

THE FINAL SORT SALE

MIDLAND

BULL TEST

60
years

APRIL 7 & 8, 2022  COLUMBUS, MT

A CHANGE WAS COMING

THE PERFORMANCE BREEDERS

In the late 1950s a group of cattlemen and women made a decision to take a different direction in breeding seedstock for the cattle industry. My father, Leo McDonnell, was part of that group. Here, in this part of the country, that group included breeders like Sally Forbes, Dale Davis, Russ Denowh, Jack Cooper, Les Holden, Charles Descheemaeker, and several more forward thinking ranchers.

Their goal was to start measuring cattle for genetic traits of economic value to the rancher and the cattle industry; measuring, recording, and maintaining a data base. Beef associations were set across the U.S. to compile and maintain these data bases. Here in Montana, the Beef Performance Association was formed with an office in Bozeman and joint support from the Montana State University Extension office.

Traits to be measured were birth weight, weaning weight, yearling weight, dam production records, and sire production records.

Prior to this, cattle were selected on looks alone and supported by various management and marketing schemes to attract potential buyers. The show ring was King!

This movement by what was being called "The Performance Breeders" was met by a huge opposition of traditional breeders and even many breed associations who felt threatened by this new approach to measuring cattle for genetic merit and value. However, the opposition was short lived, as the ranchers and feeders were soon demanding such information and buying their bulls from only breeders who provided it.

Midland Bull Test was one of the early central tests, starting in 1962, and offering an environment where young bulls and sire offspring could be compared in a neutral environment. Performance breeders could showcase and prove their genetics. Along the way, Midland was an early adapter measuring scrotal, back fat and ultrasound data. Today, Midland leads the way into one of the most economically important traits for ranchers and feeders - Efficiency. This is not just claims of efficiency, but the actual recording and measuring of feed intake and weight gained. The results of such disciplined selection have been proven on ranches and feedlots in multiple countries and universities here in the United States. Efficiency gains of \$150 per cow and up to \$200 per steer in the feedlot have been repeatedly shown and proven.

The performance disciplines still remain the same in importance today. These measurements are the foundation for building EPDs and genotypes. Without these phenotypic comparisons, neither would exist or improve or be able to be compared to validate their accuracy.

- Leo McDonnell, Jr.

MIDLAND BULL TEST SALE DAY PHONES

(406) 322-9911

(406) 322-9044

For Bidding Only

**FOR QUESTIONS AND TECHNICAL
ASSISTANCE, CONTACT CCI LIVE:**
516-366-0734 • schedule@cci.live

STEP 1 - CREATE AN ACCOUNT AND REQUESTING BIDDING CREDENTIALS

You can always view an auction without signing in. You must only sign in if you plan to bid on cattle. If you plan to bid on livestock, you must CREATE A NEW ACCOUNT and then request for bidding credentials at cci.live. Once you are approved the first time, you do not need to go through the process for each sale. Please DO NOT wait until sale day to request bidding credentials, some sales require approval more than one day ahead of time. Some sales also require a “bidder passcode” from the sale management for that auction. When you create an account, please use a valid email address. In the future, if you forget your bidders password, you can reset it immediately through the email on your account.

STEP 2 - GET A BUYER NUMBER

Once you are an approved bidder at CCI, you simply go to the SALE SCHEDULE PAGE and click on the auction name that you are interested in, then click BID ONLINE and click GET BUYER NUMBER. You will instantly be assigned a buyer number, for that auction. Some sales also require a “bidder passcode” from the sale management for that auction. When you click “get buyer number” you will be instructed to enter the passcode from the sale management for that auction.

STEP 3 - ALWAYS REFRESH YOUR SCREEN if you are going in and out of service and if you “leave” your computer or the app for over 15 minutes. The computer may log you out if you have not been active for a period of time. It’s always a good idea to refresh your screen right before the sale starts. Driving and bidding is not recommended!

IMPORTANT BUYER TIPS: BIDDING AND SCREEN PRICE - VERY IMPORTANT!!!!

Please note that the asking price on the screen is REAL TIME! Screen or asking price takes precedence over audio and voice! This means that if you have a slow internet connection the auctioneer may be a few seconds, behind the screen price that is showing. The screen price is the asking bid at the auction and there is no delay, so you can bid with confidence by watching only the screen asking price. If you have a slow internet connection, we recommend that you turn off the audio and only watch the asking price box. The audio and video are for entertainment purposes only. You can also phone in to place your bids if you feel that your internet connection is not acceptable.

Always refresh your screen periodically, especially if you move in and out of service.

Always refresh your device if you have left it for over 20 minutes or return to the app after leaving it.

IF I FORGET MY PASSWORD

If you forget your password, simply click on FORGOT PASSWORD and CCI will email you a reset password link to your email inbox.

SALE INFORMATION

SALE ORDER: Determined by Midland Bull Test Index (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 ER) and Estimated Sale Value. We do expect small changes in sale order. Be sure to check immediately prior to the sale for the most recent updates. Sale orders will be posted online (with the most current version on the bottom) and available sale day.

TERMS ARE CASH: All purchases need to be settled on the day of the sale. When making settlement, please leave specific instructions for transfer and shipping. Each animal will be sold to the highest bidder with the auctioneer settling any dispute as to bids.

Announcements made from the auction block take precedence over any printed material. Livestock will be cared for following the sale at the buyer's risk and responsibility.

CERTIFICATE OF REGISTRY: A transferred certificate of registry will be furnished to the Buyer for each animal after settlement has been made.

HEALTH: All cattle will be sold according to the health regulations of the State of Montana. Buyers must be aware of any variations between the laws of the states.

All bulls have tested BVD-PI negative and are tested negative for known genetic defects as detected by pedigree per respective Associations as of 3/1/22. Bulls sold into states that require trich test will be trich tested after sale and trucking arrangements will be made in short order.

CANADIAN BUYERS: Estimated health inspection costs for first bull purchase is \$650*. Each additional bull is \$200* per bull. Midland will split this cost equally with buyer for health inspection and testing. *Total subject to change.

FERTILITY TESTED & GUARANTEED: Complete semen and scrotal evaluations on all bulls are performed by Lacey Farhmeier, DVM and Jesse Olsen, DVM, MS, both of Absarokee, MT. Scrotal measurements for Group 1 (G1) were taken mid-February. Group 2 (G2) were taken the first week of March. All are published as actual size. For projected sale date size, add 1 to 1.5 cm per month. These bulls sell guaranteed to be breeders via natural service.

EFFICIENCY TEST: A collection of data that identifies ratio of the optimum balance between intake and gain. See page 12 for more information.

1/3 REVENUE SHARING SEMEN INTEREST: Some breeders have elected to retain semen interest in their bulls. The buyer will have full possession and full salvage value. The seller, if he/ she desires to collect semen, will do so in the off-breeding season at the seller's expense and the buyer's convenience. If the buyer opts to participate in semen sales, then buyer and seller will work out a mutual agreement. Over the years it has been Midland's experience that most sellers do not exercise this option on bulls going into commercial herds.

DELIVERY: Cattle purchased in our sale will be delivered to CENTRAL locations, such as stockyards, in the lower 48 states. Please see page 7 for our delivery policy, map and costs. Everyone attending the sale does so at their own risk. The owners and Midland assume no liability, legal or otherwise, for any accidents which may occur.

SEMEN COLLECTION:

ORigen..... (406) 348-2345

World West..... (406) 628-7510

TERMS & CONDITIONS: All sales are being conducted under the American Angus Association Suggested Sale Terms and Conditions (6/04/2020) regardless of breed of sale bull. At Midland, we equally value and appreciate our consignors and buyers; and we are cognizant of the risk incurred by both. With a commitment to mitigate and minimize risk for both parties, Midland has implemented a modified bull guarantee. Mortality Insurance will be available sale day through Dakota AG Insurance, Jared Mohnen (605) 999-4475. Buyers who desire to guarantee bulls (insure), must initiate coverage at check-out following the sale. Midland Bull Test is offering to pay 50% of the cost of a 12 month policy covering Full Mortality. The total cost of coverage is 6.35% of the purchase price, to be split between Midland Bull Test and the buyer (a minimum of \$200 premium: minimum \$100 to Midland, \$100 to buyer). We think it is a very fair and complete coverage and it will be the only loss of use breeding guarantee offered by Midland Bull Test.

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

Individual Livestock Policy Coverage Option

Midland Bull Test will pay 50% of
the total premium on a 12-month
policy the first year only!

MORTALITY ONLY COVERAGE

Coverage: The coverage provides traditional, full mortality for death from natural causes or humane destruction as a result of a life-threatening injury.

Coverage Examples: Death for any reason, severe stifles, broken legs, severe foot rot and we have to euthanize the animal, severe sickness and we have to euthanize the animal or any other major injury where we have to euthanize the animal.

Indemnity/Payout: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of life-threatening injury.

Term: Renewable 1 year policy options available only.

Age: 91 days old to 10 years of age.

Rate: 6.35% annually. \$200 minimum premium applies to each policy.

Claims:

1. Claims must be reported to Dakota AG Insurance immediately following the discovery of the claim.
2. All mortality claims made to the company must have a veterinarian evaluation and will require a post mortem examination by a veterinarian.
3. Call Dakota AG Insurance immediately upon the discovery of the claim at (605) 990-5355.

OUR SINCEREST GRATITUDE TO:

Leo, Sam & Steve

LEO AND SAM AND JEAN: The only thing better than having you as parents is having you as grandparents. We continue to learn so much about grace and life through your advice and involvement. Thank you for keeping our kids and crew alive and happy while we give our all to Midland. When we find ourselves in the dark, you are always there with your light.

MATT: Feed truck driver extraordinaire - Matt powered through injuries and surgery this year. Despite his struggles, he still gave us his all and learned to do a lot with his left hand! He is so trustworthy and an irreplaceable team player. We really value the laughs and flexibility he provides at Midland. We are so proud to work with him and even more proud to call him our friend.

Jean & Steve

LISA: We can't thank Lisa enough. She is very dedicated to our herd and literally eats, breathes and sleeps Midland! We often exchange texts at 1030pm about bulls, and to do lists, despite our strict "don't take your work home policy"! She brings tremendous leadership and compassion to our team, and we would be lost without her skills. We are so lucky we get to work with our best friend. With this schedule, lord knows, we would hardly see her otherwise.

JILLANN: She withstands a variety of futile hours and tasks at the desk handling the books, and always shows up with a smile and great stories to lift our spirits. We are grateful for her commitment to keep our office on task, and our invoices and paychecks on time. Despite her full plate she always tacks Midland into her life!

Matt & Family

MARI BETH: We love our Mari, but we can't even begin to compete with the love she gets from the Midland mutts and kids! She models such excellent care of our customers, and we value all her mothering skills as we navigate loads of paperwork and follow up during the busy season. We are so lucky to have such a patient, kind teacher in our office.

Lisa & Family

LACEY AND STILLWATER VET CLINIC CREW; such long hours and back breaking work that we feel like we should have an extra room for you! We appreciate your commitment to keeping the bulls in the best shape and always dropping life to assess our boys quickly. We love your thoroughness and your specialty in cattle. Thanks for taking on this partnership.

SAM ENGLAND: The one person who can provide Steve some competition in speed! Steve must bring his A game to keep her on her ultrasound toes and we really appreciate that expertise and work ethic. We feel blessed to have her back year after year, no matter the challenge she has growing in her home life!

Jillann & Family

SALE DAY STARS

It takes a village, and we are so grateful for the best line-up for sale prep and sale day. We truly look forward to working with each of you yearly!

KANYIN: Thank you for always lending yourself on the busiest days. You tolerate short notice and tough jobs. We all enjoy your easy-going attitude and your ability to make the best of the cold, long, thankless shitty work!

TANNER and crew for prepping bulls leading up to sale.

SUZI, BOB, SHEILA, CORTNEY, JENN, TY, PAT, ROGER, WENDY AND SALE CREW: Thank you for always keeping us on your schedules and choosing to bring us so much relief with your knowledge, stunts and smiling faces!

WHAT THE DATA TELLS YOU

GROUP#: Bulls are denoted as G1 (group 1) or G2 (group 2).

GROWSAFE FEED EFFICIENCY

TEST: RFI is given here in the test data, complete efficiency test results are available at MidlandBullTest.

DOB: Birth Date

TATTOO: Ear Tattoo

REG#: Registration number given by respective Associations.

CAB: Meets the EPD requirement of +0.65 for Marbling and +55.0 for Dollar Grid Carcass Index (\$G) to be considered Certified Angus Beef.

ANGUS GS: Angus Genomic Selection. An advanced high density Genomic testing option, designed specifically for Angus cattle including potential markers for future trait selection.

HD50K: A genotyping platform that replaces i50K, designed specifically for Angus breeders. Delivers GE-EPDs, indexes, parentage verification and genomic percentile ranks

PRE-TEST ANIMAL DATA:

BW: Actual Birth Weight

WW: Actual Weaning Weight

205 WT: Weaning Weight Adjusted to 205 Days.

NR: Nursing ratio, an index of the adjusted 205 day weight within the breeder's herd only. It is an indication of the dam's maternal performance and the bull's pre-weaning growth.

EPDs (EXPECTED PROGENY DIFFERENCE): The bull's pre-weaning growth. EPDs - The prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. You cannot compare EPDs across breeds. Each breed association calculates that breed's EPDs. See averages below.

CED/CE: Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BW: Birth Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WW: Weaning Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

MILK: Maternal Milk EPD is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

YW: Yearling Weight EPD, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires

Other Production, Carcass and Ultrasound EPDs vary among the breeds, see below.

MARB: Intramuscular Fat EPD is a predictor of the difference in a sire's progeny for percent intramuscular fat in the ribeye muscle compared to other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

REA: Ribeye area EPD is a predictor of the difference in square inches of ribeye area of a sire's progeny compared to the progeny of other sires. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

FAT: Fat thickness EPD, expressed in inches, is a predictor of the difference in external fat thickness at the 12th rib of a sire's progeny compared to the progeny of other sires. It includes the weighted average of 60% of the rib fat measurement and 40% of the rump fat measurement. (Angus, Red Angus and Simmental give ultrasound derived EPDs)

SW: Weaned Calf Value, an index expressed in dollars per head to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves.

SB: Beef Value is an index expressed in dollars per head to predict the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

FINAL TEST REPORT

ADG: Average Daily Gain.

ADG RAT: Average Daily Gain ratio. 100 is average.

365 WT: Calculated using FBW and FBW date following BIF calculation guidelines.

YR - Yearling ratio. Index of 365 Day Weights within class. 100 is average.

WDA - Actual Weight Per Day of Age (Lifetime ADG).

RFI - Residual Feed Intake. Actual feed intake minus expected feed intake.

RFI EPD - Residual Feed Intake EPD

DMI EPD - Dry Matter Intake EPD

EFF RAT - Optimizes balance between performance and efficiency. It measures how efficiently the caloric content of feed is converted to pounds.

FINAL WT - Final Test Weight.

MBT IND: Combined ADG, Nursing ratio, Yearling ratio and Efficiency ratios (1/4 ADG + 1/4 NR + 1/4 YR + 1/4 Efficiency Ratio)

SCR - Scrotal Circumference measured in centimeters by the veterinarian.

NOBODY gives you more, BECAUSE NOBODY has more, TO GIVE!

ADDITIONAL EPDS THAT MAY APPEAR IN THIS BOOK.

CED/CE: Calving Ease Direct is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

SCROTAL/SC: Scrotal Circumference EPD, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

Only 1 in 4 non-parent Angus bulls qualify.

For more information on Targeting the Brand™ visit CABcattle.com.

FEED SAVINGS ASSOCIATED WITH USING A LOW RFI BULL

INTRODUCTION

Feed costs can be as much as 70 percent of a beef producer's total production costs. Residual feed intake (RFI) is a measure of feed efficiency that explains the difference between what an animal is expected to eat and what they actually eat, for a given level of body weight, growth and production. Cattle with low RFI values are more efficient and eat less than expected while cattle with high RFI values are less efficient and eat more than expected. With its moderate heritability and independence of body weight and growth, selection for RFI can result in more feed efficient animals that require less feed while achieving the same level of production, growth and body composition. Testing and selecting cattle for RFI and using genetics from sires with low RFI expected progeny differences (EPDs) can result in significant feed savings over time. The scenarios below show the feed savings associated with using low RFI sires with varying RFI EPDs and expected breeding values (EBVs).

SCENARIO 1

A rancher purchased Bull 1 from a seedstock producer that had been selecting for RFI for 2 years. The rancher plans on using the bull for 4 years. Estimated feed savings over the 4-year period:

- Bull 1 RFI EBV = -0.08
- Bull 1 RFI EPD = -0.04
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -0.08, Bull 1 will eat 0.08 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, it's progeny will eat 0.04 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 1. FEED COST SAVINGS USING BULL 1 FOR 4 YEARS

	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	117	15.18
Replacement Heifers	7	0.13	1,635	212.58
Feedlot Animals	13	0.13	468	60.84
Total Savings:				\$288.60

As seen in Table 1, over the 4-year period, Bull 1 will save the rancher \$288.60 in feed costs alone when compared to feed costs of an average bull. Savings in feed costs will continue to be increased if the rancher chooses to breed the replacement heifers with another low RFI bull. With several years of selection, the feed savings associated with a bull can be increased drastically, as shown below in Scenario 2.

SCENARIO 2

A rancher purchased Bull 2 from a seedstock producer that had been selecting for RFI for 15 years, hence the improvement in the RFI EPD (seen below). The rancher plans on using the bull for 4 years. Below you can see how much can be saved in feed costs over the 4-year period, given the following assumptions:

- Bull 2 RFI EBV = -1.0
- Bull 2 RFI EPD = -0.5
- Bred to average cows with RFI EBVs = 0
- Each year the bull sires 20 calves; 10 heifers and 10 bull calves
 - 7 of the heifers are kept as replacements
 - 13 calves are sent to the feedlot
- Feed cost = \$0.13/lb DM

With an RFI EBV of -1.0, Bull 2 will eat 1.0 lb DM/day less than the average bull. If the bull is bred to an average cow with an RFI EBV of 0, its progeny will eat 0.5 lb DM/day (based on EPD) less than progeny from an inefficient or average RFI bull. This will equate to feed savings associated with maintaining the bull itself, as well as savings with feeding the replacement heifers and feedlot animals.

TABLE 2. FEED COST SAVINGS USING BULL 2 FOR 4 YEARS				
	NUMBER OF ANIMALS	PER YEAR FEED COST (\$/LB DM)	REDUCTION IN FEED INTAKE (LB DM)	TOTAL SAVINGS (\$)
Maintaining Bull	1	0.13	1,460	189.90
Replacement Heifers	7	0.13	20,440	2,657.20
Feedlot Animals	13	0.13	5,850	760.50
Total Savings:				\$3,607.50

As seen in Table 2, over the 4-year period, Bull 2 will save the rancher \$3,607.50 in feed costs alone when compared to feed costs of an average bull. Again, the savings will continue to increase if the rancher chooses to breed the replacement heifers with another low RFI bull.

CONCLUSION

By selecting for RFI, or introducing several low RFI bulls into your herd, feed-related savings will continue to increase. Several years of genetic selection will improve the baseline feed efficiency of the ranch and savings will continue to transfer to the cow herd as replacement heifers are retained.

MARY McDONNELL VON FORELL SCHOLARSHIP

Each year we award one **Junior Consigner with the high performing bull from all breeds** with a \$500 scholarship from our family. This scholarship is named in remembrance of Mary, Steve's aunt and Leo's sister, who passed away from cancer. She is dearly missed. She was a huge supporter of youth.

Note: "High performing" is measured by top indexing bull over all breeds.

Thank you

Don't forget to ask about our referral program!

To our customers, consignors employees and friends, THANK YOU for placing your trust in the Midland Bull Test. You've made the past 60 years thoroughly enjoyable. We look forward to serving you for another 60 years and beyond!

Dakota AG

INSURANCE

Livestock • Equine • Farm & Ranch • Crop • LRP • PRF

Individual Livestock Policy Coverage Options

1. Mortality Only Coverage: Pays 100% of the value of the cow or bull in the event of death or humane destruction as a result of a life-threatening injury. Age: 24 hrs of age - 10 years of age.

Individual Equine Policy Coverage Options Mortality Only (\$5,000 emergency colic surgery included), Major Medical & Surgical, Stallion Infertility (Accident, Sickness & Disease), Prospective Foal Coverage & more!

Farm & Ranch We insure all sizes of farm and ranch operations throughout the Midwest. We have access to every major carrier in the United States, don't hesitate to call an agent for a **FREE-NO OBLIGATION** quote today!

Livestock Risk Protection (LRP) This new & exciting subsidized coverage option offers protection against unexpected future declines in the market value of cattle and swine. Coverage is available for Feeder Cattle, Fat Cattle, Swine and Unborn Livestock as long as the livestock are born before the SCE end date. *Unborn Livestock Definition:* Livestock not born on the effective date but expected to be marketed before the end date.

Livestock Specified Perils, Livestock Herd Coverage This policy option provides coverage for losses caused by death or humane destruction of livestock as a result of a specified peril. Coverage is for both owned and non-owned livestock in your care, custody, and control.

Perils Covered: fire – lightning - explosion or smoke - windstorm, hail or tornado - smothering by blizzard or snowstorm - collision with vehicles, aircraft or falling objects - riot, civil commotion or vandalism - earthquake or volcanic eruption – flood, drowning, mudslide or tidal waves – accidental shooting – electrocution – attack by wild dogs or animals – collapse of buildings, barns, bridges or culverts – sinkhole collapse – hypothermia due to precipitation – leakage of gas or anhydrous ammonia – contaminated feed or water.

Available Endorsements: coverage in transit – grazing poisoning – livestock born during the policy period – frozen semen & embryos in storage or transit.

Rainfall Pasture, Rangeland and Forage (PRF) Covers pasture, rangeland, or forage for perennial haying and/or grazing purposes. It was designed to help protect a producer's operation from the risks of forage loss due to the lack of precipitation.

Other Available Insurance Options: Prospective Offspring Coverage (Pregnancy) – Trucking – Feedlot – Short-Term Cattle Coverage – Frozen Semen & Embryo Endorsement (Storage & Transit) – Single Trip Transit Coverage – Cargo Coverage & More.

Nasalgen³
The color of longer IBR protection.

NEW Nasalgen³ offers young calves unrivaled ERD defense. With 6.5 months of IBR protection, plus BRSV and PI, NASALGEN is the insurance you need to give your young calves the strong foundation they deserve.

And with a unique blue shadow, there's no second-guessing which animals have been vaccinated. This cattle-friendly vaccine is one more way Merck Animal Health Works for you. Learn more at Nasalgen.com.
