OX BOW RANCH PROGRAM

O
X

The Ox Bow Ranch has been known for producing a female that has a type and kind-medium frame, easy fleshing, deep bodied, with a good udder. This is the type of cattle that has been here and the type we breed for today. For the past five years, we have set out to test the performance and longevity of our bulls a little more. Over the last few years, we have seen drought, brutal winters, and some encouraging weather. Considering those inconsistent conditions, limited watering holes and miles traveled up and down the mountains for feed- we are proud of their condition going into calving, they have held up. **This is the kind of testing we are talking about.** This is what truly maternal is. No irrigated pastures, no creep, and traveling miles for water and feed. These cow families truly hold up and perform in rough country.

The weather around the western states the last few years has been challenging to say the least. Conditions such as these are where OX Bow cattle thrive. We have, as many of you have, seen and heard reports of sub-par breed ups and lighter calves. The truly maternal, tough environment tested, easy fleshing cattle have stayed in production and continue to get the job done. Non-tested, low maternal and less thrifty cattle have left the herds. Our cattle are truly out from breeding to calving in good years and in bad. Because we have tested our cattle, our conception rates continue to stay unaffected.

O X

OX BOW RANCH BULL DEVELOPMENT

The yearling bulls offered will consist of mainly calving ease bulls, with a handful of growth type bulls mixed in. These yearlings have been grown slow, with a mix between pasture and a high-end roughage ration. Our yearling bulls consume no more than 18lbs of dry roughage in the ration throughout the last three months before the sale. A great example of the low input type of easy gaining cattle we strive for. Most importantly, this ensures structural soundness, and bulls that will hold up as yearlings in tough country, without melting at turn out. The 2-year-old bulls are a moderate set of rugged, maternal bred bulls. They are developed being turned out all spring, summer, fall and are not raised in a feed pen. Again, we are shooting for soundness and structure, not record setting measurements.

We work hard to provide a well-balanced EPD profile for our customers, but we also know what our cattle can do. Our type, kind, performance model works in harsh conditions and performs year after year. These calves were trailed anywhere from 5 to 12 miles off the mountain before weaning, then ran across the scale. No filling them up on irrigated pasture. No creep feeders out. This, we think, gives a true comparison to our commercial producers. We all know what works on paper doesn't always work in the real world. For this reason, we are ok if we don't always match up with the latest and greatest EPDs. Our focus is producing bulls that work for our customers and make you money. Pounds at weaning matter and your calves are not purchased based upon what their sires EPD says. We believe in a balance of pounds weaned and mature cow height and weight that ultimately drives the largest profit factor for any cow-calf operation. If you see a bull that catches your eye, but might not meet an EPD requirement for you, let us know and we can help you determine if the actual results match what you are looking for.

Vindicator is the calving ease specialist that still has top-of-the-breed performance. He lands in the top 10% of the breed for maternal index, top 20% for \$C, and the to 10% for marbling. He will add top and hip to cattle and maintain a true calving ease, along with exceptional vigor in his calves at birth.

9672 was our pick, along with Dohrmann Cattle Co. of the 2020 Hinman Angus bull sale. The wide top, square hip, and width from behind really drew us to him. Then you add large SC and put it all in a moderate frame, calving ease package. It is a bull that is complimenting the improvements we have been making on the ranch. 9672 sired daughters sold at the top of our 2022 Female Sale, and daughters retained in our herd are doing a great job.

OX Mytty 1236 was selected in our 2022 sale by Frank Thompson. 1236 is a low BW 7701 son. Moderate frame, wide-based, and the width across the top to match. We used him AI on the Ox Bow, and couldn't be more pleased with this first set of calves. The first bull calves made the yearling sale pen, and the heifers we will retained in our herd. We look for 1236 to keep the moderate to medium size frame and make some of the easiest fleshing calves around.

Crouthamel Spur 1011 was selected out of the 2022 Crouthamel sale by Gracie and I. 1011 is a medium framed bull, with the thickness, foot, and the natrual scrotal size we are looking for to selectivley mate to our herd. The outcross pedigree for us, gave plenty of mating options. You will find these stout made ET calves catching your eye everytime you walk into the pen, and the heifer calves are being retained in the herd.

We really appericate MVP's moderate BW, good growth, SC, foot structure, carcass traits, and all in a medium sized frame. We have been very happy with the results we have seen in these wide based MVP sired calves. MVP sired females fit right into our cowherd here at the Ox Bow.

7701 was the high selling bull purchased in the last Mytty Angus bull sale in 2018. We purchased this bull for many reasons, the added length, pounds added, and maternal power just to name a few. 7701 was the standout ET eye catching calf at the Mytty Angus Ranch for the 2017 season. Mytty Blackcap 87R daughters always came to the top for performance and look. 104U, the Pathfinder dam of Mytty Source 4082 would be one. These calves have added pounds at weaning, length, excellent foot, and a little more frame than the traditional Ox Bow Cattle. 7701 sired females are the up and coming standouts in our cow herd, showing all the maternal traits we are looking for.

Ox Vindicator 3515 is a thick and clean made, calving ease prospect we are offering at lot 1. 3515's sire Ox Vindicator 0017 was the \$38,000 high selling bull in our 2021 sale to Desert Creek and Gary Bidwell. 0017 has been AI'd to over 2,000 hd of commercial heifers over the last three years, and has proven the calving ease. 3515's dam Ox Barbaramere Jet 0363 is one of our standout young 7701 daughters. 0363 raised the Ox Vindicator 2012 bull sold in our 2023 sale to T Down and Diamond P Ranch. We used 2012 on our registered heifers AI and have seen the calving ease and shape of hip we have come to expect in Vindicator genetics. We see 3515 following in 2012's footsteps with Top 3% of the breed in HP, Top 4% CED, Top 5% \$M, Top 10% SC, Top 15% BW, Top 20% CEM, Claw, and PAP, and Top 25% \$W.
