

25th Annual

**MILK RIVER
ANGUS**

Bull Sale

Selling

100 Yearling Angus Bulls

APRIL 21, 2021

1040 North Fork Road • Chinook, MT 59523

www.milkriverangus.com

WELCOME to the 25th annual Milk River Angus Sale!
Twenty-five years ago the Milk River Angus Association started the first Milk River Sale with 12 consignors, 100 bulls and 30 heifers. That first sale was held April 22, 1997 when the local Angus association decided the Hi-Line area needed a bull market for the local cattle producers. At that time only Sunrise Angus was having a sale in Chinook.

Consignors that first year included E-7 Angus, Master Angus, Tiger Ridge Angus, DH Angus (the only remaining original consignor), Nissen Angus, Ira Hall, Westfork Angus, KelMcC Angus, Milk River Genetics, Hould Angus, Heart R Angus and Cornell Angus.

Those first 95 bulls averaged \$1802 with a sale top of \$3500 consigned by Nissen Angus, selling to Robert Cox of Chinook. 22 heifers averaged \$1022 with a sale top of \$1500 consigned by E-7 Angus, selling to Current Creek Angus of Roundup. We're proud that the Milk River Angus Sale has maintained its high standards in the cattle business and seedstock industry throughout the 25 years.

From the first sale, only the top bulls from each breeder sold, and that's still the case today. Consignors in 2021 include DH Angus, C Bar Angus, North Fork Angus, 4 Butte Cattle Co. and Top Notch Angus. With only the top end selling, the breeders are able to bring to you the very best of each program.

All of the consignors welcome you to this year's sale. What a year it has been! Whether you're planning to attend in person or bid on-line, we're so grateful for our valued customers and friends who have supported us over the years.

The bulls have all passed a breeding soundness exam performed by Dr. Roger Baxter, with his 50+ years of dedication and experience. Bulls have been on a complete health program at Hould Feedlot - with the same dedication and care they've been providing to this sale for 25 years! We've worked to gather as much information to help you choose your bulls, but please contact any of the consignors with any questions.

We are very proud of the quality of the bulls in the 2021 offering. Milk River Angus Bull Sale has a bull for every need. Powerful growth bulls, calving ease bulls, and carcass bulls all backed by some of the best programs on the Hi-Line.

We are certain that our bulls will love your cows!

"YOUR SOURCE FOR BULLS ON THE HI-LINE"

MILK RIVER ANGUS

25TH ANNUAL SALE

Wednesday April 21, 2021

Bear Paw Livestock • Chinook, Montana

Lunch at 11:30 • Sale at 1:00

Selling...100 Yearling Angus Bulls

Sight Unseen Purchase Guarantee

If you cannot attend the sale you have options to place your bid:

- Bid online through Frontier Live. (See instructions on this page)
- Leave your bid(s) with any of the fieldmen, auctioneer or consignors.

We will make every effort to purchase a bull for you that will fit your budget and needs. If you are not satisfied upon delivery you don't own the bull(s).

Health & Performance

All bulls sell with complete performance test information including scrotal measurements and ultrasound data. The bulls have been given a breeding soundness and fertility exam by Dr. Roger Baxter who has over 50 years experience. Ultrasound evaluation by Sonja Gregory, AAA certified technician. All bulls have received Fusoguard (Footrot vaccine), Pyramid MLV 5, Inforce 3, 7 way with somnus booster, Safeguard wormer, pour on and have tested negative for BVD.

Genomic Enhanced EPDs

All bulls have been DNA tested for parentage and genetic defects. Numerous bulls have been Angus GS tested to increase EPD accuracies and predictability. Look for the Angus GS symbol on the pedigrees of those bulls. EPDs are current as of 3/26/2021. Updated EPDs are available at Angus.org

Insurance

First year loss of use and mortality insurance will be available after the sale through Stockmens Insurance Agency, LLC. Bill Pelton will be available after the sale if you choose to insure your purchases. The Milk River Angus consignors will pay half of the premium. See page 21 for further information.

Retained Interest

Sellers are reserving 1/3 revenue sharing interest on all bulls. Natural use and salvage belongs to the buyer. If the seller chooses to collect semen from a bull that you have purchased, it will be done at your convenience and the seller's expense.

Terms and Conditions

All cattle sell according to the standard terms and conditions of the American Angus Association.

Delivery/Hauling Rebates

Free delivery in Montana and at cost outside of Montana. \$50 rebate on every bull you take home the day of the sale.

Sale Order

Sale order has been picked by each consignor.

Videos

Videos of the bulls can be seen on the Milk River website www.milkriverangus.com or www.frontierlivesale.com.

The life of this "soon to be" breed legend came to an early end on May 18, 2020 after an injury while breeding in the pasture of one of his owners. This powerful and easy-fleshing sire with a phenomenal fertility level was the leading sales sire at ORigen for 2018 and ranked Number 2 in 2019. Produced by a dam whose first four natural calves recorded an average weaning ratio of 106, his grandam has five calves with an average weaning ratio of 113, and Southern Charm descends from a line of females with quality udder structure and a high level of fertility that have a slick hair coat, good feet, and ease of fleshing.

Ideal 4223 posted individual ratios of BW 77, weaning 114, yearling 114 and gain 114. Owned by Wheeler Mountain Angus where he has been doing exactly what they had hoped for. "He is the most consistent heifer bull we have ever used." Outcross calving ease sire. Ideal 4223's calves are moderate in frame, extremely correct with excellent feet and legs.

Sons sell as lots 84, 85, 86.

OCC Cortez was the 2nd top selling bull from the 2017 Ohlde Cattle Company bull sale. Cortez is a moderate, soggy made bull. He exhibits the extra muscle typical of OCC cattle and stands on an excellent set of feet. He sires more performance than typically found in OCC cattle. The heifers are big volumed, massive ribbed, broody females that make great cows. Owned by Gardner Angus and Hould Angus.

Sons sell as lots 30, 31, 32, 33, 34, 35.

Turbo has remarkable muscle shape and eye appeal. Very few bulls in the Angus breed can compare to Turbo's quarter. He has been used heavily in the Top Notch program for 5 years. He produces bulls with massive butts and muscle shape in a smooth, attractive package. His females are moderate and feminine with excellent udders and milk. Turbo is a proven calving ease sire with added performance and carcass. Very strong maternal influence with his dam posting 5 WR @ 111.

Sons sell as lots 46, 47, 48, 49, 50, 51, 52, 53, 54, 55.

Chaps 816 was Top Notch's high selling bull in the 2019 Northern Premier Sale selling to Quintin Smith, Tennessee. Chaps 816 weaned at 798 pounds off his 2-year-old dam, 103 ratio. His adjusted 365 of 1329 was a 106 ratio. Chaps 816 offers all the qualities of his sire Chaps and his grandsire Resource with significant advantage for all the \$ EPS's. He is built like a tank - wide-topped with extra muscle mass. This is the first sons to sell and Chaps 816 is making a statement with this group! They are following their sire with extra mass and muscle. Chaps 816 ranks in the top 2% of the breed for ribeye, his sons are a reflection of that with over 100 RE ratio on most of the sons selling in this sale. We have heard great reports from Quintin in Tennessee and we are excited about this bulls future!

Sons sell as lots 62, 63, 64, 65, 66, 67, 68, 69.

- Dam at 14 years old has made her mark in our pastures with a weaning ratio of 11@107 and yearling ratio at 4@109. Her daughters will continue on her legacy of bringing in heavy calves.
- Raindance is a long spined female maker that will add the stretch to his offspring

- Growth bull with 115 WR and 117 YR.
- This Raindance son should leave you with great females. Raindance females are known for their length of spine, long neck extension, deep bodies, presence and performance.
- Lot 2's pathfinder dam "0129" has been one of our best cows for bringing in heavy calves, posting a weaning ratio of 9@107 and yearling ratio of 4@109. She brings style, length and feminine presence.
- Great granddam in also a pathfinder with 6 WR @ 106 and 3 YR @ 110. Good set of EPDs with +3.2 BW, +65 WW, +117 YW, putting Lot 2 in the top 25% for both growth traits.

- Largest 205 weight in the C Bar offering at 799 pounds and a 135 ratio.
- The dam of Lot 17, 6293, is a GDAR Timeless/Basin Ambush cow with a little more height but is wide as a freight train. I would say she is one of those wedge shaped cows with tremendous depth and dimension.
- Dam has weaning ratio 2@121.
- Pathfinder granddam has 8WR @108.
- Awesome set of EPDs +2.5 BW, +79 WW, top 4% and +130 YW, top 10%.
- 13.1 inch RE, +.84 EPD, top 15%.

- WOW! describes Lot 51! He is long, deep-bodied, thick, and gentle!
- Heifer bull supreme ranking in the top 1% for both CED and BW!
- High maternal bull ranking in the top 1% for \$M, top 4% for milk, top 5% \$W.
- One of the better Turbo sons. His maternal brother, Top Notch Chaps 816, was a sale topper in 2018 going to Quentin Smith, Tennessee. Sons of Chaps 816 sell as lots 62-69
- His full brother was purchased in last year's sale by Mardy Cox.
- 14-inch ribeye!
- Lot 51's numbers say his calves should come easy, grow fast, perform in the feedlot and hang a good carcass.

- You will like this gentle meat wagon! Phenotypically, this bull is just the way we like them; very wide, flat straight topline, excellent quarter like his sire Turbo, deep throughout, tight sheathed, great profile, free moving, and stands on good feet! Marv's favorite!
- Weaned off his dam at 824 adjusted with a 108 ratio and he kept right on going after he hit the feedlot gaining 3.81 pounds per day and a yearling weight of 1405.
- Scanned a 13.7 RE, 105 ratio.
- Dam is a larger framed cow, she has 2@99 BR, 2@108 WR, and 2@108 YR.
- What a bullet factory – 43 cm scrotal and scored excellent and 95% on his fertility score!
- Ranks in the top 1% for WW, YW. Top 5% \$W.
- Herd sire potential in Lot 52!

"Chinks" is what we call this bull! Super gentle.

- Our biggest bull with a 1487 yearling weight and a whopping 5.81 pounds per day gain.
- Correct and long made heifer bull with well-balanced carcass numbers.
- Really wide down the top and carries that width all the way through.
- Twin to lot 65 and raised by a foster dam which is why his ratios are all 100.
- Pathfinder dam has 3@109 WR and 3 @ 109 YR.
- Top 5% \$W, top 10% milk, top 20% RE, top 25% WW, YW.

- Look for consistent birthweights and consistent weaning weights from this heifer bull.
- These four Cooper lots are not "two and done" heifer bulls – look to use these on heifers for four to five years.
- These bulls will keep your heifers developing and breeding back, reducing cull numbers, and helping build a lasting herd.

- Excellent fertility score, priceless mothering ability and calving ease built into this bull.
- This heifer calved in a snowstorm (2020) on our wintering range. She went back to the same exact spot to calve this spring (2021) right on time.
- We realize this calf is out of a first-calf heifer.... but we believe he has potential to be an outstanding sire for anyone's cow herd.

- "Soren" - This is our only Rito D son.
- He is a smooth easy-moving bull with exceptional structure.
- His sire was a well-balanced "everyone liked him" type bull.... unfortunately, he got hurt.
- This bull is out of a shorter Connelly cow with lots of volume and a great udder.
- Another heifer bull that we believe can be used much longer than typical heifer bulls, which will improve the stayability of your younger cows.
- Excellent disposition in this cow.

- Plenty of carcass in this bull, he ranks in the top 10% \$M, top 15% for MB and top 20% RE and a 13 inch RE.

Door Prizes

Bull Buyers stick around after the sale for a chance to win some fabulous door prizes, including a bronze by the late Bridger Bronze co-owner and artist Harvey Rattey, and a rope creation by Suzie Oxarart of Ropes by Suzie.

At the end of the sale, a lot number will be drawn and whoever purchased that lot will be the lucky winner of these nice door prizes!

CALVING SUPPLEMENTS

Last trimester and calving to breed-back interval is the most critical time for cow nutrition. Vitamin and mineral supplements support:

- ✓ Reduced calving problems
- ✓ Newborn calf vigor
- ✓ Improved colostrum quality
- ✓ Overall calf health
- ✓ Improved breed-back

Milk River Ag

YOUR FORAGE SEED SOURCE:

- ✓ Alfalfa
- ✓ Grass
- ✓ Grazing Corn
- ✓ Cover Crops
- ✓ Annual Forages
- ✓ Grain and Silage Corn

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

MANAGEMENT

Dockity (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockity in a sire's offspring compared to another sire.

Claw Set (Claw), is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

Foot Angle (Angle), is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

Maternal Weaned Calf Value (SM), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving dockity, foot structure and fertility while maintaining weaning weights consistent with current production.

Weaned Calf Value (SW), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

Cow Energy Value (SEN), is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

Feedlot Value (SF), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

Grid Value (SG), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), an index, expressed in dollars per head, includes all traits that make up both SM and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.
