

Spring Cove Ranch

102 years 1919-2021

The same Angus cowherd, raised on the same Idaho ranch, by the same family for 102 years.

Angus Bull & Female Sale

Monday, March 8th, 2021

At Spring Cove Ranch, Bliss, Idaho 1:00 PM MDT

2019 Certified Angus Beef LLC

Seedstock Commitment to Excellence

Award Winner

Spring Cove Ranch

SALE DATE: Monday, March 8th, 2021

LUNCH SERVED at 11:30, SALE BEGINS at 1:00 PM MDT

LOCATION: Sale is held at Spring Cove Ranch, Bliss, Idaho.

Address for GPS: 269 Spring Cove Rd. , Bliss, Idaho 83314

Map & directions are on the back of this salebook and at

www.springcoveranch.com

LODGING: Amber Inn, Bliss, Id. : (208) 352-4441

Billingsly Creek Lodge, Hagerman, Id.: (208) 837-4822

Hagerman Valley Inn, Hagerman, ID: (208) 837-6196

VIDEOS : Sale cattle videos can be viewed after March 1 at www.springcoveranch.com

SALE ORDER: Cattle sell in catalog order . Buyers are invited to come to the ranch early and view the sale cattle.

DELIVERY:

- Bulls will be delivered with a 500 mile radius free of charge.
- Hauling of females is the buyers responsibility.
- Bull buyers who haul their own on sale day or the day after receive \$50 off your bull purchase. Tell the clerks when you check out.

CALVING EASE RATING:

*****5 Star bulls, double digit CED and zero or less for BEPD.

*****4 Star bulls, Top 50% CED and a BEPD of 1.0 or less.

*** 3 Star bulls, suitable for large heifers, BEPD 2.0 or less.

HEALTH & FERTILITY:

**All sale cattle have had 8 Way, 3X (birth,branding & weaning).

Vista Once two times (branding & weaning). Pink Eye vaccine and De-wormed 3X.

**Bulls were vaccinated with Fusogard for foot rot 2X.

**Bulls are freeze branded with their identity and have an EID ear tag.

**All females are calfhood vaccinated for Brucellosis.

**All bulls have passed a thorough Semen/Breeding Soundness Evaluation by Dr. Marty Bennett, DVM.

**All bulls sell with a negative Trich test or a Certificate of Virginity. Bulls selling to state requiring Trich Tests will be tested and delivered after the completion at no cost to buyers.

**All cattle have been BVD-PI3 tested negative.

**All registered cattle in the sale known to be potential carries for AM, NH, CA, D2, M1, DD, OH or OHP have been tested free or are otherwise noted.

FIRST BREEDING SEASON GUARANTEE:

- All bulls selling or \$3000 or more will be covered 50% by Spring Cove Ranch if they are injured during their first breeding season.
- Breeding season is defined as the 90 day period following the first turnout of the bulls.
- ½ of the purchase price less the salvage value, if any, will be credited to the buyer in a future sale or toward a replacement bull if one is available.
- All claims must be made by September 1st, and accompanied by a statement from a veterinarian.

TERMS AND CONDITIONS: Cattle sale under the Terms and Conditions of the American Angus Association. Except for those stated in the Terms and Conditions, there are no warranties, either expressed or implied, as to the merchantability or fitness of a particular purpose with respect to the cattle being sold in this auction. This warranties and guarantees set forth in the Terms and Conditions are in lieu of all other remedies provided therein shall be the sole and exclusive remedy of the buyer (or any party claiming through the buyer) or any breach or warranty or guarantee therein provided and all other obligations available at the clerks office on sale day. **LIABILITY:** All persons attending the sale at Spring Cove Ranch do so at their own risk. Spring Cove Ranch assumes no liability, legal or otherwise for any accidents that might occur on or about the premises. **RETAINED INTEREST:** We are retaining 1/3 revenue sharing interest in all the bulls. Possession and salvage value is 100% the buyers's unless otherwise stated. If we chose to collect semen, it will be done at the buyer's convenience and our expense. All announcements from the auction block will take precedence over statements in the sale books.

ICA MEMBERS DISCOUNT: Buyers who are member of the Idaho Cattle Association will receive a \$50 discount on each bull purchased costing \$3000 or more. ICA representatives will be at the sale to sign up new members and take membership renewals. Make sure and let the clerks know if you are an ICA member.

CAB Targeting the Brand Logo : You will see the "Targeting the Brand" CAB logo on many lots throughout the sale book. **To qualify animals** must meet the new higher standard of a Marbling EPD of at least +.65 and at least +55 for \$Grid . See page 1 for more information.

ANGUS MEDIA Visit the Angus Journal Web site, www.angus.org and view this sale book online. *References: American Angus Association®, AHIR®, AngusSource®, CAB®, Pathfinder®.* EPDs contained in the original printed version of this sale book were current as of the printing date. Digital versions of this sale book online at angus.org will have EPDs updated every Friday. Any PDFs downloaded from the website will contain EPDs current as of the date of the download.

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase pre-weaning growth through additional weaning weight and maternal milk with expenses adjustment for mature size and maternal milk.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

To our Customers and Friends,

We are proud to present to you our culmination of 102 years of progressive Angus cattle breeding. Our ranch was grubbed out of sagebrush, along the Oregon Trail in Idaho in the early 1900's by Grandfather A.H. Butler who settled this dry, rocky, 8 inch annual rainfall desert in 160 acre Homestead Act parcels. He raised, sold and showed Percheron draft horses and registered Angus cattle across the West and his descendants have continuously raised registered Angus cattle on that same land since 1919. Each breeding decision beginning with grandfather, father and now us and our children and grandchildren has been made with the intention of improvement. Improvement of fertility, improvement of structure, improvement of udder quality & teat size and improvement of performance has always been our goal. The convenience traits of the Angus breed that my grandfather recognized in the first year he owned Angus cattle have always been of utmost importance. Traits that keep us all in business like calving ease, mothering ability, range-ability and moderate mature cow size. Stacy and I have deliberately tried to add marbling genetics to our cattle since the mid 1980's and after the first Beef Quality Assurance Audit came out in the early '90's we put more emphasis on it. We do all this while managing the herd much like commercial cattle ranchers do in our region. We don't try to maximize size or performance. We believe cattle need to fit the environment they run in and ours is arid, rocky and in some places steep making form and structure imperative.

Art & Stacy, Josh & Denise & Dale

The Angus cow has provided a living for this family for 102 years and she continues to amaze us with her tenacity and endurance. Maternal instincts and calves that get up and go are imperative for survival in our western range outfit.

We feel it's imperative to personally evaluate each young sire purchased and AI sires used. This insures they meet our criteria for phenotype and possess the genetics to fit our western environment. We strive to improve form, function, durability and profitability with each and every mating decision. We proudly produce Angus bulls for commercial ranchers who need functional genetics that excel in carcass merit, calving-ease and maternal values. It's imperative that the genetics we introduce to our herd, and to your herd, meet strict criteria for phenotype and possess the genetics to fit our western environment. The bulls and heifers in this sale, along with their dams were raised "outside" and under the same western range conditions that many of you deal with. The bulls are developed at Spring Cove on a roughage diet with a minimum amount of grain. We strive for maximum fertility and longevity not maximum performance. This allows adequate growth yet keeps the bulls sound and functional and able to work and last in rough environments. We use all available tools to make our breeding decisions; DNA, performance, visual trait appraisal and EPD's but in the end **our goal is to make cows that keep us all in business.** We avoid extremes and look for balance.

AngusGS genomic DNA tests have been done on all of the animals in this offering and on every calf born at Spring Cove and Triple L for the past 6 years. We've accumulated generations of data on over 4000 head and have contributed to the greater AAA database. This genomic information and performance data has been incorporated into the EPD's and increases their accuracy and reliability. We've done our job of getting the performance data reported in the proper contemporary groups and the DNA testing done so parentage is verified and the EPD's in this book are a real-time, current expression of the animals potential. The genomic data is like having the accuracy equivalent of 10 to 15 progeny from each individual; more than a lifetime of a cow's production. We use it as a tool in our attempt to increase the predictability of the genetics we sell.

Chad, Sarah, Helen & Isabelle Helmick
Spring Cove Ranch & Helmick Ranches

Taylor, Brennon, Suzette & Randy Lancaster
Triple L Angus

Josh, Denise, Wyatt, Will & Harvey Mavencamp
Spring Cove Ranch & Mavencamp Livestock

Our 2021 offering is strong throughout the book. The many of the sale cattle are out of herd bulls bred and or owned by Spring Cove Ranch and Triple L Angus. We have a great selection of heifer bulls, growth bulls, marbling bulls, and bulls that will leave behind daughters who will thrive in harsh environments and most of the bulls combine all these traits. The registered and commercial females offered this year are from the heart of our very best cow families.

All the bulls in the sale have been fertility tested, trich tagged and examined by Dr. Marty Bennett, DVM and have also tested negative for BVD-PI. Scrotal measurements will be available on a supplement sheet on sale day. Please note the "Calving Ease" score for the Angus bulls, printed next to the name of each qualifying animal. Calving ease bulls have been given a 3 to 5 star rank. "5 Star" bulls are considered competitive with a Longhorn without sacrificing growth, color or horns. "4 Star" bulls still possess exceptional calving ease potential, and "3 Star" bulls are still suitable for heifers with discretion. These ratings are based on genetics, genomics and our knowledge of the cow families and our assessment of the data for the individual, the dam and the sire.

You will notice that we make many references in this catalog to \$M and \$C in the footnotes. The percentage rank on all traits can be found at www.angus.org by looking up the registration number.

\$M is a combined index that is more complete than the old \$W. It includes the four traits that were in \$W plus CED, CEM, Docility, HP and both foot score EPD's. It is a more accurate maternal profitability index.

The new \$C or combined Index has all the EPD's that were in the terminal \$B index plus all the other EPD except birth weight. (See chart on page 1). I feel it is better to use \$C over \$B because it has the carcass and feeding values included but also has some influence on a lesser degree from maternal values that make Angus cows great. By using \$C you can steadily make progress in economic factors such as weaning wt, yearling wt, marbling, carcass wt and carcass value yet not ignore maternal values such as calving ease, fertility, cow size and foot quality.

You will also see notice that I referred to PAP EPD's in some footnotes. This new EPD is a tool to increase the environmental adaptability of cattle living at higher altitude. I referenced it on bulls that are in the top 40% of the breed +.76 or less. We did this because our elevation is not high enough to test, yet we have many customers who run their herds at higher altitude. This EPD will get more accurate as more data is submitted. You can find the PAP EPD's and all EPD's, percentiles and \$Values on every lot by entering their registration numbers at www.angus.org.

Lastly, we continue to provide assistance to our customers in marketing their calves and the Angus Association is making concentrated efforts to have commercial programs available to assist also. Ginette Gottswiller, Director of Commercial Programs for the American Angus Association will be at the sale to answer your questions about commercial programs available and Angus Link in particular.

We want to thank all of you for taking the time from your busy schedules to join us on sale day. Thanks to our returning customers who have kept us going through the years and a big thanks to all the folks that help us get ready for the sale. We'd also like to congratulate long time Spring Cove customer, David Rutan and his family of Morgan Ranches, Jordan Valley, Oregon for being selected as the 2020 Certified Angus Beef Commercial Commitment to Excellence Award.

Please feel free to call us if you have any questions about the sale cattle. Videos will be posted on our website after March 1st.

Regards to the Bunch, *Art and Stacy Butler*

SPRING COVE RANCH HERD SIRES

CROSSBOW is sired by the balanced trait, Sire Alliance leader "Broken Bow" and was the high selling bull at \$20,000 in our 2015 sale going to ABS Global. His pedigree is an efficient blend of calving ease, growth and maternal and is complimented by his very correct structure, big top and extra rear muscle expression. Crossbow ranks in the top 1% CED, top 10% BW & top 10% \$B, top 10% Marbling & 20% \$C. CROSSBOW progeny will lower birth weight, improve carcass wt, marbling and \$B while maintaining growth and maternal efficiency. His daughters are easy fleshing, moderate, maternal with excellent udder quality and look much like the "702" daughters. Crossbow is seeing widespread use in commercial heifer projects due to his ease of calving and vigorous calves. Progeny excel at high elevations. 6 sons sell and many grandsons. CROSSBOW semen is available through ABS Global. Owned by Spring Cove Ranch & ABS Global.

"Compound" a son of "Crossbow" was purchased at our 2018 sale by Select Sires for \$35,000. With his double digit CED and excellent growth and marbling EPDs, he's an elite calving ease sire with a lot of performance and end-product value. He was PAP tested by Select Sires while at Rocky Mountain Sire Services in Bennett, Colorado and posted a PAP of 37. His outcross pedigree brings a lot to the table from every angle - maternal advantage, top growth in WW and YW and several other traits that rank in the top 25 percent and better. Compound's dam records 3 calves at 88 birth ratio, 3@112 WR, & 3@111 YR. Spring Cove Liza 913, sired by "Compound" sold in our 2019 Fall Online Heifer Sale to Pine View Angus in Iowa for \$21,000. 14 Compound sons and 3 daughters sell in this offering. Make sure and find his maternal brothers by Charm: Lots 46, 47 & 48. COMPOUND semen available through Select Sires.

Josh and Denise chose "Comrade 49" in the 2015 Rishel Angus Sale offering in North Platte, Nebraska where he was the high selling bull at \$34,000. His unique combination of muscle, phenotype and calving ease caught the eye of many astute cattlemen. "49" is pictured here in his working clothes after coming out of the breeding pasture. He's seen 6 years of heavy, natural use breeding cows and heifers on our rugged, dry, Idaho rangelands and he's as sound and functional as the day he arrived here from Nebraska. His moderate, gentle, muscular, trouble free progeny exemplify the convenience traits of the Angus breed and his balanced EPD profile is highlighted by double digit CED, negative birth weight, positive \$EN & top 3% \$M with above breed average Marbling, \$G and \$C. His sons produce calves that come unassisted and have excellent vigor. If you're looking for a sleep-at-night heifer bull to use in a western range operation, take a close look at the 14 "Comrade 49" sons. Owned by Spring Cove Ranch, Triple L Angus & Rishel Angus.

Stacy found "702" in the Canyon Creek Angus sale in Wyoming and he has made a lasting impact on the Spring Cove herd in the last 11 years and we will use him again this year. He adds calving ease with muscle without giving up carcass quality & fertility. Emblazon 702 sons will add pounds to your calf crop while keeping the replacement females easy keeping and moderate. His daughters have perfect udders and are designed to thrive on our western range. He is featured throughout this sale book as a sire or a maternal grandsire. Note that 702 daughters produced the three outstanding Spring Cove herd sires, CROSSBOW, RENO and PAYGRADE. CCA Emblazon 702 continues to gain popularity across the nation as commercial and registered producers alike calve his daughters. He is represented in this offering by his fabulous daughters, granddaughters and grandsons. Semen available through Spring Cove Ranch. Owned by Spring Cove Ranch & Triple Angus.

We purchased a semen interest in BUB's Southern Charm AA31 in January in 2018 after seeing his progeny at the bull sale in Denver. A phenotypic favorite of visitors to ORigen, this powerful sire was the leading sales bull at ORigen for 2018 & 2019. Produced by a dam whose first four natural calves recorded an average weaning ratio of 106, his grand dam has five calves with an average weaning ratio of 113, and Southern Charm descends from a line of females with quality udder structure and a high level of fertility that have a slick hair coat, good feet, ease of fleshing, and fecund tolerance. The females that produced him are very efficient cattle. As his Scrotal Circumference EPD predicts, Southern Charm collects and freezes extremely well and produces high quality semen that has yielded a far above average conception rate, and his sons have semen checked very well at 12 to 14 months. Charm is a proven Marbling and Maternal sire who now has 5165 weaned progeny on record. He ranks in the top 15% \$M and top 20% of the breed for \$C. 20 Southern Charm sons sell in this offering. Owned with BUBS Ranch of Koshkonong, MO and Sitz Angus Ranch of Dillon, Montana and Herbst Angus, Falls City, NE. Semen available a Origen.

"SONNY" joined our herd bull battery in 2018 as an outcross calving ease sire. Josh found him on a trip to BUB Ranch and was impressed with his solid, muscular phenotype, good, hard feet and structural correctness. His first calf crop at SCR came unassisted and calves are vigorous and get up and go. "Sonny" is a three-quarter brother to the 2018 National Western Grand Champion Sale Bull BUBS Southern Joe, and he was produced by a Pathfinder Dam that combines the immortal maternal power of the Pathfinder Sires H A Image Maker 0415 and SydGen CC & 7. Sonny ranks in the top 5% of the breed for \$M and his daughters are ideal sized, bold ribbed and have excellent udders and small teat size. Look to "Sonny" sons to breed virgin heifers and to sire replacement heifers with the maternal heritage for both productivity and longevity. Owned by Spring Cove Ranch, BUB Ranch and Triple L Angus. Semen available through ORigen.

We purchased Basin Bonus 4345 at the 2015 Montana Performance Breeders Sale at Midland Bull Test and he has bred cows at Spring Cove Ranch and Triple L Angus for 6 seasons. Bonus is a moderate birth weight sire with exceptional length of body, along with the deep rib and easy fleshing phenotype of his powerful sire, BASIN PAYWEIGHT 1682. He offers a similar EPD profile to his famous sire, with more frame and higher EPDs for WW, YW, marbling and ribeye. Bonus ranks in the top 20% of the breed for marbling, CW and \$C. He is represented throughout this catalog by his daughters in production. 10 Bonus sons and 8 daughters sell in this offering. Semen on Bonus is available through Origen. Owned by Spring Cove Ranch and Basin Angus

"Longevity" defines our commitment to functional, convenient Angus traits that provide our customers genetics that meet high standards for performance, carcass, phenotype and maternal traits. He was our \$50,000 choice at Sitz Angus in Dillon, Montana in their 2013 offering. His sons are muscular and big nuted and his proven daughters are easy-keeping, ideal Angus cows with beautiful udder conformation. "Longevity" has spent 6 summers breeding cows "outside" on our southern Idaho summer rangelands. His progeny performance has earned him the rank in the top 20% of the breed for Marbling and \$M as well as the top 25% for \$C. 2 Longevity sons and many grandsons sell. Semen is available at ORigen. Owned by Spring Cove Ranch, Triple L Angus and Sitz Angus Ranch

JVC Cavalry has been described as one of the most athletic performance bulls in the business. He offers the genetic performance you need in a big BW to YW spread. His progeny have been well received across the country because of the stoutness, fleshing ability, structural correctness and broody design. Use Cavalry sons to add power, dimension and fleshing ability in one generation. Many grandsons sell as sons of TD Brigade 714, Cavalry 737 and Cavalry 751.

RENO was a high selling "Broken Bow" son in our 2015 bull sale going to David Rutan, Morgan Ranches of Jordan Valley, Oregon. He was used in their commercial herd AI and natural and then returned to Spring Cove Ranch for pasture service as a yearling and a 2 yr old. ST Genetics purchased RENO from Morgan Ranches and due to his untimely death there is limited semen available. Reno's flawless phenotype, powerful maternal pedigree and EPD profile are elite and have caught the attention of performance breeders across the nation. The fabulous Spring Cove Liza cow family who produced Reno traces to cows born at Spring Cove Ranch in the 1920's and his dam Spring Cove Liza 021 is now a donor at Baldrige Bros Angus in North Plate, NE and his 14 year old grand dam, Liza 721 is still in production at Spring Cove. He ranks in the top 2% of the breed for WW, top 10% for YW, and top 3% \$M. RENO progeny will add growth and carcass quality while maintaining excellent maternal efficiency. Reno has been used widely and now has nearly 1200 progeny on record. His EPD profile continues improve. Recent sales of Reno progeny include 1/2 interest in a son at Graber Farms in Indiana to ST Genetics & group for \$225,000, 1/2 interest in a Reno daughter sold at Crazy K Ranch to Spruce Mountain for \$90,000 and a \$65,000 Reno daughter sold at Spruce Mountain to Vintage Angus. 1 Reno son sells in this book and many grandsons & granddaughters.

Sitz Pioneer 566B sire of Herd Unit H

YOU'VE DONE THE WORK.

Get paid for it.

You've invested in good genetics.
You've kept all the records.

AngusLinkSM combines USDA Process Verified Programs with a Genetic Merit Scorecard that gives buyers confidence in your calves. From age and source verification to cattle care and handling, you choose which programs make the most sense for you.

Group Age & Source: Verifies the group age and source of the cattle

Angus-Sired Genetics: Verifies calves are sired by 100% registered Angus bulls

Non-Hormone Treated Cattle: Verifies cattle have never received hormones

NeverEver³: No antibiotics, no hormones, no animal by-products ever

Cattle Care & Handling: Documents proper management, demonstrates quality commitment

Calf Management: Documents preventative health program

Genetic Merit ScorecardSM: Measures the genetic merit of calves for feedlot performance and carcass merit.

**Optional, not part of the PVP claims*

Easy and affordable, our customer service representatives walk you through the process.
