GENERAL INFORMATION

SALE LOCATION:

Stockmen's Livestock — East Barn Dickinson, ND 701-225-8156

SALE DAY PHONE:

701-225-8156

701-260-2579 (Rusty) 701-260-8277 (Arthur)

PRE-SALE INSPECTION:

Bulls can be viewed at Ridl Farms any time prior to February 25th and at Stockmen's Livestock through sale day.

HEALTH:

All bull have been given 7 way Somnus, foot rot vaccine, Pinkeye vaccine, and Vista 5 poured. Health papers will be furnished for bulls going out of state. Bulls will be semen tested in March prior to delivery or pickup and sell fully guaranteed.

SEMEN INTEREST:

Ridl Angus has the right to retain 1/3 seme interest in any bulls sold.

GENETIC DEFECTS:

All bulls selling are free of any known genetic defects.

MAIL BIDS:

Anyone unable to attend the sale may call or send bids to any of the owners, ringmen, auctioneer or bid online at www.dvauction.com

DELIVERY:

Haul your bull home sale day and receive a \$75 per bull discount. Free delivery on bulls and heifers within 350 miles from the ranch. Bull deliveries will take place in late March and April. Heifer deliveries will take place promptly after the sale.

LUNCH:

FREE BEEF LUNCH STARTS AT 12:00, sponsored by Bravera Bank

BREEDING GUARANTEE:

A 60-day breeding season guarantee will be offered on any bulls selling over \$3000 or more. This will cover any injury that would keep them from being a breeder for the first season. This does not cover injury that occurs prior to breeding season at Ridl Angus or at the purchase's ranch. If a problem occurs, we will provide a suitable replacement if one is available or you will receive full credit, minus \$2000 towards a purchase in next year's sale. This guarantee does not cover death as death is insurable. Injury or death prior to deliver or pickup is not the responsibility of Ridl Angus, also insurable. All bulls will pass a breeding soundness exam performed by a veterinarian. Bulls are guaranteed to be sound breeders.

FEEDING ARRANGEMENTS:

We will "feed um till you need um" at no extra cost. Bulls returning to Ridl Farms for wintering will be handled and cared for as if they were our own but are the property of the buyer with the buyer taking all risk and responsibility promptly after the sale. Ridl Angus will not be responsible for bulls if injury occurs. Injury is an insurable risk and Ridl Angus will not be responsible for any injury. We highly suggest insuring all bulls. Bulls wintered at Ridl Farms are to be picked up at the farm. Please call ahead to make loading arrangements.

TERMS:

Bulls sell under the terms and conditions of the American Angus Association. Terms are available at www.angus.org.

RIDL ANGUS DICKINSON, ND

Cattlemen:

It is our pleasure to welcome you to our 26th annual production sale. We would like to thank all our past customers and look forward to working with any newcomers. The sale will be held Monday, February 27th at Stockmen's Livestock in Dickinson ND at 1:00 MDT. We will offer 87 yearling registered Angus bulls and 9 registered yearling open replacement heifers. The sale will be broadcast live on www.dvauction.com and the videos will be available there as well.

We strive to produce good, high-volume, growthy cattle with great maternal traits and good dispositions. We feel the offering will show this from the first calf to the last. It's often said "this is the best set of bulls we have offered", well I full heartedly feel this way about this group. They are the deepest set we have raised and are very excited about them. The bulls are freeze branded, fully guaranteed, have passed a breeding soundness exam, and have DNA enhanced EPDs. We continue to offer our "feed um till you need um" wintering program.

Feel free to stop out at the farm and go through the cattle at any time prior to February 25th and at Stockmen's thereafter. We thank you for your interest in our program and look forward to working with you. Check out our website for more information at www.ridlangus.com.

Thank You
Ridl Angus

• Stats was our pick and co-top selling bull of the 2021 Mohnen Angus bull sale. We bred all our heifers the last two years to Stats and couldn't be happier. He is a double digit CED bull with explosive growth. The Stats calves are long sided clean made, weaned off big and kept on performing on feed. The yearling heifers by Stats are fancy and look like they will make great cows. Semen is available for sale. Owned with Richard Angus.

American Angus Association Selection Tools

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted by the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility in a sire's offspring compared to another sire.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction, and the EPD is reported in percentage units.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

FOOT SCORE

Claw Set (Claw), is expressed in units of claw-set score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal claw set, which is toes that are symmetrical, even and appropriately spaced.

Foot Angle (Angle), is expressed in units of foot-angle score. A lower EPD is more favorable, indicating a sire will produce progeny with more ideal foot angle, which is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

CARCASS

The genetic evaluation produces a single set of EPDs for carcass traits where the units of measure are in trait format and analyzed on an age-constant basis.

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait selection indexes where a higher value suggests more profit. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires if sires were randomly mated to cows and if calves were exposed to the same environment.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Increased selection pressure on \$W increases weaning and maternal milk traits while increasing mature cow size.

Cow Energy Value (\$EN), expressed in dollars savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals. Components for computing \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase, and market these animals on a quality-based carcass grid.

- Suitable for use on heifers

NOTES:

RIDL Registered Heifers

These heifers are being offered right out of the heart of our replacement pen. They represent the same exciting sires as the bull mates. The heifers are bangs vaccinated, freeze branded, have an EID tag, and are checked open and breedable. DNA enhanced EPDs will be available sale day.

- Another younger heifer out of a female purchased from Tokach Angus. A nice EPD profile compliments this feminine Plus One daughter.

Junior Herdsires

Vermilion Dynasty

Reference Sire K

- Dynasty was a feature and a high selling bull in the spring 2022 Vermilion Ranch bull sale
- Dynasty is packed with cow power; his donor dam is said to be the best cow to walk the Vermilion Ranch. His popular sire Fair-N-Square is known to be backed by an extremely good cow as well.
- Dynasty will have a major roll going forward

Bruns 5 Star

Reference Sire L

- 5 Star was the standout and high selling bull in the 2022 Bruns Angus sale in South Dakota.
- 5 Star is a real beef bull; very thick topped, deep ribbed and long sided
- 5 Star saw heavy use as a yearling bull breeding over 40 cows naturally and he held up very well
- Look for sons to highlight our 2024 bull sale
