

40th Annual Bull Sale

Open Gate Ranch

Tuesday, March 17, 2020

1:00 pm • Simms, MT

At Broken O Land and Livestock

Simmental. SimAngus. BUILD BETTER BEEF.

Notes on Reading our Sale Book...

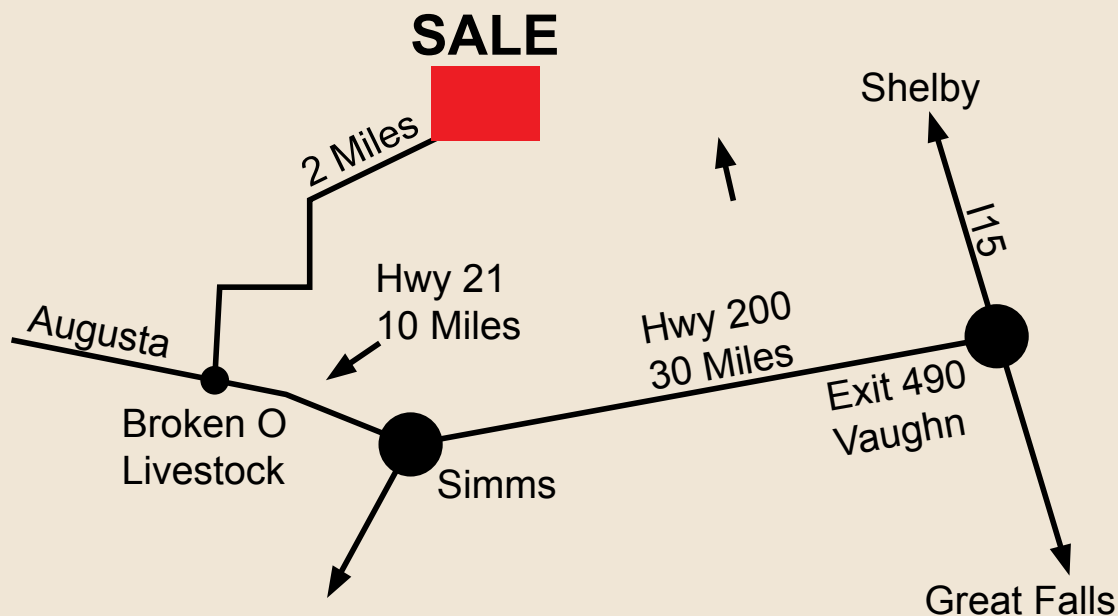

When we sort through the stacks of Bull Sale Books we receive each year, we notice everyone presents their data a bit differently. Surely, this can get confusing-but it's important to remember there is no right or wrong formula to building a catalog. We choose to present the data that is most relevant to the way we make breeding decisions, the way we manage our cattle, and the trends we want to be able to track and observe in each year's calf crop.

For example, we like to think of our cattle in simple, straightforward terms, that we can actually keep straight mentally and visualize. So we don't include as many EPDs as we could. We monitor our trends on all of the traits and understand their merit, but we strive to effect change according to what most of our customers need. So a simpler data set works well for us. We continue to provide actual records of ultrasound, gain, and birthweight, because we like to see whether traits are truly manifesting themselves - if the patterns in a sire group show that genetic markers have actually triggered and are doing what they promise. Large discrepancies or inconsistencies in a sire group are a red flag to us and will influence our decision of whether to use a sire again.

So please don't hesitate to reach out to one of us if you do not see data you need, or if it is unclear why we include it. We would love to help you utilize better the patterns we see when we put it together every year.

Sale Location

Open Gate Ranch

Tuesday, March 17, 2020

1:00 pm • Simms, MT

At Broken O Land and Livestock

SCHEDULE OF EVENTS

TUESDAY, MARCH 17

All Day Cattle available for viewing
Come early for coffee and to see the bulls.

12:00 NOON Lunch

1:00 PM **OPEN GATE RANCH BULL SALE**

SALE LOCATION

Broken O Land and Livestock is located ten miles west of Simms, MT on Highway 21. For map and directions, see opposite page.

AUCTIONEER

Roger Jacobs

LIVESTOCK PRESS REPRESENTATIVES

Lynn Perry, *Western Ag Reporter*

Jeff Thomas, *Lee Agri Media*

Devin Murnin, *Western Livestock Journal*

SEMEN INTEREST

Open Gate Ranch reserves the right to collect semen for our personal use on any of the bulls offered in the sale. This will be done outside the breeding season at our expense.

SATISFACTION GUARANTEED

Open Gate Ranch offers a **complete satisfaction and soundness guarantee** up to the second breeding season on every bull purchased at our sale. This includes bull replacement or full credit minus salvage against a new one. Please notify one of us immediately if any problem develops. We truly want to be the first to know.

Any individual purchasing **3 or more bulls will receive a 5% volume discount** off the purchase price.

There is **\$100 discount per bull for hauling** your own on sale day.

Buyers unable to attend the sale can **purchase bulls sight unseen** and know that when we deliver them - if you don't like them, you don't own them. Please contact us ahead of time if you would like to bid by proxy or by phone.

Dustin 590-6016

www.OPENGATERANCH.COM

ABOUT THE BULLS

The bulls are available for viewing at the ranch prior to the sale. They are located in the development pasture right off the main highway. From Fairfield, take Hwy 408 west for 9.5 miles. You will see the bulls to the north.

Videos of the bulls available online www.opengateranch.com

EPDs on both sale bulls and Reference Sires are printed as calculated by American Simmental Association and follow the Simmental definition for each trait.

Ultrasound scan data was taken on February 4, 2020 by Sonya Gregory and interpreted at a Central Ultrasound Processing Lab. It is an actual calculation of each bull's carcass information that has been adjusted to a 365 day measurement, which will facilitate accurate comparison between bulls. American Simmental Association provided updated Carcass EPDs based on the scan data. IMF is marbling as a percent of mass, BF is back fat in percent of inch, and REA is rib eye in square inches.

Scrotal evaluation and fertility testing was done by Dr. Cale Bjornstad on February 9, 2020.

WELCOME TO THE SALE

Warmest greetings and Welcome to our 40th Sale!

Probably the most dominant piece of conversation in our little corner of the Beef Business these days is what a fine thing it has been to be having an open winter. It is the best possible companion to a little bit of optimism returning to the cattle markets and we haven't heard a single person complaining about the lack of snow piles . . .

We know you all will be opening this Sale Book with Bulls on your mind, but at Open Gate, we would always much rather talk about cows. They are the heartbeat of why we stay in this business. Lots of people think and talk about Simmental as a terminal breed. We do not. Of course, if all you want is to muscle up your calves and add pounds on the scale, Simmental will always do that, year in and year out. But that is only a small part of the value the breed can bring to your

program, and a little bit like never shifting your truck out of compound. We place much more value on the combined effect of Simmental performance and muscling with the kind of quiet, deep bodied, MATERNALLY excellent crossbred females you could be making. Females with capacity, frame, appetite and bone structure to support the next level of performance. In fact, we rely a great deal on the performance our females are bringing to the table - not just seeking it in the Sires we mate them to. You can see it plainly in their wide set pin bones, depth and spring of rib, milking capacity, heavy hair coats, ability to birth and raise a heavier calf, and all the way down to a broad muzzle for getting down to the business of utilizing resources. (In our intensive grazing program, we often get a chance to observe cows competitively grazing, side by side. A fine, narrow muzzle just doesn't get 'er done!). Each of those components is maybe only a detail- but adding them up and stacking them makes a powerful case for maximizing profit and our use of available resources -increasing the bottom line- without needing to run more cows to do it.

How can you spot the Sire groups that have been chosen to promote maternal excellence? We have done that for you. There are no Terminal Sire groups. It is important to us to pay attention to Maternal Calving Ease and Milk, and Maternal Weaning Weight so that we never go backward on those traits. Then, when we add in a good Rib Eye and heavy Weaning Weight we know all the pieces are there for passing on value to you, the rancher. Value you will be able to cash in on.

We know you'll be looking at a lot of Bulls over the next few weeks. But we hope you'll mostly be seeing cows.

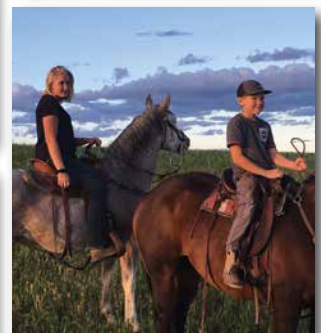

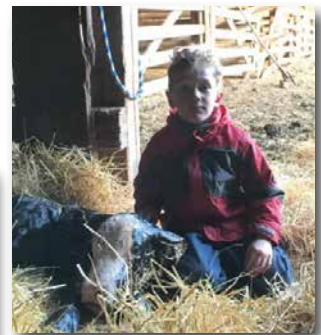

It's high time to introduce our up and coming ranch crew: Ivey is the oldest. She got a jump start on the rest and has already put together a fine little herd of SimAngus cows. She is putting herself through High School by correspondence, and has made herself indispensable in the calving barn, moving wheel lines, raking hay, riding and filling in wherever there is a need. This is her second year on the night calving crew.

Willow is next. Our thoughtful and nurturing one. She raises Border Collie pups and keeps an eye out for any opportunity to care for something . . . chicks or kittens or bum calves.

Soren and Able are the boy cousins. They each have earned their starter cow too. Soren's is a classic, red, heavy milking Simmental and Abel's is a crossbred black baldy, because he is already deeply prejudiced against red cattle. A case could be made for Dustin having influenced this opinion. Soren will happily keep the whole world flowing with endless conversation and jokes, and Abel raises dust - keeping himself right in the middle of whatever is going on. No doubt, this snapshot of them will be just a memory in no time and is a good reminder to be present with our little ones every chance we get. It goes by so fast.

We keenly anticipate the great time we will have with you all on Sale Day! In the meantime, please accept our best wishes for you and yours, and may your hay yards stay full.

Warmly,
The Open Gate Crew

GIBBS 0601X RAISINCAIN Reference Sire.

We keep coming back to this bull because he is just so classy: gorgeous traditional Simmental style and influence, dominance in pre-weaning growth, solid maternal credentials and a rib eye to bring huge carcass yields. His daughters are deep, stylish and have excellent dispositions. He is keeping udders correct, pigmented, and we love the structure of all his calves.

Notes on Fertility

This year, our fertility testing and breeding soundness evaluation with Dr. Bjornstad went the best it ever has. Excellent test results and very few problems. Dr. Bjornstad commented that a 36 to 37 centimeter scrotal measurement is ideal for bulls this age. The official average for all Open Gate Bulls this year is 36.8. That makes us feel pretty good to know we are hitting the target for well developed bulls, ready to breed, and carrying high fertility across the board. This is a classic component that Simmental Influence will bring to a crossbreeding program. And if this kind of fertility is so measurably consistent in the bulls, we know it is present in the females too. You are buying a complete package of genetics for long term profitability. Another reason we are glad to stand behind our guarantee that our bulls will do their job.

OLF OTIS Y43 Reference Sire.

Otis is a very complete, traditional Simmental. He has one of those EPD profiles that seem too good to be true. His weaning weight compared with his calving ease are antagonistic, but the numbers have proven reliable for us in 5 years of using him. One obvious element is his length and very smooth shoulder. His offspring are consistently quiet, and his daughters are very feminine, broody and extremely productive.

TJ COWBOY UP 529B Reference Sire.

A powerfully constructed son of the untouchable Cowboy Cut, building a reputation for incredible growth and docility. He ranks at the top of the breed for weaning and quality grade, rang the bell on individual performance and ultrasound data, and does a knockout job blending power and phenotype.
