To look at this bull now, you would never guess he had a fairly moderate birth weight. He is as long bodied as a bull and a half. His clean made front, mass from end to end and overall growth without over done frame certainly are traits we admire. Miss Pride 305, his dam, is a full sister to Prairie Pride Next Step that certainly puts out good ones. Mark this one herd bull caliber.

Premium was our high selling bull in 2015 to Hilltop Angus, Denton, Montana. He has contributed to their program and is the sire of some of their best young females. He is very correct, good footed and stout. His ability to consistently sire calving ease, good bull calves and excellent females makes him very appealing.

We feel this son of the 4001 bull is an individual that has plenty of performance, a very correct and solid structure, good natural muscle and shape and in a right size, attractive long bodied and feminine. His granddam was A New Day daughter that was also exceptional. An interesting combination of bloodlines that should mate well in several herds.

EZAR Gold Rush really did a noteworthy job for us. We were impressed by reports of his natural mass and muscle combined with his superb phenotype. He has passed those traits on for us so well. Equally important was the fact that his dam and granddam were superior producers. His carcass is solid from cut to marbling, with good \$ values. We feel he is a solid breeding piece.

We have used very few A.I. or natural sires that have bred as consistant as PayPal. His calves are born with realistic weights in a fairly tight range. They perform well and have a very similar look and type. Good muscle, adequate frame, natural rib and volume and a nice compete look. We feel his progeny will contribute to alot of breeding programs. His dam has high commendations in the Maher herd.

This Gold Rush son and his twin brother have been fun to watch grow and develop. The dam is a terrific Freedom daughter that raised both calves to weaning. Loads of performance in these Gold Rush sons that have extra length, rib and volume. Light birth weight is likely due to being a twin, not a recommended heifer bull.

+72	+73	+79	+118	+56	+175

We really felt that the 4001 bull would play a big role in our program for awhile. Unfortunately a severe Laceration to a back foot cut this plan short. He was a solid muscled as you would find and had good length and super foot structure. His pedigree has some familiar bloodlines, but in a mix that is somewhat unique. Dont hesitate on these 4001 bulls, they should be producers.
