SPICKLER

RANCH NORTH

Wednesday, November 16, 2022

1:00 pm cst at the ranch

140 Coming Two Year Old Bulls

140 Bred Angus Heifers

Online bidding Available through:
DVAuction & Northern Livestock Video

Cattlemen, Friends and Neighbors,

I want to take a moment to invite you come to our ranch November 15th and 16th for our annual production sale. We truly enjoy each opportunity we receive to supply you with Angus seedstock. The bulls we are offering in this sale are fully guaranteed as in the past. We will also offer single lot bred heifers and commercial bred heifers from our operation as well as purchased heifers from Kip Sparrow, Mercer ND.

I would be greatly remiss to not take a moment to thank the people that help Sara and I run this ranch. Thank you, Grandma JoAnn, for all of the parts runs and snack breaks, we always enjoy seeing you pull in our yard! Thank you, Wyatt, Will, Jessa, and Watson! Your hours in the tractor seat, next to the chute and in the saddle are very valuable to our daily success and are much appreciated.

Matthew 6:9-13 is a very recognizable passage to all. 9'Pray, then, in this way: 'Our Father who is in heaven, Hallowed be Your name.10'Your kingdom come. Your will be done, On earth as it is in heaven.11'Give us this day our daily bread.12'And forgive us our debts, as we also have forgiven our debtors.13'And do not lead us into temptation, but deliver us from evil. For most of my life I didn't take these verses literally. Verse 10 really hits home 'your kingdom come, your will be done, on earth as it is in heaven'. Just think if we could all experience heaven on earth and when we pray, believe and trust in this verse heaven on earth is completely available. 1 Timothy 4:10 Paul writes ' That is why we labor and strive, because we have put our hope in the living God, who is the Savior of all people, and especially of those who do not believe. As I, we, put our hope in God and restore through repentance the relationship that was broken in Genesis with sin, heaven on earth becomes possible. This is obviously easy to write and much harder to live, of which, I am the first to acknowledge.

As in the past we will winter the bulls free until spring and fertility test them. Hopefully by the 1st of March delivery will have begun. If you have questions at any point, feel free to stop in or call us, we are here to help!

Justin & Sara & Family

Auctioneer:

Roger Jacobs, Billings MT
Office/cell phone (406) 698-7686

Special Representatives:

Selling in Catalog Order:

Sale Day Phones:

Justin: (701) 650-8840 Sara: (701) 650-9890
Wyatt: (701) 650-6490 Will: (701) 650-6579

Accommodations:

Carrington.....Chieftain Motor Lodge (701) 652-3131...
Carrington Inn and Suites (701)652-3982...Cobblestone Inn (701) 652-3000
Jamestown: ...Holiday Inn (701) 251-2131...
Gladstone Inn & Suites 1-866-748-4466...Comfort Inn (701) 252-7125

Air Travel Information: Carrington Airport is located just west of Carrington and has a 3800 foot runway with 2700 feet lighted. For transportation from Carrington Airport to Spickler Ranch, Call 701-650-9890 or 701-650-8840. Jamestown is 45 miles south of Spickler Ranch and is served by a commercial airline. Fargo is located approximately 120 miles southeast of Spickler Ranch along with Bismarck being located approximately 145 miles southwest and both locations are served by several major airlines.

Herd Health:

Nate Zieman, DVM

At weaning the bull calves all received Ultrabac 7-Somubac, Bovi-Shield Gold 5, One Shot. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5, poured to control lice and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD.

Health papers will be furnished sale day for interstate shipment.

Semen Tested: All bulls in the sale have been fertility tested and have passed a breeding soundness exam performed by Dr. Nate Zieman.

Data:

Ultrasound Carcass Data: Ultrasound carcass data collected by Jason McLennan on all the bulls is listed with their individual lot in the catalog and has been adjusted to 365 days of age.

Genomic Enhanced EPDs: All sale Bulls have genomic enhanced EPDs thru the AngusGS test. Cattle that have AngusGS EPDs have the same amount of EPD accuracy as if they had recorded 8-20 calves, depending on the trait. Also, all bulls have their parentage verified.

Guarantees/Discounts:

All of the bulls are fully guaranteed to cover injury or death by Spickler Ranch North for their first breeding season. There is an assumed salvage value of \$1500 on sale credits. All cattle sell under the standard terms and conditions of the American Angus Association.

Every purebred individual in this sale has been determined to be free of genetic defects through a combination of DNA and pedigree assessment.

Volume discounts: We will discount your purchase price 2% on 2 Bull Lots up to 5% on 5 or more Bull Lots.

Delivery: 1000 mile free Bull delivery to central US points and to our nearest Canadian port. US deliveries beyond 1000 miles at cost. Leave delivery instructions at settlement time. If you bring your trailer and haul your bull purchases home sale day, we'll give you a **\$50 discount per Bull Lot.**

Free Wintering: We are offering free wintering on all the bull lots. We would gladly keep them this winter and deliver them starting in March. In the spring we will fertility test the bulls again before delivery.

Terms & Conditions:

Terms of the sale are cash. Phone bids are welcome and may be given to the auctioneer or any of the sale representatives. Each animal will be sold to the highest bidder. Any bidding disputes will be settled by the auctioneer. Any person attending the sale does so at his/her own risk. Neither the owners, nor any person connected with this sale assumes any liability, legal or otherwise.

For years we have strived to raise Angus whose numbers and phenotype align. Architect, his dam, granddam, and great granddam have all had an immense impact on our program. Architect represents the best combination of phenotypic power and numeric excellence we have produced to date. His maternal lineage represents 5 generations of nearly perfect uddered, small teated, cows from the Blossom cow family. Owned with Genex *Selling 40 Sons November 16th*

In the fall of 2018 we made the decision to buy back possession and an interest in Thrive from Hall Stock Farm. His progeny are impressive. They are big bodied, thick made cattle with extra performance and carcass quality. Thrive's dam is a model Summit daughter with a tidy, small teated udder and is one of our highest indexing pathfinder cows. Thrive daughters have set the benchmark for mothering ability and disposition. After calving 70+ Thrive daughters over 4 years it appears that he will consistently improve disposition, while maintaining quality udders. 95 of his daughters currently record a 102 WR. *Selling 20 Sons November 16th*

Powerpoint is our heaviest used calving ease sire. His combination of calving ease and performance sets him apart as a prominent and potent sire. His dam is one of our most powerful daughters of S Summit 956. She is deep middled, easy fleshing, square hipped and near perfect uddered. Powerpoint's daughters are beautiful uddered, small teated cows that are raising heavy calves. They are built to last. Owned with STgenetics and Ellingson Angus.

Blueprint was purchased as an outcross calving ease sire that is unrelated to our entire cowherd. He is the high selling bull at SydGen in Missouri in November 2017. His dam is a member of the Florabelle Fanny cow family from Sitz's that has worked so well for us. Blueprint is a docile, good footed, active sire. His sons are excellent calving ease bulls and his daughters are feminine and level uddered young cows. *Selling 5 Sons November 16th*

Definitions

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

The bull's actual scrotal (SC) and frame score.

\$VALUE INDEXES \$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

Weaned Calf Value (SW), an index value expressed in dollars per head, is the expected average difference in future progeny performance for preweaning merit. \$W includes both revenue and cost adjustments associated with differences in birth weight, weaning direct growth, maternal milk, and mature cow size.

Feedlot Value (\$F), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires.

Beef Value (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

Maternal Weaned Calf Value (\$M), an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

Dam Prod (WR):
The number of calves this dam has weaned. Along with average of her progeny's weaning weight ratios.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Yearling Weight EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk EPD (Milk), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Scrotal Circumference EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

Docility (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves.

Carcass Weight EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling EPD (Marb), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires

Ribeye Area EPD (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

(BW) Actual Birth weight (205wt) Weaning wt adjusted to 205 days of age. Ratio is the percentage above or below average (100=average) a bull is for his 205 Day weaning weight (365 wt) Yearling weight adjusted to 365 days. The ratio is the percent above or below average (100=average) a bull is for his 365 day weight

IMF: The percent of intramuscular fat (marbling) adjusted to 365 days of age. The ratio is the percent above or below average (100=average) a bull/female is for its marbling scan within its contemporary group

RE: Each bull's ribeye measured in inches and adjusted to one year of age. The ratio is the percent above or below average (100=average) a bull is for his adjusted ribeye area

Ribfat: This is the off-test backfat measured in inches adj to 1 year of age.

about the **Coming-two-year-old Bulls**

NO CREEP!—*The Bulls are raised by good milking Mothers on native pasture*

After weaning the bulls are developed on a ration to gain 2.75 lbs/day until yearling and ultrasound time in March. At this point a group of bulls are eliminated for disposition, hoof quality and poor performance. All of these bulls that have been eliminated to this point are finished and sold as steers from our ranch directly to a packing plant.

Demkota Beef--Aberdeen,SD

2021 Steer-mates to this bull offering data to date:

100% Choice

93% CAB & higher

58% Prime

The majority of the bulls that are left are turned out on grass for 60 to 90 days depending on grass availability. There is a small group of bulls not turned out that are used to cover the summer bull shortages for our customers as the need arises. As the bulls are brought home from summer pasture we continue to cull for disposition, hoof quality, injury and fertility. Consequently the group that remains has passed all of the phenotypic, disposition and fertility hurdles.

All of the sale bulls have had parentage verified and sell with a genomic profile. Their foot scores were taken with them standing on cement in early September 2022. At weaning the bull calves all received Ultrabac 7-Somubac and Bovi-Shield Gold 5 One Shot. The bulls have all been vaccinated with Bovi-shield Gold FP 5VL5, poured to control lice and dewormed with Safeguard. The bulls have all been tested negative for Persistent Infected BVD.

Soundness, Fertility, & Longevity!

Lot 2 is an impressive and massive bull with tons of depth and muscle. He is sired by Fortune and out of a powerful daughter of Transcend. His individual performance and ratios are impressive as well. This good bull will add body, muscle and power to his offspring. He is a moderate frame relative to the Fortune sons, but packs the same performance as his paternal brothers. The Fortune daughters are bigger, stout made cows, have nice udders, milk well and are fertile. The Fortune daughters are valuable possessing dominant genetics for performance and marbling. **Use on Cows.**

Lot
3

This Architect son blew off the doors for individual performance. His dam is a Thrive granddaughter and raised a good one as her first calf. He started small and weaned at 847lbs. Lot 3 is as deep bodied and high performing as any bull in this offering. He continues to hold that spot and is the heaviest bull in this sale. **Use on Heifers or Cows.**

Heel Depth: adequate

Toe Shape: slight curve

Lot 4

Lot 4 is one of my all-time favorite Powerpoint sons. He is very expressive in his muscle pattern, moderate, sound structured and eye appealing. His feet are excellent. Lot 4's dam is level uddered which is typical of the Sydgen Blueprint daughters. Note his 205 WT was 708 lbs and he ratioed really well for IMF and REA with ratios of 128 and 109 respectively. **Use on Cows.**

Heel Depth: adequate Toe Shape: straight

Lot 5

Lot 5 is a good-looking Architect son and is the cover bull calf from our Spring 2022 brochure. He is phenotypically impressive, balanced and very mild in his disposition. In addition to his high ced and negative birth epd; he weaned with a 205 Wt of 720lb, while adding to his statline a 146 marbling ratio. **Use on Heifers or Cows.**

Heel Depth: adequate Toe Shape: straight

Welcome!

We welcome visitors anytime throughout the year.

Tuesday, November 15th, the cattle will be penned for viewing ease. Lunch will be provided
Wednesday, November 16th sale starts at 1pm and CAB dinner starts at 11 am

Whether you need cattle or not, feel free to stop to visit and have dinner on us!

"Rusty" doing his job behind a group of cows! We had our first colt this summer and looking forward to next summer's foal crop. Justin really appreciates how quick he learns, his attention to cattle and calm demeanor. You'll have to take Justin's word for it, since he won't let anyone else ride Rusty!

<<<Fall Born Yearling Bulls>>>

As our cowherd grows and our staff shrinks in numbers and available time to help, the decision was made to implant embryos in November rather than in June. This will present a predominately ET bull offering of August bulls available for this November sale. Starting in 2023 there will be a larger group of these bulls. The bulls in this offering are unique as there are 5 Chisum 255 sons of S Selena 201, Thrive's dam and the other 3 bulls are sired by Thrive.

S Queen Essa 1519 is one of the most unique females ever offered in this production sale. She is sired by a S Powerpoint son, SAV Powerhouse. Her dam is the mother of Diligent and Summit 4535 who sold for \$80,000 as her first calf in 2015. Queen Essa 1519 is designed with a feminine and attractive profile, coupled with massive body depth, substance and muscle. The Queen Essa cow family is my most prominent and productive family, solidifying 1519's place as a herd changing donor cow.

Selling 50% embryo interest and full possession with an option for full ownership.

Three firsts align in this power heifer. She is the first and only Architect daughter offered from his first dominating calf crop. She is the first Chloe offered at auction from a powerful flush. She is the first and only heifer I will offer due to Sitz Incentive. I believe the Architect females are his strongest contribution to the breed. After raising him and watching him develop it became obvious he was a standout. My confidence level in the Architect females is reflected by having 100 calves born here every year for 3 years. My goal is to have 150 or more Architect cows in production as soon as possible. **Retaining the right to one future flush.**

Only fitting that after Wyatt clipped all the single lot sale heifers, we made him get a senior pic with them!

Spickler Ranch North Purebred Commercial Heifers

This group of heifers are mainly pasture sired, younger heifers. They have been managed with our replacements all year and are included as a sale feature. The heifers are sorted for quality and uniformity by calving windows. The females are all freeze branded and have had their Bovi-shield Gold 5 VL5 FP, are dewormed with Safeguard, are poured and will have their first Scor-Bos shot. These heifers are all negative PI-BVD. The winning bidder can take the first 5 head or more, up to the whole calving group sort. Bidding will resume again with each new group. These heifers are selling without registration papers. However, if you are interested in registration papers they are available for an additional \$250/head. The following is an approximate number of head in each group. We will provide updated spreadsheets sale day and a listing will be available on our website. www.SpicklerRanchNorth.com as soon as available.

Spickler Bred Heifers

February 25--**44 head** AI'd to Architect

February 25-March 1--**17 head** Pasture Bred to Spickler Architect sons

April 1-April 20--**7 head** Pasture Bred to Spickler Architect sons

Commercial Heifers

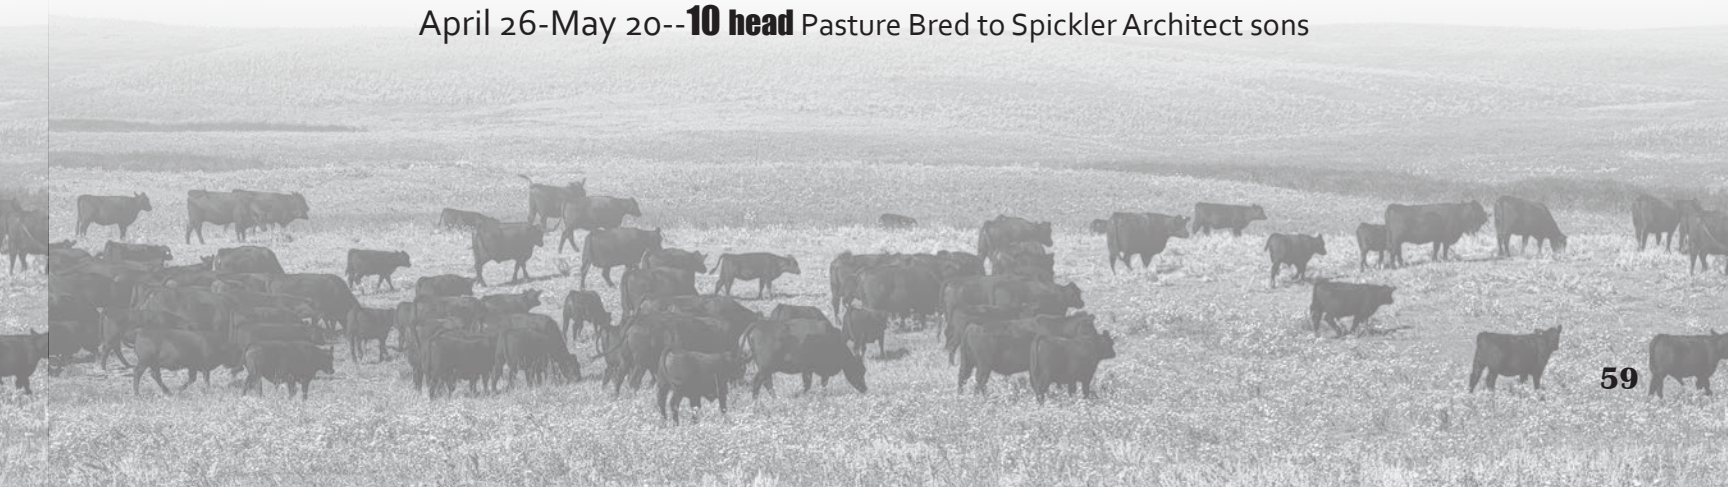

These heifers have originated from Kipp Sparrow-Mercer, ND. They are bred to make excellent cows and a number of these heifers are sired by our bulls. This group is freeze branded, bangs vaccinated, on our herd health program, and carrying no brand. They have been sorted for disposition and quality, they are ultrasounded for pregnancy and will be lot ordered by size and weight. We will provide updated spreadsheets sale day and a listing will be available on our website.

www.SpicklerRanchNorth.com when available.

BW-0.1 WW+101 YW+169 Milk+24

#19437622 SydGen Blueprint s S Whitlock 179 x Connealy Courage 25L x S Summit 956

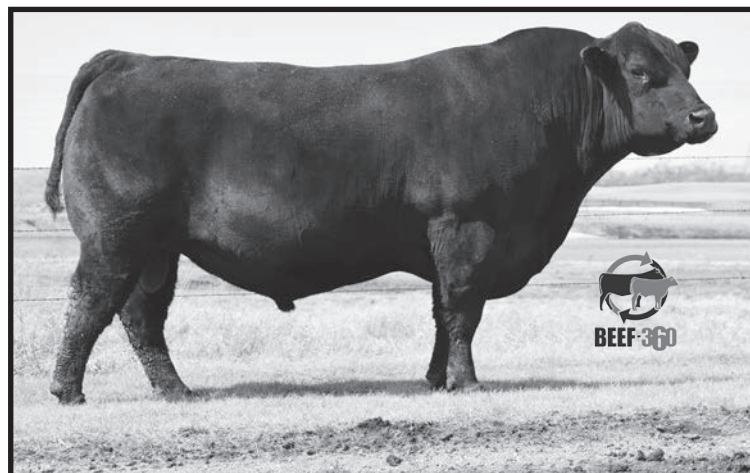

Architect is a very unique, potent sire of calving ease and performance; unparalleled by any animal raised at Spickler Ranch North. His sons are fast gaining, stout, big bodied bulls. His daughters are deep middled, broody, feminine females that I expect to be Architect's strongest asset. His maternal lineage includes 4 of 6 cows in his immediate ancestry as productive Pathfinder® cows, with his dam being our highest indexing cow. She has a tight tidy, small teated udder and currently records a WR of 3/125. The last 3 breeding seasons Architect has been our heaviest used sire. He will continue in that spot for the foreseeable future with the value Architect's progeny are adding to our operation. Look for the largest offering of his

sons November 2022

S Thrive JAS 5515

BW+0.5 WW+69 YW+126 Milk+24

#18159105 Tehama Revere x S Summit 956 x Shipwheel Chinook

In the fall of 2018 we made the decision to buy back possession and an interest in Thrive from Hall Stock Farm. His progeny are impressive. They are big bodied, thick made cattle with extra performance and carcass quality. Thrive's dam is a model Summit daughter with a tidy, small teated udder and is one of our highest indexing Pathfinder® cows. Thrive daughters have set the benchmark for mothering ability and disposition. After calving 70+ Thrive daughters over 4 years it appears that he will consistently improve disposition, while maintaining quality udders. 95 of his daughters currently record a 102 WR

S Right Time 7861

BW+3.0 WW+74 YW+118 Milk+28

#18762372 Sitz Right Time 8034 x S Chisum 6175 x Leachman Right Time

S Right Time 7861 is seeing heavy use in our program based on his strong maternal lineage; tracing 4 times to Right Time. His dam is a productive Chisum daughter and Queen Essa cow family member who records a WR of 7/102. 7861 has impeccably perfect feet, he adds scrotal to his sons and early indications are that he sires extra IMF.

Calving Ease ♦ Performance ♦ Maternal Impact

GDAR Ace 1719

BW+2.3 WW+67 YW+135 Milk+28

#20078845 GDAR All Pro 8121 x KG 5594 Traveler 3020 x GDAR New Day 5346

GDAR Ace 1719 was purchased from GDAR in MT. In my search to add fresh genetics to this herd while maintaining udder quality and maternal production I found ACE. He is an attractive, moderate, correct made bull whose dam, according to Chad Denowh, "is one of our best donor cows". Ace is seeing extensive use here both spring and fall. Around 70 calves will arrive by Ace in 2023. Owned with Gartner-Denowh Angus Ranch, MT

Thomas Confirm 9457

BW+2.8 WW+84 YW+151 Milk+28

#19715683 Baldrige Command Co36 x Connealy Black Granite x G A R Predestined

Confirm is a unique power, growth and performance herdsire purchased from Thomas Angus in Oregon, through their Galt, CA sale. Confirm sired an excellent set of bull and heifer calves this year. They are stout, heavy, and attractive. The quality of the udder of Confirm's dam coupled with the Command daughters' udder quality will make Confirm a great addition to this program as we stack tight, tidy udders with small teats for continuous generations while bringing in outcross genetics to our herd. Freys Clancy

BW+0.8 WW+75 YW+126 Milk+19

#19858487 Freys Cowboy Logic x Freys Institute 123D x M A R Midland Empire 3092

Clancy was added to this sire lineup due to his hoof quality, outcross pedigree and balanced numbers. Will and I saw his dam 10 days or so after she calved as a 3 yr old and are really impressed with her tight udder and small teats, which was the turning point for us to purchase him. Clancy sired a tremendous group of calves this year out of heifers. His sons are attractive patterned calving ease bulls. Clancy's daughters are feminine, attractive, beautiful young females that I have high expectations for. Owned with Frey Angus Ranch, ND

Class of 2023

Wyatt Roy Spickler

As the seasons come and go here at the ranch; we talk about how we will do things differently next year. We will be left with a void in those plans as we try to readjust to Wyatt leaving. However, we couldn't be more proud of him and excited for what his future holds. We appreciate your long hours in a tractor seat, pickup seat, in a saddle, and at chute-side.

Wyatt's first coaching job and Watson's last elementary BB season!

...adding livestock picturing to his resume!
