objectives in any breeding program. At Midland Bull Test, we do the sorting for you. The bulls that exhibit this strong balance across the board rise to the top and are offered in one sale from across all of America. At Midland, you don't have to rely solely on EPDs or indexes to make the choices for you. They are validated with actual performance and coupled with data on the dams and grand dams to give you complete transparency. We are proud to be a trusted gathering area for progressive minded breeders, nationwide, and this is not a task we take lightly. We do everything possible, from feeding intelligently to providing top notch care and treatment, all to enable these bulls to perform to their true potential. We take pride in growing athletic breeding bulls with proven proficiency to go out and work for the operations that procure them. Efficiency is talked about all the time, yet rarely is it measured and offered with a truly comparable, profitable value. Efficiency is not something you can see, and without measuring, one is only assuming. With feed being the #1 input cost of any cattle operation; it is not a trait that can be overlooked. Low DMI without gain is not going to work in the commercial feedlot. So, how do we use efficiency to make gain? This is why, at Midland, we utilize the Efficiency Index to easily identify the bulls that do well in both areas, efficiency, and gain. For example, feed conversion ratio (FCR) is an important trait to keep in mind, but it is not a true measure of efficiency, and it is not comparable unless it is accompanied by additional detailed data. As pioneers in efficiency, we make it a priority to highlight the most beneficial value..

Only the top-quality bulls from across the country have been consigned to Midland to compete in one place. We welcome you to come and see the top quality "Final Sort" bulls anytime . If you are unable to make it out, videos and a live auction will be available online at cci.live again this year. If we can assist in any way, let us know!

Steve E Amy

We do one thing: BULLS.

*FOR QUESTIONS AND TECHNICAL
ASSISTANCE, CONTACT CCI LIVE:
405-400-9505 • schedule@cci.live*

STEP 1 - CREATE AN ACCOUNT AND REQUESTING BIDDING CREDENTIALS

You can always view an auction without signing in. You must only sign in if you plan to bid on cattle. If you plan to bid on livestock, you must CREATE A NEW ACCOUNT and then request for bidding credentials at cci.live. Once you are approved the first time, you do not need to go through the process for each sale. Please DO NOT wait until sale day to request bidding credentials, some sales require approval more than one day ahead of time. Some sales also require a “bidder passcode” from the sale management for that auction. When you create an account, please use a valid email address. In the future, if you forget your bidders password, you can reset it immediately through the email on your account.

STEP 2 - GET A BUYER NUMBER

Once you are an approved bidder at CCI, you simply go to the SALE SCHEDULE PAGE and click on the auction name that you are interested in, then click BID ONLINE and click GET BUYER NUMBER. You will instantly be assigned a buyer number, for that auction. Some sales also require a “bidder passcode” from the sale management for that auction. When you click “get buyer number” you will be instructed to enter the passcode from the sale management for that auction.

STEP 3 - ALWAYS REFRESH YOUR SCREEN if you are going in and out of service and if you “leave” your computer or the app for over 15 minutes. The computer may log you out if you have not been active for a period of time. It’s always a good idea to refresh your screen right before the sale starts. Driving and bidding is not recommended!

IMPORTANT BUYER TIPS: BIDDING AND SCREEN PRICE - VERY IMPORTANT!!!

Please note that the asking price on the screen is REAL TIME! Screen or asking price takes precedence over audio and voice! This means that if you have a slow internet connection the auctioneer may be a few seconds, behind the screen price that is showing. The screen price is the asking bid at the auction and there is no delay, so you can bid with confidence by watching only the screen asking price. If you have a slow internet connection, we recommend that you turn off the audio and only watch the asking price box. The audio and video are for entertainment purposes only. You can also phone in to place your bids if you feel that your internet connection is not acceptable.

***Always refresh your screen periodically, especially if you move in and out of service.
Always refresh your device if you have left it for over 20 minutes or return to the app after leaving it.***

IF I FORGET MY PASSWORD

if you forget your password, simply click on FORGOT PASSWORD and CCI will email you a reset password link to your email inbox.

We do one thing: BULLS.

SALE INFORMATION

SALE ORDER: Determined by Midland Bull Test Index (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER) and Estimated Sale Value. We do expect small changes in sale order. Be sure to check immediately prior to the sale for the most recent updates. Sale orders will be posted online (with the most current version on the bottom) and available sale day.

TERMS ARE CASH: All purchases need to be settled on the day of the sale. When making settlement, please leave specific instructions for transfer and shipping. Each animal will be sold to the highest bidder with the auctioneer settling any dispute as to bids.

Announcements made from the auction block take precedence over any printed material. Livestock will be cared for following the sale at the buyer's risk and responsibility.

CERTIFICATE OF REGISTRY: A transferred certificate of registry will be furnished to the Buyer for each animal after settlement has been made.

HEALTH: All cattle will be sold according to the health regulations of the State of Montana. Buyers must be aware of any variations between the laws of the states.

All bulls have tested BVD-PI negative and are tested negative for known genetic defects as detected by pedigree per respective Associations as of 3/1/23. Bulls sold into states that require trich test will be trich tested after sale and trucking arrangements will be made in short order.

CANADIAN BUYERS: Estimated health inspection costs for first bull purchase is \$650*. Each additional bull is \$200* per bull. Midland will split this cost equally with buyer for health inspection and testing. *Total subject to change.

FERTILITY TESTED & GUARANTEED: Complete semen and scrotal evaluations on all bulls are performed by Lacey Farhmeier, DVM and Jesse Olsen, DVM, MS, both of Absarokee, MT. Scrotal measurements for Group 1 (G1) were taken mid-February. Group 2 (G2) were taken the first week of March. All are published as actual size. For projected sale date size, add 1 to 1.5 cm per month. These bulls sell guaranteed to be breeders via natural service.

EFFICIENCY TEST: A collection of data that identifies ratio of the optimum balance between intake and gain. See page 12 for more information.

1/3 REVENUE SHARING SEMEN INTEREST: Some breeders have elected to retain semen interest in their bulls. The buyer will have full possession and full salvage value. The seller, if he/ she desires to collect semen, will do so in the off-breeding season at the seller's expense and the buyer's convenience. If the buyer opts to participate in semen sales, then buyer and seller will work out a mutual agreement. Over the years it has been Midland's experience that most sellers do not exercise this option on bulls going into commercial herds.

DELIVERY: Cattle purchased in our sale will be delivered to CENTRAL locations, such as stockyards, in the lower 48 states. We will attempt to get bulls as close to you as possible. Drops will occur at central locations related to the majority needs for that particular load. Please see page 7 for our delivery policy, map and costs.

RISK: Everyone attending the sale does so at their own risk. The owners and Midland assume no liability, legal or otherwise, for any accidents which may occur.

SEMEN COLLECTION:

ORigen..... (406) 348-2345

World West..... (406) 628-7510

TERMS & CONDITIONS: All sales are being conducted under the American Angus Association Suggested Sale Terms and Conditions (6/04/2020) regardless of breed of sale bull. At Midland, we equally value and appreciate our consignors and buyers; and we are cognizant of the risk incurred by both. With a commitment to mitigate and minimize risk for both parties, Midland has implemented a modified bull guarantee. Mortality Insurance will be available sale day through Dakota AG Insurance, Jared Mohnen (605) 999-4475. Buyers who desire to guarantee bulls (insure), must initiate coverage at check-out following the sale. Midland Bull Test is offering to pay 50% of the cost of a 12 month policy covering Full Mortality. The total cost of coverage is 6.35% of the purchase price, to be split between Midland Bull Test and the buyer (a minimum of \$250 premium: minimum \$125 to Midland, \$125 to buyer). We think it is a very fair and complete coverage and it will be the only loss of use breeding guarantee offered by Midland Bull Test.

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

Individual Livestock Policy Coverage Option

Midland Bull Test will pay 50% of
the total premium on a 12-month
policy the first year only!

MORTALITY ONLY COVERAGE

Coverage: The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury.

Coverage Examples: Death for any reason, severe stifles, broken legs, severe foot rot and we have to euthanize the animal, severe sickness and we have to euthanize the animal or any other major injury where we have to euthanize the animal.

Indemnity/Payout: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of life-threatening injury.

Term: Renewable 1 year policy options available only.

Age: 91 days old to 10 years of age.

Rate: 6.35% annually. \$250 minimum premium applies to each policy.

Claims:

1. Claims must be reported to Dakota AG Insurance immediately following the discovery of the claim.
2. All mortality claims made to the company must have a veterinarian evaluation and will require a post mortem examination by a veterinarian.
3. Call Dakota AG Insurance immediately upon the discovery of the claim at (605) 990-5355.

Our Sincerest **GRATITUDE:**

LEO, SAM AND JEAN: Thank you for always keeping us afloat when the water gets high and ensuring we stay grounded when the heat makes us rise. We value the path you forged before us and appreciate how you continue to selflessly give so much time and energy for our livelihood. We continue to learn so much about life. This is a long haul!

MATT: This year we have really noticed how well you endure our team of strong, bossy women! Thank you for the countless hours and flexibility in making sure Midland runs smoothly 24/7. Your sacrifices at home and on the road do not go unnoticed. We are so blessed with your admirable attitude and ever smiling face.

LISA: We never have to worry about jobs getting complete when Lisa is here. We couldn't find anyone more thorough, caring, and selfless. She finds jobs that we don't even know about! She is the complete package, and we wish she could be here 7 days a week!

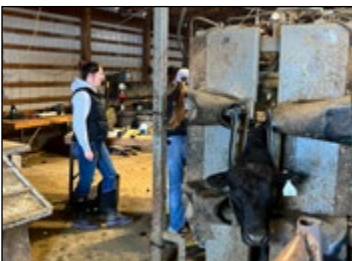

MELISSA: Melissa is new to Columbus and new to Midland this year. She has taken over Mari's duties and added a lot here by being an extra hand outside. She is a quick learner and has embraced our technology and craziness with an open mind. It has been helpful to have another signing person in the office and another sweet family to share in our joys.

DANI RAE: Dani came to us around Christmas time this year and jumped right into the hard work. She is a great addition to our herd health and is no stranger to physical demands, no time off and cold temperatures. We sure enjoy her willingness to learn things with an open mind and her dedication to being here even when it's tough!

LACEY AND STILLWATER VET CLINIC CREW: Thank you for taking every hard day and making them fun! We appreciate your commitment to keeping the bulls in the best shape and always being flexible with the immense amount of work at the end of the season. Your thoroughness and your specialty in cattle make you a valuable asset to our team.

SAM ENGLAND: Good help is hard to find, and we are so blessed to have you back year after year. There is no schedule too intense for Sam and we only wish we could spend more free time with her. Sam is so driven and fun that we really learn a lot from her work ethic.

TANNER AND CREW: Thank you for prepping the bulls, sunup until sundown, your dedication is unmatched!

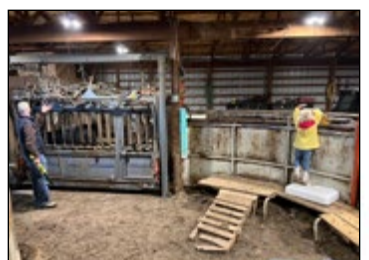

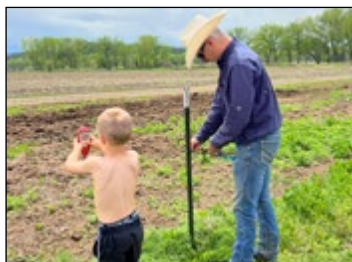

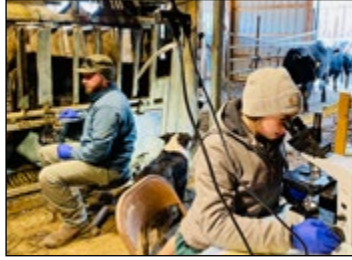

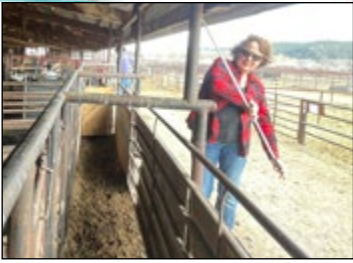

MELISSA AND HER CATERING CREW: Who knew almost 1800 meals in 3 days could taste so good! We really hit the jackpot when you came into our life. Thank you for offering up such amazing service and having the strength to take on all these days in a row!

SHEYNA: It has been so fun to see our ideas come to life in print. Thank God you stay up way too late to meet our deadlines!

SALE DAY STARS It takes a village, and we are so grateful for the best line-up from sale prep to sale day. We truly look forward to working with each of you yearly!

BOB, SUZI, JENN, TY, ROGER, WENDY, AND COUNTLESS OTHER SALE CREW: Thank you for always keeping us on your schedules. You bring us so much relief and we can't thank you enough!

WHAT THE DATA TELLS YOU

GROUP#: Bulls are denoted as G1 (group 1) or G2 (group 2).

CLASS#: Breeds with more than 40 head on test will be indexed in two birth weight classes. Class 1 = low birth bulls. Class 2 = average/above average birth weight. The split will be determined by birth weight averages per breed and by EPDs as of Feb. 1

DOB: Birth Date

TATTOO: Ear Tattoo

REG#: Registration number given by respective Associations.

CAB: Meets the EPD requirement of +0.65 for Marbling and +55.0 for Dollar Grid Carcass Index (\$G) to be considered Certified Angus Beef.

ANGUS GS: Angus Genomic Selection. An advanced high density Genomic testing option, designed specifically for Angus cattle including potential markers for future trait selection.

HD50K: A genotyping platform that replaces i50K, designed specifically for Angus breeders. Delivers GE-EPDs, indexes, parentage verification and genomic percentile ranks

NOBODY gives you more, BECAUSE NOBODY has more, TO GIVE!

Semen Interest to be retained by consignor

PRE-TEST ANIMAL DATA:

BW: Actual Birth Weight

WW: Actual Weaning Weight

205 WT: Weaning Weight Adjusted to 205 Days.

NR: Nursing ratio, an index of the adjusted 205 day weight within the breeder's herd only. It is an indication of the dam's maternal performance and the bull's pre-weaning growth.

EPDs (EXPECTED PROGENY DIFFERENCE): The bull's pre-weaning growth. EPDs - The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across breeds. Each breed association calculates that breed's EPDs. See averages below.

CED/CE: Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW: Birth Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

MILK: Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

YW: Yearling Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires

Other Production, Carcass and Ultrasound EPDs vary among the breeds, see below.

MARB: Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

REA: Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

FAT: Fat thickness EPD, expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

SW: Weaned Calf Value, an index expressed in dollars per head to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves.

SB: Beef Value is an index expressed in dollars per head to predict the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

FINAL TEST REPORT

ADG: Average Daily Gain.

ADG RAT: Average Daily Gain ratio. 100 is average.

365 WT: Calculated using FBW and FBW date following BIF calculation guidelines.

YR - Yearling ratio. Index of 365 Day Weights within class. 100 is average.

WDA - Actual Weight Per Day of Age (Lifetime ADG).

RFI - Residual Feed Intake. Actual feed intake minus expected feed intake. RFI is given here in the test data, complete efficiency test results are available at MidlandBullTest.

RFI EPD - Residual Feed Intake EPD

DMI EPD - Dry Matter Intake EPD

EFF RAT - Optimizes balance between performance and efficiency. It measures how efficiently the caloric content of feed is converted to pounds.

FINAL WT - Final Test Weight.

MBT IND: Combined ADG, Nursing ratio, Yearling ratio and Efficiency ratios (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 Efficiency Ratio)

SCR - Scrotal Circumference measured in centimeters by the veterinarian.

ADDITIONAL EPDS THAT MAY APPEAR IN THIS BOOK.

CED/CE: Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

SCROTAL/SC: Scrotal Circumference EPD, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

BREED ASSOCIATION AVERAGES FOR NON-PARENT BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.

FEED SAVINGS ASSOCIATED WITH USING A LOW RFI BULL

INTRODUCTION

Feed costs can be as much as 70 percent of a beef producer's total production costs. Residual feed intake (RFI) is a measure of feed efficiency that explains the difference between what an animal is expected to eat and what they actually eat, for a given level of body weight, growth and production. Cattle with low RFI values are more efficient and eat less than expected while cattle with high RFI values are less efficient and eat more than expected. With its moderate heritability and independence of body weight and growth, selection for RFI can result in more feed efficient animals that require less feed while achieving the same level of production, growth and body composition. Testing and selecting cattle for RFI and using genetics from sires with low RFI expected progeny differences (EPDs) can result in significant feed savings over time. The scenarios below show the feed savings associated with using low RFI sires with varying RFI EPDs and expected breeding values (EBVs).

SCENARIO 1

A rancher purchased Bull 1 from a seedstock producer that had been selecting for RFI for 2 years. The rancher plans on using the bull for 4 years. Estimated feed savings over the 4-year period:

- Bull 1 RFI EBV = -0.08
- Bull 1 RFI EPD = -0.04
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -0.08, Bull 1 will eat 0.08 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, it's progeny will eat 0.04 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 1. FEED COST SAVINGS USING BULL 1 FOR 4 YEARS

	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	117	15.18
Replacement Heifers	7	0.13	1,635	212.58
Feedlot Animals	13	0.13	468	60.84
Total Savings:				\$288.60

As seen in Table 1, over the 4-year period, Bull 1 will save the rancher \$288.60 in feed costs alone when compared to feed costs of an average bull. Savings in feed costs will continue to be increased if the rancher chooses to breed the replacement heifers with another low RFI bull. With several years of selection, the feed savings associated with a bull can be increased drastically, as shown below in Scenario 2.

SCENARIO 2

A rancher purchased Bull 2 from a seedstock producer that had been selecting for RFI for 15 years, hence the improvement in the RFI EPD (seen below). The rancher plans on using the bull for 4 years. Below you can see how much can be saved in feed costs over the 4-year period, given the following assumptions:

- Bull 2 RFI EBV = -1.0
- Bull 2 RFI EPD = -0.5
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -1.0, Bull 2 will eat 1.0 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, its progeny will eat 0.5 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 2. FEED COST SAVINGS USING BULL 2 FOR 4 YEARS

	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	1,460	189.90
Replacement Heifers	7	0.13	20,440	2,657.20
Feedlot Animals	13	0.13	5,850	760.50
Total Savings:				\$3,607.50

As seen in Table 2, over the 4-year period, Bull 2 will save the rancher \$3,607.50 in feed costs alone when compared to feed costs of an average bull. Again, the savings will continue to increase if the rancher chooses to breed the replacement heifers with another low RFI bull.

CONCLUSION

By selecting for RFI, or introducing several low RFI bulls into your herd, feed-related savings will continue to increase. Several years of genetic selection will improve the baseline feed efficiency of the ranch and savings will continue to transfer to the cow herd as replacement heifers are retained.

Note: The awards presentation will be held prior to the sale of each breed.

MARY MCDONNELL VON FORELL SCHOLARSHIP

Each year we award one **Junior Consignor with the high performing bull from all breeds** with a \$500 scholarship from our family. This scholarship is named in remembrance of Mary, Steve's aunt and Leo's sister, who passed away from cancer. She is dearly missed. She was a huge supporter of youth.

Note: "High performing" is measured by top indexing bull over all breeds.

Thank you

Lot 307 is a EXAR Monumental Son out of a Vermillion Spur daughter who is a herd favorite. Look for this moderate, negative BW EPD sire to also add Milk and Marbling merit. He would be an excellent candidate to use on yearling heifers.

America's largest source of EFFICIENCY TESTED bulls.

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

Individual Livestock Policy Coverage Option

Mortality Only Coverage: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of a life-threatening injury. Age: 24 hrs of age - 10 years of age.

Individual Equine Policy Coverage Options

Mortality Only (\$5,000 emergency colic surgery included), Major Medical & Surgical, stallion Infertility (Accident, Sickness & Disease), Prospective Foal Coverage & more!

Farm & Ranch

We insure all sizes of farm and ranch operations throughout the Midwest. We have access to every major carrier in the United States, don't hesitate to call an agent for a **FREE-NO OBLIGATION** quote today!

Livestock Risk Protection (LRP)

This new & exciting subsidized coverage option offers protection against unexpected future declines in the market value of cattle and swine. Coverage is available for Feeder Cattle, Fat Cattle, Swine and Unborn Livestock as long as the livestock are born before the SCE end date. *Unborn Livestock Definition:* Livestock not born on the effective date but expected to be marketed before the end date.

Livestock Specified Perils, Livestock Herd Coverage

This policy option provides coverage for losses caused by death or humane destruction of livestock as a result of a specified peril. Coverage is for both owned and non-owned livestock in your care, custody, and control.

Perils Covered: fire – lightning - explosion or smoke - windstorm, hail or tornado – smothering by blizzard or snowstorm - collision with vehicles, aircraft or falling objects - riot, civil commotion or vandalism - earthquake or volcanic eruption – flood, drowning, mudslide or tidal waves – accidental shooting – electrocution – attack by wild dogs or animals – collapse of buildings, barns, bridges or culverts – sinkhole collapse – hypothermia due to precipitation – leakage of gas or anhydrous ammonia – contaminated feed or water.

Available Endorsements: coverage in transit – grazing poisoning – livestock born during the policy period – frozen semen & embryos in storage or transit.

Rainfall Pasture, Rangeland and Forage (PRF)

Covers pasture, rangeland, or forage for perennial haying and/or grazing purposes. It was designed to help protect a producer's operation from the risks of forage loss due to the lack of precipitation.

Other Available Insurance Options:

Prospective Offspring Coverage (Pregnancy) – Trucking – Feedlot – Short-Term Cattle Coverage – Frozen Semen & Embryo Endorsement (Storage & Transit) – Single Trip Transit Coverage – Cargo Coverage & More.

Call an agent today to attend your annual production sale or to obtain a free, no obligation quote on all of your insurance needs!

Join us for Bulls on Parade in Billings!

Alta Genetics and GENEX are swinging open the gates and inviting you to join us for an afternoon of bulls, fun and fellowship at our production center in Billings, Montana, during the Midland Bull Test!

Thursday, April 6, 2023
11:00am - 3:00pm

3800 Duck Creek Rd. Billings, MT 59101

This is your opportunity to see some of the industry's hottest bulls in the flesh and ask questions of our beef genetics and sire procurement teams. You won't want to miss this open house!

- › Tours of the bulls and the facility will be ongoing during the day.
- › Lunch will be served from 11:00 a.m. – 1:00 p.m. with refreshments provided the entire day.

- › Two lucky attendees will win a vaccine cooler or semen tank!
