### TRANSPORTATION

The RAR Sale Facility is 35 minutes from the Gregory Simmons Memorial Airport in Cisco, TX, and can accommodate any private aircraft. DFW and Love Field airports are approximately 2 hours from Desdemona with services by all major airlines.

### DELIVERY AND DISCOUNTS

RAR offers FREE NATIONWIDE DELIVERY. We offer a 5% discount to volume buyers of 6 or more bulls. We also offer a \$50 per head discount for all bulls loaded out on sale day.

### SEMEN INTEREST

RAR is selling 100% full possession in all sale bulls and retaining half revenue sharing and semen interest.

### ANNOUNCEMENTS

All announcements made from the auction block take precedence over printed matter in this book.

### FOOD AND REFRESHMENTS

Lunch will be provided by Gorman Milling.

## ROONEY ANGUS RANCH STAFF

Steve and Karen Rooney • Owners

Brady Chandler • General Manager / Managing Member

Micah Chandler • Office & Marketing Manager / Managing Member

Cutter Overton • Ranch Manager, TX Division • Paige Janke • Cow Herd, WI Division • Jaden Valko • Cow Herd, WI Division

Dear Cattlemen,

On behalf of the entire Rooney Angus Ranch team, we would like to invite you to our Annual Spring Bull Sale at the RAR sale facility located in Desdemona, Texas, Thursday, March 10<sup>th</sup>, 2022.

First of all, we appreciate your time and interest in reading through our 2022 sale book. We all get a lot of sale books in the mail these days! The overarching philosophy here at RAR is built around “interaction, action, results and accomplishments.” The tie that binds this philosophy is the simple word, “shared.” As a reputable seedstock producer, it’s up to us to take action and design Angus cattle with extraordinary opportunity from beginning to the end of the supply chain. If we do our jobs well, then interaction happens through aggressive competition for our cattle, and more importantly, our customer’s cattle. Our efforts are measurable and shared accomplishments result in greater opportunities for profitability as superior Angus cattle move from farm to fork.

It is important to note, these bulls are raised in Central Texas, in a commercial environment from birth. We are relentless in our phenotypic appraisal of these cattle. Every animal must pass a visual appraisal for overall conformation, feet and disposition. Then, each animal’s individual performance, EPDs and \$Value indexes must meet an even stricter threshold. Please look at the charts on the following page. Note the significant difference in our 2022 sale offering compared to the breed average for all Angus non-parent bulls, particularly Yearling Weight and Marbling. The Certified Angus Beef® *Targeting the Brand* logo appears on the pedigrees. These bulls are not simply meeting the minimum requirements. In fact, the average of the offering is 32% higher than CAB’s +.65 requirement for marbling and 19% higher for \$Combined. Our 2022 offering is the best overall group of herd bulls, with the genetic potential to be successful in any operation or production environment, anywhere in the country that we have ever offered.

Our goal is action on our behalf and interaction on your behalf, that results in shared accomplishments. We look forward to seeing you March 10<sup>th</sup>. Meantime, if we can be of any assistance, please don’t hesitate to contact us.

With much appreciation,  
The Rooney & Chandler Families

Steve & Karen Rooney

Brady & Micab Chandler

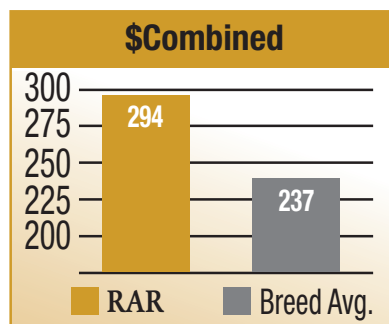

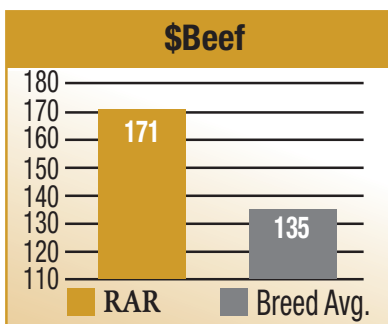

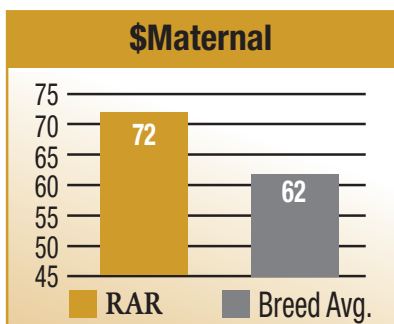

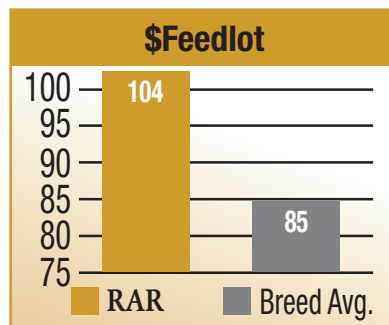

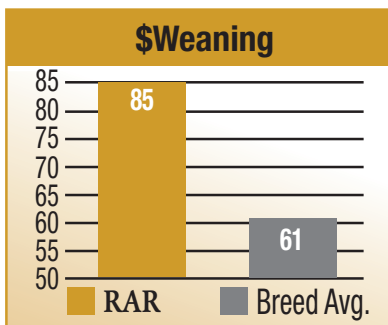

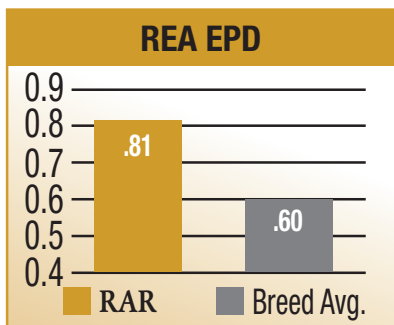

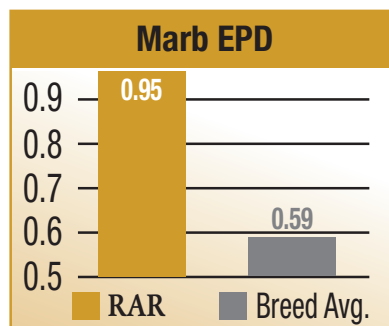

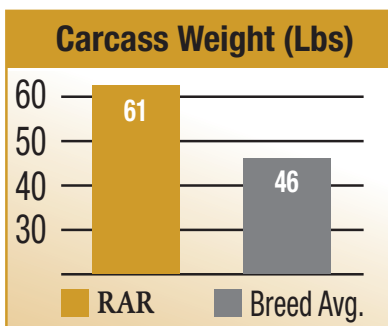

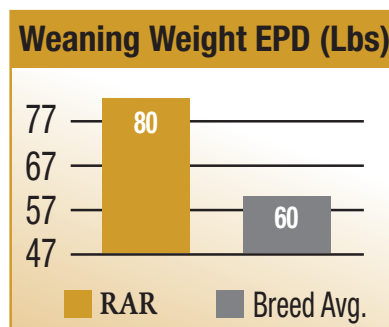

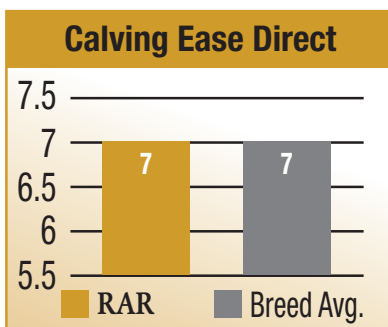

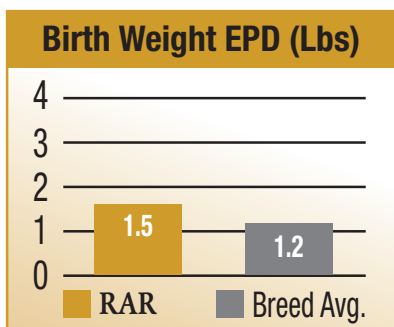

## Comparison of Rooney Angus Ranch Bulls to the Angus Breed

**Expected Progeny Differences (EPD)**, is the prediction of how future progeny of each bull is expected to perform relative to the progeny of other bulls listed in the database. EPDs are expressed in pounds, square inches, or centimeters (depending on the trait), plus or minus.

**\$Value Indexes** are multi-trait selection indexes expressed in dollars per head, to assist beef producers by adding simplicity to genetic selection decisions. The \$Value is an estimate of how future progeny of each bull is expected to perform, on average, compared to progeny of other bulls in the database if the bulls were randomly mated to cows and if calves were exposed to the same environment.

HERD BULL kind and unique by any sort you do in the Angus breed. Only 2 non-parent bulls in the breed combine 100+ WW; \$100+ \$Maternal. He is the only son of the highly regarded Power Play to achieve that to this point. His dam and several of her full sisters from our now deceased donor Williams Prophet Elba 233 are drawing the attention of the industry for high genetic merit in multiple traits with elite genomic scores and elite progeny. His dam will be one of the features in the Rooney Angus Female sale at our WI location on September 9. She is a prolific producer.

Not the first good bull from this mating of Full Disclosure on this great producing Payweight daughter that ranks as 1 of only 2 Payweight daughters at her BW, YW, \$M and \$C—Multi-Trait Excellence from Sire and Dam. The Full Disclosure steers have distinguished themselves in branded beef programs for grade and tenderness. Full Disclosures first 14 daughters have him pegged as a great maternal sire with those 14 daughters at 105 progeny weaning ratio. Watch more for his daughters and granddaughters in the breed. 0538 spreads the birth-growth and every \$Index excels top 10%. And—1.03 PAP indicates he could work at altitude.

Our now deceased herd sire, K216, made cattle with length, capacity, growth, carcass merit, with elite tenderness genomics. We call them "industry cattle." They take care of business in multiple traits.

# Lots 6 through 20: Two Year Old Bulls

**10**

82	92	1	1	95	36	10	21	18	78	50	3	12	1	48	4	2	75

A really unique son of the popular Casino Bomber bull. Like Lot 12, from a Vintage donor daughter of the VAR Frontier bull that only has a few daughters in the breed. He is the #1 son of Bomber for YW and the #4 son of Bomber for \$ Combination. A top 1% CW with a top 1% \$F = feedin' cattle! A truly unique genetic tool with elite data and a deep cow family to back it up.

**14**

58	50	44	34	91	73	15	41	16	6	27	68	84	18	12	91	72	86

A high \$Maternal bull from one of the most popular female sires in the country, Playbook. The dam of this bull is a donor for Vintage Angus, California, and Lylester Angus, Nebraska, and has produced top sellers in multiple sales. Bulls this strong in maternal sometimes lack his strength in growth and carcass merit.

Another Confidence Plus x 1984 donor that has a unique combination of marbling and ribeye combined with a powerful growth EPD profile.

## American Angus Association \$Value Indexes

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

**ANGUS**  
THE BUSINESS BREED

**Maternal Weaned Calf Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

**Weaned Calf Value (\$W)**, an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. Over time, increased selection pressure on \$W will increase weaning and maternal milk traits while also continuing to increase mature cow size.

**Feedlot Value (\$F)**, an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

**Grid Value (\$G)**, an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

**Beef Value (\$B)**, an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wear all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

### Combined Value (\$C)

an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

An interesting bull here from the Select Sires roster member Hoover Know How with a dam that is as fertile a donor as we have experienced. She has had previous top-sellers and we are building an arsenal of daughters. The Know How cattle have added muscle dimension with good feet, good scrotal and good HP. Really unique bull here with high maternal values and still Top 1% for Marbling, \$G, \$B and \$C. This bull is the ONLY son of Know How with his level of Marbling, RE and \$C.

Calving ease bull by K216 herd bull that is another "industry bull"—balanced across multiple traits.

**Rooney Angus Bull Development**

All the bulls in this offering have spent a majority of development time running in large pastures on cake and grass. While we have the genetics to produce 800 plus lb. weaning weights and 1,500 plus lb. yearling weights we feel it is not in the best interest of the cattle or our customers to feed that hard. Soundness, fertility and longevity are our goal with this management practice to produce bulls that can work in any environment. We are in the business of selling genetics, not feed.

## Rooney Angus Ranch Guarantee

All the bulls will sell with the Rooney Angus Ranch Guarantee. If a bull is injured at anytime during the first breeding season (90 days from turnout) so as to make them functionally infertile, you will receive 100% of the purchase value (minus the salvage value) or a replacement bull of equal quality and value if one is available. In short, if you're not happy, we're not happy and we will make it right.

Power Play with Top 1% WW and high Marbling and strong \$ Index values.

Created by Angus Genetics Inc. (AGI) and powered by Neogen GeneSeek, our sale cattle have been tested with the first DNA profile designed specifically for Angus cattle, Angus GS<sup>SM</sup>.

Each marker is intentionally chosen from the Angus genome to drive the Angus breed into the future. It offers maximum accuracy for genomically enhanced EPDs at great value. Testing heifer and bull calves ultimately allows you to reap the benefits of faster genetic gain in your commercial herd. With Angus GS, it's all about you, our customer.

## Top Dollar Angus Feeder Calf Program

### Promote Your Verified Genetic Investment

Top Dollar Angus is the industry leader in third-party genetic verification and marketing assistance for superior Angus and Red Angus-based feeder cattle. Our program stamps a unique identity on the 'best of the best' by verifying and then showcasing their genetic merit. The Top Dollar Angus team works directly with a large number of feedyards and buyers to provide them with documented superior feeder cattle, coupled with genetic risk

mitigation and the precision understanding they need to pursue your cattle with absolute confidence.

Top Dollar Angus enables cow-calf producers to benefit from the genetic value already built into their herds. Producers that invest in high-end genetics, as well as strong health and nutrition programs, need a means of positively differentiating their calves from average cattle. Top Dollar Angus does that. Industry demand is strong for genetically superior feeder calves with the right supporting documentation. Don't make buyers guess, let them know by putting the Top Dollar Angus badge of honor on your premium genetic investment.

*Contact our team for more information and a free evaluation:*

# ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

---

## *Aim High*

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

### *Minimum Genetic Requirements*

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

**Only 1 in 4 non-parent Angus bulls qualify.**

For more information on Targeting the Brand™ visit [CABcattle.com](http://CABcattle.com).

# EXPLANATION OF EPDS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance re-cord for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Residual Average Daily Gain (RADG)**, feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for post-weaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

**Dry Matter Intake (DMI)**, expressed in pounds per day, is a predictor of difference in transmitting ability for feed intake during the post-weaning phase, compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

**Docility (DOC)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

## MATERNAL

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

## CARCASS

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. **Weaned Calf Value (\$W)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

**Combined Value (\$C)**, an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd.

## HOW TO PARTICIPATE AS AN ABSENTEE BUYER

We have made preparations to bid and buy livestock through Superior Productions' "Call or Click-To-Bid" service for those unable to attend in person on sale day. Please note that all of the lots in the sale will also be available for viewing online prior to sale day at [www.superiorlivestock.com](http://www.superiorlivestock.com).

### HERE'S HOW IT WORKS

**TURN IN BIDS OVER THE PHONE.** This is our traditional method of buying livestock. To get started simply go online to [www.superiorlivestock.com](http://www.superiorlivestock.com) and click on the tab titled "Register for a Buyer Number". Select the registration form for Superior Productions and print the registration form, fill it out and fax it in to Superior Productions at (817) 378-3380 with a signature on it, or scan and email the form to [info@superiorauction.com](mailto:info@superiorauction.com). You can also mail it in to the address provided on the form. Upon receipt of this information Superior will call you with a buyer's number and the bid line phone number that you will use on sale day to place bids over the phone.

**CLICK-TO-BID.** This is Superior's online bidding platform for cattle buying. **Please note that high speed internet is required – this is not for dial-up or satellite internet.** Registration is free, but you must become a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to sign up. Becoming a member is easy - just go to the homepage of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) and follow the out-lined steps to get started. Input your information and select a username and password. You will receive an e-mail confirming you are a member. From that point forward you just have to sign in and select the sale you would like to register for and once approved you will receive an e-mail confirming which sale you are now registered for.

**VIEWING THE AUCTION.** There are 2 places to view the sale broadcast live on the internet: [www.superiorlivestock.com](http://www.superiorlivestock.com) or [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Just go to the home page of either website and select the auction. If you just want to watch the auction on your computer, smartphone or tablet go to [www.superiorlivestock.com](http://www.superiorlivestock.com), but if you want to bid over the computer you must go to [www.superiorclicktobid.com](http://www.superiorclicktobid.com). Remember you can call in to bid on the internet, but you must be a member of [www.superiorclicktobid.com](http://www.superiorclicktobid.com) to "click- to-bid". Your computer must have Flash Media Player installed for this website to view the auction. If you have any questions, please call the Superior Productions office at 800-431- 4452.

**If you plan to bid by phone through Superior Livestock or 'Click-toBid,' you must register at [www.SuperiorLivestock.com](http://www.SuperiorLivestock.com) prior to bidding.**

# PROMOGEN®

## GENETIC EVALUATION

### WHAT IS PROMOGEN GENETIC EVALUATION?

Promogen® genetic evaluation is not just another method for establishing genomic probabilities. The purpose of the test is to identify and quantify, using a simple numerical scoring system, the presence of three key proteins that medical science has labeled collectively as "Defensins." A twenty-year research project involving several universities in the United States and Europe, has proven that physiologic performance, whether it is measured as disease resistance, fertility, productivity, or athletic ability, are directly related to the concentration of these proteins in the body.

### WHY IS PROMOGEN IMPORTANT?

- Provides a "road map" for developing management strategies that maximize herd profitability.
- Helps you identify animals who are most likely naturally inclined to herd longevity, reproductive efficiency, and naturally able to maximize environment and express Expected Progeny Differences (EPDs) to the best of their ability.
- Early identification of animals that may prove to incur more input costs than their counter-parts.

### HOW DOES PROMOGEN EQUATE TO PROFITABILITY?

Genetic progress in beef cattle comes with challenges. The major issue is industry segmentation. Utilizing the Promogen® assay can add value throughout the production cycle. The ideal cow for a cow/calf operation is one that successfully weans a feedlot-ready calf at six to seven months of age and does so with minimum added expense associated with feed supplementation, medication, and labor. At the same time, that cow is expected to breed back within 40 to 90 days post-calving to repeat the cycle; she is expected to do this year after year. Promogen® assays will predict value-added cows that will raise healthy calves.

Then there is the challenge of sire selection. Current EPDs, even when supported by genomics testing, can become little more than a good guess with so many traits being selected simultaneously. Promogen® testing accurately identifies bulls who are more feed efficient, more disease resistant, more fertile and appear to be able to pass the ability to produce high levels of Defensins and their associated proteins to their offspring.

# PRGMOGEN<sup>®</sup>

## SCORING

### THE SYSTEM USES A NUMERICAL SCORE OF 1 TO 6.

- Animals with scores of **less than 4** are not producing the three marker proteins we are measuring at physiologically effective levels.
- Animals scoring **between 4 to 4.5** are producing the three marker proteins at levels that are physiologically average.
- Animals scoring **between 4.5 to 5** are in the **top 25%** of the populations we have tested. This includes both beef and dairy cattle.
- Animals scoring **over 5** are in the **top 5%**.
- Animals scoring **6** are in the **top 1%**. We believe that these individuals are extraordinary.

Immunologically superior animals are proven to return higher significant gains across all traits: overall wellness, fertility, and feed efficiency.

Profits on overall wellness are realized through in increased response to vaccines and antiparasitic treatments, drastically reducing the incidence of morbidity and antibiotic use.

Fertility is reflected in higher conception rates, reduced risk in early embryonic death, weaning calves at higher weight ratios, and overall retention and longevity in replacement females.

Feed efficiency is directly affected by the body's ability to ward off inflammation due to environmental stress factors.

Cattle on feed who possess this natural ability have higher conversion rates than their counterparts who are immunologically inferior - all without commanding additional medicine costs and higher overall expenses.

Immunologically superior animals who possess specific Defensen predictive biomarkers are proven to be more profitable, and aide in economic gains through these highly heritable traits for generations to follow.

**Choose immunologically superior animals through Promogen Genetic Evaluation.**

**CHOOSE GENETIC GOLD.**
