

Annual Production Sale

SPICKLER

RANCH NORTH

Wednesday, November 17, 2021

1 pm cst at the Ranch

150 *Coming - two - year - old Bulls*
240 *Bred Angus Heifers*
including **25** *Single Lot Registered Heifers*

Visitors are Welcome Anytime

Cattle Producers, friends and neighbors,

I want to take a moment to invite you come to our ranch November 16th and 17th for our annual production sale. We truly enjoy each opportunity we receive to supply you with Angus seedstock. The bulls we are offering in this sale are fully guaranteed as in the past. We will also offer single lot bred heifers and commercial bred heifers from our operation as well as purchased heifers from Stangeland Ranch, Kensal ND; North Hill Angus, Beulah, ND; and Harris Ranch, Killdeer ND. 170 of these heifers are AI bred to Architect to calve in February or March.

It would be greatly remiss to not take a moment to thank the people that help Sara and I run this ranch. Thank you Grandma JoAnn for all of the parts runs and snack breaks, we always enjoy seeing you pull in our yard! Thank you Wyatt, Will, Jessa, and Watson! Your hours in the tractor seat, next to the chute and in the saddle are very valuable to our daily success and much appreciated. Evan likewise, we are thankful for all you do each day that you are here! Your willingness to perform any task and enthusiasm for the Angus industry are refreshing.

Across all aspects of society and life we continue to experience things we haven't in the past. Hebrews 12:1 says 'Therefore, since we are surrounded by such a great cloud of witnesses, let us throw off everything that hinders and the sin that so easily entangles. And let us run with perseverance the race marked out for us.' As we ponder all of the recent happenings it is important to realize what 2 Peter 3:9 records 'The Lord is not slow in keeping his promise, as some understand slowness. Instead, he is patient with you, not wanting anyone to perish, but everyone to come to repentance.' We truly serve a wonderful, sovereign, holy, patient God!

As in the past we will winter the bulls free until April and fertility test them. Hopefully by the 10th of April delivery will have begun. If you have questions at any point feel free to stop in or call us, we are here to help!

JoAnn & Elroy

Evan Farnsworth

Justin and Sara and Family

Tuesday, November 16th: Sale cattle will be penned for easy viewing and lunch will be provided
Wednesday, November 17th: CAB dinner starting at 11:00 am cst followed by the sale starting at 1:00 pm cst.

please pre-register with Northern Livestock by
calling
1-866-616-5035.

Bidding: The auction will be live via high speed
Internet at www.northernlivestockvideo.com or
you can bid on Northern Livestock's
Bid Line by calling **1-406-245-0889.**

Accommodations: Carrington...Chieftain Motor Lodge (701) 652-3131...Carrington Inn and Suites (701) 652-3982...

Cobblestone Inn (701) 652-3000

Jamestown: Holiday Inn (701) 251-2131...Gladstone Inn & Suites 1-866-748-4466...Comfort Inn (701) 252-7125

Air Travel Information: Carrington Airport is located just west of Carrington and has a 3800 foot runway with 2700 feet lighted. For transportation from Carrington Airport to Spickler Ranch, Call 701-650-9890 or 701-650-8840. Jamestown is 45 miles south of Spickler Ranch and is served by a commercial airline. Fargo is located approximately 120 miles southeast of Spickler Ranch along with Bismarck being located approximately 145 miles southwest and both locations are served by several major airlines.

Insurance: Insurance will be available sale day but is not necessary as the bulls are fully guaranteed.

Herd Health: Nate Zieman, DVM -At weaning the bull calves all received Ultrabac 7-Somubac, Bovi-Shield Gold 5, One Shot, and Inforce. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5 HB, poured to control lice and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD. Health papers will be furnished sale day for interstate shipment.

Semen Tested: All bulls in the sale have been fertility tested and have passed a breeding soundness exam performed by Dr. Nate Zieman.

Ultrasound Carcass Data: Ultrasound carcass data collected by Jason McLennan on all the bulls is listed with their individual lot in the catalog and has been adjusted to 365 days of age.

Genomic Enhanced EPDs: All sale Bulls have genomic enhanced EPDs thru the AngusGS test. Cattle that have AngusGS EPDs have the same amount of EPD accuracy as if they had recorded 8-20 calves, depending on the trait. Also, all bulls have their parentage verified.

Guarantee: All of the bulls are fully guaranteed to cover injury or death by Spickler Ranch North for their first breeding season. There is an assumed salvage value of \$1500 on sale credits. All cattle sell under the standard terms and conditions of the American Angus Association. Every individual in this sale has been determined to be free of genetic defects through a combination of DNA and pedigree assessment.

Volume discounts: We will discount your purchase price 2% on 2 Bull Lots up to 5% on 5 or more Bull Lots.

Delivery: 1000 mile free Bull delivery to central US points and to our nearest Canadian port. US deliveries beyond 1000 miles at cost. Leave delivery instructions at settlement time. If you bring your trailer and haul your bull purchases home sale day, we'll give you a \$50 discount per Bull Lot.

Free Wintering: We are offering free wintering on all the bull lots. We would gladly keep them this winter and deliver them starting in April. In the spring we will fertility test the bulls again before delivery.

Terms & Conditions: Terms of the sale are cash. Phone bids are welcome and may be given to the auctioneer or any of the sale representatives. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise.

In the fall of 2018 we made the decision to buy back possession and an interest in Thrive from Hall Stock Farm. His progeny are impressive. They are big bodied, thick made cattle with extra performance and carcass quality. Thrive's dam is a model Summit daughter with a tidy, small teated udder and is one of our highest indexing pathfinder cows. Thrive daughters have set the benchmark for mothering ability and disposition. After calving 60 Thrive daughters over 3 years it appears that he will consistently improve disposition, while maintaining quality udders. 74 of his daughters currently record a 102 WR. *Selling 12 Sons November 17th*

Powerpoint is our heaviest used calving ease sire. His combination of calving ease and performance sets him apart as a prominent and potent sire. His dam is one of our most powerful daughters of S Summit 956. She is deep middled, easy fleshing, square hipped and near perfect uddered. Powerpoint's daughters are beautiful uddered, small teated cows that are raising heavy calves. They are built to last. Owned with STgenetics and Ellingson Angus.

Blueprint was purchased as an outcross calving ease sire that is unrelated to our entire cowherd. He was the high selling bull at SydGen in Missouri in November 2017. His dam is a member of the Florabelle Fanny cow family from Sitz's that has worked so well for us. Blueprint is a docile, good footed, active sire. His sons are excellent calving ease bulls and his daughters are feminine, level uddered, young cows. *Selling 10 Sons November 17th*

McCumber Armour 7148 was our selection in the 2018 McCumber sale. We purchased him with McLennan Angus, SD. Armour is very attractive in his design, he is well balanced and thick. His pedigree is loaded with maternal production that is unparalleled in the breed. His dam is a beautiful uddered donor cow whose offspring are really well received at McCumber production sales. Armour is a calving ease bull that stamps his offspring consistently with an attractive phenotype and we expect his daughters to be exceptional cows. *Selling 7 Sons November 17th*

We decided to use Capitalist 316 after seeing him at stud and recognized the tremendous maternal pedigree his dam represents. He is not disappointing-his sons are thick, square made bulls and his daughters are tidy uddered, easy fleshing young cows. *Selling 14 Sons November 17th*

Definitions

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

The bull's actual scrotal (SC) and frame score.

\$VALUE INDEXES \$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (\$W): an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F): an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Beef Value (\$B): an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Maternal Weaned Calf Value (\$M): an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility,

Dam Prod (WR): The number of calves this dam has weaned. Along with average of her progeny's weaning weight ratios.

Calving Ease Direct (CED): is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW): expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW): expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW): expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Calving Ease Maternal (CEM): is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk): is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Scrotal Circumference EPD (SC): expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC): is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

Carcass Weight EPD (CW): expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb): expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires

Ribeye Area EPD (RE): expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

about the **Coming-two-year-old Bulls**

NO CREEP!—*The Bulls are raised by good milking Mothers on native pasture*

After weaning are developed on a 44 mcal ration until yearling and ultrasound time in March. At this point a group of bulls are eliminated for disposition, hoof quality and poor performance. All of these bulls that have been eliminated to this point are finished and sold as steers from our ranch directly to a packing plant.

The majority of the bulls that are left are turned out on grass for 60 to 90 days depending on grass availability. There is a small group of bulls not turned out that are used to cover the summer bull shortages for our customers as the need arises. As the bulls are brought home from summer pasture we continue to cull for disposition, hoof quality, injury and fertility. Consequently the group that remains has passed all of the phenotypic, disposition and fertility hurdles.

This year there are 3 contemporary groups. The calves out of 2 year-old heifers are in their own group (roughly 80 head) and the calves out of the mature cows are in their own group (roughly 170 head). Embryo transplant bulls, which are all raised on our ranch, are one group (20 to 40) head. Also all twins and grafted calves are not included in these contemporary groups.

All of the sale bulls have had parentage verified and sell with a genomic profile. Their foot scores were taken with them standing on cement in early September 2021. At weaning the bull calves all received Ultrabac 7-Somubac, Bovi-Shield Gold 5 One Shot, and Inforce. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5 HB, poured to control lice and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD and BLV.

Soundness, Fertility, & Longevity!

A very complete Thrive son to start the sale offering in 2021. This good bull is well balanced, good footed, wide hiped, and ratioed well at each measuring point. His nice, tidy uddered dam is a May born show heifer that Watson showed a couple years ago. Note her excellent WR of 3/112. The Rachel cow family descends from GDAR in MT.

Lots 150 – 153 Four full brothers sired by Capitalist 316 and out of the dam of Resurgence and g. grand dam of Architect. All 4 are negative birth bulls, yet all four are solid performance bulls. My personal favorite is lot 152. He is quite possibly the most complete herd bull prospect in the offering. He is very sound structured, attractive patterned and square rumped, and his dam is one of our most productive and influential cows. Full brother lots 17..63..80..118..150..152..153..Maternal Brother lots 21..126..Registered heifer lot 161. **All are Suitable for Heifers or Cows.**

Registered Heifers

This group of registered heifers are a cross section of our replacement pen, along with ratioing really well at weaning and yearling time. These heifers are difficult to part with and have been mated to the sires I would have used had I kept them. There are several that have donor potential.

Lot 160 is a definite sale feature and one whose future genetic impact as a matriarch and potential donor is limitless.

Lot 160 is a maternal sister to Thrive and a flush mate to lot 7 in the bull division. She starts her productive life with an excellent epd profile and is bred to calve to Architect. She is sired by Capitalist 316. 316 has been a great AI sire for us. His progeny grow well, are square made and easy fleshing. His first daughters calved here this spring and met our expectations being very good mothers with tight, small teated udders.

High performance Enhance daughter from the Blossom cow family that produced Chisum 255, Resurgence and of course, Architect. This extremely gentle, growthy heifer is very quiet and should be an excellent cow. She is part of this offering to be a sale highlight. Her dam is the dam of Resurgence and is the great grand dam of Architect. Lot 161's numeric tabulation offers significant mating versatility and she sells bred to KG Justified.

Spickler Ranch North Purebred Commercial Heifers

This group of heifers are mainly pasture sired, younger heifers. They have been managed with our replacements all year and are included as a sale feature. The heifers are sorted for quality and uniformity by calving windows. The females are all freeze branded and have had their Bovi-shield Gold 5 VL5 FP, are dewormed with dectomax, are poured and will have their first Scor-Bos shot. These heifers are all negative PI-BVD. The winning bidder can take the first 5 head or more, up to the whole calving group sort. Bidding will resume again with each new group. These heifers are selling without registration papers. However, if you are interested in registration papers they are available for an additional \$250/head. The following is an approximate number of head in each group. We will provide updated spreadsheets sale day and a listing will be available on our website.

www.SpicklerRanchNorth.com as soon as available.

Spickler Bred Heifers

February 24-March 6--**22 head** AI'd to Architect

March 10-March 25--**14 head** Pasture Bred to Spickler Powerpoint sons

April 1-April 20--**9 head** Pasture Bred to Spickler Powerpoint sons

Commercial Heifers

These heifers have originated from 3 top commercial operations: Harris Ranch (Killdeer, ND), Cory Stangeland Ranch (Kensal, ND), and North Hill Angus Ranch (Beulah, ND). They are bred to make excellent cows and a number of these heifers are sired by our bulls. This group is freeze branded, bangs vaccinated, on our herd health program, carrying the brand they came with or no brand. They have been sorted for disposition and quality, they are ultrasounded for pregnancy and will be lot ordered by size and weight. We will provide updated spreadsheets sale day and a listing will be available on our website. www.SpicklerRanchNorth.com when available.

For years we have strived to raise Angus cattle whose numbers and phenotype align. Architect represents the best combination of phenotypic power and numeric excellence we have produced to date. His maternal lineage represents 5 generations of nearly perfect uddered, small teated, cows from the Blossom cow family. Architect is our most heavily used sire for 2 consecutive years.

#18159105 Tehama Revere x S Summit 956 x Shipwheel Chinook

In the fall of 2018 we made the decision to buy back possession and an interest in Thrive from Hall Stock Farm. His progeny are impressive. They are big bodied, thick made cattle with extra performance and carcass quality. Thrive's dam is a model Summit daughter with a tidy, small teated udder and is one of our highest indexing pathfinder cows. Thrive daughters have set the benchmark for mothering ability and disposition. After calving 60 Thrive daughters over 3 years it appears that he will consistently improve disposition, while maintaining quality udders. 74 of his daughters currently record a 102 WR. *Contact Beef 360 for Semen Purchases*
