DESIGNED FOR MATERNAL STRENGTH

OUR VISION

Hello Cattlemen

This year the Red Angus Industry lost a great supporter & one of the most motivated Red Angus Breeders we had. A true cowboy & a great friend, Josh Dykes passed away tragically last fall. Josh & I would talk at great lengths about our philosophies, our long term goals, and the direction we thought Red Angus cattle should go. He was very passionate and his phone calls are something I truly miss. One thing Josh always told me during our conversations was, "Tell your philosophy more." I wrote this lengthy introduction about our vision at Sandhill Red Angus in the days following his passing. Sandhill Red Angus will be selling picks of our 2019 and 2020 born females as Lot 4A in the sale this year. The proceeds from this Lot will go to Josh's children.

With this introduction I am going to talk about our vision and why we have this philosophy. Our long-term goal would most easily be described as trying to make a great Red Angus female! We want females with growth, carcass, and longevity. We don't want to make them into a terminal animal. Longevity is the one thing most attributed to sustainability in the cattle business. We don't chase the new and upcoming thing. We will not flip through generations to keep our EPDs up to date. We want functional females that last. You will see us talk about cows that are 12, 15, or even 17 years of age. These cows that breed up on time for that long and produce an above average calf are exactly what we shoot for. These females must be big bodied, long, and attractive. They must have good feet and a perfect udder. We believe that without these foundation females, you cannot produce the right end product.

To start at the beginning, we do not believe in low birth weights. Calving ease can be accomplished without giving up growth and structure. We do not want calves that weigh under 75lbs. We calve our cows out in a 1600-acre pasture, starting in the middle of March in northeast Montana. Calves need to have enough body mass to get up, nurse, and withstand some weather. A calf that is 90lbs will survive a negative degree night, whereas a calf that is 65lbs will probably never get up. If we pick up a cold calf at calving, it is almost always 75lbs or less.

Red Angus Cattle have always been and always will be calving ease, so why try and fix something that doesn't need to be fixed. Our birth weights stay very steady between 80-95 lbs and that is because we haven't chased lower birth weight bulls. Consistency is a must for us, we want our calves to average 85-87lbs. We don't want a sire that will have a 100lbs & then throw a 70lb calf. We want our herd sires to have a very constant birth weight average. We have some exceptions with calves in the 65-75lbs range and some over 95lbs, but very few. This will always be our first step in picking a new sire. A big negative birth weight EPD bull will not have very many live progeny in our program.

The next step in keeping our vision on track is watching our cows at calving time. It may sound silly to most in the cattle business, but the simple truth is that there are a lot of females in production that should not be. I am not sure if they are simply not looked at, or are just bred with an EPD calculator. This is when most of your convenience traits that can make the cattle business very fun or just plain miserable show up. First off is if they want to be a mother, again we calve out and not in pens. If a cow or a first calf heifer has a calf and doesn't want to take care of it, she is culled. It has amazed me how many popular bulls will have daughters that don't know how to take care of a calf. Second is a cows temperament, we will not punish a cow for being protective of a calf in the first couple hours after birth. Cows that will keep coyotes & other predators away have more live calves. That being said, we weigh every calf at birth, give them a permanent metal clip, and give two shots; so the cows have to be easy to handle. Disposition is huge and it is easy to pick out at this time.

Next is udder and feet scores. It is amazing to me how fast udders can be cleaned up and fixed with attention. It also amazes me how many poor udder-ed cows are in production. If a calf is born and cannot get up and nurse on its own, the cow should be culled. We don't have time to get a cow in to milk her or help assist the calf. Our foundation 2715 cow is a prime example of what we believe in. Last spring, she had a calf at the age of 17 without a problem, with a perfect udder and foot score.

I believe feet issues are harder to control because it has been such a problem for so long. It skips generations or doesn't show up until the cows or bulls get older. We have culled extensively on our cattle's feet and legs. It is something that we are proud of, but we believe still needs more work. Our cows are very good footed but in buying new bulls or keeping our own replacements, it is going to take years to fix.

Weaning a big calf while keeping good condition is our next concern. Growth is one of our biggest concerns and it goes back to low birth weights. The bigger the calf at birth, the bigger it will be at weaning. We have long time customers that calve in the middle of March and wean 650-700lbs steers every year in October. Commercial cattlemen get paid by the pound and we want cattle that will produce. We believe there are Red Angus Bulls that will perform with any breed. These bulls are just getting harder to find.

We all sell cattle to get fattened and killed. The next step in performance is getting those cattle to convert feed to muscle. The faster and easier they convert feed, the more profitable the feeders can be; thus your cattle will be in more demand. Along with this comes the carcass traits. Angus cattle have always marbled very well. The problem is that they lack in rib-eye and muscling compared to other breeds. We believe you can find bulls that will add rib-eye without sacrificing marbling or making your female into a terminal animal. A well balanced approach is needed in this area. Also, steers that don't have enough growth and frame and kill at 1000lbs don't make feeders much money, although steers that kill at 1500lbs & don't grade are just as bad or worse.

After weaning it comes time to focus on fertility. We believe fertility can be greatly enhanced in a short period of time. Fertility is the strictest culling factor we have at Sandhill Red Angus. When we preg check our cows, we cut them off at two cycles every year. There is no exception to this ever. In our first calf heifers, we keep only the heifers that catch in the first cycle.

We don't feed a mineral to our cows during the summer, they have to raise a calf & re-breed on their own. The only supplement that we put out is salt blocks. We believe that we have to be harder on our cows than our customers. If we are not, then the cows will not be functional for them.

This last fall we preg checked our Registered heifers in Jordan and they caught 87% to the AI. We put Embryos in all of our commercial heifers and they caught at an incredible 64%. This we believe is attributed to the fertility in our herd. Our Registered cows usually test at about a 3-4% open rate and that is only covering two cycles.

With all that, TYPE is still the biggest guide in what we do. We believe the right type of cow or bull can go anywhere in the world and produce. Environment will impact the size of the cow and the size of the calf she weans, but if she's not the right type, she won't last in production. To me the best explanation of this is a cow from north-east Montana that is long, deep, has some bone, structure, and keeps her flesh can go to Canada or Texas and thrive. Her progeny will adapt in size to the environment, but will still thrive. On the flip side of that, a fine boned, harder doing type female that may survive in Nebraska, will not be able to come north and stay productive. She won't be able to handle the winters and will be open or late.

Thanks for taking time to look at our program. We hope we can help you in some way, with highly productive females or big stout grow-thy bulls.

Please call me anytime to visit at 1-406-489-3773.

SANDHILL RED ANGUS

Annual Bull and Female Sale March 3rd 2020

Sidney Livestock Auction, Sidney, Montana 1:00 PM(MT)

CONTACT INFORMATION

HOME 406-963-2200

SALE LOCATION

Sidney Livestock Market Center 406-482-3513
720 10th AVE SE
Sidney, MT 59270
Lunch will be served prior to the sale at Sadie's.

AUCTIONEER

Joe Goggins 406-861-5664

SALE DAY REPRESENTATIVES

Scott Fraser, Frontier Live Sale 406-860-6548
Nolan Woodruff, Red Angus Association of America 805-861-0996
Matthew Wznick, Tri-State Livestock News 406-489-2414
Jared Murnin, Western Ag Reporter 406-698-4159
Devin Murnin, Western Livestock Journal 406-696-1502

INSPECTION OF SALE CATTLE

Cattle will be available for viewing at the ranch prior to the sale. All bulls and commercial females in the sale will be at Sidney Livestock Sunday and Monday before the sale.

INSURANCE

Austin O'Dea with O'Dea Agency is available to help you with insurance options. 406-766-2205

BIDDING

The Auctioneer in charge will settle any disputes as to bids, and his decision on such matters shall be final.

TERMS & CONDITIONS

All cattle sell under the standard terms & conditions of the American Red Angus Association.

UPDATED INFORMATION

Ultrasound, Yearling Weights, and Measurements will be available on sale day & on our website at WWW.SANDHILLREDANGUS.COM
Videos of every lot can be found at WWW.FRONTIERLIVESALE.COM

SEMEN INTEREST

Sandhill Red Angus will retain 50% semen interest in all bulls selling.

TRUCKING

All bulls will be fed free of charge until April 1st. All bulls will be delivered free of charge. We will assist in any way possible with transportation of the females in the sale.

HEALTH

BULLS will have two rounds of fusoguard, be poured and be current on all shots and a breeding soundness exam by High Plains Vet Clinic.
FEMALES will be bangs vaccinated, be poured and be current on all shots.

BREEDING GUARANTEE

All bulls have a one year breeding guarantee.

ABSENTEE BIDS

We hope everyone can attend the sale in person, but for those who cannot attend the sale, they can participate through Frontier Live Sale. If you would prefer to be on the phone with someone on site, please contact Andrew at 406-489-3773, or Scott Fraser with Frontier at 406-860-6548.

ABSENTEE PURCHASE

Absentee Purchases can be settled by contacting Sidney Livestock immediately after the sale at 406-482-3513.

SALE ACCOMMODATIONS

Candlewood Suites 406-482-9692
201 6th Street SE
Sidney, MT 59270
Ask for the Sandhill Red Angus Block

MONDAY NIGHT SUPPER

For all of those traveling to the sale on Monday. We will be at the Stockyards all day, so feel free to come view the cattle. Otherwise join us for supper at the Rodiron Grill at 6pm for a complementary supper and social, located at 520 North Central Ave in Sidney.

\$200 Discount to all Bulls taken Home Sale Day!

COMMERCIAL FEMALES

LOT
1A

50 THREE YEAR OLD RED ANGUS COWS

Here is a rare chance to buy a set of cows with all the work done. These young cows come right off the top of our replacement program and are to calve March 20th for 40 days. All of the cows for sale here bred up AI last year and are bred up really tight again. If you are looking for fertile females, take a look here. These young cows are bred to high power Sandhill Red Angus bulls. These cows will raise a great set of calves this year and for many more.

LOT
2A

100 RED ANGUS FIRST CALF HEIFER PAIRS

Selling pairs for May 1st to June 1st delivery.

All the pairs offered for sale will have calves out of Sandhill Red Angus bulls. We will work with buyers in any way possible to help with delivery and trucks. All calves will have two shots at birth. Sidney Livestock will collect 70% of the purchased price on the pairs and the other 30% will be paid at delivery.

COMMERCIAL FEMALES

LOT
3A

50 RED ANGUS BRED HEIFERS

All these heifers were purchased from past bull customers or home raised and put into our bred heifer program. The heifers have been ultra sounded by High Plains Vet Clinic and grouped into one heat cycle. The heifers should start calving April 5 for one cycle. They were bred by Sandhill Red Angus calving ease bulls. They are easy fleshing, moderate framed, and of top quality. Selling gate cut of 5 or more.

LOT
4A

1 Pick of our Registered Heifers/Bred Heifers

Lot 4A is a rare opportunity to pick a heifer out of our purebred heifers. You will have the option to choose from all the **2019 & 2020 born heifers!** There will be close to 100 embryo heifers included in this select opportunity. Pick will be chosen in October 2020 at the ranch after weaning. **Proceeds will be donated to the children of Josh Dykes. Please read our introduction.**

SELLING CHOICE BETWEEN
LOT 1 AND LOT 2

Take your pick of two bulls we think are exceptional..... Here is a chance to pick which one you feel is better. We cannot decide and therefor are letting you. Sandhill Red Angus will be keeping the other bull for our own in herd use. We would also like to collect semen on whichever bull is chosen to sample as well. We feel that these two sons are by far the best 103C sons to ever sell!!!

Payback Mineral

PAYBACK

Heifers:

- ▶ Improved growth
- ▶ Improved ovulation
- ▶ Better conception rates

Cows:

- ▶ Tighter calving intervals
- ▶ Improved conception rates

Bulls:

- ▶ Earlier puberty
- ▶ Enhanced semen quality
- ▶ Improved foot health

Healthy calves:

- ▶ Improved colostrum quality
- ▶ Better vaccination response
- ▶ Lower incidence of scours

Heavier calves:

- ▶ Increased milk production
- ▶ Tighter calving intervals
- ▶ Greater weaning weights

Payback mineral forms the foundation of a productive feeding program resulting in the best return on investment for your operation.

Bull Challenger

- High Fiber source for muscle expression
- Chelated mineral program
- Proven formulation for genetic potential

Head Start Feeding Program

	Head Start
Feeding Rate*	10-15 lbs
Additional Hay*	2-5 lbs
Average Daily Gain**	2.5-4.0 lbs
Medication	Optional

Thank you Sandhill Red Angus for all your support!
Contact Brandon Weidert @ 701-240-1230 for more information!
Hay & Water Testing, Rations and many other services available!

HEIFER BULL!

Red Angus Guide to EPDs

- HB** HerdBuilder Index – Need bulls for developing a profitable cowherd and maximizing the value of marketed progeny? Select a bull with a high HB value.

GM GridMaster Index – If you market all of your calf crop and want to increase the value of that calf crop, select a bull with a high GM value to maximize your profit.

CED Calving Ease Direct – Breeding Heifers? Select bulls with a high CED to increase the probability that the heifers will calve unassisted.

BW..... Birth Weight – Predicts differences in birth weight. BW is included in the CED EPD, so simplify your decisions by selecting bulls based on CED instead of BW.

WW Weaning Weight and **YW** Yearling Weight – Predicts differences in weight at weaning and yearling. While selection based on these growth measures can increase your payweight, be cautious what the bull's other EPDs are.

Milk Milk – Predicts differences in weaning weight of daughter's progeny due to milk production.

ME Maintenance Energy – Selecting bulls with a lower ME EPD will decrease the amount of feed his daughters will require to maintain body weight.

HPG..... Heifer Pregnancy – Retaining heifers? Select bulls with a high HPG to increase the percentage of exposures that result in a calving observation.
- CEM** Calving Ease Maternal – Another number to pay attention to if you are retaining heifers. Selecting bulls with a high CEM will increase the probability of those daughters calving unassisted.

STAY.... Stayability – The most important trait if your goal is developing cows that stay productive, thus increasing your profitability. Bulls with a high Stay EPD are expected to sire daughters that remain productive in the herd until at least 6 years of age.

MARB .. Marbling Score – Select bulls with high MARB EPD to increase the number of progeny that grade Choice or Prime.

YG Yield Grade – Marketing calves on a grid? Placing selection pressure on YG EPD will decrease the number of YG discounts on grid-marketed progeny.

CW..... Carcass Weight – Selecting bulls with a high CW EPD will increase the weight of the hanging carcass, which directly impacts revenue.

REA Rib Eye Area – Need to add muscle? Select bulls with a high REA EPD to increase rib eye area, which favorably increases Yield Grade.

FAT Backfat – Need to reduce waste in carcasses? Select bulls with a low FAT EPD to reduce backfat, which favorably increases Yield Grade.
