Fellow Cattlemen, Cattlewomen, Friends and Neighbors

A big hello and welcome from our outfit to yours. We would like to welcome you to our 14th annual production sale on December 14th. Also, a huge thank you goes out to everyone that helps us throughout the year.

We are very proud of this year's offering which includes sons from our home raised herd sires as well as many proven A.I. sires. Twenty-four ET sons from our very best cows are in the offering. We continue to be progressive in our embryo program and implant 120 embryos a year into our own commercial cows. We feel that this helps us produce higher quality, more uniform bulls for you, our customers. Again this year, we will be offering a fancy set of bred heifers. 50 from our program and 50 from long time customer and consigner Curry Cattle Company. We are also offering the dispersion of our 9- and 10-year-old cows. Free wintering will be available on the bulls until mid-March. As always, the cattle sell fully guaranteed. We stand behind them 110%. Our program and management practices enable the bulls to grow and develop slowly with hopes of them working many, many years for you. Only the best of the best are selected from the top 45% of the calf crop, making eight sorts.

Our motto is pretty simple here. Our cattle need to do their job, do it damn well and do it for a long time. We work hard around here and expect our cattle to do the same with little attention. They aren't overfed or overpampered and have had no hoof trimming. Our registered and commercial cattle are run together year-round. We feel that this method helps ensure that we are passing on genetics to keep you in the cow business.

Thank you for your interest and continued support. If you are new to our program, we would love to meet you and visit. We look forward to seeing you on sale day. If you can't make it and have questions, please give us a call.

Our co-top selling bull in 2019. He's truly the kind we strive to raise and about as complete as we can make one. He's a medium framed, easy fleshing bull with extra muscle shape and nice Angus head. Dreamer is very athletic and moves freely with a long stride and good feet. His first calves hit the ground here and have truly been standouts as a group ever since. His dam, WMR Pride 03, is the highest income producing cow we have, which totals \$288,000 from the last three sales. She is currently 12 years old and raising twins. We only have a limited number of Dreamer sons this year but will have much larger groups in the future. **Owned with 33 Angus Ranch, ND**

# EXPLANATION OF CALVING EASE SCORE DISPOSITION AND FOOT SCORES

We pay very close attention to the foot quality of our herd and only use a bull that we feel will improve hoof structure. We focus on breeding an Angus cow that will stand the test of time in our extreme Northern Montana climate. Foot Quality has been severely over-looked in the chase for bigger numbers. No animal here is trimmed except for our horses. If there ever is a foot problem with a bull purchased from us, we make it right. Any bulls that showed signs of poor hoof structure have been culled.

## DISPOSITION AND FOOT SCORES:

The scoring for the disposition and foot scores are based on a 1-5 rating. 1 being the very worst and 5 being the very best.

## BULL DEVELOPMENT AT SHIPWHEEL CATTLE CO.

Prior to calving, our cows are expected to graze winter pasture with only SweetPro blocks, usually well into February before seeing any hay. Our cows are range calved in April and May while only being checked twice a day. The pairs summer primarily in some of our higher, rougher pastures with the calves never seeing any creep feed. A full round of shots are given at our June/July brandings as well as preconditioning in September/October. The calves are then fence line weaned in early November on our hay meadows and SweetPro blocks. After grazing for 30 days, the bulls are then hauled into our grow yard, where they remain until May. While in the grow yard, a 2.5 to 3 lb. gain is targeted with a roughage based diet. We are constantly evaluating them and enjoy watching them slowly progress into structurally sound breeding bulls. The bulls are then hauled to summer pasture where they are expected to travel and thrive in rough terrain. In September, the bulls are brought back into the grow yard and fed a similar diet to post weaning. The bulls are broke to horses, dogs and a hot wire.

*A huge thank you goes out to Ron Amidon for the countless hours spent on our rations. His knowledge and experience is very valuable to our program. Also thanks to R&G Feeds, Malta MT.*

- A bull we were very impressed with last spring. Enough so that we decided to use A.I. and froze 140 units on his first collection. Maternal power with performance, sound structure and Angus breed character bred into this guy.
- Dam is super deep and easy fleshing with nice udder attachment that raised Lot 1 as a first calf heifer.
- Pathfinder granddam is a deep, long bodied, wedge-shaped cow with a nice hip. I'd be happy if all our cows looked like her.
- Donor 4th dam.

- A stretchy Exclusive with extra frame out of one of our best cows.
- Dam is currently 12 and still in production. Our old Net Worth cows fit right into what we breed for. Easy fleshing, excellent uddered, with great hoof shape and outstanding maternal instinct that really shines in our range calving program. Look for Net Worth's influence in future herd sires that we select.
