P.O. Box 215 • Wolf Creek, MT 59648
oxbowranch1725@gmail.com

Dear Friends,

Welcome to our annual Ox Bow Ranch Bull Sale. We are pleased to be able to offer you again, a nice set of yearling bulls, and a select group of rugged 2-year-old bulls. We are excited to showcase a couple new sire groups that we feel compliment, and help improve what we are striving for - moderate, stout, maternal cattle with longevity. We like to breed like and kind cattle, as we feel it creates more consistency in our program.

The yearling bulls will consist of mainly calving ease heifer bulls, with a handful of growth type bulls mixed in. These yearlings have been grown slow, with a high roughage ration. This ensures structural soundness, and bulls that can hold up as yearlings in tough country without melting after turn out. The 2-year-old bulls are a moderate set of rugged, maternal bred bulls. They are developed being turned out all spring, summer, fall, and are not raised in a feed pen. Again, we are shooting for soundness, structure, and longevity, not record setting measurements. We do lean toward maternal based cattle, this year's group of bull's averaged in the top 30% of the Angus breed for \$Maternal.

We strive to provide a well-balanced EPD profile for our customers, but we also know what our cattle can do. We have a type, kind, and performance model that we know works in harsh conditions and performs. This might not always match up with the latest and greatest EPD's but, we will take the real-world testing and results. Pounds at weaning matter and your calves are not purchased based on what their sires EPD says. We believe it is a balance of pounds weaned and mature cow height and weight that ultimately drives the largest profit factor for any cow calf operation- female longevity. If you see a bull that catches your eye but, might not meet a EPD criteria for you, let us know and we can help you determine if the actual results match what you are looking for.

We invite you to stop by to view our program and cattle. The bulls can be viewed anytime at the ranch before the sale. We really enjoy visiting with customers about their program and going through the bulls. As always, if you are not able to make it to the ranch prior to the sale or sale day you can view the videos via a link on our website. The sale this year will once again be broadcast on Superior Livestock.

Best Regards,

Marc Orem

GUARANTEED BID PROGRAM-ABSENTEE BIDDING

A 100 % satisfaction guarantee for cattle purchased in your absence is offered by Ox Bow Ranch if Marc Orem or John Andras assists you with your purchases.

HOW TO PARTICIPATE AS AN ABSENTEE BUYER WITH SUPERIOR

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. *Please note that all of the lots in the sale will also be available for viewing online prior to sale day at www.superiorlivestock.com.*

HERE'S HOW IT WORKS

Turn in Bids Over the Phone. This is our traditional method of buying livestock. To get started simply go online to www.superiorlivestock.com and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to info@superiorauction.com. You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

Click-To-Bid. This is Superior's online bidding platform for cattle buying. Please note that high speed internet is required – this is not for dial-up or satellite internet. Registration is free, but you must become a member of www.superiorclicktobid.com to sign up. Becoming a member is easy - just go to the homepage of www.superiorclicktobid.com and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

Viewing the Auction. There are 2 places to view the sale broadcast live on the internet: www.superiorlivestock.com or www.superiorclicktobid.com. Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to www.superiorlivestock.com, but if you want to bid over the computer you must go to www.superiorclicktobid.com. Remember you can call in to bid on the internet, but you must be a member of www.superiorclicktobid.com to "click-to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431-4452.

**If you plan to bid by phone through Superior Livestock or 'Click-to-Bid', you must register at www.superiorlivestock.com prior to bidding.*

Sale Location: Paved road to the sale site! The sale site is conveniently located at Ox Bow Ranch's Sentinel Rock Ranch just off I-15 at Wolf Creek then 2 miles east on Holter Lake Frontage Road. See map below.

Terms and Conditions: Cash. Cattle will sell under the Terms and conditions of the American Angus Association. No Cattle will leave Ox Bow Ranch until paid for in full. No cattle will be loaded out until after the sale. All bulls with potential defect carrier pedigrees have been tested free.

Retained Ownership: Ox Bow Ranch is retaining 1/3 revenue sharing semen interest in all bulls. Full possession sells on all bulls.

Sight Unseen Purchases: Satisfaction guaranteed on all sight unseen purchases through the sale team.

Bids: Buyers unable to attend the sale may send or phone their bids to Marc Orem, John Andras, field representatives or the auctioneer.

Fertility and Breeding Soundness: All yearling bulls will be given a breeding soundness and fertility exam after the sale, but all bulls will be guaranteed sound and fertile at the time of delivery.

Herd Health: All cattle have had a complete vaccination program prescribed by Dr. Clint Hilt. All bulls were vaccinated and received pour-on last fall. **All bulls have tested negative for persistent BVD infection.**

Delivery: Bulls will be delivered as soon as arrangements can be made. Please give delivery or pick up information at the end of sale. \$100 discount on bulls picked up sale day.

Performance Data: All performance data will be available sale day. This includes ultrasound, final weights and scrotal. Current EPDs can be viewed at www.angus.org

First Year Breeding Guarantee: Ox Bow Ranch will guarantee soundness for the first year, if any issue comes up, we will replace with an equal value bull if available or do what it takes to make it right. We stand behind our cattle!

Volume Discounts: We will offer volume discounts starting with 5 bulls at 5%, up to 10% on 10 bulls or more. Repeat customers: Repeat customers from the previous year will receive 2% discount on all bulls, this will also be added on to your volume discount if you purchase more than five bulls.

Liability: All persons attending this sale do so at their own risk and responsibility without liability on the part of the ranch owners or their employees.

Cattle Inspection: Cattle are available for inspection prior to the sale at Ox Bow Ranch's main ranch, 1 mile Northeast of Wolf Creek on Holter Lake Recreation Road then right on gravel 2.5 miles southeast. Cattle will arrive at the sale site on March 1st.

Accommodations:

Numerous nice motels are available in

Helena (35 miles south) & Great Falls (58 miles north)

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

Cow Energy Value (\$EN), an index expressed in dollars per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in future daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing \$EN savings differences include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they had recorded 8-33 calves, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation at www.angus.org.

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen GeneSeek or the HD50k or i50k by partner Zoetis.

+1.05	-10	+70	+56	+84	+24	+109	

The mating decisions behind using Raindance AI on the Ox Bow, was to first add length and pounds to the calves. We have also found that we can add a little frame with him also. Females have been easy to retain in the herd, but this is not suprising with the power of the famous SAV Blackcap May 4136 behind them.

+1.73	-8	+90	+81	+66	+61	+127	

Justified was selected to use AI due to the many excellent reports on his daughters in production. The females calve easy, have excellent udders, maintain flesh, and wean big calves. Additionally, they are quiet, moderate, well balanced, good footed cattle, and have the shape and kind we like to produce. He also has the advantage of excellent marbling and still produces moderate easy fleshing cattle, this made it an easy choice for us.

Source was chosen to use through AI on the ranch because of the history and production of females he sired, mainly in the commercial world. With the results we saw on large heifer projects, I wanted to be able to get a group of daughters to test and go forward with. Being a moderate, easy fleshing, calving ease Resource son aligns with type and kind we are breeding for.

745 was our pick of the Hould Angus Ranch 2018 production sale. He falls in with our type and kind we try to produce and will continue on the consistency of Resource. He has been used natural service, and we have some AI calves hitting the ground now. He is a thick, long, moderate, big scrotal, good footed no nonsense type bull. Backed by cow families known for longevity. If you're looking for moderate, quiet, low input type cattle, he fits the bill.

7701 was the high selling bull purchased in the last Mytty Angus bull sale in 2018. We purchased this bull for many reasons, the added length, pounds added, and maternal power just to name a few. 7701 was the standout ET eye catching calf at the Mytty Angus Ranch for the 2017 season. Mytty Blackcap 87R daughters always came to the top for performance and look. 104U, the Pathfinder dam of Mytty Source 4082 would be one. This is the first set of calves by 7701 on the Ox Bow. These calves have added pounds at weaning, length, excellent foot, and a little more frame when mated to larger cattle. For our customers that can take a little more frame than the traditional Ox Bow Bulls, he is a good choice.

103			

- Very balanced, big topped Herd Sire prospect
- Dam is from the highly productive Ox Bow Manor cow family, generations of maternal strength
- This bull's pedigree combines power and maternal strength in a unique way, with War Party on the top
- The outcross bull with the correct phenotype to give you that eye appeal everyone wants
- Dam's first calf produced is retained in the herd and calved this year AI. Dam also calved AI this year.
- Grand Dam avg wean ratio of 108 and avg yearling ratio of 110
- Top 15 % SC and WW
- Top 20 % YW

Ox

Commitment to the Community

Ox BOW RANCH
WOLF CREEK, MT

**Ox Bow is proud to sponsor
professional bareback rider**

Buck Lunak

We love Buck's focus, hardwork,
great character and strong traditions
in ranching and horsemanship.

Buck's Accomplishments:
Three Time Indian World Champion,
Montana PRCA Circuit Champion,
10 Time Circuit Finalist

We believe in the value of community
and supporting our youth.
Ox Bow appreciates the opportunity
to support many local events.

Proud to Support

We look to support young 4-H'ers
that have raised and are selling at
the local stock show and state fair.

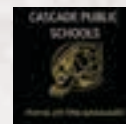

FFA Bulls for Blue local program and
various events throughout the year.

Donations to local organization,
Friends of the Black and Gold that
supports youth and family activities
in the Cascade area.

Cascade High School
Booster Club business member.

Cascade Schools Track improvements
project contributor.

Local Cascade Pro Rodeo Event Sponsor
