

SPICKLER

RANCH NORTH

Wednesday, November 18, 2020

130 *Coming Two Year old Bulls ~* **300** *Bred Angus Females*

1:00 pm CST at the Ranch

Online Bidding Directly Available through:
www.NorthernLivestockVideo.com

Visitors Welcome Anytime

The day before our sale, Tuesday, November 17th, we will have the sale cattle penned for easy viewing and lunch will be provided! Please join us Sale Day~WEDNESDAY, NOVEMBER 18th~for a CAB Dinner starting at 11:00 am CST

Cattlemen & Friends,

I would like to take this opportunity to invite you to preview our sale offering in this catalog and to welcome you to Spickler Ranch North for our annual production sale on November 18. Sara, I and our kids ranch for a living 365 days a year aiming to produce a product that will work well for you and add value to your operation. If this is your first encounter with our program we would like to meet you in person; if you have visited us before, we are anxious to catch up with you. Our door is always open and we welcome you to visit our ranch anytime of the year. Currently, all of the sale cattle are gathered onsite, off summer grass and available for viewing.

The sale offering has some additions to our past sire groups offered. We have a large offering of bulls by SydGen Blueprint, a new herdsire for us, as well as a sample of bulls by Connealy Fortune, Connealy Gary and LD Capitalist 316. The registered bred heifer offering includes a true cross section of our replacements, with a couple of the highest performing heifers to lead off the group. We will not offer cows one at a time. The donors up for offer included Powerpoint's dam and Thrive's dam.

Jessa and Will were adamant that we not sell those 2 cows; with that said there is still an offering of young purebred commercial cows.

New this year, we have also added a nice group of commercial heifers to the sale offering. They are sourced from 3 reputable programs, Stuart Simon, SD; Dan Birkeland, ND; and Harris Ranch, ND. Consistent with past sale offerings, we will also have a group of home raised purebred heifers selling without papers.

Obvious to most, this year has been different than last year. In this area, we are not flooded, harvest went smoothly and quickly with some corn coming out of the field in late September, rather than February, March, April, May...you get the idea- you lived it! We have much to be thankful for, but what is most exciting to me is one of the occurrences that happened earlier this year when we nearly ran out of toilet paper in this country. The occurrence was a perceived shortage of beef. We all know that there really isn't a shortage, but for a time there was a supply interruption. We did learn what consumers were willing to pay for ground beef and that people don't want to go without beef on their tables. This occurrence solidifies our place as a protein source in this world. What a unique product we produce, that can be raised for much of its life on forage, produced by land not suitable for farming, turning grass into protein. The result is a nutritious product that feeds the world's population and people are demanding it. You cattle producers should be proud of what you do! You do it well!

It is a must to acknowledge those that help here everyday. Our children are great contributors to the operation and all have an opinion of how the ranch should operate. As they become capable and sometimes before they are old enough, they take on more responsibility. Thank you Wyatt, Will, Jessa and Watson for your contribution! I also want to recognize Evan Farnsworth. He is our full time employee, but he does his jobs well and his resume is expanding each day. Thank you for your efforts on the easy days and the tough days. You are appreciated and contribute continually to our success!

If you have need for bulls, heifers or cows to add to your operation for the 2021 production cycle we are here to help fill your needs. As always the bulls are fully guaranteed and no insurance is necessary. Thank you to all who support our operation; past, present and future!!

*Thank you Mom for
always helping us: kids,
food, part runs...*

JoAnn & Elroy

Evan Farnsworth

*Thank you for
all you do!*

*Sincerely,
Justin & Sara Family*

Internet Live Auction:

Pre-Register: To bid via the Internet or phone please pre-register with Northern Livestock by calling
1-866-616-5035.

Bidding: The auction will be live via high speed Internet at www.northernlivestockvideo.com or you can bid on Northern Livestock's Bid Line by calling **1-406-245-0889.**

Accommodations: **Carrington:** Chieftain Motor Lodge (701) 652-3131...Carrington Inn and Suites (701) 652-3982... Cobblestone Inn (701) 652-3000

Jamestown: Holiday Inn (701) 251-2131...Gladstone Inn & Suites 1-866-748-4466...Comfort Inn (701) 252-7125

Air Travel Information: Carrington Airport is located just west of Carrington and has a 3800 foot runway with 2700 feet lighted. For transportation from Carrington Airport to Spickler Ranch, Call 701-650-9890 or 701-650-8840. Jamestown is 45 miles south of Spickler Ranch and is served by a commercial airline. Fargo is located approximately 120 miles southeast of Spickler Ranch along with Bismarck being located approximately 145 miles southwest and both locations are served by several major airlines.

Insurance: Insurance will be available sale day but is not necessary as the bulls are fully guaranteed.

Herd Health: Nate Zieman, DVM -At weaning the bull calves all received Ultrabac 7-Somubac, Bovi-Shield Gold 5 One Shot, and Inforce. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5 HB, poured to control lice and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD and BLV. Health papers will be furnished sale day for interstate shipment.

Semen Tested: All bulls in the sale have been fertility tested and have passed a breeding soundness exam performed by Dr. Nate Zieman.

Ultrasound Carcass Data: Ultrasound carcass data collected by Jason McLennan on all the bulls is listed with their individual lot in the catalog and has been adjusted to 365 days of age.

Genomic Enhanced EPDs: All sale Bulls have genomic enhanced EPDs thru the AngusGS test. Cattle that have AngusGS EPDs have the same amount of EPD accuracy as if they had recorded 8-20 calves, depending on the trait. Also, all bulls have their parentage verified.

Guarantee: All of the bulls are fully guaranteed to cover injury or death by Spickler Ranch North for their first breeding season. All cattle sell under the standard terms and conditions of the American Angus Association. Every individual in this sale has been determined to be free of genetic defects through a combination of DNA and pedigree assessment.

Volume discounts: We will discount your purchase price 2% on 2 Bull Lots up to 5% on 5 or more Bull Lots.

Delivery: **1000 mile free Bull delivery** to central US points and to our nearest Canadian port. US deliveries beyond 1000 miles at cost. Leave delivery instructions at settlement time. If you bring your trailer and haul your bull purchases home sale day, we'll give you a \$50 discount per Bull Lot.

Free Wintering: We are offering free wintering on all the bull lots. We would gladly keep them this winter and deliver them starting in April. In the spring we will fertility test the bulls again before delivery. If you choose to take delivery immediately on your bull purchases we will deduct \$300/bull at settlement time.

Terms & Conditions: Terms of the sale are cash. Phone bids are welcome and may be given to the auctioneer or any of the sale representatives. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise.

Definitions

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

The bull's actual scrotal (SC) and frame score.

\$VALUE INDEXES \$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Dam Prod (WR):
The number of calves this dam has weaned. Along with average of her progeny's weaning weight ratios.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

[illegible]

about the BULLS...

We have advertised that this offering is the top 45% of the 2019 bull calf crop. You will notice that a few bulls still ratioed below averaged for weaning or yearling. I think an explanation of our management is warranted.

At weaning we begin culling the bull calf crop for obvious animals that won't work phenotypically. They are either light muscled, poor structured or weaned really poorly with a ratio less than 90. We also sort based on disposition at this time, culling those that don't act quiet.

The bulls are then developed on a 44 or 45 mcal ration until yearling and ultrasound time in March. At this point a group of bulls are again eliminated for disposition, hoof quality and poor performance. All of these bulls that have been eliminated to this point are finished and sold as steers from our ranch directly to a packing plant. This number represents approximately 40% percent of the bull calf crop.

The majority of the bulls that are left are turned out on grass for 60 to 90 days depending on grass availability. There is a small group of bulls not turned out that are used to cover the summer bull shortages for our customers as the need arises. As the bulls are brought home from summer pasture we continue to cull for disposition, hoof quality, injury and fertility. Consequently the group that remains has passed all of the phenotypic, disposition and fertility hurdles; which includes some good bulls that were a bit weak on weaning ratio.

This year there are 4 contemporary groups. The calves out of 2 year-old heifers are in their own group (roughly 80 head) and the calves out of the mature cows are in their own group (roughly 170 head). Embryo transplant bulls, which are all raised on our ranch, are one group (20 to 40) head. A new contemporary group this year is a group of younger bulls mainly starting in the catalog after lot 110, they were summered at Regent and weaned in late November (roughly 20 head). Also all twins and grafted calves are not included in these contemporary groups.

The bulls are weaned, weighed promptly the same day and receive no creep or supplement while on the cow. The cows only receive salt and mineral as they raise the calves for the summer and early fall until weaning.

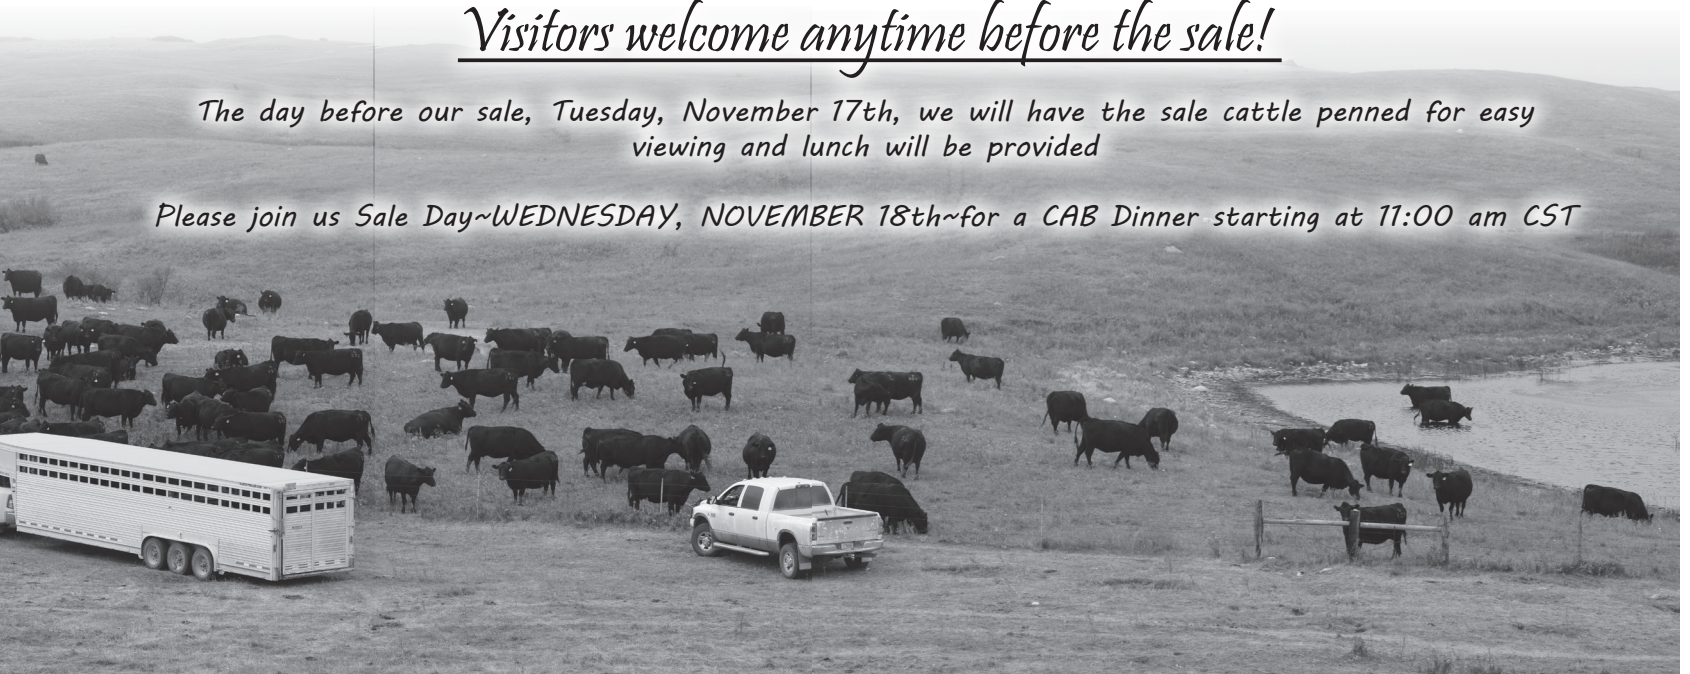

Post weaning, as grass deteriorates, protein is supplemented to increase digestability for cows on forage. I want the cows to graze as long as possible and this really helps that process.

All of the sale bulls have had parentage verified and sell with a genomic profile. At weaning the bull calves all received Ultrabac 7-Somubac, Bovi-Shield Gold 5 One Shot, and Inforce. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5 HB, poured to control lice and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD and BLV.

Visitors welcome anytime before the sale!

The day before our sale, Tuesday, November 17th, we will have the sale cattle penned for easy viewing and lunch will be provided

Please join us Sale Day~WEDNESDAY, NOVEMBER 18th~for a CAB Dinner starting at 11:00 am CST

SydGen Blueprint--Resident Herd Sire

Blueprint was purchased as an outcross calving ease sire that is unrelated to our entire cowherd. He was the high selling bull at SydGen in Missouri in November of 2017. His dam is a member of the Florabelle Fanny cow family from Sitz's that has worked so well for us. Blueprint is a docile, good footed, active sire who sired more than 50 calves as a yearling bull. His sons are excellent calving ease bulls and we are anxiously anticipating calving his daughters.

For years we have strived to raise Angus whose numbers and phenotype align. Architect represents the best combination of phenotypic power and numeric excellence we have produced to date. His maternal lineage represents 5 generations of nearly perfect uddered, small teated, cows from the Blossom family. 4 of the first 6 cows on the bottom side of his pedigree are Pathfinders, with his dam well on her way to Pathfinder status with a WR of 2/111. We will have 80

Architect calves born this spring, of which he sired 40 naturally last summer in 40 days.

Powerpoint is our heaviest used calving ease sire for the last 4 seasons. His combination of calving ease and performance sets him apart as a prominent and potent sire. His dam is one of our most powerful daughters of S Summit 956. She is deep middled, easy fleshing, square hiped and near perfect uddered. She currently records a of BR 5/99 and a WR of 5/107.

Powerpoint's daughters are beautiful uddered, small teated cows that are raising heavy calves. They are built to last.

Powerpoint has written his own story and he has done it through sons and daughters. Lot 2 is a performance sire, is nearly flawless phenotypically and yet performed considerably above average at each measuring point. Lot 2 is very complete in his design with extra length and extension. His dam is an angular, productive Cora cow sired by Intrinsic. This bull is impressive, look him up sale day.

+6	+0.9	+68	+125	+9	+21	+73	+47	+53	+68

In the fall of 2018 we made the decision to buy back possession and an interest in Thrive from Hall Stock Farms.

His progeny are impressive. They are big bodied, thick made cattle with extra performance and carcass quality. Thrive's dam is a model Summit daughter with a tidy, small teated udder and is one of our highest indexing pathfinder cows with 7/107 WR and 6/109 YR. Thrive daughters have set the benchmark for mothering ability and disposition. After calving out Thrive daughters for two years it appears that he will consistently improve disposition, while maintaining quality udders.

I strongly considered keeping this herdsire prospect by Thrive. We also needed a place to start the sire group that would feature all of the positive qualities that Thrive has contributed to our herd, so I reluctantly sell lot 6. He has a tremendous disposition; he is very complete in his make up and yet is deep middled and stout. He also ratioed well for IMF. His dam is likely going to become a donor in the future. She is one of our best combinations of phenotypic excellence, udder quality and fleshing ability.

81	726	104	1321	111	3.12	100	13.3	99	0.30

Big, stout Thrive bull with numbers to match. This performance sire has a really quiet disposition. He is big all over, what doesn't show in his picture is revealed in person. He is deep middled, big scrotaled, ratioed well at weaning and was one of the fastest gaining bulls to yearling time. Equally impressive are his genetic predictions with epd's in the upper percentiles of the breed. Good Bull.

Big, stout Capitalist 316 son out of a very powerful Revere daughter. This performance herd bull prospect has excellent individual growth numbers and epds. He is an extreme outlier for IMF with a ratio of 145. This bull will add value to the cows he services. We didn't end up with quite as many Capitalist 316 calves as we had hoped for in 2019, but 2020 made up for it. We flushed several cows to him and some of our most exciting prospects for next year are sired by Capitalist 316. He is a consistent breeding bull who worked really well on our cows. We are excited to calve his daughters.

Connealy Fortune was the high selling bull in Connealy's Spring 2018 Sale. He is an outlier for performance and has bred true to his numbers. His offspring are deep bodied, bigger framed cattle, with quiet dispositions. We used him again for our 2021 calf crop to take advantage of his out-cross pedigree and increased performance.

Unique herdsire prospect sired by a new sire for us, Connealy Fortune. Fortune was a performance outlier at Connealys and has bred that way for us. The Fortune cattle really grow and his heifers were the first heifers to begin cycling in the replacement pen. Lot 11 was used this summer in natural service and we will have 34 natural sired calves by him. His dam is best known as the dam of Axiom. She is a really productive Summit daughter that we flushed extensively last year ahead of the 2019 sale, she was featured and sold as the second-high selling female. Several of her ET sons born in 2020 are destined to be sale features.

Stand out herd sire prospect with a maternal lineage to match. His dam is a maternal sister to Powerpoint and records an excellent WR of 5/106, she weaned the second high indexing 2020 born heifer calf out of the cowherd who had a 205 WT of 739 to ratio 120. Lot 16 has impressive ratios and weights for weaning and yearling. Even more noteworthy is his 16.8 inch ribeye. If you need a herdbull that checks the boxes in the upper percentiles and has a strong maternal background, look this bull up.

83	722	110	1260	110	3.99	118	12.8	101	0.29

Powerful Blueprint bull who has developed into one of the stoutest bulls in the offering. This bull is thick, deep and big all over. His dam is a Whitlock cow with a neat story. She only records one weaning ratio because the AAA doesn't include weaning ratios on multiple births. This spring, she effortlessly had triplet heifer calves sired by Transcend. All of them will make the replacement pen. I really like the power of this bull and the fact that his dam bred back early after raising him and after carrying triplets.

High quality, very solid performing Thrive son whose weaning and yearling data is really good. Remember we are developing these bulls without creep to weaning, feeding a 45 or less mcal diet during development over the winter and turning these bulls back on grass for the summer. It is our goal to raise bulls that are heavy muscled, hard, athletic and never fat. This quiet disposition bull meets these requirements well and has a pathfinder cow with a WR of 4/104 as his mother.

91	864	124	1365	115	3.06	98	13.5	101	0.40

Powerful growth bull and absolute standout of the calf crop from birth to present. His dam is sired by a maternal brother to S Queen Essa 2226, the dam of Diligent and Summit 4535. 22's dam had a really low ratioing calf as her first, but has recovered and has done an excellent job on her 2nd and 3rd calves. This bull is as stout as any we have and would work really well as a herd bull. We considered turning him out due to his shear power, depth and performance. We expect him to be a major impact sire.

Miss Wix 2003 of Mc Cumber

McCumber Armour 7148 was our selection in the 2018 McCumber sale. We purchased him with McLennan Angus, SD. Armour is very attractive in design, he is well balanced and thick. His pedigree is loaded with maternal production that is unparalleled in the breed. His dam is a beautiful uddered donor cow whose offspring are really well received at McCumber production sales. Armour is a calving ease bull that stamps his offspring consistently with an attractive phenotype and we expect his daughters to be exceptional cows.

Lot 24 at 5 mos old. Maternal brother to 2019 sale topper S Intent 8578

Powerfully constructed mid 5 frame Armour bull used this summer in natural service on our replacement heifers. He is a maternal brother to S Intent 8578 the lot 2 and high selling bull from the 2019 sale offering and heaviest used young sire in 2020. I really like the tiny teat size and clean udder of Intent and lot 24's dam, plus she is a very productive 4-year-old cow with a WR of 3/109. Our expectations are extremely high for the daughters of both of these bulls as their pedigrees include the best maternal genetics we have sourced to date. Lot 24's individual performance coupled with his mother's udder quality made him a must use young bull here this summer. **Suitable for Heifers or Cows. Used in natural service.**

The lead off son of Connealy Gary and a power bull. This wide body is really heavy muscled. We sampled Gary in this calf crop and liked the calves which led us to use him heavily for the 2020 calf crop. We have used him on heifers with excellent success, plus several of the top calves out of mature cows in 2020 are sired by him. Gary offers breed leading growth and a different pedigree for our cowherd. Lot 25 is one of his best 2019 born sons and was used in as a service sire to the single lot heifers after AI. **Suitable for Heifers or Cows.** Used in natural service.

Big numbered, highly negative birth son of Connealy Gary. Gary is a potent sire of growth and muscle and we have used him successfully for 2 years on heifers. The top herdbull prospect of the 2020 calf crop is a Gary out of the dam of Resurgence and great-grand dam of Architect. **Suitable for Heifers or Cows.**

Hoof Structure: good Toe Shape: straight

Big bodied, thick quartered Transcend bull out of a heavy milking Revere daughter who records a WR of 3/106. Transcend consistently adds performance to every cow he is mated to. His trademark is moderate framed calves that weigh more than you ever think they will. This good bull should breed just like his sire, adding extra pounds and performance. Note his near 800 lb 205 WT.

Hoof Structure: good Toe Shape: straight Heel Depth: adequate

Big middled, easy fleshing Armour calving ease bull out of a first calf daughter of Vintage Commander. This light birth bull should work well as an easy calving sire on heifers. Armour has worked well for us, consistently stamping his offspring with a correct, attractive profile, and strong traditional Angus breed character. I am anxiously waiting to calve his daughters. Lot 84 has some white ahead of his scrotum. **Suitable for Heifers or Cows.**

about the Registered Heifers...

This group of registered heifers are a cross section of our replacement pen, along with ratioing really well at weaning and yearling time. These heifers are difficult to part with and have been mated to the sires I would have used had I kept them. Like the bulls, they have been culled for disposition. There are several that have donor potential.

89	757	123	1079	125	58	77	106	171

Stand out Queen Essa bred heifer sired by Connealy Fortune. This high performance, yet feminine heifer was at the top of her

137 head contemporary group for weaning and yearling performance. Her genomic profile backs her phenotypic production with a 3 weaning rank and a 1 yearling rank, which gives her genetic predictions for growth in the top 1% of the breed. Her dam is a very productive pathfinder Revere daughter with a WR of 4/109. She is also a maternal sister to S Queen Essa 2226 the dam of Diligent and Summit 4535. This heifer is a good one who is destined to impact the breed with her maternal heritage and outstanding individual performance.

COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®. Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions. A commitment to the female starts with MaternalPlus.

Contact AGI at 816-383-5100 or agi@angus.org for more information.

ANGUS MEANS BUSINESS.

ANGUS
THE BUSINESS BREED
www.ANGUS.org

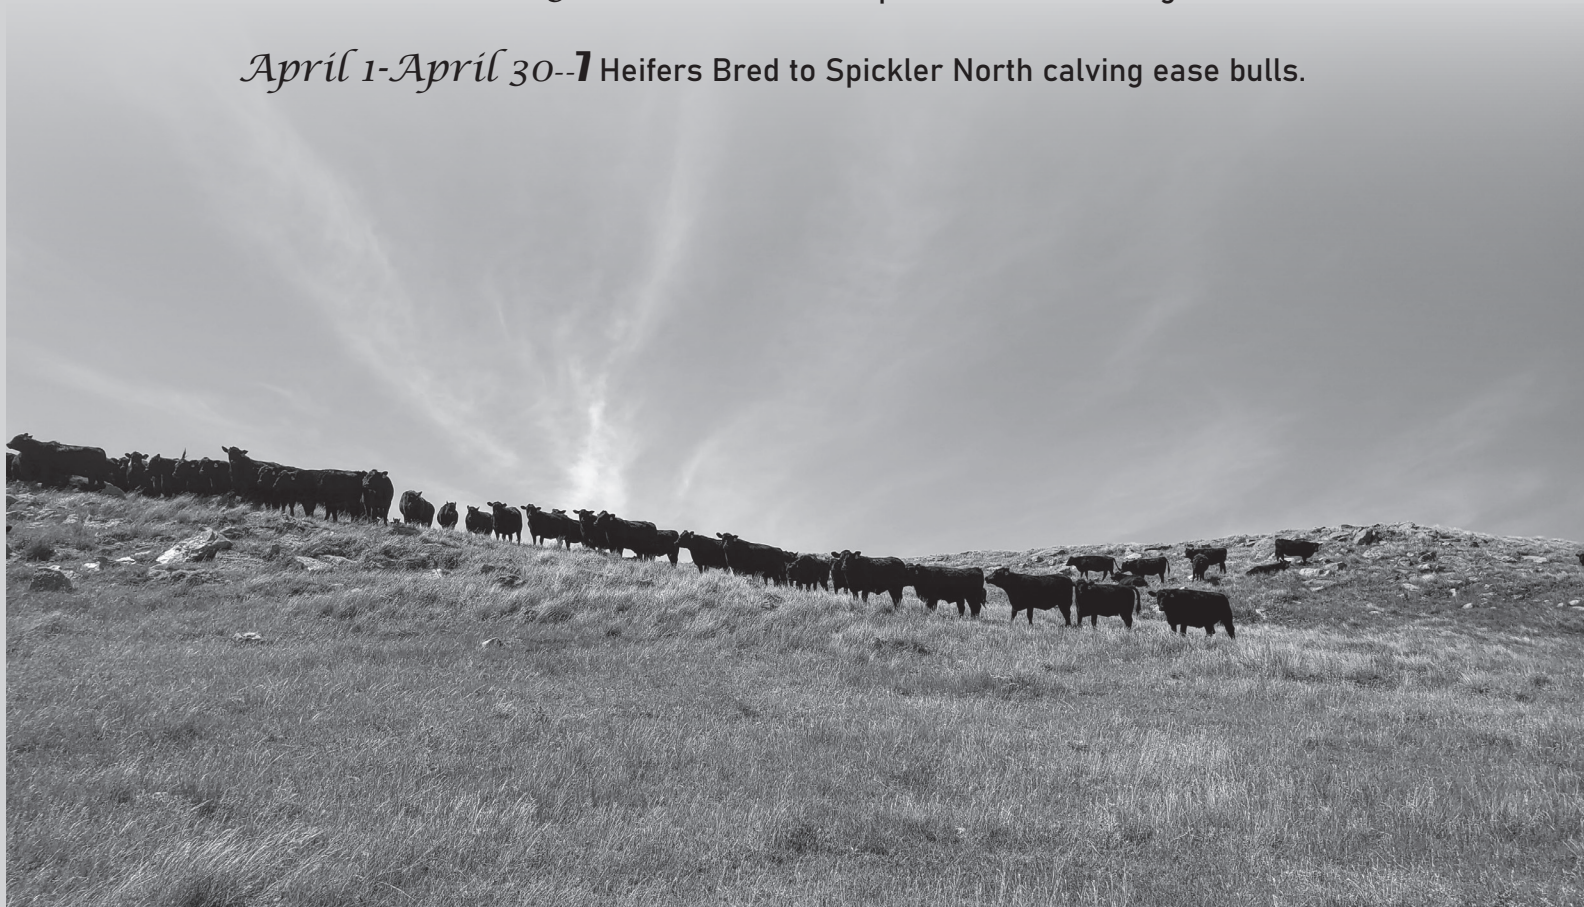

Our Purebred Commercial heifers...

This group of heifers are mainly pasture sired, younger heifers. They have been managed with our replacements all year and are included as a sale feature. The heifers are sorted for quality and uniformity by calving windows. The females are all freeze branded and have had their Bovi-shield Gold 5 FP VL5, are dewormed with dectomax, are poured and will have their first scour shot. These heifers are all negative for PI-BVD, BLV and their dams have tested negative for Johnes every year. The winning bidder can take the first 5 head or more, up to the whole calving sort group. Bidding will resume again with each new group. These heifers are selling without registration papers. However, if you are interested in registration papers they are available for an additional \$250/head. The following is an approximate number of head in each group. We will provide updated spreadsheets sale day and a listing will be available on our website www.SpicklerRanchNorth.com. as soon as available.

*February 15-March 5--***22** Heifers Mainly Al'd to S Powerpoint WS 5503 with the remainder Al'd to Architect.

*March 1-March 25--***21** Heifers Bred to Spickler North calving ease bulls.

*April 1-April 30--***7** Heifers Bred to Spickler North calving ease bulls.

Commercial heifers...

These heifers have originated from 3 top commercial operations: Stuart Simon, Tolstoy SD; Dan Birkeland, Sheyenne, ND and Harris Ranch, Killdeer, ND. They are bred to make excellent cows and a number of these heifers are sired by our bulls. This group is freeze branded, bangs vaccinated, on our herd health program, carry one brand: ours or the one they came with. They have been sorted for disposition and quality, they are ultrasounded for pregnancy and will be lot ordered by size and weight. We will provide updated spreadsheets sale day and a listing will be available on our website www.SpicklerRanchNorth.com. when available.

*February 10-February 24--***60** Heifers AI'd to S Powerpoint WS 5503

*March 5-March 31---***75** Heifers Bred to Spickler North Right Time bulls.

*April 1-April 25---***40** Heifers Bred to Spickler North calving ease bulls.

*May 1-May 20--***17** Heifers Bred to Spickler North calving ease bulls.

Purebred Commercial Cows

In an effort to keep our cow numbers in line we are again offering a group of young cows. They are productive, consistent cows that have been culled for disposition problems. Its hard to sell them as they are really easy to calve and manage; with numerous individuals of this group raising bulls or replacements each year. The cows are on the same vaccination program as our entire cow herd and were given Bovi-Shield Gold 5 FP VL5 HB, dewormed with dectomax, and have been poured to control lice. The cows are all negative for PI-BVD and they and their dams have tested negative for Johnes each year. The winning bidder can take the first 5 cows up to all the cows in that calving window group. Bidding will then resume with each calving window group. These cows are selling without their papers.

Pedigrees are available for \$250/head if the new owner chooses.

Connealy Fortune was the high selling bull in Connealy's Spring 2018 Sale. He is an outlier for performance and has bred true to his numbers. His offspring are deep bodied, bigger framed cattle, with quiet dispositions. We used him again for our 2021 calf crop to take advantage of his out-cross pedigree and increased performance.

A thought....

I'm not sure exactly where this fits, but I know it belongs somewhere on these pages. In the last few months have you wondered 'What is going on in our area, country and world?' I definitely have wondered this and it prompts me to ask lots of questions, questions about life – What am I doing here on earth? What is life going to be like for my kids and grandkids? How are people handling the emotional and mental consequences of being quarantined, not seeing family and friends for days and weeks? – the list goes on and on. Many of these questions depending on how you answer them can cause grief, anxiety, despair, fear and anger.

I have felt all these things with the country shut down and the constant interruption to life. For peace to return and be present during this time I return to Jesus, his work on the cross – bearing the sin and shame of the world and the hope of things to come because of God's faithfulness to his people. I am constantly reminded to check on my relationship with Christ Jesus, are you? In John 10:10 Jesus says: 'the thief comes only to steal, kill and destroy, I have come that they may have life and have it to the full.' Wow, have any of you had any loss of time, money or even family or friends in 2020? Well, this verse tells us the cause, but what I find most interesting is that Jesus tells us He has come to give us full life! This is possible through salvation in Jesus and a constant relationship with Him.

When things begin to falter for me, there is a relationship breakdown with Jesus. As I am struggling to get back on track and I seek Him, He rights things and abundant living continues with His peace abounding even in the challenging times we are living in during 2020.

Justin

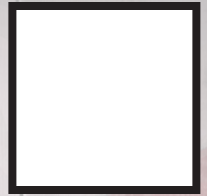

A Sincere Thank You...

Our family appreciates all our friends & family that contribute to making this day happen. To the guys out back and the gals clerking, this day wouldn't run smoothly without you! The Schoolhouse cafe did the catering again this year, and has always done a great job with the food and service. If you satisfied your sweet tooth the Grandmas are to thank for their hours of baking!!!
