Spring Cove Ranch

Sale Details

SALE DATE: Monday, March 14th, 2022

LUNCH SERVED at 11:30, SALE BEGINS at 1:00 PM MDT

LOCATION: Sale is held at Spring Cove Ranch, Bliss, Idaho.

Address for GPS: 269 Spring Cove Rd. , Bliss, Idaho 83314

Map & directions are on the back of this salebook and at

www.springcoveranch.com

LODGING: Amber Inn, Bliss, Id. : (208) 352-4441

Billingsly Creek Lodge, Hagerman, Id.: (208) 837-4822

Hagerman Valley Inn, Hagerman, ID: (208) 837-6196

VIDEOS : Sale cattle videos can be viewed after March 1 at www.springcoveranch.com

SALE ORDER: Cattle sell in catalog order . Buyers are invited to come to the ranch early and view the sale cattle.

DELIVERY:

- Bulls will be delivered with a 500 mile radius free of charge.
- Hauling of females is the buyers responsibility.
- **Bull buyers who haul their own on sale day or the day after receive \$50 off your bull purchase. Tell the clerks when you check out.**

FEED ARRANGEMENTS FOR BULLS can be made at minimal cost to the buyer if needed. Talk with Art or Josh ahead of the sale.

CALVING EASE RATING:

*****5 Star bulls, double digit CED and zero or less for BEPD.

*****4 Star bulls, Top 50% CED and a BEPD of 1.0 or less.

*** 3 Star bulls, suitable for large heifers, BEPD 2.0 or less.

HEALTH & FERTILITY:

**All sale cattle have had 8 Way, 3X (birth,branding & weaning). Vista Once two times(branding & weaning). Pink Eye vaccine and De-wormed 3X.

**Bulls were vaccinated with Fusogard for foot rot 2X.

**Bulls are freeze branded with their identity and have an EID ear tag.

**All females are calfhooed vaccinated for Brucellosis.

**All bulls have passed a thorough Semen/Breeding Soundness Evaluation by Dr. Marty Bennett, DVM.

**All bulls sell with a negative Trich test or a Certificate of Virginity. Bulls selling to state requiring Trich Tests will be tested and delivered after the completion at no cost to buyers.

**All cattle have been BVD-PI3 tested negative.

**All registered cattle in the sale known to be potential carries for AM, NH, CA, D2, M1, DD, OH or OHP have been tested free or are otherwise noted.

FIRST BREEDING SEASON GUARANTEE:

- All bulls selling or \$3000 or more will be covered 50% by Spring Cove Ranch if they are injured during their first breeding season.
- Breeding season is defined as the 90 day period following the first turnout of the bulls.
- ½ of the purchase price less the salvage value, if any, will be credited to the buyer in a future sale or toward a replacement bull if one is available.
- All claims must be made by September 1st, and accompanied by a statement from a veterinarian.

TERMS AND CONDITIONS: Cattle sale under the Terms and Conditions of the American Angus Association. Except for those stated in the Terms and Conditions, there are no warranties, either expressed or implied, as to the merchantability or fitness of a particular purpose with respect to the cattle being sold in this auction. This warranties and guarantees set forth in the Terms and Conditions are in lieu of all other remedies provided therein shall be the sole and exclusive remedy of the buyer (or any party claiming through the buyer) or any breach or warranty or guarantee therein provided and all other obligations available at the clerks office on sale day. **LIABILITY:** All persons attending the sale at Spring Cove Ranch do so at their own risk. Spring Cove Ranch assumes no liability, legal or otherwise for any accidents that might occur on or about the premises. **RETAINED INTEREST:** We are retaining 1/3 revenue sharing interest in all the bulls. Possession and salvage value is 100% the buyers's unless otherwise stated. If we chose to collect semen, it will be done at the buyer's convenience and our expense. All announcements from the auction block will take precedence over statements in the sale books.

ICA MEMBERS DISCOUNT: Buyers who are member of the Idaho Cattle Association will receive a \$50 discount on each bull purchased costing \$3000 or more. ICA representatives will be at the sale to sign up new members and take membership renewals. Make sure and let the clerks know if you are an ICA member.

ANGUSMEDIA EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at www.angus.org and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink™, CAB®, Pathfinder®.

Dollar value indexes, or **\$Values**, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase pre-weaning growth through additional weaning weight and maternal milk with expenses adjustment for mature size and maternal milk.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Combined Value (\$C), an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and eventually sell them on a quality-based carcass merit grid.

ABOVE AVERAGE GOALS REQUIRE TARGETED BULLS

Aim High

The Targeting the Brand™ logo highlights registered Angus bulls with greater genetic potential to produce calves that meet the most challenging specifications of the *Certified Angus Beef®* brand.

Only 1 in 4 non-parent Angus bulls qualify.

Minimum Genetic Requirements

Marbling EPD (Marb)	+0.65
Dollar Grid Carcass Index (\$G)	+55.0

For more information on Targeting the Brand™ visit CABcattle.com.

Welcome to the Sale.

To our Customers and Friends,

We are proud to present to you our culmination of 103 years of progressive Angus cattle breeding. Our ranch was grubbed out of sagebrush, along the Oregon Trail in Idaho in the early 1900's by Grandfather A.H. Butler who settled this dry, rocky, 8 inch annual rainfall desert in 160 acre Homestead Act parcels. He raised, sold and showed Percheron draft horses and registered Angus cattle across the West and his descendants have continuously raised registered Angus cattle on that same land since 1919.

AH Butler with herd bull at SCR in the early 1950's

1920, Art's grandfather, AH Butler plowing the field north of the house we live in today. Art's Dad, Doran Butler, on riding on Jumbo's back.

Each breeding decision beginning with grandfather, father and now us and our children and grandchildren has been made with the intention of improvement. Improvement of fertility, improvement of structure, improvement of udder quality & teat size and improvement of performance has always been our goal. The convenience traits of the Angus breed that my grandfather recognized in the first year he owned Angus cattle have always been of utmost importance. Traits that keep us all in business like calving ease, mothering ability, range-ability and moderate mature cow size.

Stacy and I have deliberately tried to add marbling genetics to our cattle since the mid 1980's and after the first Beef Quality Assurance Audit came out in the early '90's we put more emphasis on it. We do all this while managing the herd much like commercial cattle ranchers do in our region. We don't try to maximize size or performance. We believe cattle need to fit the environment they run in and ours is arid, rocky and in some places steep making form and structure imperative.

The Angus cow has provided a living for this family for 103 years and she continues to amaze us with her tenacity and endurance. Maternal instincts and calves that get up and go are imperative for survival in our western range outfit.

We feel it's imperative to personally evaluate each young sire purchased and AI sires used. This insures they meet our criteria for phenotype and possess the genetics to fit our western environment. We strive to improve form, function, durability and profitability with each and every mating decision.

We proudly produce Angus bulls for commercial ranchers who need functional genetics that excel in carcass merit, calving-ease and maternal values. It's imperative that the genetics we introduce to our herd, and to your herd, meet strict criteria for phenotype and possess the genetics to fit our western environment.

The bulls and heifers in this sale, along with their dams were raised "outside" and under the same western range conditions that many of you deal with.

The bulls are developed at Spring Cove Ranch on a roughage diet with a minimum amount of grain. We strive for maximum fertility and longevity not maximum performance. This allows adequate growth yet keeps the bulls sound and functional and able to work and last in rough environments.

We use all available tools to make our breeding decisions; DNA, performance, visual trait appraisal and EPD's but in the end **our goal is to make cows that keep us all in business.** We avoid extremes and look for balance.

Chad, Sarah, Helen & Isabelle Helmick
Spring Cove Ranch & Helmick Ranches

Brennon, Suzette & Randy Lancaster and
Kyle & Taylor Nicholson Triple L Angus

Josh, Wyatt, Harvey, Will & Denise Mavencamp
Spring Cove Ranch & Mavencamp Livestock

AngusGS genomic DNA tests have been done on all of the animals in this offering and on every calf born at Spring Cove and Triple L for the past 7 years. We've accumulated generations of data on over 4800 head and have contributed to the greater AAA database. This genomic information and performance data has been incorporated into the EPD's and increases their accuracy and reliability. We've done our job of getting the performance data reported in the proper contemporary groups and the DNA testing done so parentage is verified and the EPD's in this book are a real-time, current expression of the animals potential. The genomic data is like having the accuracy equivalent of 10 to 15 progeny from each individual; more than a lifetime of a cow's production. We use it as a tool in our attempt to increase the predictability of the genetics we sell.

Our 2022 offering is strong throughout the book. We have a great selection of heifer bulls, growth bulls, marbling bulls, and bulls that will leave behind daughters who will thrive in harsh environments and most of the bulls combine all these traits. You will find a bull for every budget. The registered and commercial females offered this year are from the heart of our very best cow families.

All the bulls in the sale have been fertility tested, trich tagged and examined by Dr. Marty Bennett, DVM and have also tested negative for BVD-PI. Scrotal measurements will be available on a supplement sheet on sale day. Please note the "Calving Ease" score for the Angus bulls, printed next to the name of each qualifying animal. Calving ease bulls have been given a 3 to 5 star rank. "5 Star" bulls are considered competitive with a Longhorn without sacrificing growth, color or horns. "4 Star" bulls still possess exceptional calving ease potential, and "3 Star" bulls are still suitable for heifers with discretion. These ratings are based on genetics, genomics and our knowledge of the cow families and our assessment of the data for the individual, the dam and the sire.

You will see notice that we referred to PAP EPD's in some footnotes. This new EPD is a tool to increase the environmental adaptability of cattle living at higher altitude. We referenced it on bulls that are in the top 50% of the breed or less. We did this because our elevation is not high enough to test, yet we have many customers who run their herds at higher altitude. This EPD will get more accurate as more data is submitted. You can find the PAP EPD's and all EPD's, percentiles and \$Values on every lot by entering their registration numbers at www.angus.org.

Lastly, we continue to provide assistance to our customers in marketing their calves and the Angus Association is making concentrated efforts to have commercial programs available to assist also. Ginette Gottswiller, Director of Commercial Programs for the American Angus Association will be at the sale to answer your questions about commercial programs available and Angus Link in particular.

Please feel free to call us if you have any questions about the sale cattle. Videos will be posted on our website after March 1st.

Regards to the Bunch, *Art and Stacy Butler*

ACCOMPLISHMENT was a cowboy favorite and the high seller at the 2019 Sitz Sale. He combines the eye appealing calving ease and carcass merit of Achievement with the powerful muscle mass of Resource and is a big bodied, powerfully constructed bull that excels for thickness and volume. We added him to our program as an outcross and admired his sound structure, depth, good feet and his 35 PAP score. He ranks in the top 15% of the breed for WW, YW, and Marbling and in the top 10% for \$M. We appreciate the consistency of phenotype in his calves. They are structurally correct, with great bone and muscle and the heifers are feminine. We liked them so much as babies that we purchased an Accomplishment son at the 2021 Sitz Sale, and named him Sitz Feat 729H. You will see "Feat" calves in our 2022 sale.

RESILIENT was the record-setting \$165,000 bull of the Fall 2019 SITZ Angus Ranch sale at Harrison, Montana. As his dam's first calf, Resilient had a weaning ratio of 121 and an adjusted yearling weight of 1,530 pounds for a yearling ratio of 117. His PAP score of 37 at 18 months of age contributes to an elite PAP score EPD and makes him a great choice for producing cattle that will work at altitude. He offers an outcross pedigree for many of the popular and high usage sire lines in the industry. We introduced him to the Spring Cove herd as a heifer AI sire, and he proved to be a good one. He ranks in the top 4% of the breed for \$M and the top 3% for \$C.

COMPOUND, a son of Spring Cove Crossbow, was purchased at our 2018 sale by Select Sires for \$35,000. With his double digit CED and excellent growth and marbling EPDs, he's an elite calving ease sire with a lot of performance and end-product value. Compound's full sister produced the LOT ONE bull in this sale. He has seen heavy use in commercial AI programs where sure-fire calving ease and added marbling are keys to success. We have been impressed with the growth his calves exhibit, and it has exceeded our expectations. Compound was PAP tested by Select Sires while at Rocky Mountain Sire Services in Bennett, Colorado and posted a PAP of 37. His outcross pedigree brings a lot to the table from every angle - maternal advantage, top growth in WW and YW and several other traits that rank in the top 25 percent and better. Our Compound daughters in production are feminine, moderate, easy-fleshing with nice udders and did a super job with their first calves who sell in this offering.

We purchased a semen interest in BUBS Southern Charm AA31 in January in 2018 after seeing his progeny at the bull sale in Denver. A phenotypic favorite of visitors to ORigen, this powerful sire was the leading sales bull at ORigen for 2018 & 2019. Produced by a dam whose first four natural calves recorded an average weaning ratio of 106, his granddam has five calves with an average weaning ratio of 113, and Southern Charm descends from a line of females with quality udder structure and a high level of fertility that have a slick hair coat, good feet, ease of fleshing, and fescue tolerance. The females that produced him are very efficient cattle. As his Scrotal Circumference EPD predicts, Southern Charm collects and freezes extremely well and produces high quality semen that has yielded a far above average conception rate, and his sons have semen checked very well at 12 to 14 months. Charm is a proven Marbling and Maternal sire.

TIGER was the \$29,000 top-selling bull of the 2019 TD Angus Bull Sale at North Platte, Nebraska. His sire Spring Cove TL Cat D13 is a son of Basin Bonus out of Randy's great donor TL Ruby 4143. Tiger is a maternal brother to JVC Cavalry V3266. His calves have outstanding phenotype, keep birth weights moderate and should work well under our western range conditions.

WOODROW is a maternal brother to BUBS Southern Charm AA31 out of Spring Cove Reno 4021. We purchased him from Mahan Angus at the NWSS Bull Sale in 2020. He has been used as pasture sire in both our spring and fall herds for two seasons now, and we really like the shape, style, muscle and performance of his calves. He's a breeding bull that has great feet and legs. Woodrow's first calves sell in this offering. He ranks in the top 1% of the breed for \$M, top 2% for WW, and top 10% for YW and \$C.

COLONEL is the record setting \$580,000 bull brings a complete outside the box pedigree to the table loaded with a never seen before muscle pattern. His deceased sire opens the book up for EPD excellence across the board with out-cross mating flexibility. He sets himself apart from most heavy muscled bulls in his athletic stride and comfort in his skeleton. Foot soundness and correct shape and depth at his foundation will carry this bull's massive muscle with ease. His uncanny personality and superior docility is an added bonus that can't be overlooked.

RENO was a high-selling "Broken Bow" son in our 2015 bull sale going to David Rutan, Morgan Ranches of Jordan Valley, Oregon. He was used in their commercial herd AI, and natural and then returned to Spring Cove Ranch for pasture service as a yearling and a 2-year-old. ST Genetics purchased RENO from Morgan Ranches and, due to his untimely death, there is limited semen available. Reno's flawless phenotype, powerful maternal pedigree and EPD profile are elite and have caught the attention of performance breeders across the nation. The fabulous Spring Cove Liza cow family who produced Reno traces to cows born at Spring Cove Ranch in the 1920s, and his dam Spring Cove Liza 021 is now a donor at Baldrige Bros Angus in North Platte, NE. His 14-year-old granddam, Liza 721, is still in production at Spring Cove. He ranks in the top 4% of the breed for WW, top 10% for YW, and top 1% \$M. RENO progeny will add growth and carcass quality while maintaining excellent maternal efficiency.

YEARLING BULLS

CCA EMBLAZON 702 - SIRE OF LOTS 106-111.

CCA Emblazon 702

Stacy found "702" in the Canyon Creek Angus sale in Wyoming and he has made a lasting impact on the Spring Cove herd in the last 13 years and we will use him again this year. He adds calving ease with muscle without giving up carcass quality & fertility. Emblazon 702 sons will add pounds to your calf crop while keeping the replacement females easy keeping and moderate. His daughters have perfect udders and are designed to thrive on our western range. He is featured throughout this catalog as a sire or a maternal grand sire. Note that 702 daughters produced the three outstanding Spring Cove herd sires, CROSSBOW, RENO and PAYGRADE. 7 Sons of 702 sell as lots 76, 106-111. Semen available through Spring Cove Ranch. Owned by Spring Cove Ranch & Triple Angus.
